Strategic objectives from ICAO:	<i>A – Operational Safety</i> <i>B – Capacity and efficiency</i>

1. **Introduction**

1.1 The Secretariat continuously monitors Air Navigation Deficiencies for the AIS/AIM area in the SAM Region.

1.2 The SAM/AIM/16 Meeting reviewed the Air Navigation Deficiencies of each State.

1.3 The Secretariat circulated, by e-mail, the current status of the Air Navigation Deficiencies.

2. **Discussion**

2.1 The Air Navigation Deficiencies Database contains requirements not met by States, which are related to ICAO SARPs and air navigation services, as well as infrastructure declared in the Regional Air Navigation Plan.

2.2 The Secretariat has noted that a significant percentage of these deficiencies are related to the AIS/AIM, mainly related to digital datasets related to terrain and obstacles, and to the availability of the AIP and English language.

2.3 During SAM/AIM/16, the consideration of this matter, the Meeting discussed the Air Navigation Deficiencies, for the area of AIS, that remain active in the GANDD, which is presented as **Appendix A** to this working paper.

2.4 At the same meeting, some States submitted corrective action plans (CAPs) for deficiencies. It should be noted that Brazil has solved all the shortcomings for the AIS area.

2.5 The Secretariat distributed to States the current status of their deficiencies via e-mail in order to review and update their CAPs. States could report on the status of implementation of these CAPs at this meeting.

3. **Action Required**

3.1. The Meeting is invited to:

- a) take note of the information presented in the WP;
- b) provide information to update the table;
- c) update the Corrective Action Plan; and
- d) consider other actions.
