

## ICAO Action

Doc 9625, *Manual of Criteria for the Qualification of Flight Simulation Training Devices* is amended as necessary and ICAO will task the International Pilot Training Consortium (Training Devices Work Stream) with studying the introduction of image recorders as part of the instructor operating station. It is noted, however, that image recorders have been installed in most full-flight simulators.

*Note.— The International Pilot Training Consortium was created to improve the safety, quality and efficiency of commercial aviation by developing international agreement on a common set of pilot training, instruction and evaluation standards and processes for the benefit of the industry worldwide. The founding partners are IATA, ICAO, IFALPA and the RAeS.*
