A37-20: Consolidated statement of continuing ICAO policies in the air transport field

Introduction

Whereas the Convention on International Civil Aviation establishes the basic principles to be followed by governments to ensure that international air transport services may be developed in an orderly, regular, efficient, economical, harmonious and sustainable manner and it is therefore one of the purposes of ICAO to support principles and arrangements in order that international air transport services may be established on the basis of equality of opportunity, sound and economic operation, mutual respect of the rights of States and taking into account the general interest;

Whereas air transport is a major factor in promoting and fostering sustained economic development at national as well as international levels;

Whereas it is becoming increasingly difficult, particularly for developing countries, to secure the necessary resources required to optimize the opportunities and meet the challenges inherent in the development of air transport, and to keep pace with the challenges posed by demands on air transport;

Whereas the Organization prepares guidance, studies and statistics on the development of air transport for Contracting States on a continuing basis and these should be kept current, focused and relevant and should be disseminated to Contracting States through the most effective means;

Whereas Contracting States are required to provide accurate and factual statistical data and other information in order that the Organization may prepare this guidance;

Whereas the Organization is moving toward management by objective with more focus on implementation over standard setting;

Whereas guidance developed by the Organization, and action taken by the Organization in implementing its Strategic Objectives, should assist Contracting States in developing policies and practices that facilitate the globalization, commercialization and liberalization of international air transport; and

Whereas it is important for Contracting States to participate in the work of the Organization in the air transport field:

The Assembly:

1. Resolves that the Appendices attached to this resolution and listed below constitute the consolidated statement of continuing ICAO policies in the air transport field, as these policies exist at the close of the 37th Session of the Assembly:

   Appendix A — Economic regulation of international air transport

   Appendix B — Statistics

   Appendix C — Forecasting, planning and economic analyses

   Appendix D — Facilitation

   Appendix E — Taxation

   Appendix F — Airports and air navigation services
Appendix G — Air carrier economics

Appendix H — Air mail

2. Urges Contracting States to have regard to these policies and their continuing elaboration by the Council in documents identified in this consolidated statement and by the Secretary General in manuals and circulars;

3. Urges Contracting States to make every effort to fulfil their obligations, arising out of the Convention and Assembly resolutions, to support the work of the Organization in the air transport field, and, in particular, to provide as completely and promptly as possible the statistical and other information asked for by the Organization for its air transport studies;

4. Requests the Council to attach particular importance to the problem of financing the development of the human and technical resources necessary to ensure the best possible contribution of air transport to the economic and social well-being of developing countries;

5. Requests the Council, when it considers that it would be of benefit in assisting its work on any air transport issues, to consult expert representatives from Contracting States by the most appropriate means, including the establishment of panels of such qualified experts, reporting to the Air Transport Committee or of Secretariat study groups, and working by correspondence or by meetings;

6. Requests the Council to convene Conferences or Divisional meetings, in which all Contracting States may participate, as the principal means of progressing the resolution of issues of worldwide importance in the air transport field, when such meetings are justified by the number and importance of the issues to be dealt with and where there is the likelihood of constructive action upon them;

7. Requests the Council to provide for workshops, seminars and other such meetings as may be required to disseminate ICAO’s air transport policies and associated guidance to and amongst Contracting States;

8. Requests the Council to keep the consolidated statement of ICAO’s air transport policies under review and advise the Assembly as appropriate when changes are needed to the statement; and

9. Declares that this resolution supersedes Resolution A36-15.

APPENDIX A

Economic regulation of international air transport

Section I. Agreements and arrangements

Whereas the basic principles of sovereignty, fair and equal opportunity, non-discrimination, interdependence, harmonization and cooperation set out in the Convention have served international air transport well and continue to provide the basis for its future development;

Whereas multilateralism in commercial rights to the greatest possible extent continues to be an objective of the Organization;
Whereas within the framework of the Convention, Contracting States have many differing regulatory goals and policies but share a fundamental objective of participation through reliable and sustained involvement in the international air transport system;

Whereas one of the objectives of the Convention is that international air transport services may be operated soundly and economically and in that regard the International Air Services Transit Agreement (IASTA) facilitates the achievement of that objective for the Contracting States who are already parties to it;

