ICAO EUR/NAT Regional Database

Since October 1995, EUROCONTROL and the ICAO EUR/NAT regional Office are working together to develop and maintain a common database of facilities and services required for international air navigation within the EUR/NAT region.

In February 1998, the first internet application on the EUROCONTROL website was developed to support the allocation process of five-letter name-codes used for the identification of significant points (for ATS routes) not marked by the site of a radio navigation aid. This application was named ICARD.

- ▶ [5LNC : Allocation of unique names for designated points \(Annex 11 Appendix 2\)](#)
- ▶ [Route Designators : Allocation of unique names for ATS Routes \(Annex 11 Appendix 1\)](#)

The database maintained under this agreement is also used for reference codes like location indicators, country codes and aircraft operators. Country codes are provided for public access under the following link

Start | EUROCONTROL - IC... | 09:18

Select

ICARD 5LNC access

**For Data Managers
and nominated
Route planners**

**Requests for
5LNCs can only
be made by
nominated
Route planners**

The screenshot shows a Microsoft Internet Explorer browser window displaying the EUROCONTROL website. The address bar shows the URL: http://www.eurocontrol.int/icard/public/standard_page/5lnc.html. The page title is "EUROCONTROL - Five Letter Name-Codes for Designated Points". The navigation menu includes: Safety, Regulation, ATM Strategy, ATM Performance, Air Traffic Control, Air Navigation Charges, Training, Airports, Security, Civil / Military, Research & Development, Managing the Traffic, Society & Economics, Capacity, Traffic & Delay, and Environment. The sidebar on the left contains links: ICARD Home, 5LNC (with sub-links for public users, authorised users, and monitoring), Route Designators, ICAO Countries - 7310, and ICAO Countries - ITU. The main content area is titled "Five Letter Name-Codes for Designated Points" and contains the following text:

Pilots need physical air navigation aids to reach their final destination. However, with modern air navigation systems being based on longitude and latitude readings, air routes are being more frequently defined by logical designated points, identified by a unique Five-Letter Name-Code (5LNC) and a longitude / latitude position (e.g. TULIP 52°22'N 3°51'E in the Netherlands).

The 5LNC codes are drawn from a set of pre-defined five letter combinations generated by ICAO and the FAA in the 1960's. This list was then split and distributed to the various ICAO Regional offices throughout the world. These reserve lists have since formed the base for 5LNC allocation by the ICAO Offices with the objective of world-wide unique allocation to enable unambiguous designation of significant points not linked to the site of a Radio Navigation Aid.

