

**Cuestión 3 del  
Orden del Día:**

**Informe del Equipo Regional de Seguridad Operacional de la Aviación -  
Panamérica (RAST-PA) del RASG-PA**

**INFORME DEL EQUIPO REGIONAL DE SEGURIDAD OPERACIONAL DE LA AVIACIÓN - PANAMÉRICA  
(RAST-PA) DEL RASG-PA**

(Presentada por la Secretaría)

**RESUMEN**

La presente nota de estudio describe el establecimiento de proyectos factibles basados en medidas priorizadas de mitigación con resultados finales bien definidos (inclusive la métrica para valorar la eficacia de las acciones propuesto de mitigación) y líneas de tiempo desarrollados por el Equipo Regional de Seguridad Operacional de la Aviación – Panamericana (RAST-PA) en forma de Planes Detallados de Implementación (DIPs).

**Objetivo  
Estratégico**

*Esta nota de estudio se relaciona con el Objetivo estratégico A.*

**1. Introducción**

1.1 Durante la Reunión RASG-PA/02 en Bogotá, Colombia, en noviembre de 2009, a través de la Decisión RASG-PA/02/4, se estableció el Equipo Regional de Seguridad Operacional de la Aviación - Panamérica (RAST-PA). El equipo ha celebrado dos reuniones (Ciudad de México, México, en febrero de 2010 y Miami, Estados Unidos, abril de 2010) y ha sostenido más de diez teleconferencias.

## 2. Actividades

2.1 Utilizando el proceso de la Hoja de Ruta de la Seguridad Operacional a nivel mundial (GASR) y las tres principales áreas de riesgo según los datos identificados por el RASG-PA (Excursiones en Pista/RE, Impacto contra el suelo sin pérdida de control/CFIT y Pérdida de Control durante el vuelo/LOC-I), el RAST-PA preparó mejoras a la seguridad operacional con acciones paliativas para cada área de riesgo en Panamérica. Se asignó un número a cada iniciativa de mejora de la seguridad operacional y se categorizaron por GSI, impacto en la seguridad operacional, posibilidad de cambio, indicador, tiempo para realizarse, además de identificar a un líder y referencias disponibles.

2.2 El RAST-PA entregó las siguientes acciones de mejora de la seguridad operacional (siete en total) al Comité Ejecutivo de RASG-PA (ESC) y se les otorgó aprobación para empezar la creación de Planes de Implementación Detallados (DIPs) para las siguientes áreas de riesgo identificadas por los datos del RASG-PA:

a) Excursiones en Pista (RE):

- RAST-PA/RE/4: Promover la observancia por parte de los pilotos de los procedimientos operacionales normalizados (SOP) para procedimientos de aproximación incluyendo el proceso de toma de decisión de aproximación frustrada; y
- RAST-PA/RE/9: Instrucción específica para pilotos y controladores de tránsito aéreo para evitar aproximaciones inestables y desestabilizados;

b) Impacto contra el suelo sin pérdida de control (CFIT):

- RAST-PA/CFIT/02: Instrucción específica para pilotos sobre Aproximación y Reducción de Accidentes en el Aterrizaje (ALAR/CFIT); y
- RAST-PA/CFIT/04: Instrucción específica sobre la gestión de los recursos en el puesto de pilotaje (CRM)/Conciencia situacional para pilotos y controladores de tránsito aéreo.

c) Pérdida de Control durante el vuelo (LOC-I):

- RAST-PA/LOC-I/6: instrucción LOC – factores humanos y automatización;
- RAST-PA/LOC-I/7: instrucción LOC – maniobras avanzadas; y
- RAST-PA/LOC-I/9: instrucción LOC – políticas de monitoreo para pilotos y procedimientos para explotadores y programa de instrucción para tripulaciones de vuelo.

2.3 En el **Apéndice A** (disponible únicamente en Inglés) se incluye la lista actual de los participantes de RAST-PA.

2.4 Se han creado DIPs para todas las iniciativas de mejora de la seguridad operacional aprobadas por el ESC, lo que también incluye la aprobación para su implementación (refiérase al **Apéndice B**, disponible únicamente en Inglés).

2.5 Además, el **Apéndice C** (disponible únicamente en Inglés) contiene el informe cronológico basado en los diferentes resultados para cada uno de los DIPs y el **Apéndice D** (disponible únicamente en Inglés) contiene la lista completa de iniciativas de mejora de la seguridad operacional para las cuales se desarrollaran Planes de Implementación Detallados.

### **3. Conclusión**

3.1 El tiempo designado para finalizar la tarea ha sido determinado por el ESC con base en la prioridad y los recursos económicos disponibles.

3.2 Para asegurar el éxito de esta iniciativa, se solicita a todas las partes interesadas participar activamente en las actividades de RAST-PA.

3.3 RAST-PA está trabajando con “Líderes DIP” para proporcionar apoyo y ha programado teleconferencias de seguimiento mensuales para monitorear el progreso de la implementación. Además, RAST-PA continuará preparando DIP para todas las iniciativas de mejora de la seguridad operacional identificadas.

3.4 Se prevé que se realizará por lo menos una reunión en Sudamérica el próximo año.

### **4. Acción por parte de la Reunión**

4.1 Se invita a la Reunión a considerar la adopción del siguiente proyecto de conclusión:

#### **PROYECTO DE CONCLUSIÓN RASG-PA/3/xx APOYO A ACTIVIDADES DEL RAST-PA**

Que RASG-PA:

- a) revise la lista de participantes del Apéndice A e identifique representantes de partes interesadas adicionales que necesiten ser incluidos;
- b) tome nota de los planes de implementación detallados y cronograma en los Apéndices B y C; y
- c) sugiera futuras actividades para RAST-PA, tomando en consideración el alcance de los objetivos de RAST-PA y los requisitos y limitaciones de recursos.

