

Agenda Item 3: AIS-to-AIM transition planning

3.6 Developments in the integrated aeronautical information package (IAIP)

Integrated AIP Documentation

(Presented by the Secretariat)

Summary	
This working paper contains an analysis of the information on the availability of integrated aeronautical information in the SAM Region and the existence of gaps that need to be filled in order to provide a more complete service in accordance with the SARPs contained in the documents that comprise the IAIP.

ICAO strategic objectives:	<i>A – Safety</i> <i>C – Environmental protection</i>

1 Background

1.1 The integrated aeronautical information package comprises a set of documents that include the AIPs with their corresponding amendments, the AIP supplements (SUP), NOTAMs and PIBs, as well as AICs, checklists and lists of valid NOTAMs.

1.2 The SAM/AIM/1 multilateral meeting established an *ad-hoc* group that conducted a survey of information on the integrated package in the Region, as reflected in the table shown in **Appendix A** to this working paper.

2 Discussion

2.1 According to the latest information on the availability of integrated aeronautical information, there are gaps that need to be filled in order to be able to provide a more complete service in accordance with the SARPs contained in the documents that make up the IAIP.

2.2 The gaps identified include, more notably, failure to provide integrated aeronautical information in English, and to a lesser extent, failure to distribute it by electronic means.

3. **Suggested action**

3.1 Based on the above, the Meeting is invited to:

- 1) update the table on the provision of integrated aeronautical information (IAIP),
and
- 2) establish a target date in which each State must fill the gaps identified.