Whereas the Assembly has repeatedly stressed the obligation of each Contracting State to comply with Article 83 of the Convention by registering with the Council as soon as possible all arrangements relating to international civil aviation, in accordance with the Rules for Registration with ICAO of Aeronautical Agreements and Arrangements;

Whereas undue delays and non-compliance relating to the registration of aeronautical agreements and arrangements are not desirable for the accuracy and completeness of regulatory information and for enhancing transparency;

Whereas the establishment of international air transport fares and rates should be fair, transparent and designed to promote the satisfactory development of air services;

Whereas consumer interest should be given due regard in the development of policy and regulation of international air transport;

Whereas there is a need to adapt to the changing regulatory and operating environment in the air transport field and the Organization has accordingly developed policy guidance for the regulation of international air transport, including model clauses and template air services agreements, for optional use by States in bilateral or regional agreements; and

Noting that the Organization has developed and provided to States an innovative meeting facility, the ICAO Air Services Negotiation Conference (ICAN), which facilitates and improves the efficiency of their air services negotiations and consultations:

The Assembly:

1. Reaffirms the primary role of ICAO in developing policy guidance on the regulation of international air transport and in assisting and facilitating liberalization as necessary;

2. Urges Contracting States that have not yet become parties to the International Air Services Transit Agreement (IASTA) to give urgent consideration to so doing;

3. Urges all Contracting States to register cooperative agreements and arrangements relating to international civil aviation with ICAO in accordance with Article 83 of the Convention and the Rules for Registration with ICAO of Aeronautical Agreements and Arrangements;

4. Urges Contracting States to keep the Council fully informed of serious problems arising from the application of air services agreements or arrangements and of any developments which tend toward the objective of multilateralism in the exchange of commercial rights;

5. Encourages Contracting States to make use of and benefit from the ICAO Air Services Negotiation Conference facility;

6. Requests the Council to continue to cooperate with regional and subregional bodies in their examination and development of measures of cooperation, including liberalized arrangements, and
the results of these measures, in order to see whether similar or other measures should at the appropriate time be recommended to Contracting States for application on a wider basis;

7. **Requests** the Council to continue the comparative and analytical study of the policies and practices of Contracting States and airlines concerning commercial rights and the provisions of air services agreements and to inform all Contracting States of any new developments in international cooperation, including liberalized arrangements, with respect to commercial rights;

8. **Requests** the Council to keep under review the machinery for establishing the Organization’s policy guidance on the regulation of international air transport, and to revise or update it as required;

9. **Requests** the Council to review periodically the rules for registration of aeronautical agreements and arrangements with a view to simplifying the process of registration;

10. **Requests** the Secretary General to remind Contracting States of the importance of registration without undue delay, of aeronautical agreements and arrangements and to provide such assistance to Contracting States as they may require in registering their aeronautical agreements and arrangements with the Council; and

11. **Requests** the President of the Council and the Secretary General to promote universal adherence to and implementation of the International Air Services Transit Agreement (IASTA) and to urge Contracting States to inform the Secretariat of their intentions with respect to adherence to the agreement.

**Section II. Cooperation in regulatory arrangements**

**Whereas** certain economic, financial and operational constraints unilaterally introduced at the national level affect the stability of, and tend to create unfair discriminatory trading practices in, international air transport and might be incompatible with the basic principles of the Convention and the orderly and harmonious development of international air transport;

**Whereas** the provision of regular and reliable air transport services is of fundamental importance to the development of the economies of States, especially the developing States, including those dependent on tourism;

**Whereas** the strict application of the criterion of substantial ownership and effective control for the authorization of an airline to exercise route and other air transport rights could deny many States a fair and equal opportunity to operate international air services and to optimize the benefits to be derived therefrom;

**Whereas** air carrier designation and authorization for market access should be liberalized at each State’s pace and discretion progressively, flexibly and with effective regulatory control in particular regarding safety and security;

**Whereas** the broadening or the flexible application of the criteria for airline designation and authorization could help create an operating environment in which international air transport may develop and flourish in a stable, efficient and economical manner, and contribute to the participation objectives of States in the liberalization process, without prejudice to States’ obligations for aviation safety and security;

