Cuestión 1 del Orden del Día: **Revisión del Proyecto H2 - Implantación de la vigilancia de los volcanes en las aerovías internacionales (IAVW)**

Ejercicios sobre Cenizas Volcánicas

(Presentada por la Secretaría)

RESUMEN

Esta nota de estudio presenta un resumen de los ejercicios por Cenizas Volcánicas realizadas durante los últimos dos años, además de las Conclusiones del GREEPECAS referidas al mismo.

Referencias:

- Doc 9691 – Manual
- Doc 9766 – Manual de Vigilancia de los Volcanes en las Aerovías Internacionales - *IAVW Handbook* (*International Airways Volcano Watch*).
- Informes del GREPECAS/14, GREPECAS/15, GREPECAS/16, GREPECAS/17
- Informe del CRPP/1, CRPP/2, CRPP/3
- Informe de la Reunión COM/MET 2015
- Informe de la Reunión OPMET 2014

Objetivos estratégicos de la OACI:	*A - Seguridad operacional* *B - Capacidad y eficiencia de la navegación aérea* *E - Protección del medio ambiente*

1. Introducción

1.1 La Reunión debería tener en cuenta que los ejercicios sobre SIGMET de Cenizas Volcánicas es una tarea que desarrolla la Región desde su aprobación por el GREPECAS/14.

1.2 El GREPECAS/16 decidió convertir las Agendas de trabajo de los Sub-Grupos en Programas de Proyectos por área, y en el área MET, se incluyó el Proyecto H2- Implantación del IAVW, como uno de los Proyectos del Programa MET.

1.3 Una de las tareas incluidas dentro del Proyecto H2 fue la realización de los ejercicios sobre Cenizas Volcánicas hasta el año 2014.

1.4 Sin embargo, el GREPECAS/17 revisó el desarrollo del Proyecto, y decidió continuar con los ejercicios sobre el mismo.

1.5 EL GREPECAS/17 solicitó a los Estados que alientan a las dependencias NOF a participar activamente de los ejercicios con la preparación y difusión de los ASHTAM.

1.6 La Reunión OPMET del 2014 emitió la Conclusión 14/02, la cual, en el literal c) solicitaba modificar los protocolos de los ejercicios de SIGMET por cenizas volcánicas para introducir un formulario del reporte de las oficinas NOF sobre los ASHTAM emitidos y ASHTAM recibidos.

2. **Discusión**

2.1 En la Reunión OPMET/14 se observaron varios problemas relacionadas con los ejercicios de SIGMET sobre Cenizas Volcánicas. Los problemas observados fueron:

- No todas las Oficinas de Vigilancias Meteorológicas participan de los ejercicios de SIGMET sobre Cenizas Volcánicas.
- No todos los mensajes elaborados contienen información proporcionada por el Centro de Asesoramiento sobre Cenizas Volcánicas contenidas en los Avisos de Ceniza Volcánica (*Volcano Ash Advisory* - VAA).
- No todas las oficinas NOTAM internacional (NOF) participan del ejercicio activamente.
- No se tiene reporte de los mensajes ASHTAM emitidos por las NOF durante los ejercicios.

2.2 Para el ejercicio del 2014, se coordinó con el Jefe del VAAC de Buenos Aires la modificación del protocolo a fin de incluir el formulario sobre los mensajes ASHTAM emitidos y recibidos por las NOF.

2.3 Un logro importante en el ejercicio del 2014 fue que todos los Estados que reportaron los resultados de los ejercicios, han incluido la lista de ASHTAM emitidos y recibidos por las NOF, por lo que se ha logrado la plena incorporación de las dependencias AIM al ejercicio, al menos en los Estados que han reportado sus resultados.

2.4 La Reunión debe considerar que, lamentablemente, en la Región SAM, no todos los Estados están asociados al VAAC de Buenos Aires. De los Estados de la Región SAM que trabajan con el VAAC de Washington la Secretaría no ha recibido un reporte de sus resultados del 2014.

2.5 En la Tercera Reunión del Comité de Revisión de Programas y Proyectos (CRPP/3), la Secretaría informó que una de las dificultades para llevar adelante el ejercicio es la coordinación con la Región CAR. Por lo tanto, debido a que la Región SAM se encuentra bajo la responsabilidad de dos VAAC, hasta el momento, en la Oficina Regional SAM no se han recibido los resultados del ejercicio del 2014 de los Estados SAM asociados al VAAC de Washington.

