

ICAO Action

ICAO *Training Manual*, Part E-1 — *Cabin Attendants' Safety Training Manual* (Doc 7192) contains general guidance regarding carry-on luggage during boarding but does not contain sufficient guidance to cabin crew regarding passengers who gather and take carry-on baggage during an emergency evacuation.

ICAO will examine this issue in consultation with the existing Informal Regulatory and Industry Cabin Safety Groups in order to incorporate relevant guidance in the third edition of Doc 7192, Part E-1, envisaged to be published in 2013.
