Alexandre Zambrano

Alexandre Zambrano is a Brazilian industrial engineer and a customs officer that works as the Single Window Program Manager (Portal Único Siscomex) for Brazil's Federal Revenue Secretariat - RFB. For the past four years, he has been working with International Trade Facilitation and the redesigning of customs procedures. The Portal Único Siscomex Program involves 22 government agencies and is the main initiative to reduce bureaucracy and modernize the international trade in Brazil. One of the most important projects on development is the New Air Cargo Control, based on the standards of IATA Cargo-XML. It's complete implementation is expected to reduce in 80% the average time required for the secure release of air cargo in Brazil.

Alberto Martinez Ordoñez

Degree in computer science

Position: Deputy Administrator of Single Window in the Central Administration of Customs Modernization of the Tax Administration Service (SAT)

In charge of the implementation and approval of the cargo manifests (air, maritime, rail and land) in addition to being in charge of the simplification and automation of government procedures within the Single Window.