**Whereas** the realization of developmental objectives among such States is increasingly being promoted by cooperative arrangements in the form of regional economic groupings and functional
cooperation symbolic of the affinity and community of interest which are particularly shared among
developing States belonging to such regional economic integration movements; and

Whereas the exercise of route and other air transport rights of a developing State having such
community of interest by an airline substantially owned and effectively controlled by another developing
State or States or its or their nationals sharing the same community of interests will serve to promote the
foregoing interests of developing States:

The Assembly:

1. Urges Contracting States to avoid adopting unilateral measures that may affect the orderly
and harmonious development of international air transport and to ensure that domestic policies and
legislation are not applied to international air transport without taking due account of its special
characteristics;

2. Urges Contracting States to accept such designations and allow such airlines to exercise the
route rights and other air transport rights of a State or States, in particular developing States, within the
same grouping, under mutually acceptable terms and conditions including air transport agreements
negotiated or to be negotiated by the parties concerned;

3. Urges Contracting States to recognize the concept of community of interest within regional or
subregional economic groupings as a valid basis for the designation by one developing State or States of
an airline of another developing State or States within the same regional economic grouping where such
airline is substantially owned and effectively controlled by such other developing State or States or its or
their nationals;

4. Urges Contracting States to give consideration to the use of alternative criteria for airline
designation and authorization, including those developed by ICAO, and to adopt a flexible and positive
approach to accommodate other States in their efforts to liberalize air carrier ownership and control
without compromising safety and security;

5. Invites Contracting States with experience in various forms of joint operation of international
air services to submit to the Council, on a continuing basis, full information concerning their experience,
so that the Organization may have in this particular field all information that might be of assistance to
Contracting States;

6. Requests the Council, when approached, to render all feasible assistance to Contracting
States wishing to enter regional or subregional economic groupings with respect to the operation of
international air services; and

7. Requests the Council to give assistance, when approached, to Contracting States that take
the initiative in developing cooperative arrangements for the joint ownership and operation of
international air services, directly among themselves or whose airlines develop such arrangements, and to
promptly circulate to States information concerning such cooperative arrangements.

Section III. Airline product distribution

Whereas the advancement of information and electronic technologies have had a significant
impact on the way the airline industry is doing business, particularly on its product distribution; and

Whereas ICAO has developed a Code of Conduct for the Regulation and Operation of Computer
Reservation Systems (CRSs) for States to follow, and two related Model Clauses for optional use by
States in their air services agreements:
The Assembly:

1. Requests the Council to monitor developments in airline product distribution and related regulatory practices, and disseminate information to Contracting States on significant developments; and

2. Requests the Council to review whether there is a continued need for the ICAO CRS Code and Model Clauses in light of the industry and regulatory changes.

Section IV. Trade in services

Whereas on the issue of including aspects of international air transport under the General Agreement on Trade in Services (GATS), ICAO has actively promoted an understanding by all parties concerned of the provisions of the Convention on International Civil Aviation and of the particular mandate and role of ICAO in international air transport:

The Assembly:

1. Reaffirms the need for ICAO to continue to explore future regulatory arrangements and develop recommendations and proposals to meet the challenges facing international air transport, responding to the internal and external changes affecting it;

2. Recognizes that such arrangements should create an environment in which international air transport may develop and continue to flourish in an orderly, efficient and economical manner without compromising safety and security, while ensuring the interests of all Contracting States and their effective and sustained participation in international air transport;

3. Reaffirms the primary role of ICAO in developing policy guidance on the regulation of international air transport;

4. Urges Contracting States that participate in trade negotiations, agreements and arrangements relating to international air transport to:

   a) ensure internal coordination in their national administrations and in particular the direct involvement of aeronautical authorities and the aviation industry in the negotiations;

   b) ensure that their representatives are fully aware of the provisions of the Convention on International Civil Aviation, the particular characteristics of international air transport and its regulatory structures, agreements and arrangements;

   c) take into account their rights and obligations vis-à-vis those of ICAO Member States which are not members of the World Trade Organization;

   d) examine carefully the implications of any proposed inclusion of an additional air transport service or activity in the GATS bearing in mind, in particular, the close linkage between economic, environmental, safety and security aspects of international air transport;

   e) promote a full understanding of the role and mandate of ICAO in developing policy guidance on economic regulation, including liberalization of international air transport, and consider using this guidance; and
f) file with ICAO under Article 83 of the Convention copies of any exemptions and specific commitments pertaining to international air transport made under the GATS;

