Conclusion

ICAO Mandate

Assembly Resolution A40-27: Innovation in Aviation

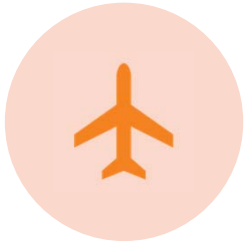

Outreach opportunities with interested parties

INNOVATION

ICAO's Goal on Innovation

Raise awareness of innovation among States, industry partners and the aviation community and promote its potential benefits

Encourage and support the timely deployment of sustainable innovative technologies, processes and capacity-building activities

Provide a framework that allows the industry to engage with ICAO

Provide a framework that enables ICAO to engage academia in the development of innovative studies, training and projects

Innovation through Implementation Support Activities

Provide technical assistance, training, and guidance to aviation stakeholders

Identify potential risks and develop solutions to mitigate them

Ensure that new technologies can operate safely and reliably

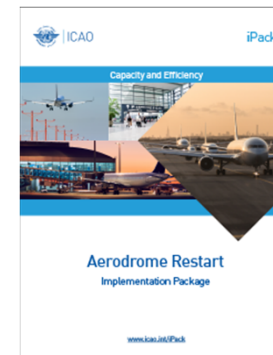

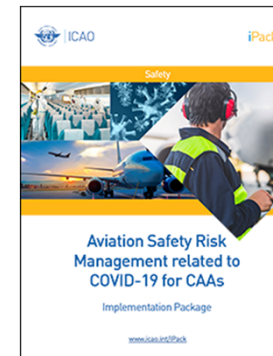

Foster collaboration and partnerships

Standardized product: Implementation Packages (iPacks)

Standardized & short-term support

- Initially established in 2020 to support COVID-19 recovery efforts, new topics are now being developed to focus on priority implementation needs
- An Implementation Package (iPack) is a standardized bundle of implementation support composed of 5 key components, as follows:**
 - Subject matter expertise
 - Guidance material
 - Standardized training
 - Tools (including data-driven applications)
 - Procurement Guidance (when applicable)

Duration: Short intervention (3 to 6 months)

Conclusion

Clear mandate and structured approach (Strategy)

Transparency

Innovation culture

Part of the Transformational Objective