# ESC Approved Detailed Implementation Plans (DIPs)

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/LOC-I/6	LOC Training - Human factors and automation	SE 30	9	High	Moderate	P2	3	Short
<b>Safety Enhancement Action (expanded):</b>	To improve the overall performance of flight crews to recognize and prevent loss of control accidents, through effective use of automation.							
<b>Statement of Work:</b>	To reduce loss of control accidents, operators will be encouraged to adopt consensus policies and procedures relating to mode awareness and energy state management aspects of flight deck automation, as appropriate to their respective operations.							
<b>Champion Organization:</b>	RASG-PA (RAST-PA)							
<b>Human Resource:</b>	IATA, Pilot Associations; Safety, Flight Operations and Training managers; ICAO, CAA's, aircraft manufacturers, training centers.							
<b>Financial Resource:</b>	The total estimated cost would be X person-years.							
<b>Relation Current Aviation Community Initiative:</b>	<p>The following are some of the activities related to this project:</p> <ul style="list-style-type: none"> <li>•Incident data has shown that flight deck automation is a core issue that needs to be addressed. To enhance safety, a CAST working group, including aircraft manufactures, pilot associations, etc. developed a tactical approach and distributed policies and procedures relating to mode awareness and energy state management. The COSCAP's in Asia used this material to develop a generic advisory circular.</li> <li>•CAST Flight Deck Automation Working Group has been formed to recommend and prioritize actions to address, for current and projected operational use, the safety and efficiency of modern flight deck systems for flight path management (including energy state management).</li> <li>•The Human Factors and Pilot Training Group of the ALPA, Air Safety Structure has identified its position regarding CRM and Human Factors with respect to the use of automation.</li> <li>•SAE G10, Aerospace Behavioral Engineering Technology (ABET) Committee, deals with the philosophies, principles and criteria by which designers, engineers, pilots and behavioral scientists structure systems to achieve maximum human workload compatibility for automation efficiency. The committee has several subcommittees with on-going work into human factors and automation</li> </ul>							
<b>Performance Goal Indicators:</b>	<p>Goal 1: Mitigate the effects of mode confusion and energy state management as contributing factors in loss of control accidents. Indicator: A measurable reduction of loss of control incidents and accidents related to automation.</p> <p>Goal 2: Mode awareness and energy state management aspects of flight deck automation advisory circular is readily available. Indicator: Each ICAO contracting State in the region has issued an advisory circular and distributed it to each operator's in the State. Completion of Output 3.</p> <p>Goal 3: All operators incorporate mode awareness and energy state management aspects of flight deck automation guidance in their approved training programs. Indicator: Mode awareness and energy state management aspects of flight deck automation guidance is provided to all transport airplane pilots Completion of Output 4.</p>							
<b>Key Milestones:</b>	<p>The following milestones are based on the date of Steering Committee Approval (SCA) (months):</p> <ul style="list-style-type: none"> <li>•Review Asian advisory circular IATA SCA+6</li> <li>•Issue generic advisory circular ICAO Output 1 +1</li> <li>•Issuance of advisory circular by States in the Region. CAAs Output 2 +6</li> <li>•Operators develop guidance based on the AC and train pilots. Operators Output 3 + 18</li> <li>•Track Implementation RASG-PA SCA +12 and yearly</li> </ul>							
<b>Potential Blockers:</b>	<ul style="list-style-type: none"> <li>•Operator might not embrace advisory circular material,</li> <li>•Operators might not accept the potential cost of this training,</li> <li>•Operators may not recognize the safety enhancement benefits,</li> <li>•States may opt not to adopt and issue the advisory circular.</li> </ul>							

**DIP Notes:**

*To reduce loss of control accidents, air carriers will be encouraged to adopt consensus policies and procedures relating to mode awareness and energy state management, as appropriate to their respective operations.*

**RAST-PA/LOC-I/6 Output 1**

**Description:** Review and evaluate the advisory circular created by the ICAO COSCAP's in Asia

- ALTA / IFALPA / IATA team to review and evaluate the advisory circular created by the ICAO COSCAP's in Asia related to mode awareness and energy state management of flight deck automation.
- Based on this review create a generic advisory circular for the Region

**Resources:**

**Resource Notes:** ALTA, IFALPA, IATA, Pilot Associations, Flight Operations, Safety and Training managers, and Aircraft Manufacturers. The estimated cost of a one day meeting of the appropriate persons.

**Time Line:** SCA + 6 months

**Actions:** ALTA / IFALPA / IATA will convene a team to analyze the advisory circular, to verify policies and procedures related to mode awareness and energy state management are appropriate for the Region. The team will develop a generic mode awareness and energy state management aspects of flight deck automation advisory circular for Pan America.

**Target Completion Date:****RAST-PA/LOC-I/6 Output 2**

**Description:** •ICAO will distribute a copy of the developed generic advisory circular to each State in the Region.

**Resources:**

**Resource Notes:** ICAO

**Time Line:** Completion of Output 1 + 1 months

**Actions:** ICAO Regional Offices will prepare a cover letter and disseminate the generic advisory circular to each member State in the Region.

**Target Completion Date:****RAST-PA/LOC-I/6 Output 3**

**Description:** •Each State in the region will use the generic advisory circular as a template to prepare a State advisory circular on mode awareness and energy state management aspects of flight deck automation.

**Resources:**

**Resource Notes:** State regulatory authorities

**Time Line:** Completion of output 2 + 6 months

**Actions:** States in the Region to issue their own advisory circular on mode awareness and energy state management aspects of flight deck automation.

**Target Completion Date:****RAST-PA/LOC-I/6 Output 4**

- Description:** Mode awareness and energy state management aspects of flight deck automation guidance is provided by operators to all of their pilots.
- Resources:**
- Resource Notes:** Operator’s flight operations, standards and training departments.
- Time Line:** Completion of Output 3 + 18 months
- Actions:** Each operator should carefully developed procedures and guidelines that support the proper use of mode awareness and energy state management aspects of flight deck automation in their training programs. Each transport airplane pilot should be trained to the flight deck automation procedures and guidelines developed by their organization.
- Target Completion Date:**
-

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/LOC-I/7	LOC Training - Advanced maneuvers	SE 31	9	High	Moderate	P2	1	Short

**Safety Enhancement Action (expanded):**

Promote LOC Training – Advanced maneuvers  
Pilots will be better trained to avoid and recover from excursions from normal flight and loss of control.

**Statement of Work:**

Advanced Maneuvers Training (AMT) focuses on training to prevent and recover from hazardous flight conditions outside of the normal flight envelope, such as, inflight upsets, stalls, ground proximity and wind shear escape maneuvers, and inappropriate energy state management conditions. There has been a recent increase in accidents where loss of control was a contributing factor.