5. Requests the World Trade Organization, its Member States and Observers to accord due consideration to:

   a) the particular regulatory structures and arrangements of international air transport and the liberalization taking place at the bilateral, subregional and regional levels;
   
   b) ICAO’s constitutional responsibility for international air transport and, in particular, for its safety and security; and
   
   c) ICAO’s existing policy and guidance material on the economic regulation of international air transport and its continued work in the field; and

6. Requests the Council to:

   a) continue to exert a global leadership role in facilitating and coordinating the process of economic liberalization while ensuring safety, security and environmental protection in international air transport;
   
   b) pursue in a proactive manner developments in trade in services that might impinge on international air transport and inform Contracting States accordingly; and
   
   c) promote continued effective communication, cooperation and coordination between ICAO, the World Trade Organization, and other intergovernmental and non-governmental organizations dealing with trade in services.

Section V. Elaboration of policy guidance

Whereas governments have international obligations and responsibilities in the economic regulation of international air transport;

Whereas economic liberalization and the evolution of air transport industry will continue to bring about opportunities, challenges and issues with respect to the regulation of international air transport; and

Whereas the Organization has addressed many of the regulatory issues and compiled related policies and guidance material:

The Assembly:

1. Urges Contracting States in their regulatory functions to have regard to the policies and guidance material developed by ICAO on economic regulation of international air transport, such as those contained in Doc 9587, Policy and Guidance Material on the Economic Regulation of International Air Transport; and

2. Requests the Council to ensure that these policies and guidance material are current and responsive to the requirements of Contracting States, and to develop guidance on emerging issues of general interest where required.
Whereas ICAO’s Statistics Programme provides an independent and global foundation for the purpose of fostering the planning and sustainable development of international air transport;

Whereas each Contracting State has undertaken that its international airlines shall file the statistics requested by the Council in accordance with Article 67 of the Convention;

Whereas the Council has also laid down requirements for statistics on domestic airline operations, international airports, and international route facilities, pursuant to Articles 54 and 55 of the Convention;

Whereas the Council has laid down requirements for data collection on civil aircraft on register pursuant to Article 21 of the Convention;

Whereas there is a need for the Organization to collect data from States on annual aviation fuel consumption to be used to address emerging challenges of sustainable development of air transport;

Whereas the nomination by States of focal points for aviation statistics will facilitate the timely filing of statistics and data requested by ICAO;

Whereas the Council has adopted a policy of management by objective which requires collection of pertinent data and analysis to measure the performance of the Organization as a whole and of its constituent parts in meeting the Strategic Objectives of the Organization;

Whereas the development of ICAO’s integrated statistical database for validation and storage of data provides Contracting States and other users with an efficient online system for the retrieval of statistical data;

Whereas a number of Contracting States are still not filing, or have not been filing completely, the statistics requested by the Council; and

Whereas cooperation amongst international organizations active in the area of collection and distribution of aviation statistics may enable reduction in the burden of filing statistics:

The Assembly:

1. Urges Contracting States to nominate focal points for aviation statistics, and to make every effort to provide the statistics required by ICAO on time and to submit them electronically whenever possible;

2. Requests the Council, calling on national experts in the relevant disciplines as required, to examine on a regular basis the statistical data collected by ICAO in order to meet more effectively the needs of the Organization and its Member States, and to establish the necessary metrics to monitor the performance of the Organization in meeting its Strategic Objectives, to improve the uniformity of the statistics, the completeness and timeliness of reporting by Contracting States, and the form and content of analyses; and

3. Requests the Council to:

   a) continue to explore ways of closer cooperation with other international organizations active in the collection and distribution of aviation statistics; and
b) make arrangements, on an appropriate basis, for assistance to be given upon request to Contracting States by personnel of the Secretariat for the improvement of their civil aviation statistics and their statistical reporting to the Organization.