The tool

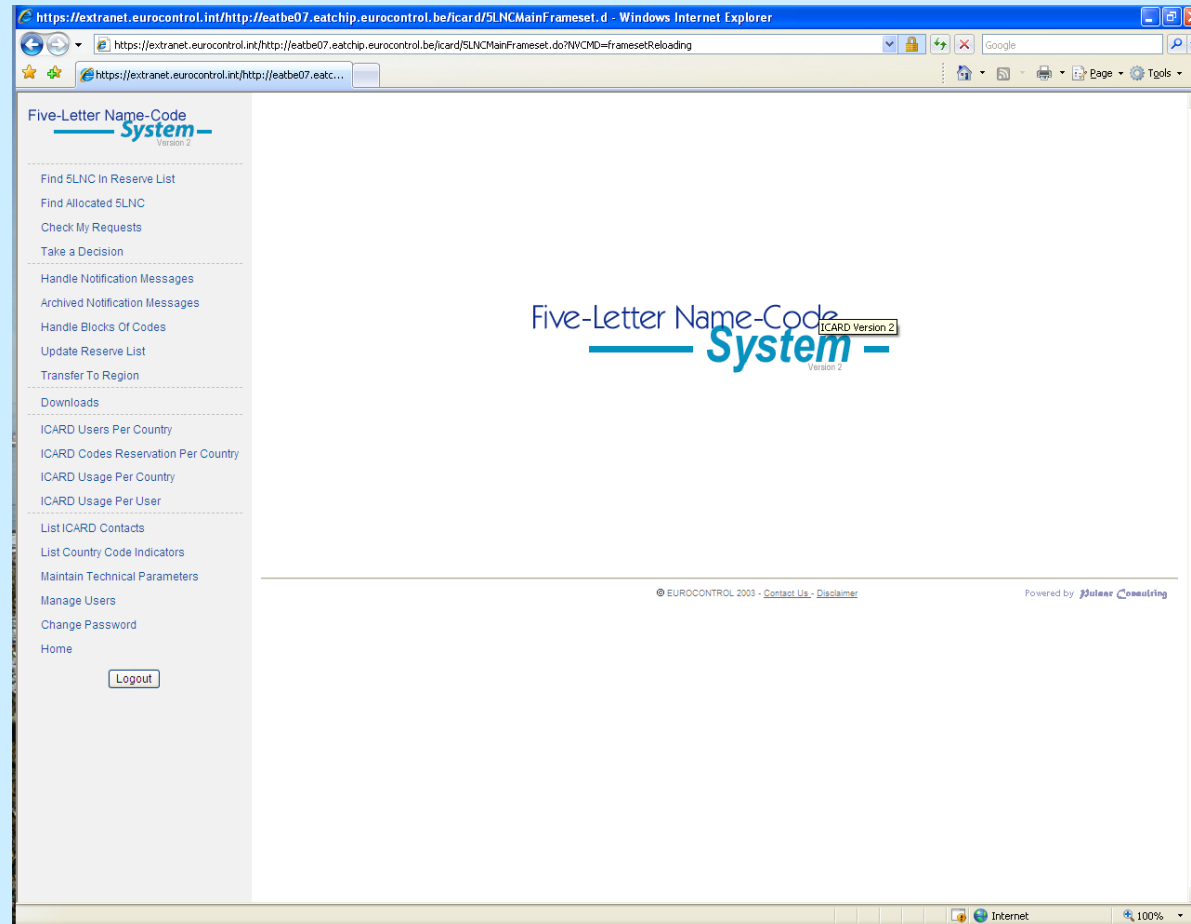

Public users have access to a limited number of functionalities to query the content of the database maintained by the staff of the ICAO EUR/NAT office.

Only authorised users can make use of the application for reserving new codes from the reserve list of 140000 codes while ensuring worldwide uniqueness. They will receive acknowledgment of their request from the ICAO EUR/NAT office.

Authorised users have also access to an analysis tool that provides information about significant points not linked to the site of radio navigation aids from various sources available in the EATM Datawarehouse.

5LNC menu

Find 5LNC in reserve list

Step 1 : 3 possibilities

a – search by selected pattern: ie: : BA* or P***A, etc.**

b – search by sound like: ie: : BASDA

c – make a random search

Step 2 : press “submit”

The screenshot shows a web browser window titled "ICARD - Find 5LNC in Reserve In List". The page has a header with the "Five-Letter Name-Code System" logo and the title "Find 5LNC in Reserve List". On the left side, there is a navigation menu with options like "Find 5LNC in Reserve List", "Find Allocated 5LNC", "Check My Requests", "Take a Decision", "Handle Notification Messages", "Archived Notification Messages", "Handle Blocks Of Codes", "Update Reserve List", "Transfer To Region", "Downloads", "ICARD Users Per Country", "ICARD Codes Reservation Per Country", "ICARD Usage Per Country", "ICARD Usage Per User", "List ICARD Contacts", "List Country Code Indicators", "Maintain Technical Parameters", "Manage Users", "Change Password", and "Home". The main content area is titled "Search Criteria" and contains several input fields: "Search for:" (with an asterisk), "Sound like:", "Excluding the letter(s):" (with a note "(e.g.: A, T, S)"), "Random selection for:" (with a dropdown for "codes (max 100 codes)"), and "Region:" (with a dropdown menu set to "EUR/NAT - Paris"). A "Search" button is located below the "Region" dropdown. At the bottom of the page, there is a "Logout" button. The browser's address bar shows the URL: "https://testnet.eurocontrol.int/https://testnet.eurocontrol.be/icaod/S5LNCMainFrameset.do?WCID=framesetReLoading".

5LNC from reserve list /2

1 a : Search for 5lnc starting with BA... : Result

The screenshot shows a web browser window titled "ICARD - Find 5LNC In Reserve In List". The page content includes a search interface and a list of results.