The purpose of this project is to collect and provide advanced maneuver training material and to encourage operators to use these materials to implement advanced maneuver ground training and flight training using appropriate flight training equipment. Emphasis should be given to stall onset recognition and recovery, unusual attitudes, upset recoveries, effects of icing, energy awareness and management, and causal factors that can lead to loss of control

**Champion Organization:**

ALTA

**Human Resource:**

Airline Associations, Pilot Associations; Safety, Flight Operations, and Training managers, aircraft manufacturers, ICAO, flight simulation device manufacturers, training centers, existing training aids, and new materials developed by manufacturers.

**Financial Resource:**

The total cost associated with this project would be determined by the number of crew personnel that need to be trained and the amount of training time required. This initiative is considered essential for flight safety, there would be no cost associated with the devel

**Relation Current Aviation Community Initiative:**

- Voluntary training currently being done – both ground and flight
- Wind shear training required since 1988
- Airplane Upset Recovery Training Aid
- Commercial training products becoming available

**Performance Goal Indicators:**

Goal 1: Develop and make available AMT material for operators approved training programs

Indicator: Availability of the AMT material within 8 months of SCA.

Goal 2: All operators incorporate AMT in their approved training programs.

Indicator: Operators incorporate AMT material within 36 months of SCA.

Goal 3: Reduce occurrence of LOC accidents.

Indicator: A measurable reduction of loss of control incidents and accidents related to excursion from normal flight.

**Key Milestones:**

The following milestones are based on the date of Steering Committee Approval (SCA) (months):

- Distribute currently available Training Aids ALTA SCA +8
- Track adoption of AMT ALTA SCA +8
- Track Implementation SCA+8 and on a yearly basis

**Potential Blockers:**

- Some special interests might discredit AMT simulator training
- Operators might ignore AMT materials
- Operators might not accept the potential cost of this training
- Operators may not recognize the safety enhancement benefits

**DIP Notes:**

*Advanced Maneuvers Training (AMT) refers to training to prevent and recover from hazardous flight conditions outside of the normal flight envelope. Examples include in-flight upsets, stalls, ground proximity and wind shear escape maneuvers, and inappropriate energy state management conditions. This safety enhancement collects and provides advanced maneuver training material and encourages operators to use these materials to implement advanced maneuver ground and flight training using appropriate flight training equipment. Emphasis should be given to stall onset recognition and recovery, unusual attitudes, upset recoveries, effects of icing, energy awareness and management, and causal factors that can lead to loss of control.*

**RAST-PA/LOC-I/7 Output 1**

**Description:** Listing of training materials available from regulators, industry, operators, academia and other resources.

**Resources:**

**Resource Notes:** RAST-PA Secretariat (NACC office) will produce a comprehensive list, with input from all RAST-PA members. All aircraft manufacturers should provide a list of available training materials and aids. FAA Airplane Upset Recovery Training Aid: is available on its public web site.

**Time Line:** SCA+ 6 months

**Actions:** RAST-PA should distribute the Airplane Upset Recovery Training Aid to all appropriate regional stakeholders.

**Target Completion Date:**

---

**RAST-PA/LOC-I/7 Output 2**

**Description:** Advanced Maneuvers Training provided to all operators.

**Resources:** 10000

**Resource Notes:** Estimated distribution costs in USD. ALTA, IATA

**Time Line:** Output 1 Complete + 6 months

**Actions:** ALTA should provide the training materials to each operator in the region. IATA should support ALTA’s initiative. ALTA should report the level of commitment by the operator’s flight operations and training departments.

**Target Completion Date:**

---

**RAST-PA/LOC-I/7 Output 3**

**Description:** Advanced Maneuvers Training provided by all operators. The expectation is that this training will be accomplished during initial training and as part of the recurrent training program, via ground and simulator instruction within the certified flight envelope, with emphasis on recognition, prevention and recovery techniques.

**Resources:**

**Resource Notes:** Costs may vary from operator to operator and would need to consider;  
1) Revising the training program for AMT.  
2) Assessing the simulator time allotted on the initial and recurrent syllabuses to accommodate AMT.  
3) It is estimated that AMT training would require 30 minutes or less of simulator time.

**Time Line:** Output 2 Complete + 28 months

**Actions:** ALTA and IATA should promote a high level of commitment to advanced maneuvers training (AMT) by operator flight operations and training departments. Advanced maneuvers training will be conducted emphasizing energy state management and early recognition and recovery from flight outside the certified aircraft-operating envelope. Flight conditions outside of the certified flight envelope include inflight upsets, stalls, ground proximity and wind shear escape maneuvers, and inappropriate energy state management conditions. The training will be accomplished via ground and simulator instruction within the certified flight envelope, with emphasis on recognition, prevention and recovery techniques. The simulator instruction will be within the limitation of the training device being utilized.

