

Safety Recommendation

Safety recommendation 7.2.3 e)

Given that more clarity of the regulations relating to switching on the CVR, in such a way that it ensures the recording of the cockpit voices during checks, technical and operational conversations, and decision making, would be beneficial for safety and safety studies related to cockpit conversations., ICAO should revise and clarify the provisions in Annex 6 – *Operation of Aircraft* and associated guidance material related to switching on the cockpit voice recorder (CVR).
