

## **ICAO Action**

ICAO has received several recommendations to develop provisions for airborne image recorders and the Flight Recorder Panel has proposed amendments to Annex 6 for the carriage of image recorders in large passenger aeroplanes. However, the Air Navigation Commission (ANC) had some concerns regarding due protection of data obtained from image recorders following an accident. As a consequence, the ANC deferred the discussion of the proposals until after the conclusion of the work of the Safety Information Protection Task Force, which is envisaged for early 2013.