**Target Completion Date:**

---

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/LOC-I/9	LOC Training - Pilot monitoring policies and procedure for the operator and training program for crews.		9	High	Easy	P1	2	Short
<b>Safety Enhancement Action (expanded):</b>	Promote Pilot Monitoring Techniques and Training. Monitoring performance can be significantly improved by training these skills							
<b>Statement of Work:</b>	<p>The purpose of this project is to collect and provide pilot monitoring training material and to encourage operators to use these materials to implement pilot monitoring training and flight procedures.</p> <p>Inadequate flight crew monitoring has been cited by a number of sources as a problem for aviation safety. A collaborative research effort by NASA-Ames, 21 worldwide airlines and the University of Texas Human Factors Research Program, which observed more than 2,000 airline flights, noted that roughly 62 percent of unintentional errors went undetected by flight crews. In addition, the Flight Safety Foundation, ALAR working group, has established that poor monitoring has been a factor in 63 percent of approach and landing accidents. ICAO has also determined that 50 percent of CFIT accidents had pilot monitoring as a common factor.</p> <p>The term 'Pilot Monitoring' (PM) should be used as an alternative to 'Pilot Not Flying' (PNF) since it reflects clearly the most important function of a PNF.</p> <p>Conventionally, when two pilots fly a fixed-wing airplane the aircraft commander occupies the left hand seat, and the co-pilot or first officer occupies the right hand seat. Before the commencement of each flight leg, the aircraft commander decides which pilot will take direct responsibility for flying the aircraft and they become 'Pilot Flying' (PF) for that leg. The other pilot is then 'Pilot Not Flying' (PNF) and carries out supporting duties such as communications and check-list reading. Currently some operators use alternative terms for PF and PNF.</p> <p>Several major airlines have recently revised their procedures to maximize the monitoring of aircraft trajectory, automation and systems. They have tried to minimize or eliminate concurrent procedures that conflict with crew monitoring.</p>							
<b>Champion Organization:</b>	IFALPA							
<b>Human Resource:</b>	<p>Pilot Associations, IATA, ALTA, ICAO, Flight Operations, and Training managers, training centers, existing training aids.</p> <p>The total cost associated with this project would be determined by the number of flight crews that need to be trained and the amount of time required. This initiative is considered essential for flight safety.</p> <p>Estimated 2 meetings of RAST representatives to implement Output 1.</p>							
<b>Financial Resource:</b>								
<b>Relation Current Aviation Community Initiative:</b>	<ul style="list-style-type: none"> <li>•Aligns with major findings by ICAO, FSF, NTSB.</li> <li>•Aligns with components of CRM</li> </ul>							
<b>Performance Goal Indicators:</b>	<p>Goal 1:Reduce occurrence of LOC accidents. Indicator: A measurable reduction of loss of control incidents and accidents related to deviations from normal flight.</p> <p>Goal 2: Pilot Monitoring Training material is readily available. Indicator: Availability of the Pilot Monitoring Training material in each operator’s organization within 2 months of Output 3.</p> <p>Goal 3: All operators incorporate Pilot Monitoring Training in their approved training programs. Indicator: Pilot Monitoring Training is provided to all transport airplane pilots. Within 18 months of Output 4.</p>							
<b>Key Milestones:</b>	<p>The following milestones are based on the date of Steering Committee Approval (SCA) (months):</p> <ul style="list-style-type: none"> <li>•Distribute currently available Training Aids ALTA SCA+5</li> <li>•Track adoption of Pilot Monitoring Training ALTA SCA+12</li> </ul>							
<b>Potential Blockers:</b>	<ul style="list-style-type: none"> <li>•Operators might not accept the potential cost of this training</li> <li>•Operators may not recognize the safety enhancement benefits</li> </ul>							

DIP Notes:

*Pilot Monitoring policies and procedure for the operator and training program for crews.*

**RAST-PA/LOC-I/9 Output 1**

**Description:** •Listing of training materials available from industry, operators, and other resources.

**Resources:**

**Resource Notes:** RASG-PA Secretariat (NACC office) will produce a comprehensive list.

**Time Line:** SCA + 3 months

**Actions:** RASG-PA should distribute the Pilot Monitoring Training Aid to all appropriate regional stakeholders (IATA, ALTA, CAA, etc.).

**Target Completion Date:**

---

**RAST-PA/LOC-I/9 Output 2**

**Description:** •Raise awareness of availability and need of Pilot Monitoring Training.

**Resources:**

**Resource Notes:** IFALPA, Local Pilot Associations

**Time Line:** Completion of Output 1 + 1 months

**Actions:** IFALPA, ALTA and local pilot associations should market and promote ongoing activities that develop a higher level of commitment to Pilot Monitoring Training by operator’s flight operations, standards and training departments.

**Target Completion Date:**

---

**RAST-PA/LOC-I/9 Output 3**

**Description:** •Pilot Monitoring Training material provided to all operators.

**Resources:**

**Resource Notes:** ALTA, IATA, CAA’s

**Time Line:** Completion of Output 1 + 2 months

**Actions:** ALTA should provide the training materials to each operator in the region. IATA should support ALTA’s initiative. ALTA should report to RASG-PA the level of commitment by the operator’s flight operations and training departments.

**Target Completion Date:**

---

**RAST-PA/LOC-I/9 Output 4**

**Description:** •Pilot Monitoring Training provided by operators to all of their pilots.

**Resources:**

**Resource Notes:** Operator’s flight operations, standards and training departments, pilot associations.

**Time Line:** Completion of Output 3 + 18 months

**Actions:** Each operator should carefully developed procedures and guidelines that support pilot monitoring in their training programs. Each transport airplane pilot should be trained to the Pilot Monitoring procedures and guidelines developed by their organization.

**Target Completion Date:**

---

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/RE/04	Promote pilot adherence to Standard Operating Procedures (SOPs) for approach procedures including go- around decision making process.		9	High	Easy	P1	1	Short

**Safety Enhancement Action (expanded):** Promoting pilot adherence to Standard Operating Procedures (SOPs) which would include stabilized approach criteria and go/no go take-off decision making procedures is key to preventing and reducing the risk of runway excursions. Reviewing existing operational policies, procedures and programs is also part of an overall strategy in mitigating runway excursion risk.

**Statement of Work:** Runway Excursion has been identified as the highest safety risk area in Pan America. In order to proactively reduce this risk, RASG-PA chartered the Regional Aviation Safety Team (RAST) to review runway excursion information and develop mitigation strategies to reduce this risk.

**Champion Organization:** ALTA

**Human Resource:** ICAO (NACC, SAM, HQ), IATA, ALTA, ACSA, FSF, CANSO, aircraft manufacturers, ALPA, IFALPA, IFATCA, CAA's, and other stakeholders.

**Financial Resource:** 10000

**Relation Current Aviation Community Initiative:** IATA Runway Excursion Risk Reduction toolkit/FSF: ALAR toolkit (version June 2010)  
Colegio de Pilotos Aviadores de México: Aeronautical Decision Management Training

**Performance Goal Indicators:**  
Goal 1: target audience(s): Latin America and Caribbean, will value the information provided  
(1) Objective: educate the target audience(s)  
(2) Indicator: to reach 80% of the airlines pilots in the Region  
(3) Indicator: to reach 80% of other stakeholders as determined by the research.

