Virtual Meeting – Recovery Strategy SAM during COVID-19 Session 2
(Lima, Perú, 5 May 2020)

RV / S2-SAM COVID-19 – WP/01
04/05/2020

NATIONAL RECOVERY PLANS FOR SAM STATES

(Prepared by Secretariat)

SUMMARY

This working paper identifies the sources of information from national recovery plans developed by the States of the SAM region in the contingency period caused by the COVID -19 pandemic as a tool to support the efforts of the CAA in the region with a view to an orderly recovery based on financial sustainability by reducing uncertainty levels and as part of the necessary communication strategy.

1. INTRODUCTION

1.1 It is estimated that the magnitude of the impact of the COVID-19 pandemic on the countries of the SAM region will depend on the duration of the pandemic, its spread and the prevention and response measures of countries to contain and cushion the shock. It is also estimated to depend on the structure of their economies and their exposure and vulnerability to global transmission channels; for example, its commercial openness and integration into global value chains, tourism sector contribution, commodity dependence, financial integration, among others.

1.2 The number one priority is to contain the spread of the virus at the domestic level to minimize direct impact. World Health Organization experts and experience in China and other countries in Asia and Europe highlight the importance of "flattening the curve" and containing contagion, to prevent a collapse of the health system and minimize the impact on both lives and economic activity.

1.3 Even in a favorable scenario where the region manages to control the spread of the virus and outbreaks remain localized, the economic impact of the pandemic can be significant. First, prevention and containment measures will have a direct impact on public finances, productivity and economic activity. Second, the effect of the global shock could be greater than that recorded during the international financial crisis.

1.4 The impact on growth will depend on the evolution of the pandemic outside and within each country's borders, the vulnerability of each country and its responsiveness, including that of its health system. Tax space and access to financing will be critical to the response, as well as securing and providing liquidity to the banking sector and the rest of the economy.

1.5 The States of the SAM Region have identified the need to develop recovery plans whose measures achieve the degree of harmonization necessary within the framework of the contingency of the COVID – 19 pandemics. To develop this capacity, it is necessary to have easy and constant access to national recovery plans to cope COVID – 19 developed by the States of the SAM region, mainly in the area

of displacement, border openings and in the economic area with the restart of national and international tourism.

2. ANALYSIS

2.1 Successful recovery of the aviation sector in the SAM States of the situation averted by the COVID-19 pandemic requires a number of necessary decisions and these shall be based on reliable data or information provided by States.

2.2 The financial sustainability of the recovery process requires control of uncertainty levels to as minimum values as possible, so access to government information on contingency recovery plans for the COVID – 19 is critical to the planning of aeronautical service providers and Civil Aviation Authorities (CAA) in the region.

2.3 A working group from the first session of the Virtual Meeting – Recovery Strategy SAM during COVID-19 attempted to access the national recovery plans of the States of the region and realized that this information is dispersed among the government dependencies that are developing and implementing policies and actions to cope the COVID – 19. Appendix A to this WP contains links to the government dependencies of the States of the region where the data and information related to COVID – 19 are located.

2.4 The COVID-19 Observatory in Latin America and the Caribbean implemented by the Economic Commission for Latin America and the Caribbean (ECLAC) which gathers information related to policies and actions implemented by the States of the SAM Region in the areas of:

- a) Displacements;
- b) Health;
- c) Economics;
- d) Employment;
- e) Social protection;
- f) Education; And
- g) Gender.

2.5 Appendix B to this WP describes the electronic links to the measures and actions implemented by the States of the SAM region from the ECLAC Observatory repository

2.6 The designs of the aviation sector recovery strategy should consider the policies and measures implemented by States and should analyze the impact of their implementation on the development of the aviation sector recovery plan from health protocols to even gender protection measures.

2.7 Access to related government information should be part of the communication strategy of recovery plans that are developed.

3. SUGGESTED ACTION

3.1 The Virtual Meeting IS suggested to the SAM Post COVID-19 Recovery Strategy, in its Session 2:

- (a) take note of the information presented in this working paper;

- (b) propose a constant communication link between States and ICAO, in particular with regard to the sending of national recovery plans to cope with the contingency of the COVID – 19 of the SAM States, through icaosam@icao.int mail and e-mail jpena@icao.int.

Appendix A –National Recovery Plans COVID – 19

Item	State	Recovery plan COVID – 19	Website	Comments
1	Argentina	Operational Plan for preparation and response to the COVID-19	https://www.argentina.gob.ar/salud/coronavirus-COVID-19/plan-operativo	No recovery plan is identified, only government press releases and COVID health response plan – 19
2	Bolivia	PILLARS OF THE "COVID – 19 ACTION " MINISTRY OF HEALTH	https://www.minsalud.gob.bo/	No se identifica plan de recuperación, solo notas de prensa del gobierno y el plan de respuesta sanitario frente al COVID – 19
3	Brasil	Federal Government Action Balance: Sixth Week of COVID Crisis Committee Operations Coordination Center-19	https://www.gov.br/casacivil/pt-br	No plan is identified, it is a repository of measures taken in different areas of national life.
4	Chile	Coronavirus Action Plan	https://www.gob.cl/coronavirus/plandeaccion/	No national recovery plan is identified, they are repositories of actions taken, plans and policies
5	Colombia	Coronavirus Colombia	https://coronaviruscolombia.gov.co/Covid19/index.html	Repository of actions measures and policies taken and some sectoral reactivation plans.
6	Ecuador	Coronavirus Ecuador	https://coronavirusecuador.com/	Repository of measures and policies adopted, some ministerial agreements under COVID-19
7	Guyana	Nothing	----	----
8	Panamá	CORONAVIRUS COVID-19	http://www.minsa.gob.pa/destacado/coronavirus-covid-19	Panama's Ministry of Health, measures, policies, decrees, programs and protocols
9	Paraguay	COVID – 19	https://www.msps.gov.py/covid-19.php	Measures and policies, only on the Ministry of Public Health and Social Welfare portal
10	Perú	Coronavirus (COVID-19) at Perú	https://www.gob.pe/coronavirus	Actions taken, policies and protocols developed
11	Suriname	COVID-19	http://health.gov.sr/	Suriname's Ministry of Health, basically a news repository
12	Uruguay	Measures in the face of the health emergency	https://www.gub.uy/medidas-emergencia-sanitaria	Repository of measures and policies applied
13	Venezuela	COVID – 19	http://mpps.gob.ve/ https://covid19.patria.org.ve/	Repositorio de medidas y políticas aplicadas y noticias
14	Liaison made with: France: French Guiana	Nothing	https://www.gouvernement.fr/info-coronavirus	Overseas Territory of France
