

# ICAO FSMP – WG/6

Mexico City, Mexico

*February 12<sup>th</sup>, 2018*

*Dr. Michael Garcia*

# Agenda

- Aireon Overview
- On-Orbit Acceptance Test (OOAT) Performance Results
- Other Interesting Data Proof Points
- Closing Q&A

# Aireon Overview

Global Space-based  
ADS-B Coverage

Aireon<sup>SM</sup>  
Ground Facility

ATM System

Aireon will have the first enterprise-class, continuously global, 1090 MHz space-based ADS-B system

# Constellation Overview

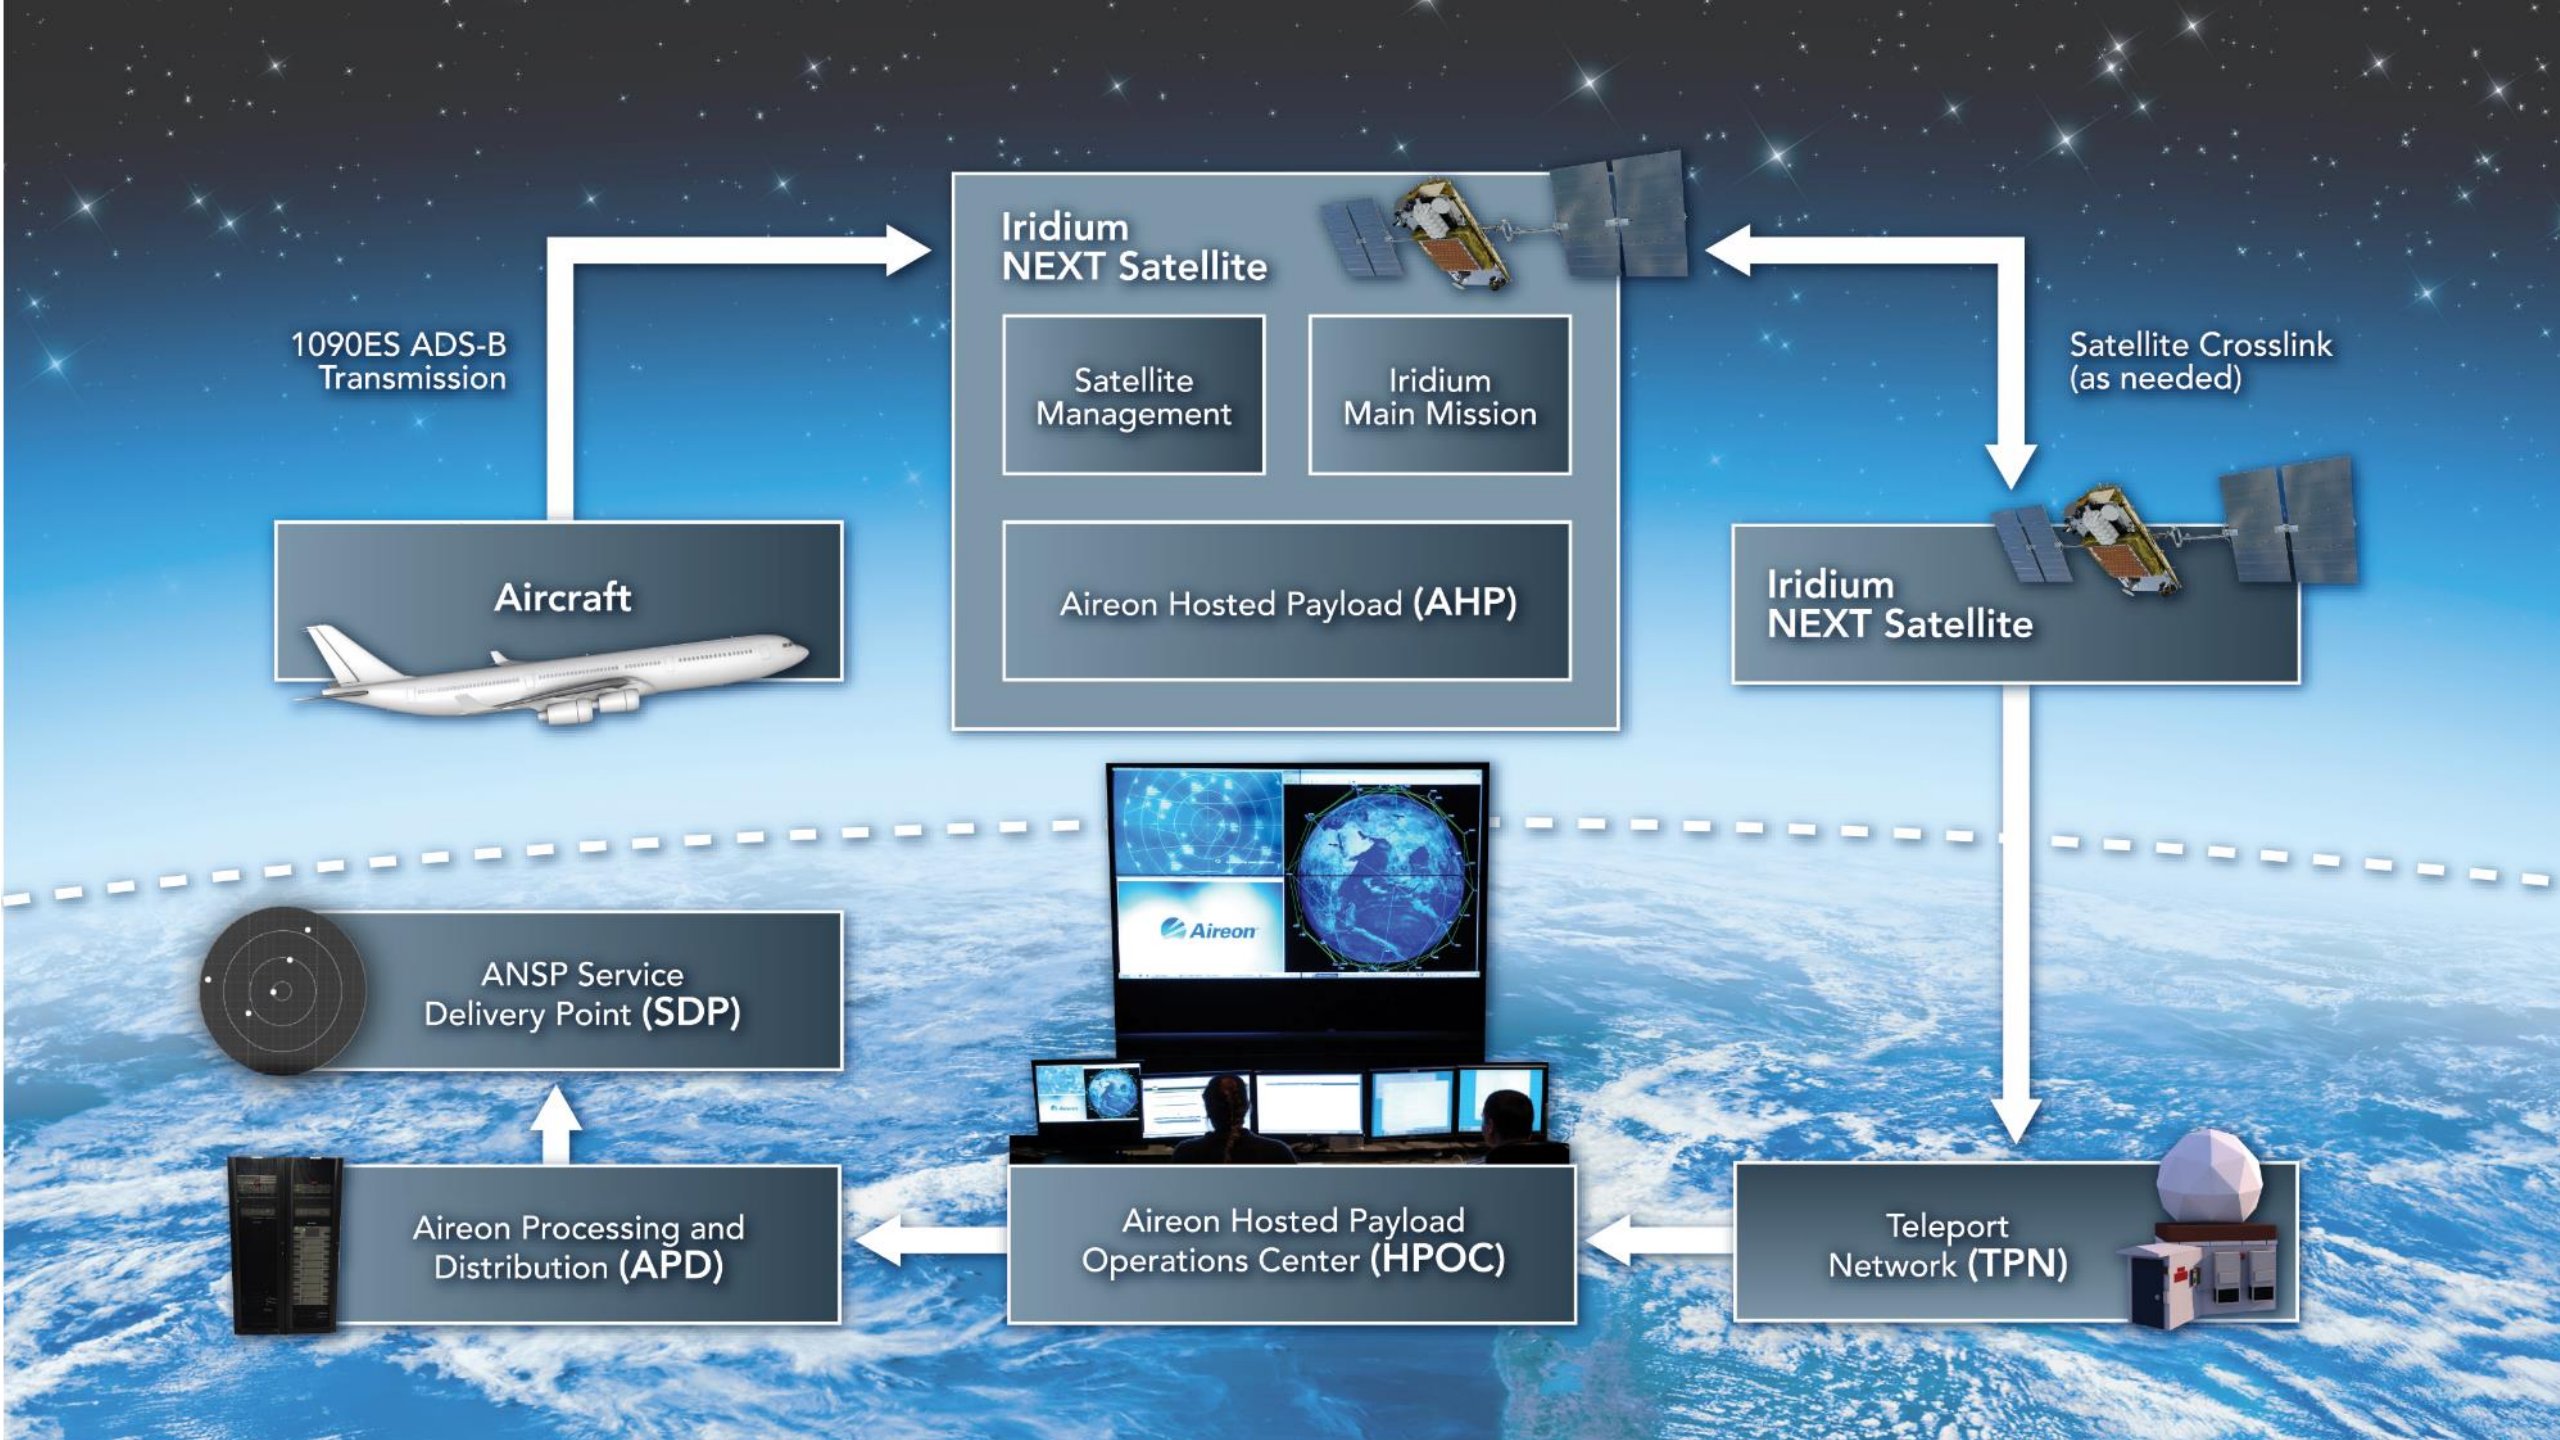

- Satellites in orbit: 66
  - 11 satellites per plane
  - Plus 9 in-orbit spare satellites and 6 ground spare satellites
- Orbital Planes: 6
- Operational altitude: 780 km
- Availability:  $\geq 0.999$