Goal 2: increase the awareness on runway excursions  
(1) Objective: reduce the number of events  
(2) Indicator: reduction of 80% of the events in the region

**Key Milestones:**

- Authorization by IATA to upload copyright material from RERR Toolkit in RASG-PA website: pending
- Release of State letters from RASG-PA Secretariat recommending establishment of SOPs: SCA+02
- RAST – PA Report from metrics regarding RE/04: Upon completion of Output 2 +03

**Potential Blockers:**

- a)Strategic Challenges
  - i)Incorporate new audience in addition to airline's pilots
  - ii)Distribution of training material to airlines
  - iii)Distribution of training material to non-airline pilots
  - iv)Establish and maintain communication with the Pan American pilots and other stakeholders
  - v)Operators to include recommendations into their Manual of Operations
  - vi)Operators to include recommendations into their training programmes
  - vii)Get feedback
  - viii)Metrics to determine penetration of this programme

**DIP Notes:**

1. Research to determine the target audience(s) Determine the specific groups of pilots to be reached in order to achieve our objective Determine other stakeholders that would benefit.
2. Communication and distribution options: Letter from RASG-PA Secretary to recommend that all operators establish SOP's that include stabilized approach criteria for pilots and a no fault go-around policy for unstable approaches, mentioning the FSF/IATA Runway Excursion Risk Reduction Tool Kit. Letter from RASG-PA Secretary to States recommending that all operators establish SOP's that include stabilized approach criteria for pilots and a no fault go-around policy for unstable approaches, mentioning the FSF/IATA Runway Excursion Risk Reduction Tool Kit.
3. Press releases from ALTA, IATA, IFALPA. 4. RASG-PA website news release, uploading of training material and E-mails to target audience

*Keep in mind that there is no contradiction with the pressure for pilots in the subsequent flight analysis.*

**RAST-PA/RE/04 Output 1**

**Description:** Distribution

**Resources:**

**Resource Notes:** Cost of the material and distribution to the operators.

**Time Line:** SCA+ 6 months

**Actions:** 1. RAST/RE recommends that all operators establish SOP's that include stabilized approach criteria for pilots and a no fault go-around policy for unstable approaches. 2. In coordination with FSF and IATA, RAST/RE should develop an awareness campaign to promote the adherence to SOP's for approach procedures including the go-around decision making process. The campaign will distribute the FSF/IATA Runway Excursion Risk Reduction Tool Kit, the Colegio de Pilotos Aviadores de Mexico Aeronautical Decision Management training, and any other available material. 3. Time to train trainers

**Target Completion Date:** 12

---

**RAST-PA/RE/04 Output 2**

**Description:** Training

**Resources:**

**Resource Notes:** Variable costs depending on the operator.

**Time Line:** SCA+ 12 months

**Actions:** Operators to include material in training programs.

**Target Completion Date:**

---

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/RE/09	Specific Training for pilots and air traffic controllers to avoid unstabilized approaches		9	High	Easy	P1	2	Short

<b>Safety Enhancement Action (expanded):</b>	Develop safety seminars for pilot and air traffic controllers to mitigate the causes of unstable approaches in Pan America.
<b>Statement of Work:</b>	Runway Excursion has been identified as one of the highest safety risk area in Pan America. In order to proactively reduce this risk, RAST in collaboration with ALTA will develop safety seminars for pilots and controllers that will provide specific training and tools to mitigate the causes of unstable approaches.
<b>Champion Organization:</b>	ALTA
<b>Human Resource:</b>	IATA, ATA, ATAC, ACSA, aircraft manufacturers, IFALPA, IFATCA, flight data analysis companies (Sagem, ADI, Airface, ect.), organizations, CANSO, local pilot and air traffic controller associations, flight academies, training centers and other stakeholders.
<b>Financial Resource:</b>	Costs would be shared by the operators, manufacturers, pilot associations and governments.
<b>Relation Current Aviation Community Initiative:</b>	- Runway Safety Action Teams (RSAT); local equivalent collaborative teams in Pan America.
<b>Performance Goal Indicators:</b>	Goal: reduce occurrence of runway excursion accidents. Indicator: a measurable reduction of runway excursion incidents and accidents.
<b>Key Milestones:</b>	The following milestones are based on the date of SCA approval (months): - Survey SCA + 6 - Reports SCA + 9 - Seminars SCA + 12
<b>Potential Blockers:</b>	- Insufficient funds to conduct seminars - Inadequate implementation of recommendations from outputs - Lack of participation from industry - Lack of human resources, specialists, facilitators - Language barriers - Obtaining copyright approval for available training material - Political barriers - Data sharing restrictions - Time availability
<b>DIP Notes:</b>	Impact on Aviation Safety in the Region: This project would have a positive impact on aviation by avoiding accidents and incidents related to runway excursion.  <i>Pressure to controllers and pilots (efficiency, 0 tolerance for unstabilized approaches). Training focused on risk management</i>

**RAST-PA/RE/09 Output 1**

**Description:** RAST in collaboration with ALTA will develop a strategy to deliver safety seminars for pilots and controllers in Pan America that targets recognition and avoidance of unstable approaches.

**Resources:**

**Resource Notes:** Stakeholders as listed above

**Time Line:** SCA 24 months

**Actions:** RAST in collaboration with ALTA develop a strategy and timeline to develop safety seminars for pilots and controllers.

At a minimum the following topics should be covered:

- Stabilized Approaches
- Go Around Gates and Missed Approach Criteria
- Approach Procedures and Briefings
- Non Normal Aircraft Conditions
- Transfer of Aircraft Control
- CRM/TRM and human factors
- Weather conditions and information dissemination

During the safety seminars participant will be asked to provide additional mitigation measures that will be compiled and used as the basis of future safety enhancements for runway excursions.

**Target Completion Date:**

---

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/CFIT/02	Specific ALAR/CFIT Training for Pilots	SE-12, ALAR Toolkit, FSF CFIT Training	9	Medium	Moderate	P5	1	Short

**Safety Enhancement Action (expanded):** Promote specific ALAR/CFIT prevention training and procedures to be included in operators approved training curriculums, emphasizing pilot situational awareness and escape procedures for flight crews to use in the event of a terrain warning indication.

**Statement of Work:** Controlled Flight Into Terrain (CFIT) has been identified as one of the top three data driven risk areas in Pan-America. CFIT is a significant cause of commercial aviation equipment loss and fatalities, worldwide. CFIT accidents could be substantially reduced if all operators and training centers in Pan America developed CFIT prevention procedures and add them to their approved initial and recurrent training curriculums.

**Champion Organization:** IATA

**Human Resource:** CAA's, ICAO, IATA, ATA, ALTA and industry partners.

**Financial Resource:**

**Relation Current Aviation Community Initiative:**

- RASG-PA has identified CFIT as the number two flight safety risk area in Pan America.
- Flight Safety Foundation (FSF) has recently updated (April 2010) the ALAR Toolkit that includes CFIT Education and Training.