Search Criteria:

- Search for:
- Sound like:
- Excluding the letter(s):
- Region:
- Random selection for: codes (max 100 codes)

Search Results:

Find 5LNC from reserve list/3

1 c : Search for 5lncs by random

Random result for x codes

1 - Type in x number of codes

2 - Press "search"

3 - Click on a code to start a request

The screenshot shows a web browser window titled "ICARD - Find 5LNC in Reserve List". The address bar shows the URL: <https://extranet.eurocontrol.nl/https://eatbe07.eatchip.eurocontrol.be/icard/5LNCMainFrameset.do?TWCHD=framesetReloading>. The page content includes a sidebar on the left with navigation links such as "Find 5LNC in Reserve List", "Find Allocated 5LNC", "Check My Requests", "Take a Decision", "Handle Notification Messages", "Archived Notification Messages", "Handle Blocks Of Codes", "Update Reserve List", "Transfer To Region", "Downloads", "ICARD Users Per Country", "ICARD Codes Reservation Per Country", "ICARD Usage Per Country", "ICARD Usage Per User", "List ICARD Contacts", "List Country Code Indicators", "Maintain Technical Parameters", "Manage Users", "Change Password", and "Home". The main content area is titled "Find 5LNC in Reserve List" and contains a "Search Criteria" section with input fields for "Search for:", "Sound like:", "Excluding the letter(s):", and "Region:" (set to "EUR/NAT - Paris"). A "Search" button is present. Below the search criteria is a "Search Results" section showing a table of results with columns for code names like NETUP, BEEGA, ATRIP, etc. The footer of the page includes "© EUROCONTROL, 2003 - Contact Us - Disclaimer" and "Powered by jhitear Consulting".

Find Allocated 5LNC

*Search for allocated codes
can be made*

-entering the name, if known

Or

- with the date parameter

- or by country

*The data manager and states
authorised users will request
amendment or deletion of an
existing 5LNC from this menu*

The screenshot displays the 'Find Allocated 5LNC' web application. The interface includes a search form with the following fields:

- Code:** A text input field.
- Decision Date:** A date range selector with 'from' and 'to' fields.
- Country:** A dropdown menu currently set to '[All]'. Below it is a 'Purpose' dropdown menu.
- Latitude:** A text input field with the format 'DDMM[SS ss]H where H is 'N' or 'S' below it.
- Longitude:** A text input field with the format 'DDDMM[SS ss]H where H is 'E' or 'W' below it.