APPENDIX C

Forecasting, planning and economic analyses

Whereas ICAO’s independence in carrying out investigations into trends and in applying economic analyses provides a necessary foundation for fostering the planning and sustainable development of international air transport;

Whereas Contracting States require global and regional forecasts of future civil aviation developments for various purposes;

Whereas the Council, in carrying out its continuing functions in the economic field, must foresee future developments likely to require action by the Organization and must initiate such action in good time;

Whereas the Organization has to regularly assess its performance against its Strategic Objectives with particular focus on safety, security, environmental protection and sustainable development of air transport; and

Whereas the Organization requires specific forecasts and economic support for airports and air navigation systems planning and environmental monitoring and planning purposes:

The Assembly:

1. Requests the Council to prepare and maintain, as necessary, forecasts of future trends and developments in civil aviation of both a general and a specific kind, including, where possible, local and regional as well as global data, and to make these available to Contracting States and support data needs of safety, security, environment and efficiency;

2. Requests the Council to develop methodologies and procedures for the preparation of forecasts, the analyses of cost-benefit or cost-effectiveness, and the development of business cases to meet the needs of the Organization, the regional air navigation planning groups and, as required, other systems or environmental planning bodies of the Organization; and

3. Requests the Council to make arrangements to collect and develop material on current forecasting methods both for the purposes described in clauses 1 and 2 and for dissemination to Contracting States from time to time as guidance in their own forecasting, planning and economic analyses.

APPENDIX D

Facilitation

Section I. Development and implementation of facilitation provisions

Whereas Annex 9 — Facilitation, was developed as a means of articulating the obligations of Contracting States under Articles 22, 23 and 24 of the Convention and standardizing procedures for meeting the legal requirements referred to in Articles 10, 13, 14, 29 and 35;
Whereas implementation of the Standards and Recommended Practices in Annex 9 is essential to facilitate the clearance of aircraft, passengers and their baggage, cargo and mail and manage challenges in border controls and airport processes so as to maintain the efficiency of air transport operations;

Whereas it is essential that Contracting States continue to pursue the objective of maximizing efficiency and security in such clearance operations;

Whereas the Convention on the Rights of Persons with Disabilities and its Optional Protocol, that had been adopted in December 2006 by the United Nations General Assembly, entered into force on 3 May 2008;

Whereas the development of specifications for machine readable travel documents by the Organization has proved effective in the development of systems that expedite the movement of international passengers and crew members through clearance control at airports while enhancing immigration compliance programmes; and

Whereas the development of a set of standard signs to facilitate the efficient use of airport terminals by travellers and other users has proved effective and beneficial:

The Assembly:

1. Urges Contracting States to give special attention to increasing their efforts to implement Annex 9 Standards and Recommended Practices;

2. Requests the Council to ensure that Annex 9 — Facilitation, is current and addresses the contemporary requirements of Contracting States with respect to administration of border controls, cargo and passengers, the protection of passenger and crew health and the accessibility to air transport by persons with disabilities;

3. Requests the Council to ensure that the provisions of Annex 9 — Facilitation, and Annex 17 — Security, are compatible with and complementary to each other;

4. Requests the Council to ensure that its specifications and guidance material in Doc 9303, Machine Readable Travel Documents, remain up to date in the light of technological advances and to continue to explore technological solutions aimed at improving clearance procedures; and

5. Requests the Council to ensure that Doc 9636, International Signs to Provide Guidance to Persons at Airports and Marine Terminals, is current and responsive to the requirements of Contracting States.

Section II. International cooperation in protecting the security and integrity of passports

Whereas the passport is the basic official document that denotes a person’s identity and citizenship and is intended to inform the State of transit or destination that the bearer can return to the State which issued the passport;

Whereas international confidence in the integrity of the passport is essential to the functioning of the international travel system;

Whereas the veracity and validity of machine readable travel documents (MRTDs) depends on the documentation used to establish identity, confirm citizenship or nationality and assess entitlement of the passport applicant (i.e. ‘breeder’ documentation);
Whereas Member States of the United Nations have resolved, under the Global Counter-Terrorism Strategy adopted on 8 September 2006, to step up efforts and cooperation at every level, as appropriate, to improve the security of manufacturing and issuing identity and travel documents and to prevent and detect their alteration or fraudulent use;