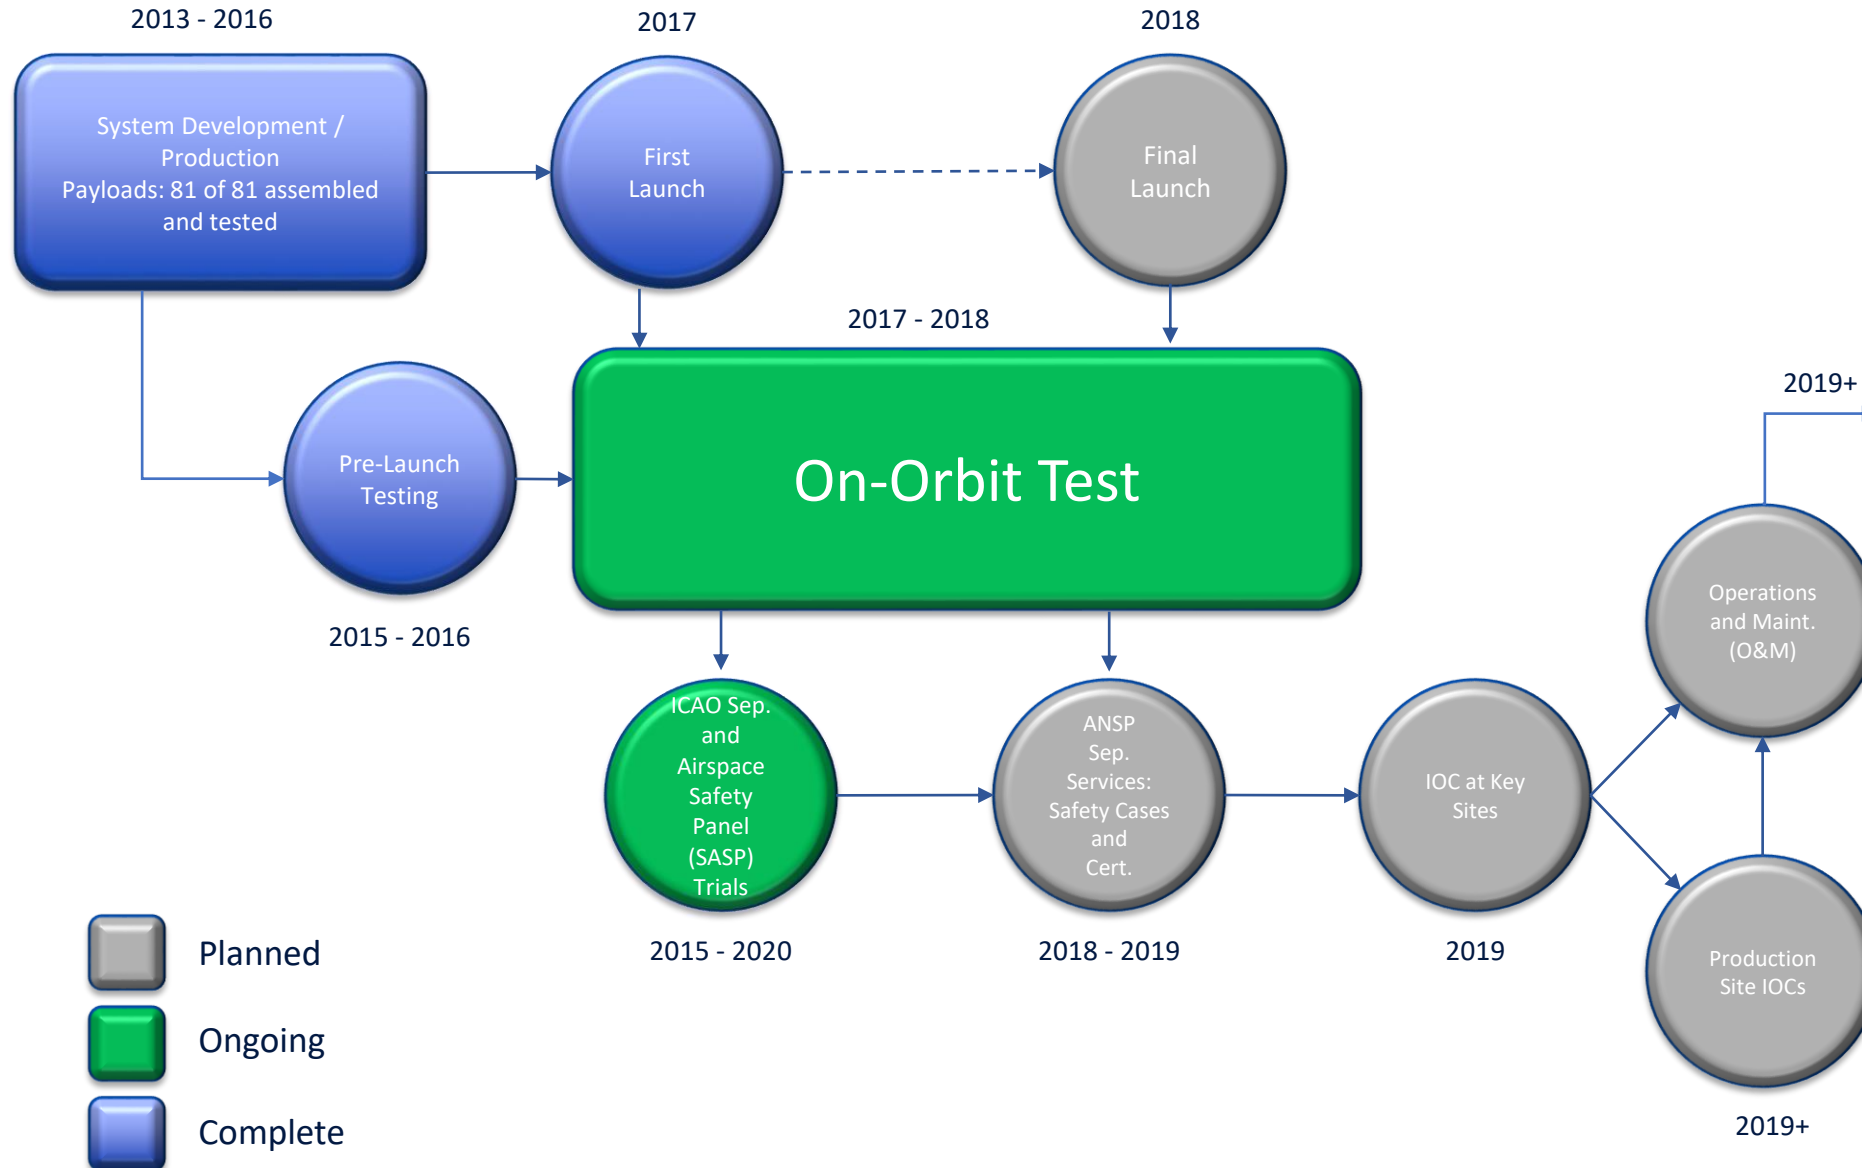

Aireon Hosted Payload

Main Mission  
Antenna L-band

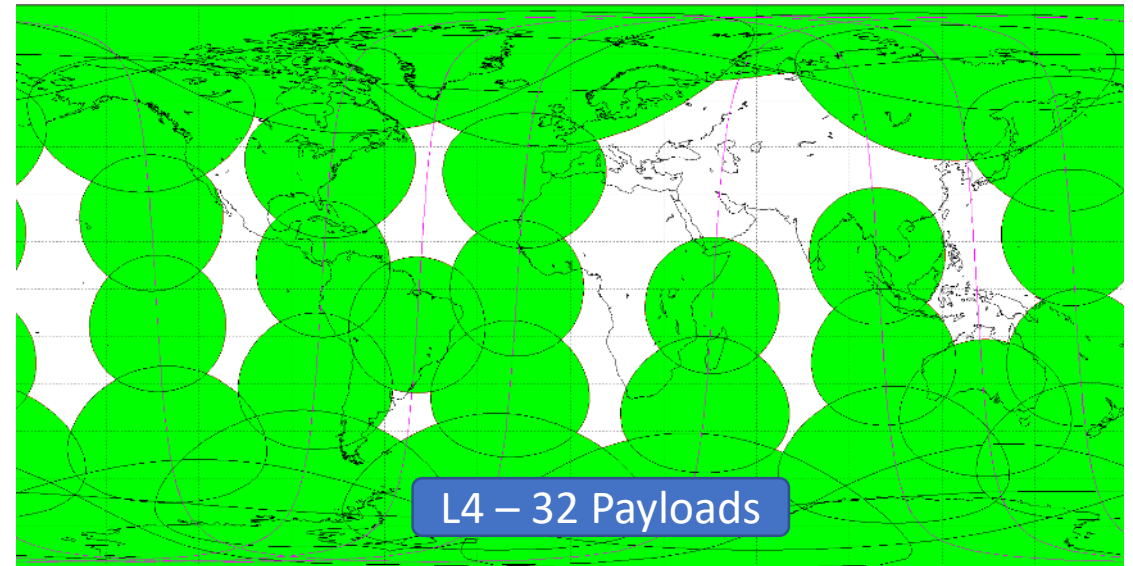

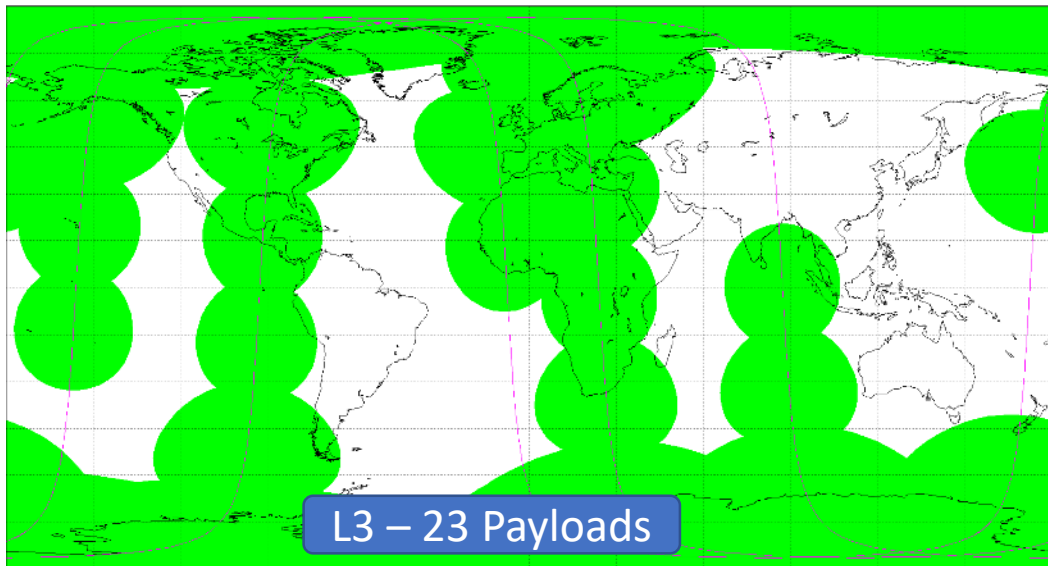

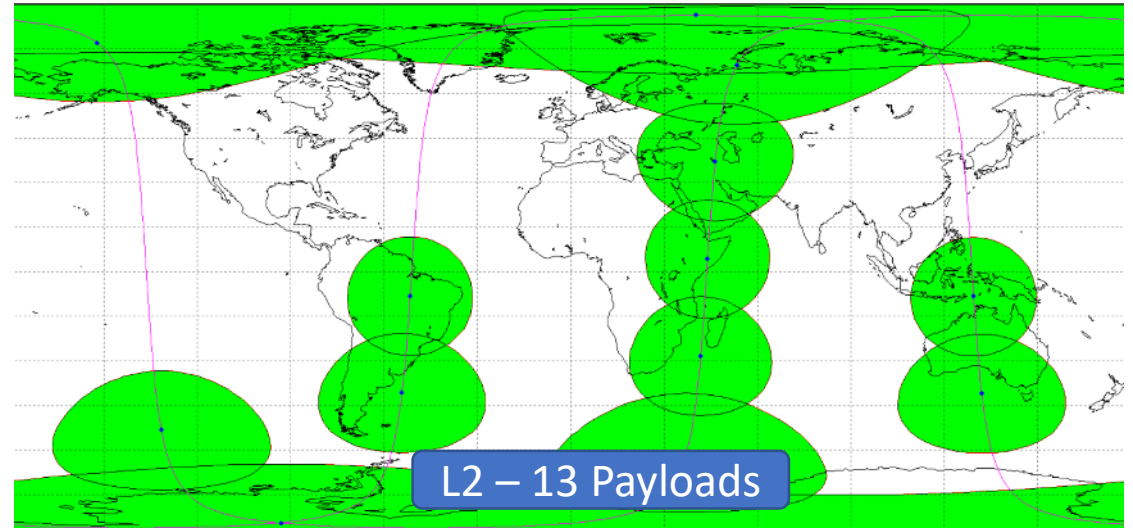

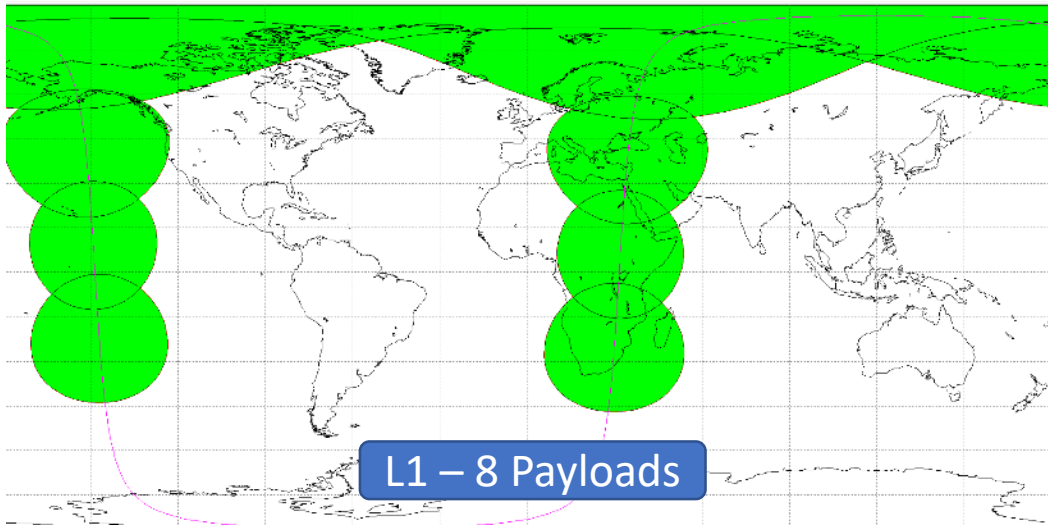