2.6 La Reunión debería ser consciente que es requerido una buena coordinación para contar con los resultados de los ejercicios sobre Cenizas Volcánicas en el menor tiempo, a fin de poder analizar y emitir conclusiones valederas en el momento de realizar la evaluación de las mismas.

2.7 La Reunión podría considerar solicitar a los Estados de la Región SAM asociados al VAAC de Washington, que envíen una copia de sus resultados al coordinador del VAAC de Buenos Aires y a la Secretaría.

2.8 Con relación a la participación de los Estados de la Región SAM asociados al VAAC de Washington, la Reunión COM/MET 2015 consideró la posibilidad de realizar dos simulacros, uno

exclusivamente para los Estados asociados al mismo. Sin embargo, luego de que el nuevo Oficial MET de la Oficina NACC asumió sus funciones, se realizaron las coordinaciones, y se acordó que la Oficina NACC coordinará todo lo referente al ejercicio de los Estados asociados al VAAC de Washington.

2.9 En lo relativo a los resultados de los ejercicios, en el **Apéndice A** podrán observar la lista de mensajes SIGMET emitidos y recepcionados por las Oficinas de Vigilancias Meteorológicas de los Estados SAM, así como los VAA, y los ASHTAM emitido y recibido por las NOF.

2.10 Con respecto al reporte de los resultados de los ejercicios correspondientes a Brasil, estos se adjuntan en el **Apéndice B**.

3. **Análisis**

3.1 La Reunión podría analizar los resultados de los ejercicios realizados hasta el 2014.

3.2 La Reunión debería de considerar la validez de estos ejercicios para los meteorólogos de la Región, atendiendo a todos los eventos de erupciones volcánicas que han sucedido coincidentemente con el inicio de estos ejercicios.

3.3 A la luz de la Conclusión GREPECAS 17/11 y al Conclusión 3/9 del CRPP/3, la Reunión debería considerar extender la realización de estos ejercicios por los años que considere necesario y reflejarlo en el Programa del Proyecto.

4. **Acción sugerida**

3.1 Se invita a la Reunión a:

a) tomar nota de la información suministrada en este documento;

b) revisar y analizar las Tablas de los Apéndices A y B;

c) acordar las acciones que considere necesarias.

3. CONSIDERAÇÕES FINAIS

O presente Exercício teve como objeto principal o trânsito de mensagens meteorológicas contendo informes de ocorrências do fenômeno de cinzas vulcânicas com a finalidade de avaliar os canais de comunicações existentes. Assim, do levantamento realizado especificamente junto aos Órgãos de Meteorologia Aeronáutica Brasileiros, do total das 672 mensagens encaminhadas referentes ao Teste, 529 (79%) foram recepcionadas positivamente em seus destinos e 143 (21%) não tiveram a mesma meta atingida. Observou-se, neste trabalho, então alguns pontos que podem ter corroborado para um resultado significativo de recepções de mensagens frustradas em seus destinos:

a) A inclusão da gama de mensagens do Exercício de Cinzas Vulcânicas ocorrido paralelamente e simultaneamente também na área de responsabilidade do VAAC WASHINGTON, fazendo com que alguns SIGMET chegassem em alguns Centros Meteorológicos e em outros, não. Isto ocorre em razão do território brasileiro se encontrar em sua grande parte inserida na área de responsabilidade do VAAC de BUENOS AIRES;

b) A inexistência de um canal dedicado (Terminal AMHS) junto à SSMET/CGNA (Subseção de Meteorologia do CGNA), fazendo com que houvesse inviabilidade da visualização de todos os AVISOS DE CINZAS VULCÂNICAS bem como todos os SIGMET do Exercício contendo este fenômeno; e

c) A necessidade de uma manutenção eficaz ou mesmo de um "*Upgrade*" do canal dedicado (Terminal AMHS) junto ao CMV-AZ (Centro Meteorológico de Vigilância Amazônico), fazendo com que houvesse a perda provável de AVISOS DE CINZAS VULCÂNICAS e SIGMET do Exercício, devido a procedimento tomado pelo pessoal de serviço, por orientação técnica, com a finalidade de se evitar o travamento do terminal com o excesso de mensagens.

Brasília-DF-BRASIL, 29 de janeiro de 2015

Paulo César da Rocha **Magalhães** – Cap QOMET
