Subject: The safety recommendation from CAAC to ICAO in the Aircraft Accident Investigation Report on ground fire accident, B777-200LR with registration ET-ARH of Ethiopian Airlines on 22 July, 2020 (Local Time) at PVG, China.

Dear sir or madam :

Please find and acknowledge the safety recommendation from CAAC to ICAO in the aircraft accident investigation report on ground fire accident, B777-200LR with registration ET-ARH of Ethiopian Airlines on 22 July, 2020 (Local Time) at PVG, China.

The following are safety recommendation to ICAO:

The global COVID-19 pandemic is not end yet. It has strong market demand for ClO₂ disinfection products. Further research is suggested to detail the requirements on different contents of ClO₂ disinfection products on air transportation, and add the relevant items into 《Technical Instructions for the Safe Transport of Dangerous Goods by Air》 (Doc 9284) for safer air transportation.

Notes: For details of the safety recommendation above, could you please refer to the attachment: **Aircraft Accident Investigation Report** (Report No. 20200722YDSQ01, Issued by Eastern Regional Administration of CAAC).

Sincerely yours,

Li yong

Deputy Director General

Office of Aviation Safety,

Civil Aviation Administration of China(CAAC)
