

NEW ONLINE PRODUCT

ICAO *DATA*⁺

Global Comparative Aviation Data

Product Description

ICAO *DATA*⁺ is a new tool that presents in a dynamic and graphical environment, powered by QlikView, the air transport statistic data collected from its 190 Member States.

The data set which includes **reports from 500 airlines and 700 airports** is the most complete source of aviation traffic and financial information in the industry today. Its historical depth allows analyses to 1980, while its forward-looking forecasting horizon reaches year 2030.

ICAO has long been recognized for the quality of global air traffic statistics and forecast which are now available online.

ICAO *DATA*⁺ enables users to quickly visualize trends, differences and similarities between air transport data selections and make competitive analyses (benchmarking) more accessible.

The new tool also allows users to bookmark their queries for repeated use in the future and to share them with other users who have access to the new ICAO platform.
