

Agenda Item 2: Implementation of Air Traffic Flow Management(ATFM) and Collaborative Decision Making (CDM)

RLA/06/901 ATFM Work Plan for 2014

(Presented by Secretariat)

SUMMARY	
The purpose of this working paper is to submit the ATFM activities approved by the Project Coordination Committee for 2014.	
REFERENCES:	
- RCC/7 Meeting Report	
ICAO strategic objectives:	<i>B – Capability and efficiency of air navigation</i>

1. Introduction

1.1 The SAM/IG/12 noted the request for support from the Project RLA/06/901 to conduct a theoretical/practical course on ATFM procedures to be performed by qualified personnel of States, with a duration of 10 days in the CGNA of Brazil, if possible, during the second half of 2014.

1.2 This course contemplated to develop the following:

- a) Airspace monitoring process;
- b) Analysis process of air traffic demand;
- c) Standards and procedures for the ATFM of a FMU/FMP dependence;
- d) Implementation of ATFM preliminary measures;
- e) TMI implementation;
- f) ATFM messaging;
- g) Development of international teleconferences;
- h) Coordination of special events;
- i) Civil/military coordination processes; and
- j) ATFM exemption procedures.

2. Analysis

2.1 The Coordinating Committee of Project RLA/06/901 reviewed the proposed work plan by the Secretariat for the year 2014, in order to continue the actions that lead to the achievement of the expected results corresponding to the immediate objectives set out in the project document.

2.2 In relation to the above , it was noted that for the activities of 2014, as in previous years, the advice of experts of the participating States, has been considered, whose support will allow to maintain the high level of performance achieved with the coordination and supervision of experts of the Regional Office in charge of each area.

2.3 When analyzing the work plan for 2014, the Committee noted and discussed each scheduled activity, the expected deliverables and updated the locations and dates of completion.

2.4 Finally, the Committee approved within Output 3, which corresponds to the "Operational implementation of new ATM automated systems and integration of existing", to carry out the CGNA ATFM Operational Course, which is related to the ASBU B0-NOPS Module.

2.5 For the purpose of programming the course, it is necessary to provide the information requested in the form attached as **Appendix A** to this working paper, detailing the product to be achieved and its relation to the ATFM implementation goals with which the States have committed in the Declaration of Bogotá.

3. **Suggested action:**

3.1 The Meeting is invited to review and complete the information on the Course Operational CGNA ATFM contained in **Appendix A** of this working paper

Project	Title of the event				ICAO Nomenclature
RLA/06/901	Course Operational CGNA ATFM				
Duration (calendar days)	Starting date	Ending date	Closing date for nominations	Language(s)	Fees USD
10 days				Portuguese	Without cost for members of project RLA/06/901
Timetable	Minimum vacancies	Maximum vacancies			
Objective	Training of specialists of the Region in the processes of traffic analysis, implementation of measures, civil/military coordination processes, and exemption procedures.				
Who should attend	Addressed to air traffic controllers, supervisors and personnel involved in ATFM tasks.				
Contents	<p>This course contemplates to develop the following:</p> <ul style="list-style-type: none"> a) Airspace monitoring process; b) Analysis process of air traffic demand; c) Standards and procedures for the ATFM of a FMU/FMP dependence; d) Implementation of ATFM preliminary measures; e) TMI implementation; f) ATFM messaging; g) Development of international teleconferences; h) Coordination of special events; i) Civil/military coordination processes; and j) ATFM exemption procedures. 				
Candidate profile	Air traffic controllers trained in ATFM, CDM Airport Capacity and ATC Sectors, or involved in the processes of implementation and development of ATFM in their States.