Whereas Resolution 1373 adopted by the United Nations Security Council on 28 September 2001, decided that all States shall prevent the movement of terrorists or terrorist groups by effective border controls and controls on issuance of identity papers and travel documents, and through measures for preventing counterfeiting, forgery or fraudulent use of identity papers and travel documents;

Whereas high-level cooperation among States is required in order to strengthen resistance to passport fraud, including the forgery or counterfeiting of passports, the use of forged or counterfeit passports, the use of valid passports by impostors, the use of expired or revoked passports, and the use of fraudulently obtained passports;

Whereas the use of stolen blank passports, by those attempting to enter a country under a false identity, is increasing worldwide; and

Whereas ICAO provides assistance to States in all matters related to MRTDs including project planning, implementation, education, training and system evaluation services, and has set up the Public Key Directory (PKD) to strengthen the security of biometrically-enhanced MRPs (ePassports):

The Assembly:

1. Urges Contracting States to intensify their efforts to safeguard the security and integrity of the breeder documentation;

2. Urges Contracting States to intensify their efforts to safeguard the security and integrity of their passports, to protect their passports against passport fraud, and to assist one another in these matters;

3. Urges those Contracting States that have not already done so, to issue machine readable passports in accordance with the specifications of Doc 9303, Part 1;

4. Urges Contracting States to ensure that the expiration date of non-machine readable passports falls before 24 November 2015;

5. Urges those Contracting States requiring assistance in implementing MRTD standards and specifications to contact ICAO without delay;

6. Requests the Council to take appropriate measures to establish guidance on breeder documentation;

7. Requests the Council to continue the work on enhancing the effectiveness of controls on passport fraud by implementing the related SARPs of Annex 9 and developing guidance material to assist Contracting States in maintaining the integrity and security of their passports and other travel documents;

8. Urges those States issuing ePassports to join the ICAO PKD; and all receiving States to verify the digital signatures associated with the passports; and

9. Urges those Contracting States that are not already doing so, to provide routine and timely submissions of lost and stolen passport data to Interpol’s Automated Search Facility/Stolen and Lost Travel Document Database.
Section III. National and international action and cooperation on facilitation matters

Whereas there is a need for continuing action by Contracting States to improve the effectiveness and efficiency of clearance control formalities;

Whereas the establishment and active operation of national facilitation committees is a proven means of effecting needed improvements;

Whereas cooperation on facilitation matters amongst Contracting States and with the various national and international parties interested in facilitation matters has brought benefits to all concerned; and

Whereas such cooperation has become vital in the light of the proliferation of non-uniform passenger data exchange systems that adversely affect the viability of the air transport industry:

The Assembly:

1. Urges Contracting States to establish and utilize national facilitation committees and adopt policies of cooperation on a regional basis among neighbouring States;

2. Urges Contracting States to participate in regional and subregional facilitation programmes of other intergovernmental aviation organizations;

3. Urges Contracting States to take all necessary steps, through national facilitation committees or other appropriate means, for:
   a) regularly calling the attention of all interested departments of their governments to the need for:
      1) making the national regulations and practices conform to the provisions and intent of Annex 9; and
      2) working out satisfactory solutions for day-to-day problems in the facilitation field; and
   b) taking the initiative in any follow-up action required;

4. Urges Contracting States to encourage the study of facilitation problems by their national and other facilitation committees and to coordinate the findings of their committees on facilitation problems with those of other Contracting States with which they have air links;

5. Urges neighbouring and bordering States to consult one another about common problems that they may have in the facilitation field whenever it appears that these consultations may lead to a uniform solution of such problems;

6. Urges Contracting States to encourage their aircraft operators to continue to cooperate intensively with their governments as regards:
   a) identification and solution of facilitation problems; and
   b) developing cooperative arrangements for the prevention of illicit narcotics trafficking, illegal immigration and other threats to national interests;
7. **Urges** Contracting States to call upon international operators and their associations to participate to the extent possible in electronic data interchange systems in order to achieve maximum efficiency levels in the processing of passenger and cargo traffic at international terminals;

8. **Urges** Contracting States, in their use of electronic data interchange systems, to ensure that their passenger data requirements conform to international standards adopted by relevant United Nations agencies for this purpose; and

9. **Urges** States and operators, in cooperation with interested international organizations, to make all possible efforts to speed up the handling and clearance of air cargo, while ensuring the security of the international supply chain.

