PASSENGER TRAFFIC

Revenue Passenger-Kilometres - RPK

World passenger traffic grew strongly by +6.2% in February 2015 compared to February 2014, up from the relatively moderate growth registered in January 2015 (+4.6%). The timing of Chinese New Year holidays which started one month later than in 2014 partly resulted the robust growth of February.

Fall in oil price over recent months continually supports passenger demand in the following month.

FREIGHT TRAFFIC

Freight Tonne-Kilometres - FTK

World freight traffic grew robustly by +11.7% in February 2015, compared to the same period a year ago. This growth was +8.5 percentage points higher than the growth of +3.2% recorded in January 2015. Freight Tonne-Kilometres performed grew at a much faster pace than the freight capacity growth (+7.4%) in February 2015.

This strong increase of freight traffic was mainly due to the West Coast port crisis, and is deemed to be temporary, as the moderate improvement in world trade and other demand drivers will not support this robust growth for a long term.