**Performance Goal Indicators:**

Goal 1: A reduction of 80% in ten years of CFIT accidents involving operators in Pan America.  
Indicator: Operator CFIT accident rate in Pan America is continuously reduced toward the goal.

Goal 2: CFIT training and guidance material will be provided to all operators and training centers not conducting CFIT training.  
Indicator: All operators and training centers are conducting CFIT training.

Goal 3: Post CFIT Education and Training Guidance Material on the RASG-PA Website. Indicator: CFIT training material posted on the RASG-PA Website prior to completion of Output 1.

**Key Milestones:**

- CAA's conduct a review of all operators CFIT training programs SCA + 6 months
- CFIT Education and Training Guidance Material Available on the Web. SCA + 2 months
- Operators and training centers will incorporate CFIT training into their training programs. SCA + 12 months

**Potential Blockers:**

- Availability of CAA resources.
- Operators may not recognize the safety enhancement benefits

**DIP Notes:**

**RAST-PA/CFIT/02 Output 1**

**Description:** CAA's conduct a review of all operators to ascertain which operators have CFIT prevention training and procedures in their approved training programs.

**Resources:**

**Resource Notes:** CAA (Flight Safety Oversight Department)  
Estimate of 2 to 4 CAA man-hours per airline to complete operator review  
CAA Inspector review checklist

**Time Line:** SCA+ 6 months

**Actions:** Through the flight safety oversight departments, CAA's will direct inspectors to conduct a review of their operator and identify which operators provide CFIT prevention training and procedures within their approved training programs.

**Target Completion Date:**

**RAST-PA/CFIT/02 Output 2**

**Description:** If an operator does not have CFIT training, he will be encouraged to incorporate CFIT training into the airline training program.

**Resources:**

**Resource Notes:** Operators, CAA's and ICAO  
Variable cost depending on the operator and the number of pilots

**Time Line:** SCA+ 12 months

**Actions:** Operators will incorporate CFIT prevention training and procedures into their training programs.

**Target Completion Date:**

Rast No	Safety Enhancement Action	Reference:	GSI	Safety Impact	Changeability	Indicator	Priority	Time Frame
RAST-PA/CFIT/04	CRM/Situational Awareness for pilots and air traffic controllers (To include review of actual events when possible)	SE -11, SE-46, SE-47	12	Medium	Moderate	P5	2	Medium

**Safety Enhancement Action (expanded):** Include specific CRM/situational awareness training and procedures to all pilots and air traffic controller training curriculums, emphasizing pilot and controller situational awareness with respect to CFIT.

**Statement of Work:** Crew Resource Management/Controller Resource Management (CRM) training, situational awareness and CFIT prevention are closely linked. This project will reduce CFIT accidents by promoting comprehensive pilot and air traffic controller CRM training programs.

**Champion Organization:** IFALPA/IFATCA

**Human Resource:** CAA's, ICAO, ANSP's, IFALPA, IFATCA, IATA and industry partners.

**Financial Resource:**

**Relation Current Aviation Community Initiative:**

- RASG-PA website (<http://www.mexico.icao.int/RASGPA.html#TrainingRefs>)
- FSF virtual library (<http://flightsafety.org/>)
- ALAR Briefing Note – Crew Resource Management ([http://flightsafety.org/files/alar\\_bn2-2-crm.pdf](http://flightsafety.org/files/alar_bn2-2-crm.pdf))
- Airbus ([http://www.airbus.com/en/corporate/ethics/safety\\_lib/](http://www.airbus.com/en/corporate/ethics/safety_lib/))
- Boeing operators ([www.myboeing.com](http://www.myboeing.com))

**Performance Goal Indicators:**

Goal 1: A substantial reduction of CFIT accidents involving air transport operators in Pan America.  
Indicator: Operator CFIT accident rate in Pan America decreases by 80%.

Goal 2: CRM/situational awareness training and guidance material provided to all air transport operators and Air Traffic Personnel.  
Indicator: Increase in number of operators and Air Traffic Personnel that are conducting CRM/situational awareness training.

Goal 3: Post the CRM/situational awareness guidance material on the RASG-PA Website.  
Indicator: CRM/situational awareness guidance material posted on the RASG-PA Website by the time of SCA +2 months.

**Key Milestones:**

- CRM/situational awareness training and guidance material available on the Web. SCA +2 months
- Operators will incorporate CFIT training into their training program. SCA +18 months
- ANSP will incorporate CFIT training into their training program. SCA+ 24 months

**Potential Blockers:**

- Availability of CAA/ANSP/State resources.
- Operators, States and ANSP may not recognize the safety benefits

**DIP Notes:** All communications to States should be conducted through the RASG-PA Secretariat. Guidance on coordinating with ICAO and identifying which operators and ANSPs are providing CFIT prevention training and procedures within their approved training programs may be useful to States.

*ATC training in this area has already been developed*

**RAST-PA/CFIT/04 Output 1**

**Description:** Incorporate and/or update CRM/situational awareness training programs for all flight crew members of air transport operators emphasizing aircraft position with relation to terrain and reviewing past occurrences.

**Resources:**

**Resource Notes:** Air transport operators (training departments),  
Variable cost depending on the operation

**Time Line:** SCA+ 18 months

**Actions:** Reduce the CFIT accident rate by incorporating CFIT prevention in CRM training programs. Situational awareness will be emphasized as an integral part of the CRM training required of flight crewmembers of all air transport operators.

**Target Completion Date:**

---

**RAST-PA/CFIT/04 Output 2**

**Description:** Incorporate CRM/situational awareness training programs for all air traffic controllers of air navigation service providers (ANSP) emphasizing aircraft position with relation to minimum allowable altitudes.

**Resources:**

**Resource Notes:** ANSP's (training departments),  
CRM/situational awareness guidance material posted on the RASG-PA Website  
Variable cost depending on the ANSP

**Time Line:** SCA+ 24 months

**Actions:** Reduce the CFIT accident rate by incorporating CFIT prevention in CRM training programs. Situational awareness will be emphasized as an integral part of the CRM training required of air traffic controllers of all ANSPs.