# Program Schedule

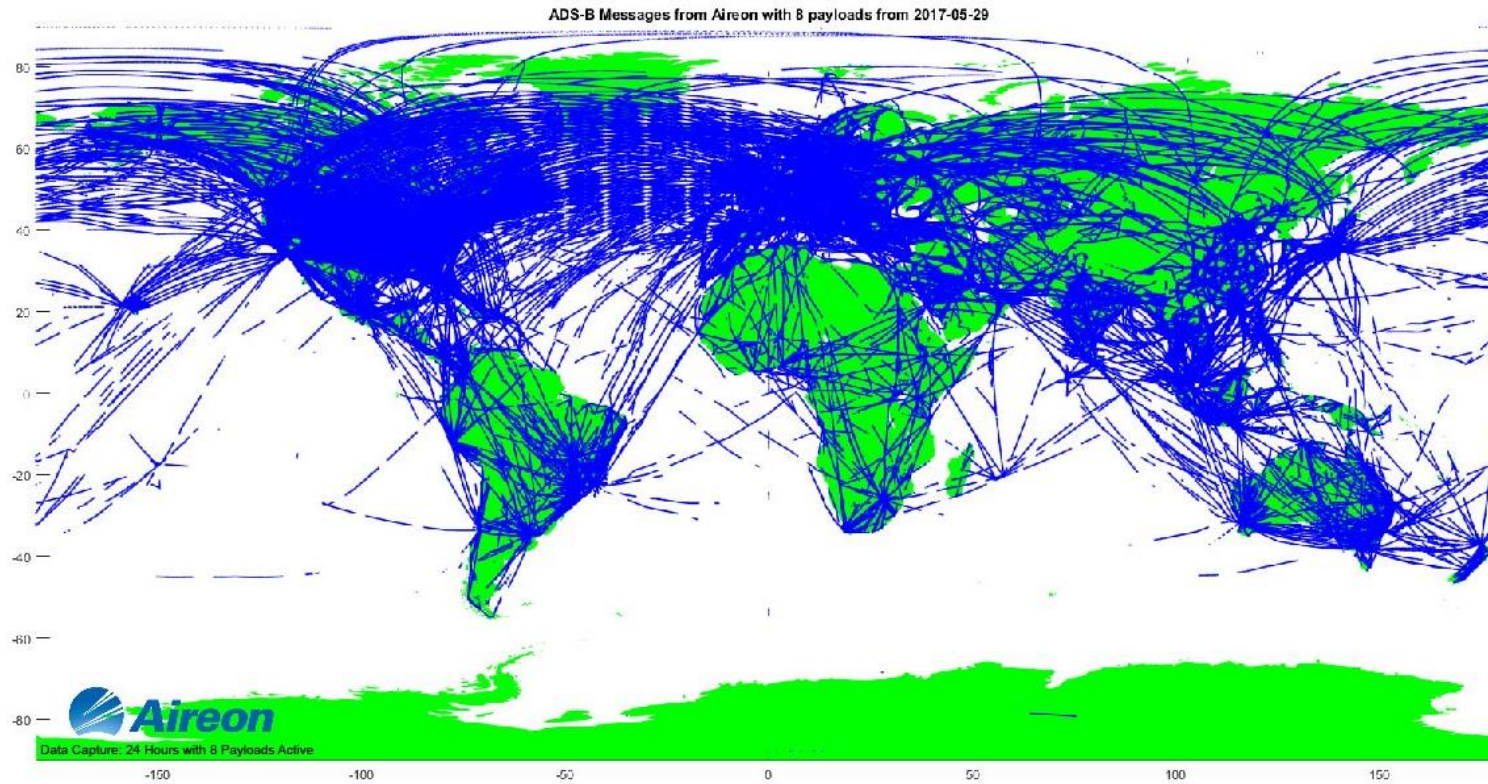

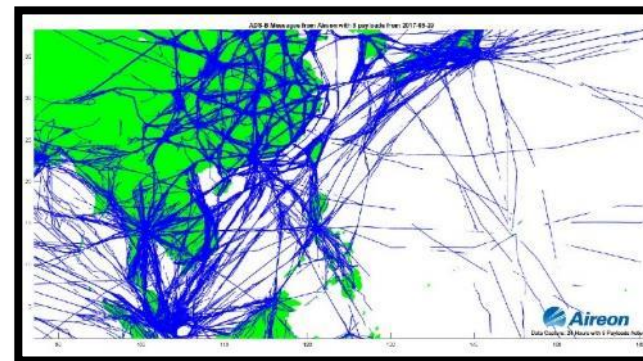

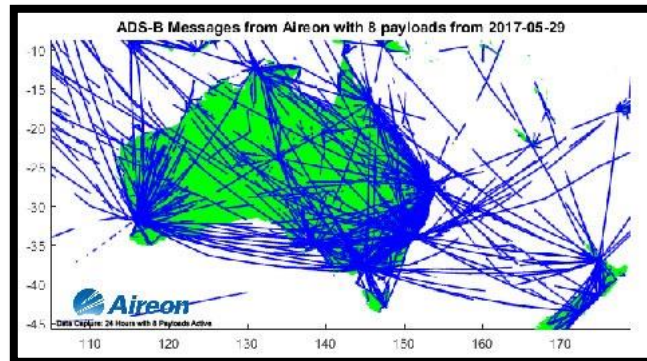

# Launch 1-4 Coverage

# Launch 1 Coverage – 8 Payloads

*8 Payloads Stitched  
Over 24 Hours  
on May 29*

# Launch 2 Coverage – 13 Payloads

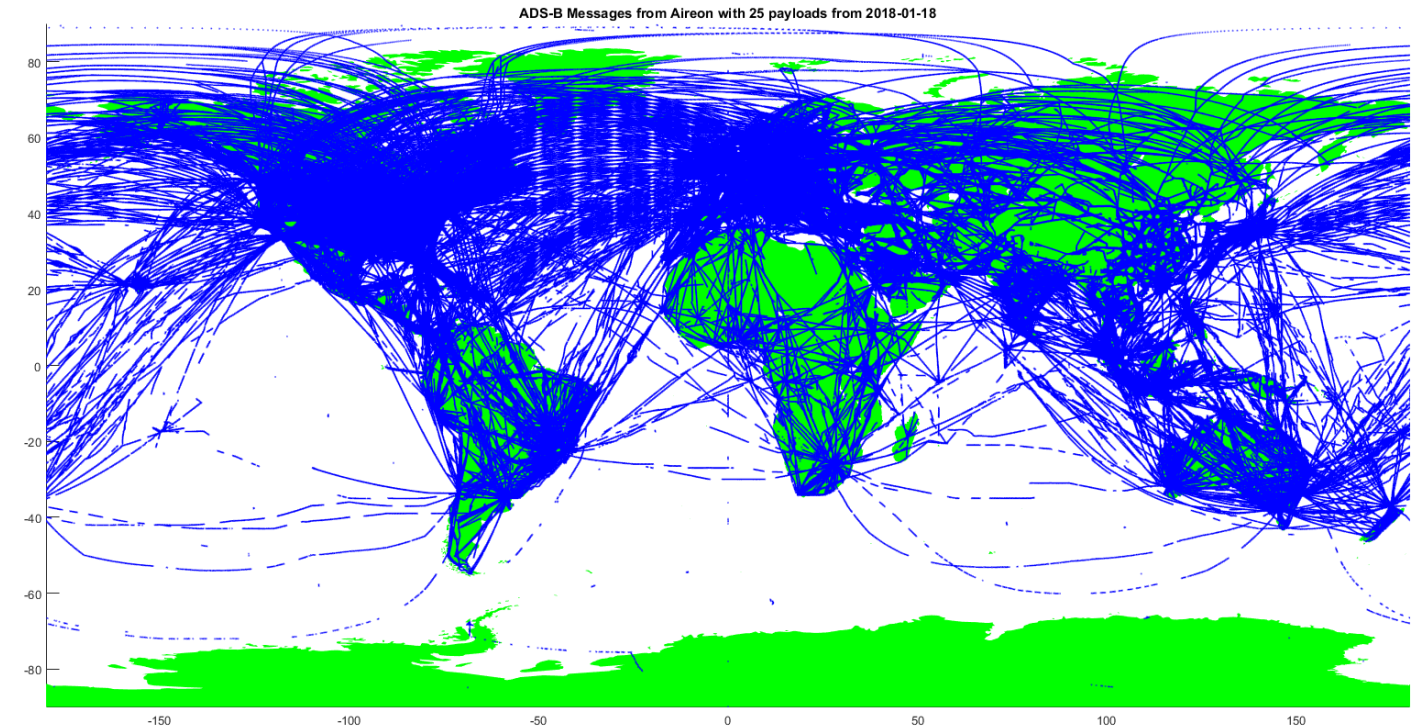

