

## **Safety Recommendation**

### **Safety recommendation 7.2.3 a)**

Revise the Standards related to the issuance of NOTAMs in such a way that air navigation service providers promptly issue the NOTAMs in case of any change or restriction imposed in the provision of services due to potentially hazardous military activities or civil-military cooperation considerations independently of the operational application, in a format that these NOTAMs could indicate that the change has been made due to security or military considerations.