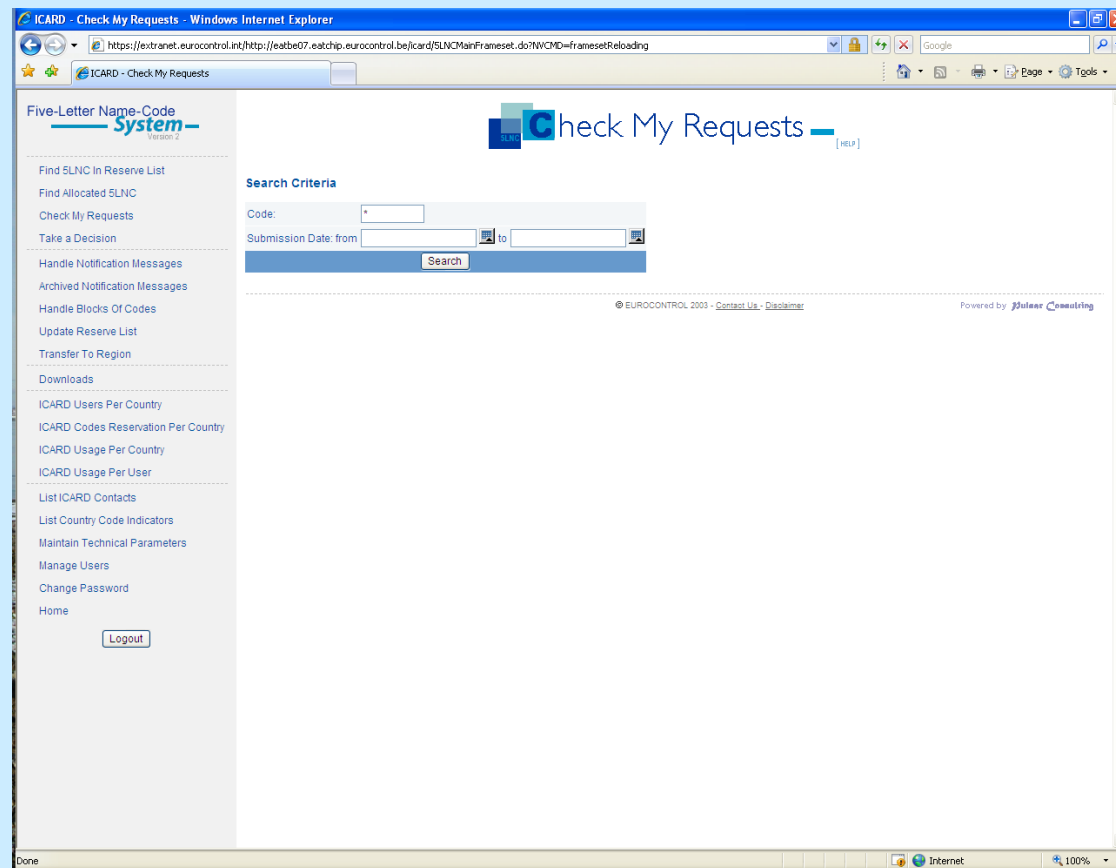

Buttons for 'Search' and 'Map' are located below the respective input fields. The left sidebar contains a navigation menu with items such as 'Find 5LNC in Reserve List', 'Check My Requests', 'Take a Decision', 'Handle Notification Messages', 'Archived Notification Messages', 'Handle Blocks Of Codes', 'Update Reserve List', 'Transfer To Region', 'Downloads', 'ICARD Users Per Country', 'ICARD Codes Reservation Per Country', 'ICARD Usage Per Country', 'ICARD Usage Per User', 'List ICARD Contacts', 'List Country Code Indicators', 'Maintain Technical Parameters', 'Manage Users', 'Change Password', and 'Home'. A 'Logout' button is positioned at the bottom of the sidebar.

Check my requests

When action has not been completed, pending requests can be listed :

- *by name, or*
- *by date*

Take a decision

The regional ICARD data manager (DM) regularly accesses this menu to take action (proceed to their approval or refusal) on requests made by States authorised users

The screenshot displays the 'Take a Decision' web application interface. The page is titled 'Five-Letter Name-Code System Version 2' and 'Take a Decision [help]'. The main content area is divided into a left sidebar with navigation links and a central search area. The search area includes a 'Search Criteria' section with the following fields:

- Code: [input field]
- Submission Date: from [calendar icon] to [calendar icon]
- Proximity check done:
- Coordinating Country: [All] (dropdown menu)
- Requesting Country: [All] (dropdown menu)

Below the search criteria is a 'Search' button. To the right of the search criteria are two vertical lists labeled 'Accepted Basket' and 'Refused Basket', each with a 'Clear Basket' button below it. The footer of the page contains the text '© EUROCONTROL 2003 - Contact Us - Disclaimer' and 'Powered by Muleair Consulting'. The browser window title is 'ICARD - Take a Decision - Windows Internet Explorer' and the address bar shows the URL 'https://extranet.eurocontrol.int/https://eastbe07.eastchip.eurocontrol.be/icard/5LNCMainFrameset.do?NVCMD=framesetReloading'.

Take a decision /2

Take a decision /3

DM checks adequate info:

- proximity checking is a requirement.

- for FIR Boundaries the other states should be added

- comment box used for background information for the route planner and/or the DM

The screenshot displays the ICARD web application interface. The main window, titled "ICARD - Take a Decision", shows a search criteria form with fields for Code, Submission Date (from 30/05/2008 to 23/07/2008), Proximity check (unchecked), Coordinating Country (Spain), and Requesting Country (All). Below the form is a "Search Results" table:

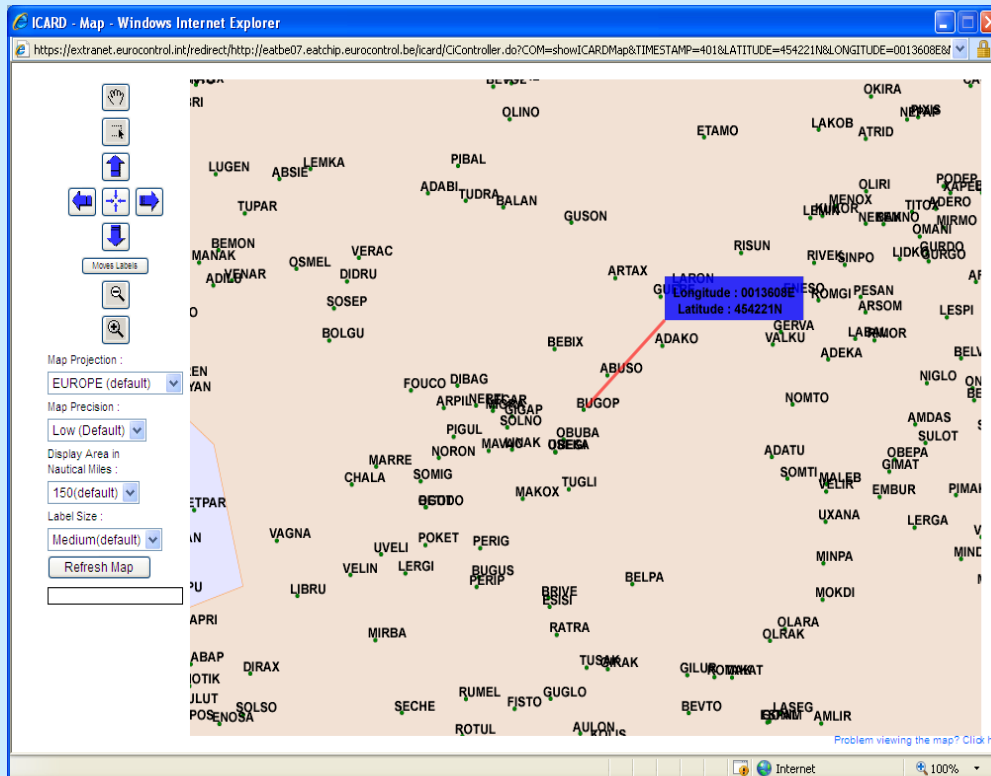

Code	Type	Lat	Lon	Subm. Date	Coord. States	Purpose	Action	Comment
ADOTO	ALL	365913N	0063451W	11/07/2008	E	TA	[Icons]	SID LEZL
RISIS	ALL	372231N	0055137W	14/07/2008	E	TA	[Icons]	SID JEREZ AD

An overlaid window titled "ICARD - Request for Code Allocation" shows details for ADOTO. It includes fields for Latitude (365913N), Longitude (0063451W), Purpose (Terminal Airspace (SID/STAR/HLDG)), and a Comment box containing "SID LEZL". The "Requested by" field is "Fernando ARENAL JEREZ Spain". The "For Countries" field is "E" (Spain). There are buttons for "Delete co-ordinating country" (Del) and "Add co-ordinating country" (Add). The window also has "Submit" and "Cancel" buttons.

Handle notification msg /1

Once requests by States have been approved, a notification to the State concerned can be generated automatically :

- DM will create a message from the “accepted” or “refused” baskets

- once codes and states are checked, DM proceeds to step 2

The top screenshot shows the 'Handle Notification Messages' page with search fields for Reference Number, Country, and Created by. The bottom screenshot shows the 'Create Message From Accepted Basket' page with a table of requests.

Code	Type	List	Low	Coord. States	Subst. Date	Status	Purpose	Action	Comment
ADOTD	ALL	38913V	80834E1V	E	11-07-2008	ACC	Terminal Airspace (SD)STARHLD	E	SD UZL
BBS	ALL	37221V	8001137V	E	14-07-2008	ACC	Terminal Airspace (SD)STARHLD	E	SD JEREZ AD

Handle notification msg /2

Electronic correspondence is drafted as for regularly mail (Note: reference is mandatory)

- the requesting authorised user address is automatically set
- other authorised users of the same state are also in copy
- in case of shared codes, other authorised users of all states concerned will also receive a copy of the message
- DM can add/delete other addressees
- DM is also added for any appropriate follow-up

The top screenshot shows the 'Handle Notification Messages' interface. The message details are as follows:

Reference Number: TEC:DTB:ICARD:5LNC:08-1366 E
 Message: Dear Mr Arenal Jerez, This is to confirm that the codes detailed in the attached table have
 TO: Spain Fernando ARENAL JEREZ (email)
 CC: Naki GOLDSCHMID (email), Spain Angeles SANCHEZ (email)

The bottom screenshot shows the 'You have successfully updated the following message' view. The message details are as follows:

Reference Number: TEC:DTB:ICARD:5LNC:08-1366 E
 Message: Dear Mr Arenal Jerez, This is to confirm that the codes detailed in the attached table have been allocated to Spain, as requested. Thank you very much.
 TO: Fernando ARENAL JEREZ (email)
 CC: Naki GOLDSCHMID (email), Angeles SANCHEZ (email)

Code	Type	Lat	Lon	Coord. Status	Subst. Date	Status	Purpose	Comment

DM can add/create codes on an exceptional basis, provided all assurance is made that new codes are not used worldwide.