Stage 3A Service Volumes

13 Payloads Stitched  
Over 24 Hours on 7/26  
w/ Stage 3A

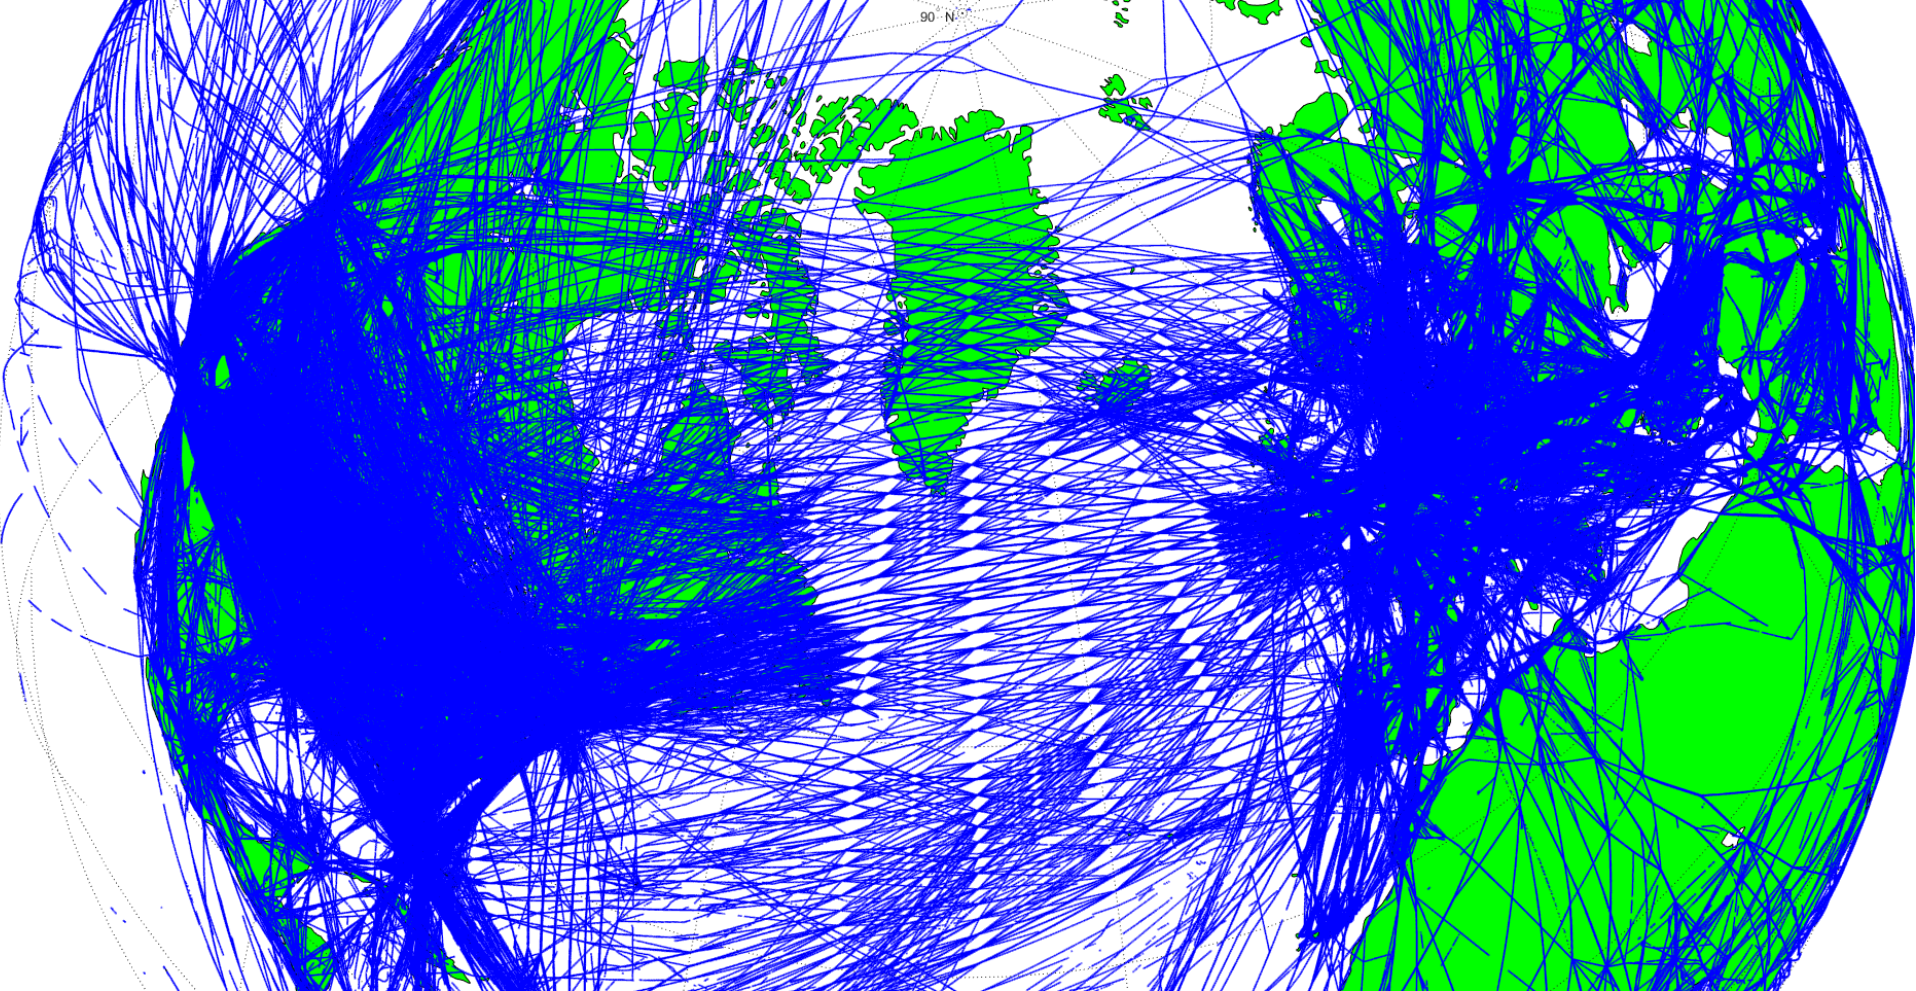

# Hamburger Counter and Coverage Overview

As of Jan 2018, Aireon receives over 6 billion ADS-B position messages per month!

