

Global Aviation Safety Roadmap Regional Safety Plan Development Process

Step 6 – Develop Prioritized Recommended Actions

Regional Safety Enhancement Plan Development

Develop Prioritized Recommended Actions

- Refer to *Global Aviation Safety Roadmap*, Section 3.1.6.
- For Each Recommended Action identified in Step 5:
 1. Identify the safety “Impact” if the action is implemented
 2. Determine the “Changeability” for the potential action – How difficult will it be to implement the action
- Rank order the list of “Recommended Actions” into a prioritized list

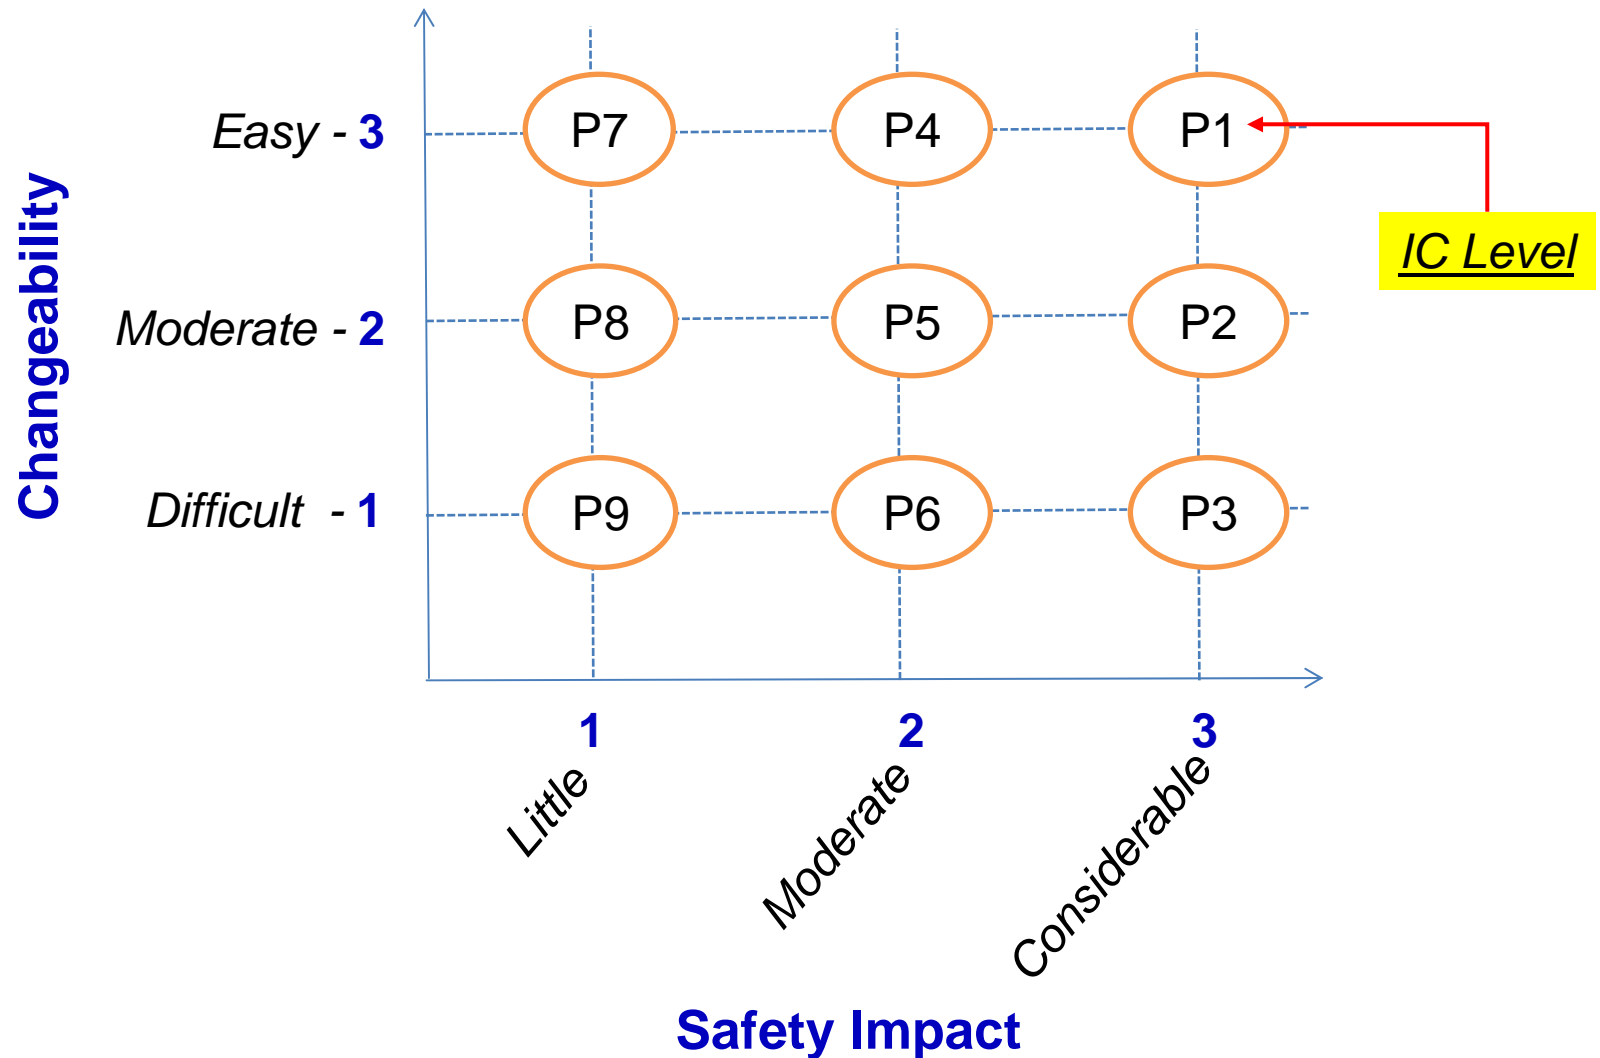

Determining the Safety Impact

- Using the group knowledge, determine the potential safety impact for the recommended action, assuming that it is fully implemented.
- Rate each action according to the following scale:
 1. Little Safety Impact
 2. Some Safety Impact
 3. Considerable Safety Impact

Determining the Changeability

- Using the group knowledge, determine the difficulty in implementing each recommended action.
- Rate each action according to the following scale:
 1. Difficult to Implement
 2. Moderate Effort Required to Implement
 3. Little or No Effort Required to Implement
- When rating each item, consider the following:
 - Political Will/Commitment/Consensus
 - Resource Requirements/availability for implementation
 - Potential Blockers – what conditions exist that could prevent implementation

Determine the Impact-Changeability Level Using the Chart

Prioritize the Recommended Actions Using the Impact-Changeability Level as a Guide

Recommended Action	Impact	Change-ability	IC Level	Selected Priority
1.				
2.				
3.				
4.				
5.				
6.				
7.				
8.				
9.				
10.
