

# **QMS/MET SEMINAR**

## **CONCLUSIONS**

**Lima, Peru, 20 to 24 October 2014**

- Team work is the right path to assist States in the implementation stage.
- Certification should be a result of the implemented system and not the main objective.
- States that have not yet implemented QMS/MET should make all the efforts to implement it before June 2015.

- Ecuador and Bolivia should request technical assistance through WMO or ICAO to complete QMS System Implementation.
- Gap analyses should be carried out to States in implementation and pre-certification processes.

- States should require that certification bodies have a leader auditor in their MET professional staff.
- States that have make progress in their forms and documentation related to competencies assessment should assist other States that have yet develop this task.

- ICAO in coordination with WMO should organize a workshop on the systems or software for forecast verification. This workshop should be attended by meteorologists and programmers (Information and Technology personnel)