Update reserve list

The screenshot displays the 'Update Reserve List' web application. The main interface includes a search criteria section with fields for Name Code, Page Number, and Region (set to EUR/NAT - Paris). A secondary window titled 'Add New SLNC' is open, showing fields for Name Code, Region/City (EUR/NAT - Paris), Page Number, Pattern, and Type (ICAO). The interface is powered by jMutee Cms and includes a 'Logout' button in the sidebar.

Transfer to region

After coordination between ICAO regional offices, DM can transfer codes from the reserve list of his/her region to another ICAO region

-the data base is updated online and new codes are ready to be allocated

The screenshots show the 'Five-Letter Name-Code System' interface. The top window shows the 'Transfer to Region' form with the following fields:
Code: ODI/BU
Region: MID - Cairo
Transfer Code To Selected Region

The bottom window shows the same form after a successful transfer, with a message:
Code ODI/BU has been successfully transferred to MID Region.
To transfer another code, please fill in the form below.

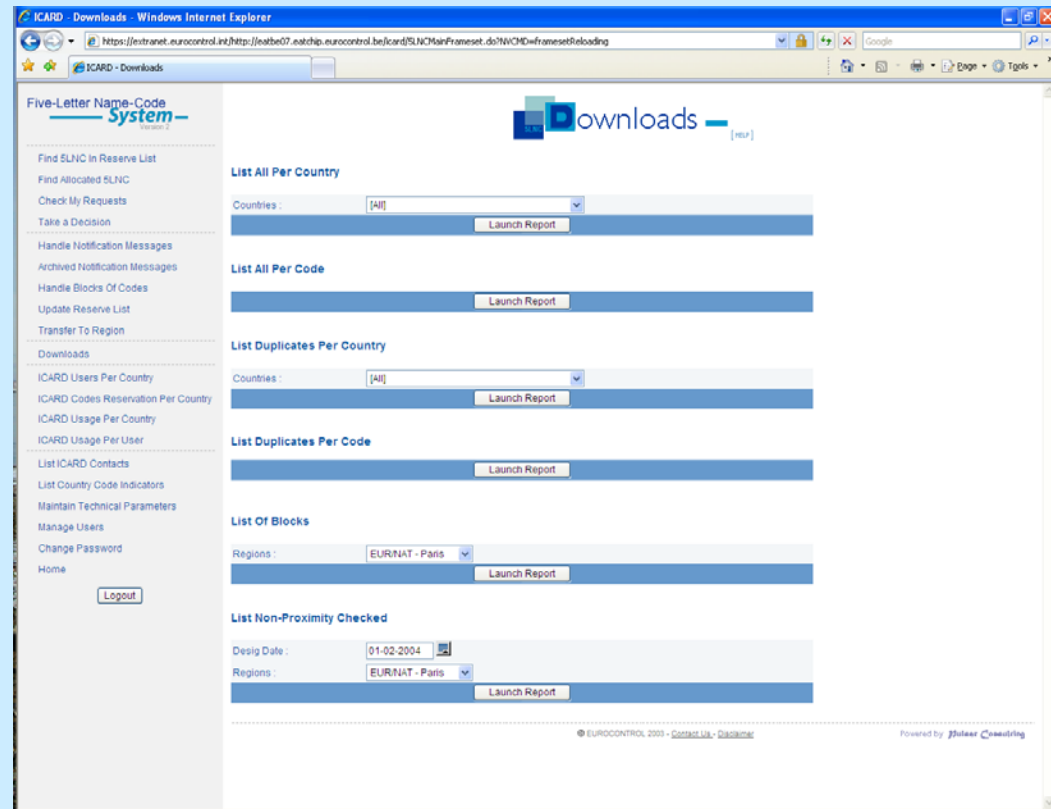

Downloads

To facilitate coordination within administrations, the following downloads are available to all (public, authorised users and DM

- List per country
- List per code
- Duplicates per country
- Duplicates per code

DM can check and coordinate with States using List of blocks facilities