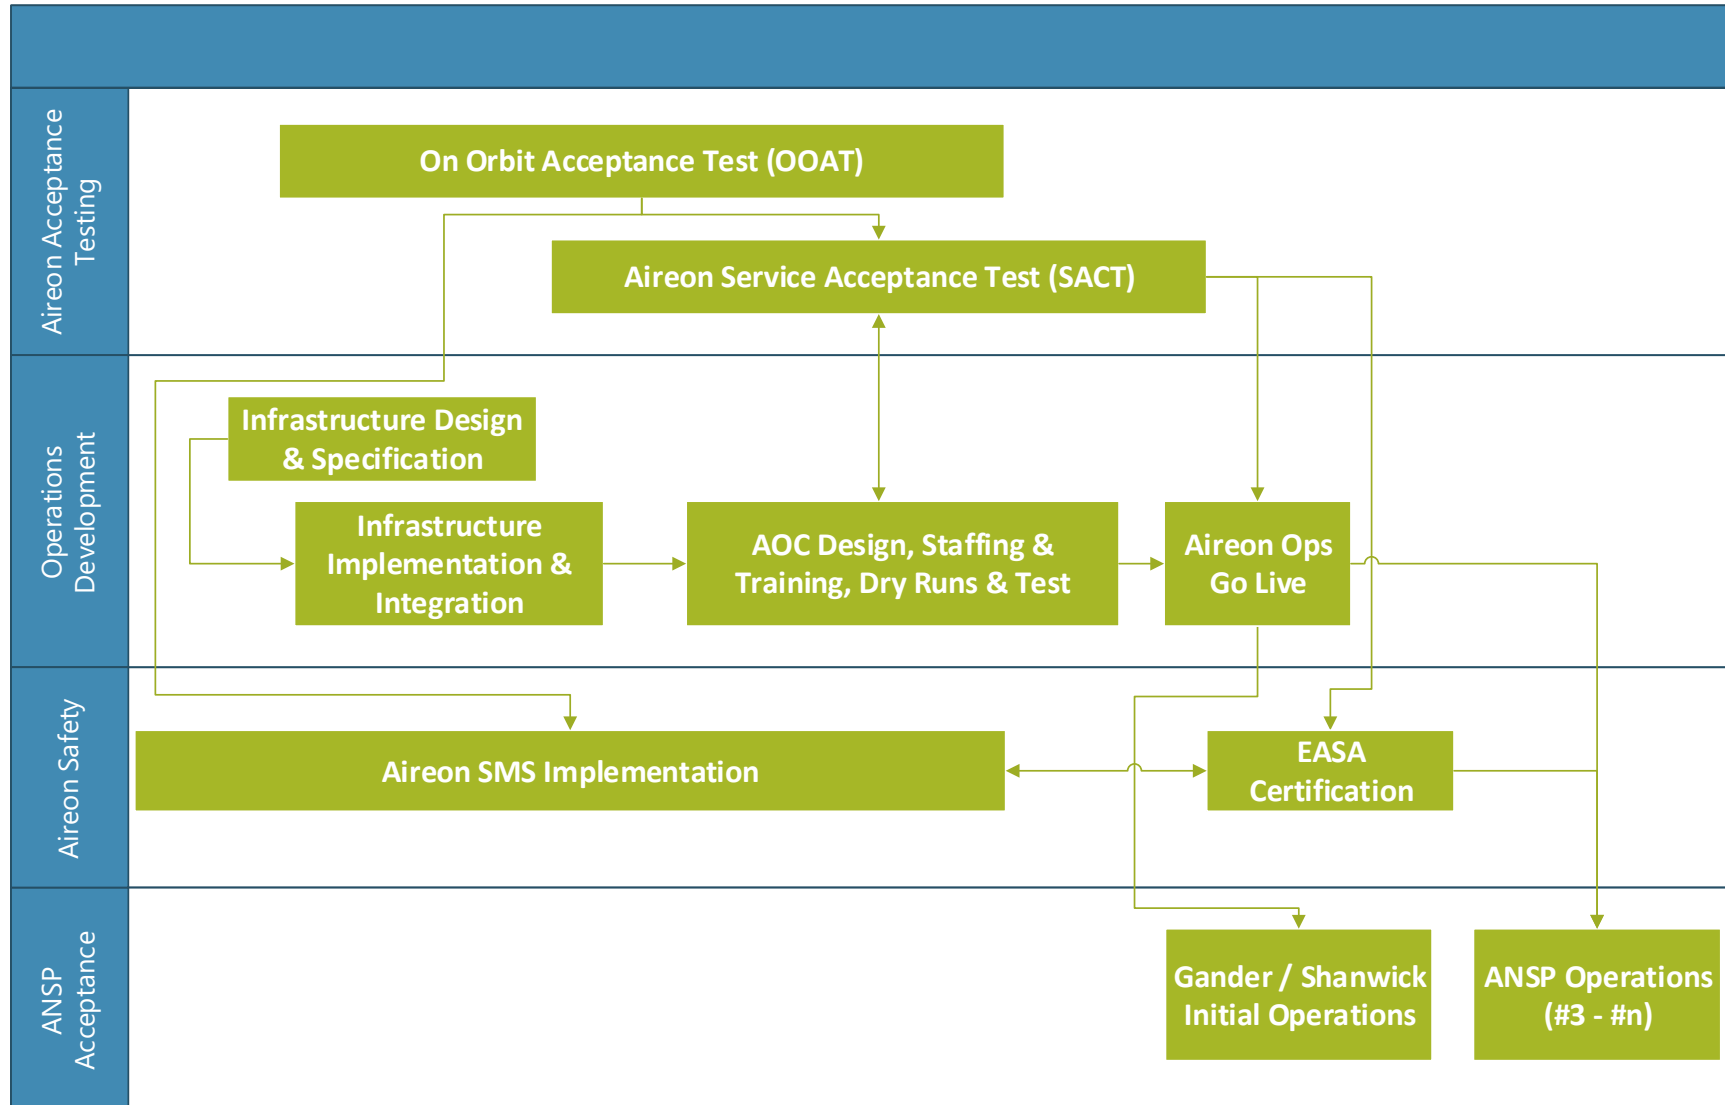

# Atlantic

# On Orbit Test Results

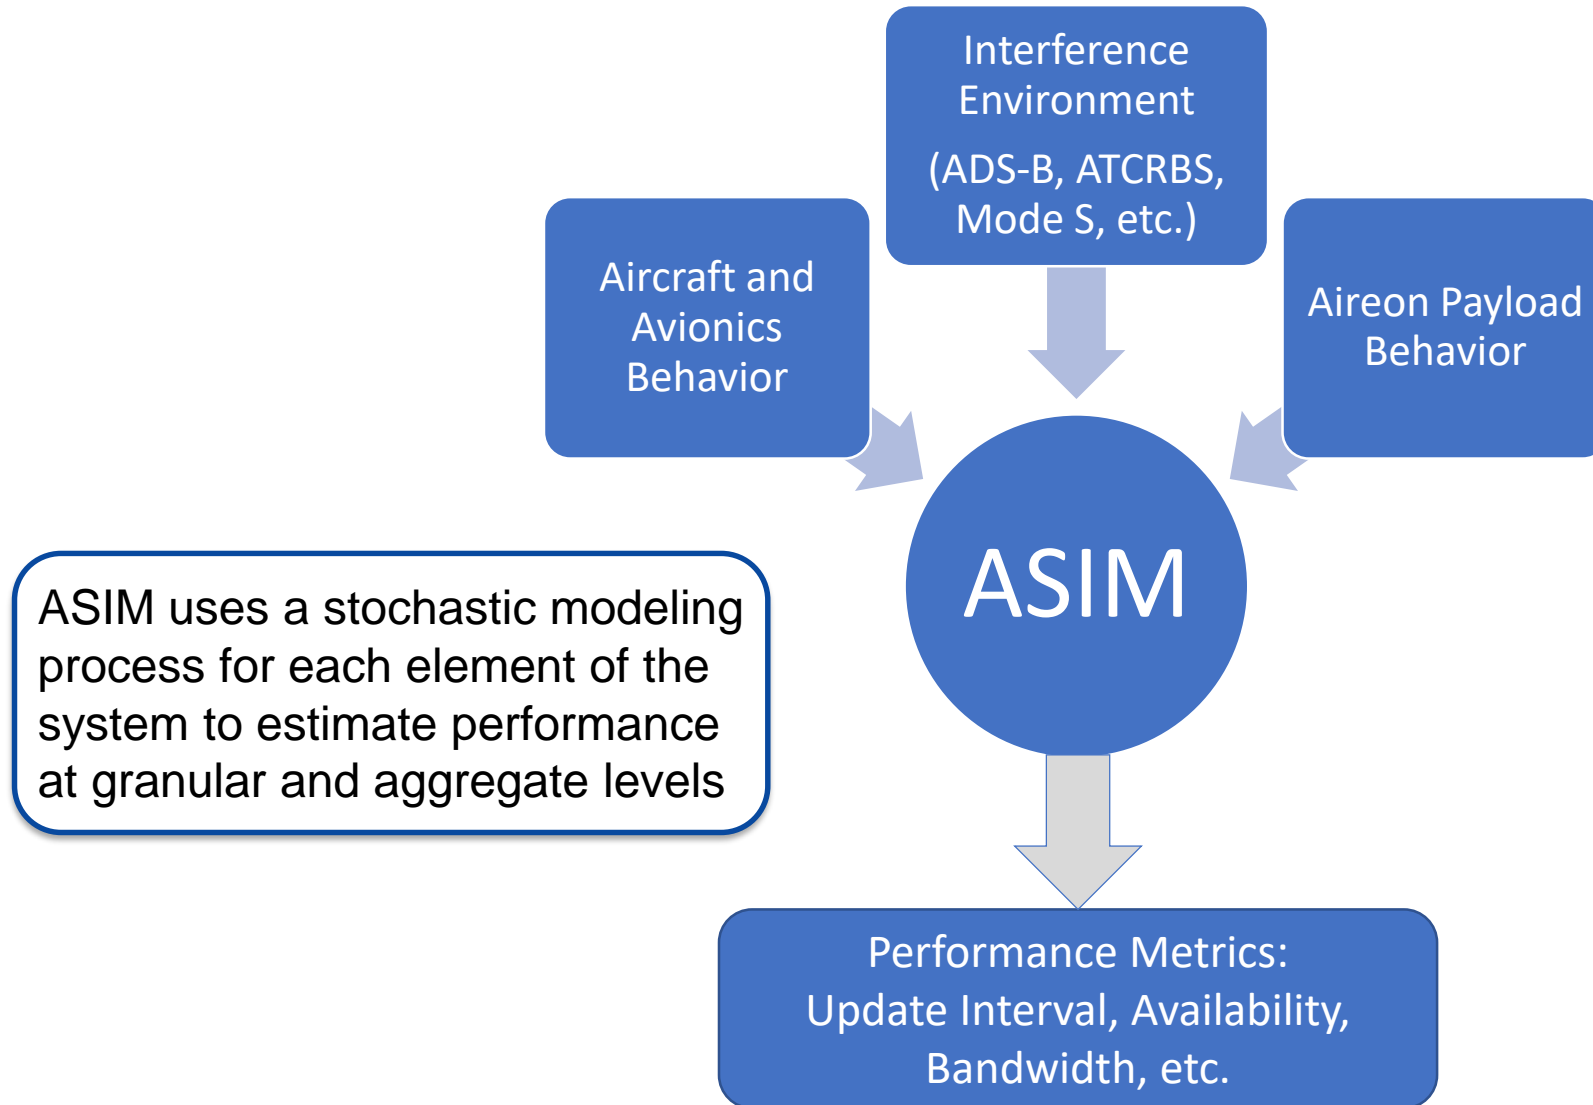

# Activities to Operations

# Aireon's Key OOAT Test Cases

Test Case	Description
PVTC-11	Low-power target performance
PVTC-12	Track A/C in high-FRUIT regions
PVTC-14	Pattern measurement with transmitters

# Aireon's Simulation (& Analysis) Tool: ASIM

# OOAT PVTC11

Low Power Target Performance

# Flight Tests

NAV CANADA  
Test Flight  
12/5 - 12/6/2017

125W

Polaris Flight Systems  
Test Flight  
12/5-12/8/2017

200W

FAA  
Test Flight  
Dec 6<sup>th</sup>, 2017

125W

# Pattern Record/Recognition Process

Measured

- Mission Data

Expected

- Remixed Tracks

Recreated Satellite Coverage

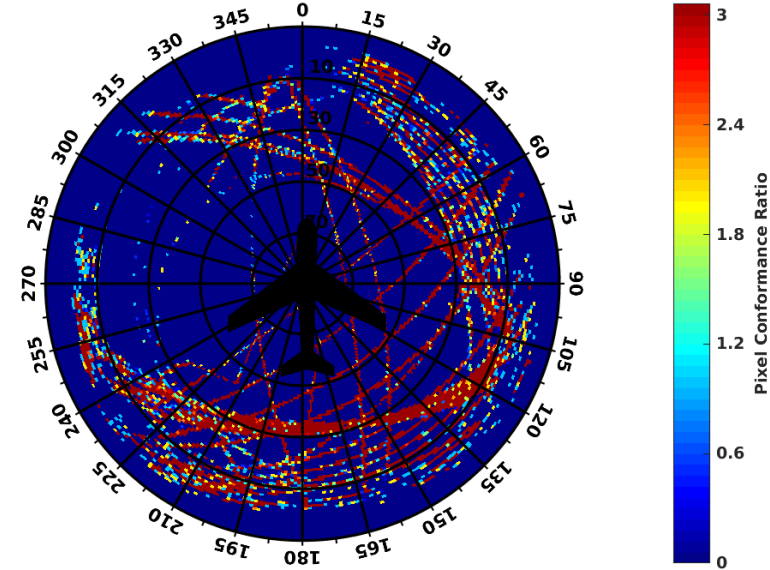

Pattern  
Rec

Conformance =  
Measured/Expected

Aircraft C06921 Measured/Expected - Elevation/Azimuth Coverage over 24 hour period with 61039 total samples