**APPENDIX E**

**Taxation**

*Whereas* international air transport plays a major role in the development and expansion of international trade and travel and the imposition of taxes on aircraft, fuel, and consumable technical supplies used for international air transport, taxes on the income of international air transport enterprises and on aircraft and other movable property associated with the operation of aircraft in international air transport, and taxes on its sale or use, may have an adverse economic and competitive impact on international air transport operations;

*Whereas* ICAO policies in Doc 8632, *ICAO’s Policies on Taxation in the Field of International Air Transport*, make a conceptual distinction between a charge and a tax in that ‘a charge is a levy that is designed and applied specifically to recover the costs of providing facilities and services for civil aviation, and a tax is a levy that is designed to raise national or local government revenues which are generally not applied to civil aviation in their entirety or on a cost-specific basis’;

*Whereas* it is a matter of great concern that taxes are increasingly being imposed by some Contracting States in respect of certain aspects of international air transport and that charges on air traffic, several of which can be categorized as taxes on the sale or use of international air transport, are proliferating;

*Whereas* the matter of aircraft engine emission-related levies is addressed in Assembly Resolution A37-18, *Consolidated statement of continuing ICAO policies and practices related to environmental protection – General provisions, noise and local air quality (Appendix H, Aviation impact on local air quality)*; and

*Whereas* the resolution in Doc 8632 supplements Article 24 of the Convention and is designed to recognize the uniqueness of international civil aviation and the need to accord tax exempt status to certain aspects of the operations of international air transport:

*The Assembly:*

1. **Urges** Contracting States to follow the resolution of the Council as contained in Doc 8632, *ICAO’s Policies on Taxation in the Field of International Air Transport*; and

2. **Requests** the Council to ensure that the guidance and advice contained in Doc 8632 are current and responsive to the requirements of Contracting States.
APPENDIX F

Airports and air navigation services

Section I. Charging policy

Whereas ICAO policies in Doc 9082, *ICAO’s Policies on Charges for Airports and Air Navigation Services* make a conceptual distinction between a charge and a tax in that ‘a charge is a levy that is designed and applied specifically to recover the costs of providing facilities and services for civil aviation, and a tax is a levy that is designed to raise national or local government revenues which are generally not applied to civil aviation in their entirety or on a cost-specific basis’;

Whereas the matter of aircraft engine emission-related levies and market-based measures is addressed separately in Assembly Resolution A37-18, *Consolidated statement of continuing ICAO policies and practices related to environmental protection – General provisions, noise and local air quality (Appendix H, Aviation impact on local air quality)*, and in Assembly Resolution A37-19, *Consolidated statement of continuing ICAO policies and practices related to environmental protection – Climate change*;

Whereas Article 15 of the Convention establishes the basis for the application and disclosure of charges for airports and air navigation services;

Whereas the Council has been directed to formulate recommendations for the guidance of Contracting States with regard to the principles on which providers of airports and air navigation services for international civil aviation may charge to recover the costs of their provision and derive other revenue therefrom, and with regard to the methods that may be employed to that effect; and

Whereas the Council has adopted and revised, as necessary, and published in Doc 9082, *ICAO’s Policies on Charges for Airports and Air Navigation Services*:

The Assembly:

1. Urges Contracting States to ensure that Article 15 of the Convention is fully respected;

2. Urges Contracting States to base the recovery of the costs of the airports and air navigation services they provide or share in providing for international civil aviation on the principles set forth in Article 15 of the Convention and additionally in Doc 9082, *ICAO’s Policies on Charges for Airports and Air Navigation Services*, regardless of the organizational structure under which the airports and air navigation services are operated;

3. Urges Contracting States to ensure that airport and air navigation services charges are applied towards defraying the costs of providing facilities and services for civil aviation;

4. Urges Contracting States to make every effort pursuant to Article 15 of the Convention to publish and communicate to the Organization any charges that may be imposed or permitted to be imposed by a Contracting State for the use of air navigation facilities and airports by the aircraft of any other Contracting State;

5. Encourages Contracting States to adopt the principles of non-discrimination, cost-relatedness, transparency and consultation with users, as espoused in Doc 9082, in their national legislation, regulation or policies, as well as in air services agreements, to ensure compliance by airports and air navigation services providers; and
6. **Requests** the Council to ensure that the guidance and advice contained in Doc 9082 are current and responsive to the requirements of Contracting States.

