# Safety Management for Practitioners (SMxP)

## Virtual Classroom

The SMxP course focuses on Safety Risk Management and Safety Assurance. It aims to provide qualified Safety Management System (SMS) staff with a comprehensive application of operational safety management processes and practical examples on the use of IT tools to enhance efficiency and effectiveness of safety management activities.

### ▶ LEARNING OBJECTIVES

Upon completion of the course, participants will be able to:

- identify hazards following a systematic and consistent approach;
- mitigate safety risks following a systematic and consistent approach;
- manage changes to the system in a safe manner;
- assess safety reports through a safety screening and internal investigation;
- prepare a safety audit/survey for assessing performance of the process; and
- design a safety performance monitoring scheme.

### ▶ TARGET POPULATION:

Service provider staff working for an air operator, approved maintenance organization, design/manufacturing organization, aerodrome operator, air traffic services provider or aviation training organizations that are involved in the following Safety Management System activities:

- Safety data and safety information collection
- Hazard identification
- Safety risk management
- Accident/incident investigations
- Safety data and safety information analysis
- Change management
- Safety audits and surveys
- Safety performance monitoring

### ▶ PREREQUISITE:

The Online Safety Management Training course is a mandatory prerequisite for the classroom course Safety Management for Practitioners (SMxP).

### ▶ STRUCTURE OF THE COURSE:

**Duration:** 1 week

**Delivery Mode:** Virtual Classroom

**Language of instruction:** English