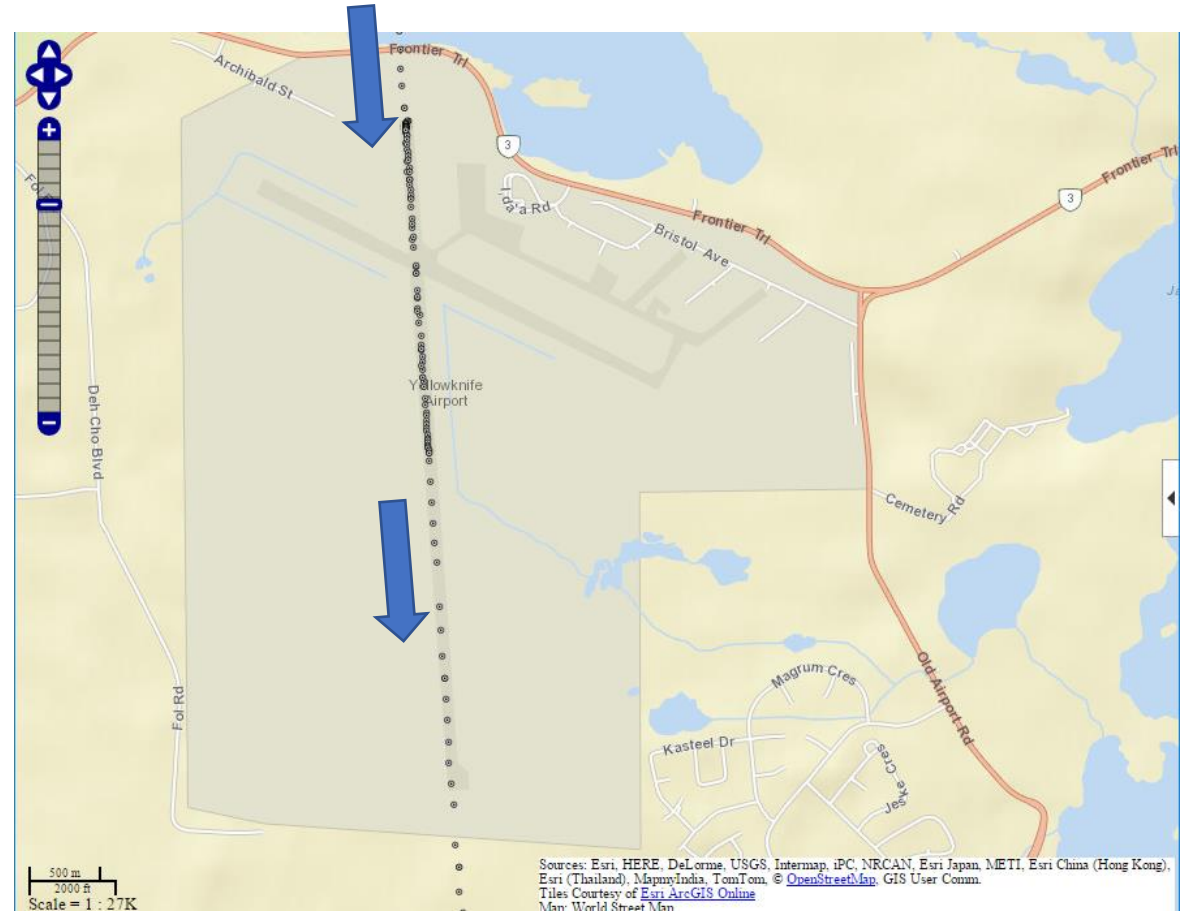

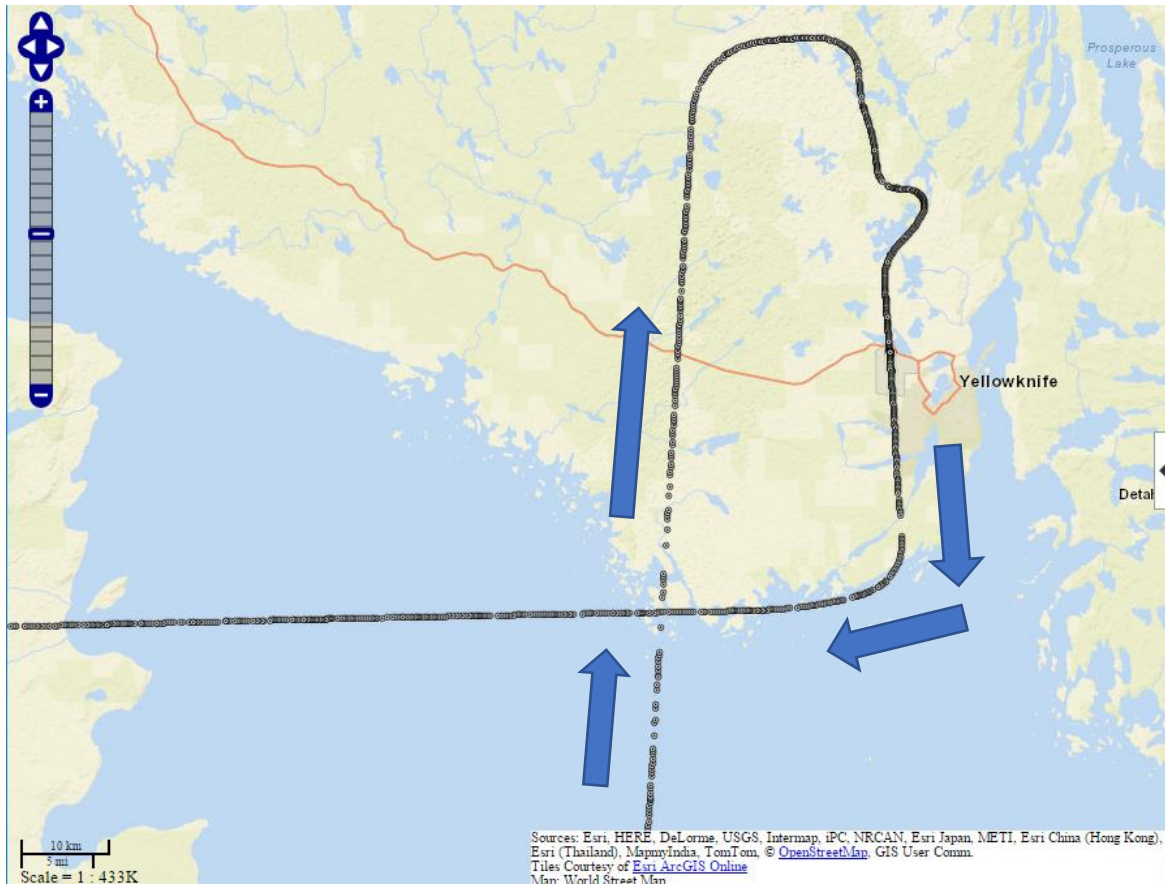

Success Criteria:  
"Sweet Spot"  $\geq 0.85$

# Aireon Data Observation Overview

95<sup>th</sup> Percentile UI = 2.88s

# Landing and Takeoff at Yellowknife

# OOAT PVTC12

Interference Model Validation Test Case