**Target Completion Date:**

---

## RAST-PA DIP Follow-up

22 October 2010

1:34:49 PM

Due Date	Champion	DIP No.	Output	Description	Actions	Time line
<b>20-Nov-10</b>	IFALPA	RAST-PA/LOC-I/9	1	<ul style="list-style-type: none"> <li>•Listing of training materials available from industry, operators, and other resources.</li> </ul>	RASG-PA should distribute the Pilot Monitoring Training Aid to all appropriate regional stakeholders (IATA, ALTA, CAA, etc.).	ESC/6 +3
<i>20-Dec-10</i>	IFALPA	RAST-PA/LOC-I/9	2	<ul style="list-style-type: none"> <li>•Raise awareness of availability and need of Pilot Monitoring Training.</li> </ul>	IFALPA, ALTA and local pilot associations should market and promote ongoing activities that develop a higher level of commitment to Pilot Monitoring Training by operator's flight operations, standards and training departments.	LOC-I/9 - O1 +1
<i>20-Jan-11</i>	IFALPA	RAST-PA/LOC-I/9	3	<ul style="list-style-type: none"> <li>•Pilot Monitoring Training material provided to all operators.</li> </ul>	ALTA should provide the training materials to each operator in the region. IATA should support ALTA's initiative. ALTA should report to RASG-PA the level of commitment by the operator's flight operations and training departments.	LOC-I/9 - O1 +2
<b>20-Feb-11</b>	RASG-PA (RAST-PA)	RAST-PA/LOC-I/6	1	<p>Review and evaluate the advisory circular created by the ICAO COSCAP's in Asia</p> <ul style="list-style-type: none"> <li>•ALTA / IFALPA / IATA team to review and evaluate the advisory circular created by the ICAO COSCAP's in Asia related to mode awareness and energy state management of flight deck automation.</li> <li>•Based on this review create a generic advisory circular for the Region</li> </ul>	ALTA / IFALPA / IATA will convene a team to analyze the advisory circular, to verify policies and procedures related to mode awareness and energy state management are appropriate for the Region. The team will develop a generic mode awareness and energy state management aspects of flight deck automation advisory circular for Pan America.	ESC/6 +6
<b>20-Feb-11</b>	IATA	RAST-PA/CFIT/02	1	<p>CAA's conduct a review of all operators to ascertain which operators have CFIT prevention training and procedures in their approved training programs.</p>	Through the flight safety oversight departments, CAA's will direct inspectors to conduct a review of their operator and identify which operators provide CFIT prevention training and procedures within their approved training programs.	ESC/6 +6
<b>20-Feb-11</b>	ALTA	RAST-PA/LOC-I/7	1	<p>Listing of training materials available from regulators, industry, operators, academia and other resources.</p>	RASG-PA should distribute the Airplane Upset Recovery Training Aid to all appropriate regional stakeholders.	ESC/6 +6
<b>20-Feb-11</b>	ALTA	RAST-PA/RE/04	1	<p>Distribution</p>	<p>1. RAST/RE recommends that all operators establish SOP's that include stabilized approach criteria for pilots and a no fault go-around policy for unstable approaches. 2. In coordination with FSF and IATA, RAST/RE should develop an awareness campaign to promote the adherence to SOP's for approach procedures including the go-around decision making process. The campaign will distribute the FSF/IATA Runway Excursion Risk Reduction Tool Kit, the Colegio de Pilotos Aviadores de Mexico Aeronautical Decision Management training, and any other available material. 3. Time to train trainers</p>	ESC/6 +6

Due Date	Champion	DIP No.	Output	Description	Actions	Time line
20-Mar-11	RASG-PA (RAST-PA)	RAST-PA/LOC-I/6	2	•ICAO will distribute a copy of the developed generic advisory circular to each State in the Region.	ICAO Regional Offices will prepare a cover letter and disseminate the generic advisory circular to each member State in the Region.	LOC-I/6 - O1 +1
20-Aug-11	ALTA	RAST-PA/RE/04	2	Training	Operators to include material in training programs.	ESC/6 +12
20-Aug-11	IATA	RAST-PA/CFIT/02	2	If an operator does not have CFIT training, he will be encouraged to incorporate CFIT training into the airline training program.	Operators will incorporate CFIT prevention training and procedures into their training programs.	ESC/6 +12
20-Aug-11	ALTA	RAST-PA/LOC-I/7	2	Advanced Maneuvers Training provided to all operators.	ALTA should provide the training materials to each operator in the region. IATA should support ALTA's initiative. ALTA should report the level of commitment by the operator's flight operations and training departments.	LOC-I/7 - O1 +6
20-Sep-11	RASG-PA (RAST-PA)	RAST-PA/LOC-I/6	3	•Each State in the region will use the generic advisory circular as a template to prepare a State advisory circular on mode awareness and energy state management aspects of flight deck automation.	States in the Region to issue their own advisory circular on mode awareness and energy state management aspects of flight deck automation.	LOC-I/6 - O2 +6
20-Feb-12	IFALPA/IFATCA	RAST-PA/CFIT/04	1	Incorporate and/or update CRM/situational awareness training programs for all flight crew members of air transport operators emphasizing aircraft position with relation to terrain and reviewing past occurrences.	Reduce the CFIT accident rate by incorporating CFIT prevention in CRM training programs. Situational awareness will be emphasized as an integral part of the CRM training required of flight crewmembers of all air transport operators.	ESC/6 +18
20-Aug-12	ALTA	RAST-PA/RE/09	1	RAST in collaboration with ALTA will develop a strategy to deliver safety seminars for pilots and controllers in Pan America that targets recognition and avoidance of unstable approaches.	<p>RAST in collaboration with ALTA develop a strategy and timeline to develop safety seminars for pilots and controllers.</p> <p>At a minimum the following topics should be covered:</p> <ul style="list-style-type: none"> <li>• Stabilized Approaches</li> <li>• Go Around Gates and Missed Approach Criteria</li> <li>• Approach Procedures and Briefings</li> <li>• Non Normal Aircraft Conditions</li> <li>• Transfer of Aircraft Control</li> <li>• CRM/TRM and human factors</li> <li>• Weather conditions and information dissemination</li> </ul> <p>During the safety seminars participant will be asked to provide additional mitigation measures that will be compiled and used as the basis of future safety enhancements for runway excursions.</p>	ESC/6 +24
20-Aug-12	IFALPA	RAST-PA/LOC-I/9	4	•Pilot Monitoring Training provided by operators to all of their pilots.	Each operator should carefully developed procedures and guidelines that support pilot monitoring in their training programs. Each transport airplane pilot should be trained to the Pilot Monitoring procedures and guidelines developed by their organization.	LOC-I/9 - O3 +18

