

## ICAO Action

Reference is made to Annex 13 — *Aircraft Accident and Incident Investigation*, paragraph 6.9, which provides that “A State conducting investigations of accidents or incidents shall address, when appropriate, any safety recommendations arising out of its investigations in a dated transmittal correspondence to the accident investigation authorities of other State(s) concerned and, when ICAO documents are involved, to ICAO.”

The aforementioned safety recommendation does not involve ICAO documents; thus, ICAO should not be the appropriate body to take action related to the safety recommendation. It is suggested that this matter be considered to be progressed with the assistance of the Civil Aviation Authority of the relevant State of Manufacturer.