# Polaris Flight Plan 11/16/2017

N9476S

LANDED OVER A WEEK AGO

Flight Details

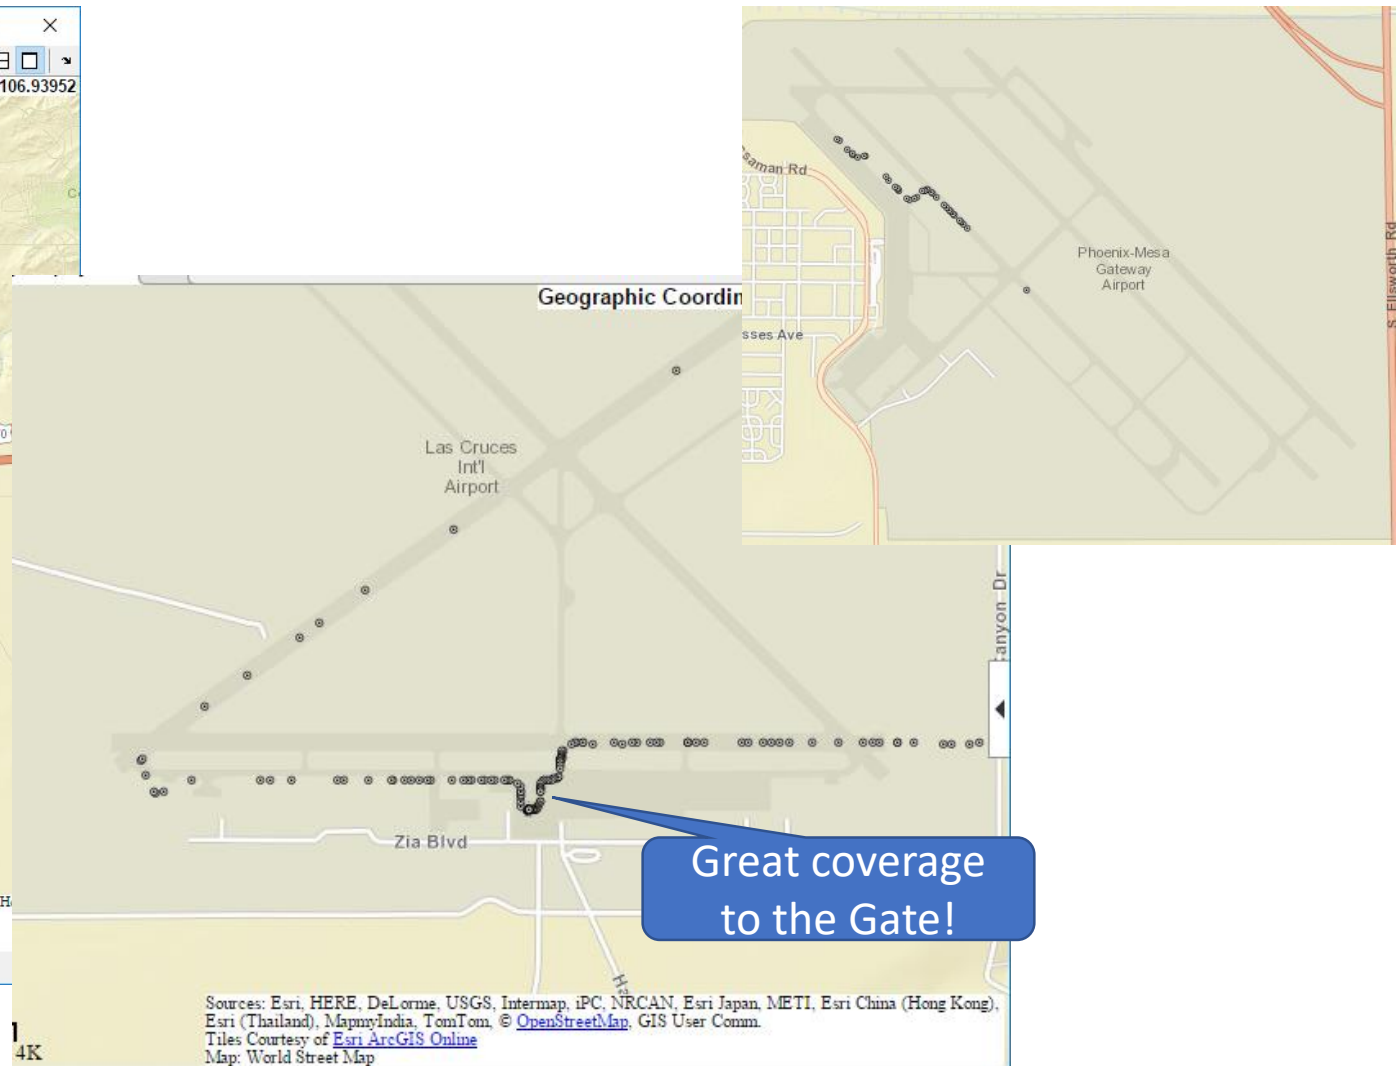

FlightAware Record from Terrestrial Data

# Observations at Las Cruces and PHX Airports

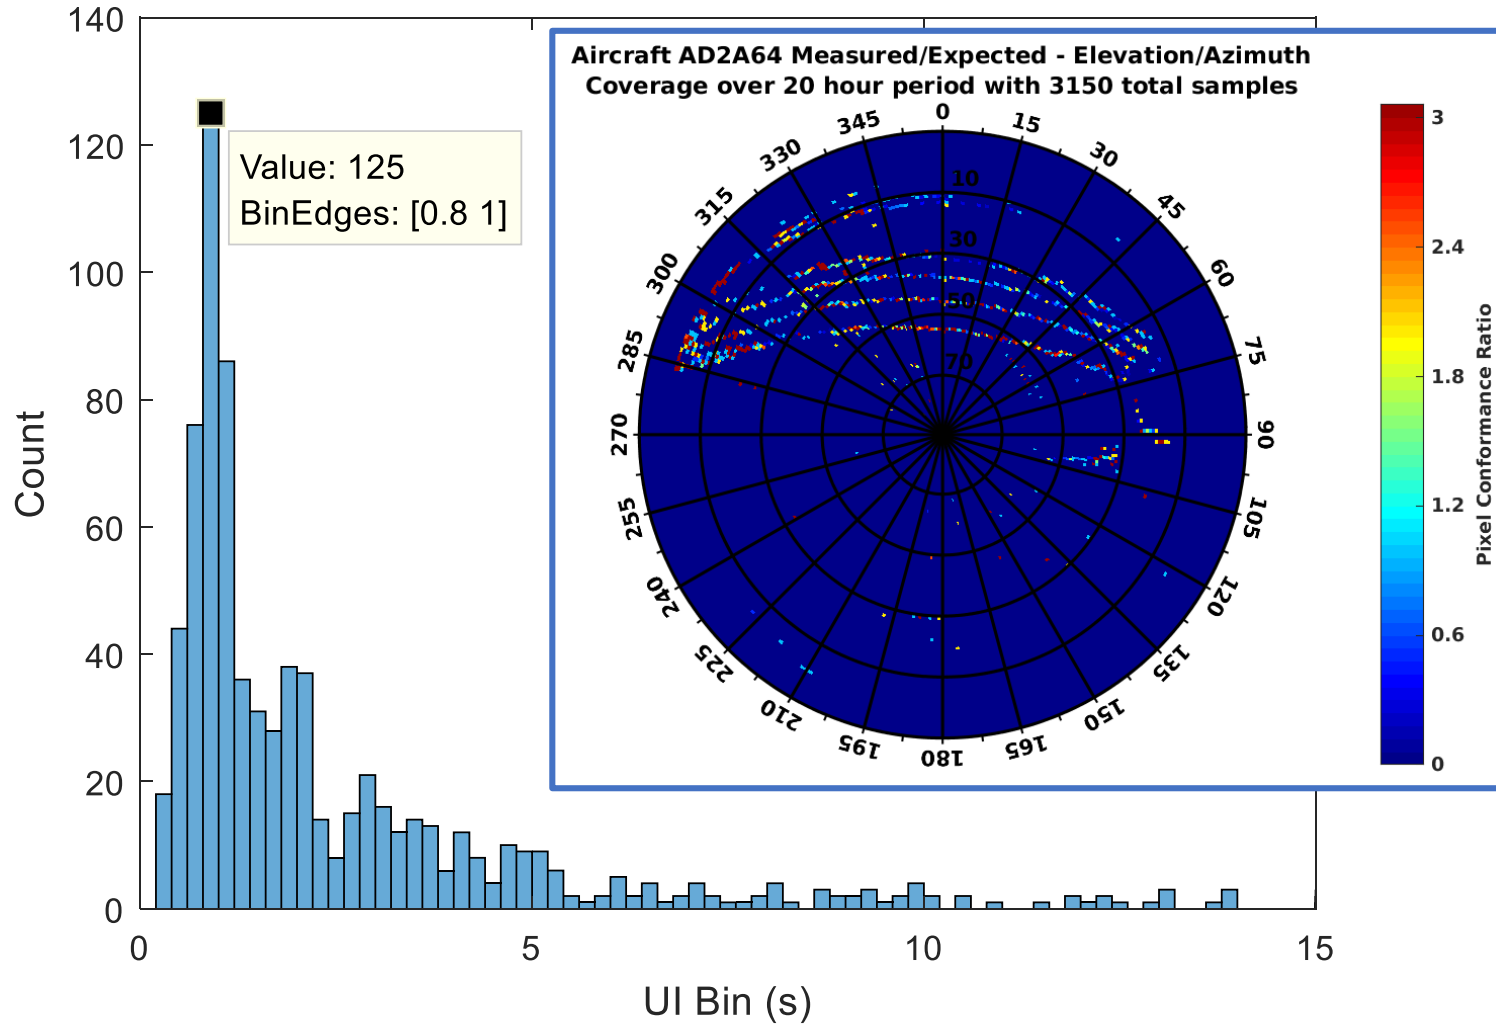

Aireon Observed Landing and Takeoff at Las Cruces Airport (18:40 and 20:12Z)