Due Date	Champion	DIP No.	Output	Description	Actions	Time line
<b>20-Aug-12</b>	IFALPA/IFATCA	RAST-PA/CFIT/04	2	Incorporate CRM/situational awareness training programs for all air traffic controllers of air navigation service providers (ANSP) emphasizing aircraft position with relation to minimum allowable altitudes.	Reduce the CFIT accident rate by incorporating CFIT prevention in CRM training programs. Situational awareness will be emphasized as an integral part of the CRM training required of air traffic controllers of all ANSPs.	ESC/6 +24
<i>20-Feb-13</i>	RASG-PA (RAST-PA)	RAST-PA/LOC-I/6	4	Mode awareness and energy state management aspects of flight deck automation guidance is provided by operators to all of their pilots.	Each operator should carefully developed procedures and guidelines that support the proper use of mode awareness and energy state management aspects of flight deck automation in their training programs. Each transport airplane pilot should be trained to the flight deck automation procedures and guidelines developed by their organization.	LOC-I/6 - O3 +18
<i>20-Dec-13</i>	ALTA	RAST-PA/LOC-I/7	3	Advanced Maneuvers Training provided by all operators. The expectation is that this training will be accomplished during initial training and as part of the recurrent training program, via ground and simulator instruction within the certified flight envelope, with emphasis on recognition, prevention and recovery techniques.	ALTA and IATA should promote a high level of commitment to advanced maneuvers training (AMT) by operator flight operations and training departments. Advanced maneuvers training will be conducted emphasizing energy state management and early recognition and recovery from flight outside the certified aircraft-operating envelope. Flight conditions outside of the certified flight envelope include inflight upsets, stalls, ground proximity and wind shear escape maneuvers, and inappropriate energy state management conditions. The training will be accomplished via ground and simulator instruction within the certified flight envelope, with emphasis on recognition, prevention and recovery techniques. The simulator instruction will be within the limitation of the training device being utilized.	LOC-I/7 - O2 +28

## Loss of Control in Flight

RAST-PA/LOC-I/6	LOC Training - Human factors and automation	9	SE 30		High	Moderate	P2	3	ALTA (RAST-PA)	Short	To reduce loss of control accidents, air carriers will be encouraged to adopt consensus policies and procedures relating to mode awareness and energy state management, as appropriate to their respective operations.
RAST-PA/LOC-I/7	LOC Training - Advanced maneuvers	9	SE 31		High	Moderate	P2	1	ALTA (RAST-PA, Manufacturers))	Short	Advanced Maneuvers Training (AMT) refers to training to prevent and recover from hazardous flight conditions outside of the normal flight envelope. Examples include in-flight upsets, stalls, ground proximity and wind shear escape maneuvers, and inappropriate energy state management conditions. This safety enhancement collects and provides advanced maneuver training material and encourages operators to use these materials to implement advanced maneuver ground and flight training using appropriate flight training equipment. Emphasis should be given to stall onset recognition and recovery, unusual attitudes, upset recoveries, effects of icing, energy awareness and management, and causal factors that can lead to loss of control.

RastNo	Safety Enhancement Ac	GSI	Reference	CAST SE	S. Impa	Changeabili	Indicator	Priority	Champion	T. Fram	Notes
RAST-PA/LOC-I/9	LOC Training - Pilot monitoring policies and procedure for the operator and training program for crews.	9			High	Easy	P1	2	IFALPA	Short	Pilot Monitoring policies and procedure for the operator and training program for crews.
RAST-PA/LOC-I/1	Policies and Procedure to prevent LOC - Enforce clear, concise, and accurate flight crew SOPs	9	SE 26		Medium	Easy	P4	8	ALTA (ICAO)	Medium	OPERATORSThis safety enhancement ensures that all airline operators publish and enforce clear, concise, and accurate flight crew SOPs. These SOPs should include expected procedures during pre/post flight and all phases of flight; i.e., checklists, simulator training, PF/PM duties, transfer of control, automation operation, rushed and/or unstabilized approaches, rejected landings and missed approaches, in-flight pilot icing reporting, and flight crew coordination. Operator instructors and check airmen should ensure these SOPs are trained and enforced in their aircrew proficiency and standardization programs.STATESVerify that Policies and Procedures are in place and actively followed.

RastNo	Safety Enhancement Ac	GSI	Reference	CAST SE	S. Impa	Changeabili	Indicator	Priority	Champion	T. Fram	Notes
RAST-PA/LOC-I/2	Policies and Procedure to prevent LOC - Prioritization of safety Information	7	SE 27		Medium	Easy	P4	4	RAST-PA	Short	OPERATORSThis safety enhancement identifies or develops and implements methods for operators, regulators, and manufacturers to prioritize safety-related decisions (SMS related).The project will improve methods of risk assessment for operational issues related to service bulletins, aircraft accident/incident analysis, flight-critical safety information, and recurring intermittent failures related to dispatch.STATESVerify that Policies and Procedures are in place and actively followed.
RAST-PA/LOC-I/3	Policies and Procedure to prevent LOC - Dissemination of safety Information	7	SE 28		High	Easy	P1	5	ALTA	Short	OPERATORSThis safety enhancement ensures that essential safety information and operational procedures generated by airplane manufacturers are included in operating manuals and training programs for pilots and other appropriate employee groups.  STATESVerify that Policies and Procedures are in place and actively followed.
RAST-PA/LOC-I/4	Policies and Procedure to prevent LOC -Flight crew proficiency	11	SE 29		High	Difficult	P3	7	ALTA (IATA)	Medium	This safety enhancement is to ensure that air carriers have a process to enhance pilot proficiency. * For some carriers this may not apply

RastNo	Safety Enhancement Ac	GSI	Reference	CAST SE	S. Impa	Changeabili	Indicator	Priority	Champion	T. Fram	Notes
RAST-PA/LOC-I/5	Policies and Procedure to prevent LOC - Modifications to manufacturers recommendations	1			High	Easy	P1	6	ICAO	Medium	States shall ensure that any amendments or additions to Policies and Procedure will be coordinated with the Manufacturer and or the CAA who issued the type certificate.
RAST-PA/LOC-I/8	LOC Training - Special purpose training to prepare for the unexpected which lead to LOC-I.	1			High	Difficult	P3	9	CAST / ICAO	Long	Special purpose training to prepare for the unexpected which lead to LOC-I.