### Section II. Economics and management

*Whereas* in handling growing volumes of traffic the global costs of providing airports and air navigation services continue to rise;

*Whereas* Contracting States are placing increased emphasis on improving efficiency and cost-effectiveness in the provision of airports and air navigation services;

*Whereas* a balance should be maintained between the respective financial interests of providers of airports and air navigation services on the one hand and air carriers and other users on the other and which should be based on promoting cooperation between providers and users;

*Whereas* Contracting States have called on the Organization to provide advice and guidance aimed at promoting equitable recovery of airport and air navigation services costs;

*Whereas* Contracting States are increasingly assigning the operation of airports and air navigation services to commercialized and privatized entities, which may have less awareness and knowledge of States’ obligations specified in the Convention and its Annexes and of ICAO’s policies and guidance material in the economic field, and are using multinational facilities and services to meet the commitments they have assumed under Article 28 of the Convention; and

*Whereas* the Council has adopted provisional policy guidance on the allocation of Global Navigation Satellite System (GNSS) costs to ensure an equitable treatment of all users:

The Assembly:

1. **Reminds** Contracting States that with regard to airports and air navigation services they alone remain responsible for the commitments they have assumed under Article 28 of the Convention regardless of what entity or entities operate the airports or air navigation services concerned;

2. **Urges** Contracting States to cooperate in the recovery of costs of multinational air navigation facilities and services and to consider the use of the provisional Council policy guidance on the allocation of GNSS costs;

3. **Requests** the Council to continue to develop ICAO’s policy and guidance material with a view to contributing to increased efficiency and improved cost-effectiveness in the provision and operation of airports and air navigation services, including the foundation for a sound cooperation between providers and users;

4. **Requests** the Council to continue its refinement of its policy guidance on the allocation of GNSS costs and the coordination of technical, legal and economic aspects, including cost-efficient interoperability;

5. **Requests** the Council to promote ICAO’s policies on user charges and related guidance material, including organizational and managerial advice, in order to increase the awareness and knowledge of these among States and commercialized and privatized airports and air navigation services entities;

6. **Requests** the Council to keep the economic situation of airports and air navigation services under review and make reports thereon to Contracting States at appropriate intervals; and
7. *Urges* Contracting States to make every effort to provide with the least possible delay the financial data relating to their airports and air navigation services to enable Council to provide such advice and prepare such reports.

**APPENDIX G**

**Air carrier economics**

*Whereas* there is a continuing interest among users, including international organizations with interests in tourism, aviation and trade, in the level of international air carrier costs of operation and appropriate revenue yields;

*Whereas* the objective studies by ICAO on international air transport costs and revenues are widely used by Contracting States and other international organizations, have promoted neutrality and have resulted in a more equitable system of revenue sharing; and

*Whereas* ICAO requires air carrier revenue, cost and operational data to assist the Council in assessment of the effectiveness of measures proposed for the implementation of the Strategic Objectives of the Organization, and for environmental planning, investment studies and other purposes:

*The Assembly:*

1. *Requests* the Council to instruct the Secretary General to issue periodically a study on regional differences in the level of international air transport operating costs, analysing how differences in operations and input prices may affect their levels and the impact that changes in costs may have on air transport tariffs; and

2. *Urges* Contracting States to make every effort to obtain from their international air carriers with the least possible delay the cost, revenue and other data requested by ICAO.

**APPENDIX H**

**Air mail**

*Whereas* the Assembly has given ongoing directions with regard to ICAO’s work in the field of international air mail:

*The Assembly:*

1. *Urges* Contracting States to take into account the effects on international civil aviation whenever policy is being formulated in the field of international air mail, and particularly at meetings of the Universal Postal Union (UPU); and

2. *Directs* the Secretary General to furnish to the UPU, on request and, as stipulated in relevant cooperation arrangements between UPU and ICAO, information of a factual character which may be readily available.