# Polaris Flight Test Results

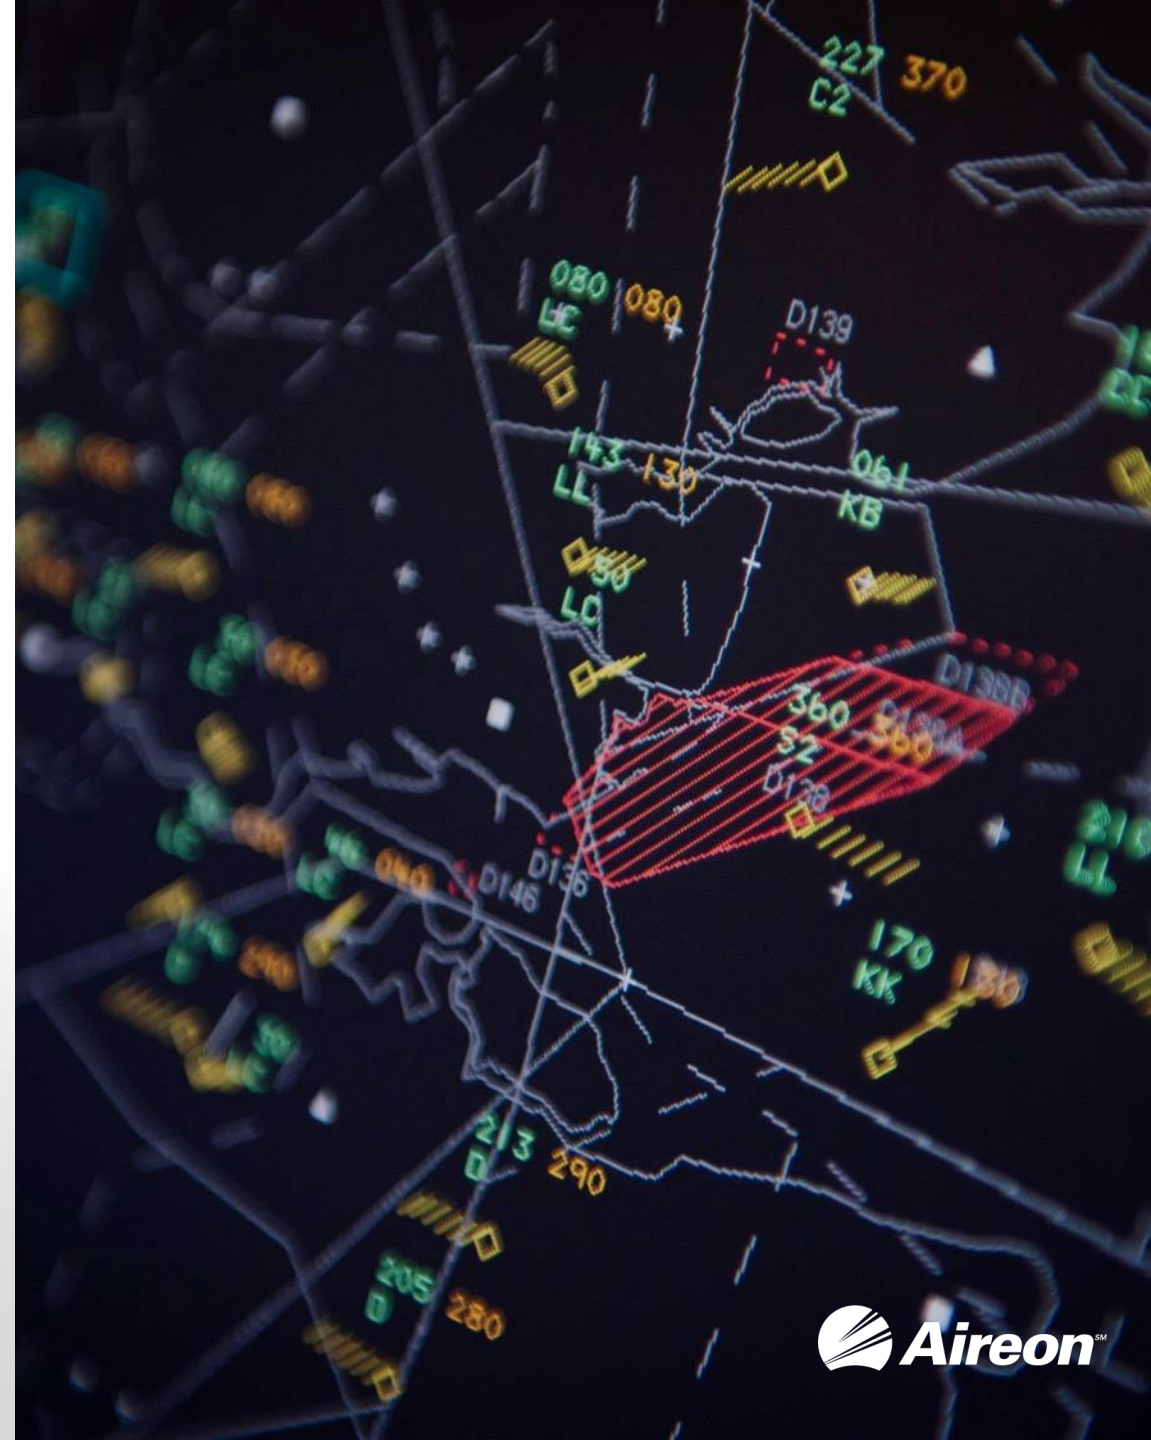

TC12G UI Histogram for Polaris Flight Test Aircraft  
95th Percentile - 9.93s

# Payload Performance Data

## OOAT PVTC14

AHP Beam Characterization/Validation

# Iqaluit Ground Based Reference Transmitter (GBRT)

Uses a 4-Channel Reference Transmitter

# GBRT Conformance Patterns

Coverage over 72 hour period with 194140 total samples

Coverage over 72 hour period with 119975 total samples

Coverage over 72 hour period with 68970 total samples

Coverage over 72 hour period with 41347 total samples

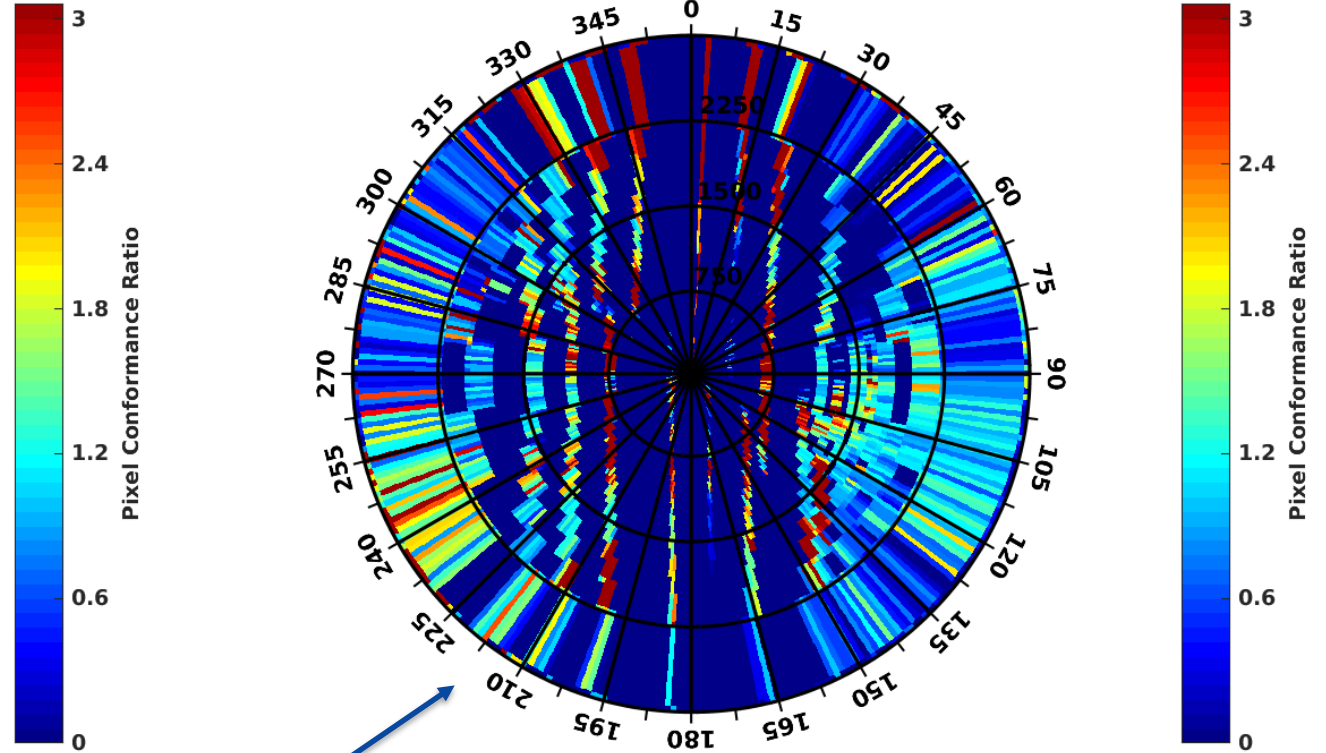

# SV112 and SV104 Performance Comparison

Satellite 57 GBRT Measured/Expected - Range/Azimuth Coverage over 72 hour period with 34378 total samples

Satellite 58 GBRT Measured/Expected - Range/Azimuth Coverage over 72 hour period with 42296 total samples

SV104 currently has a bandwidth allocation 5x higher than SV112

# Other Interesting Observations from OOAT

# ADS-B Aircraft Tracks in Caribbean from Aireon before and during Hurricane Irma

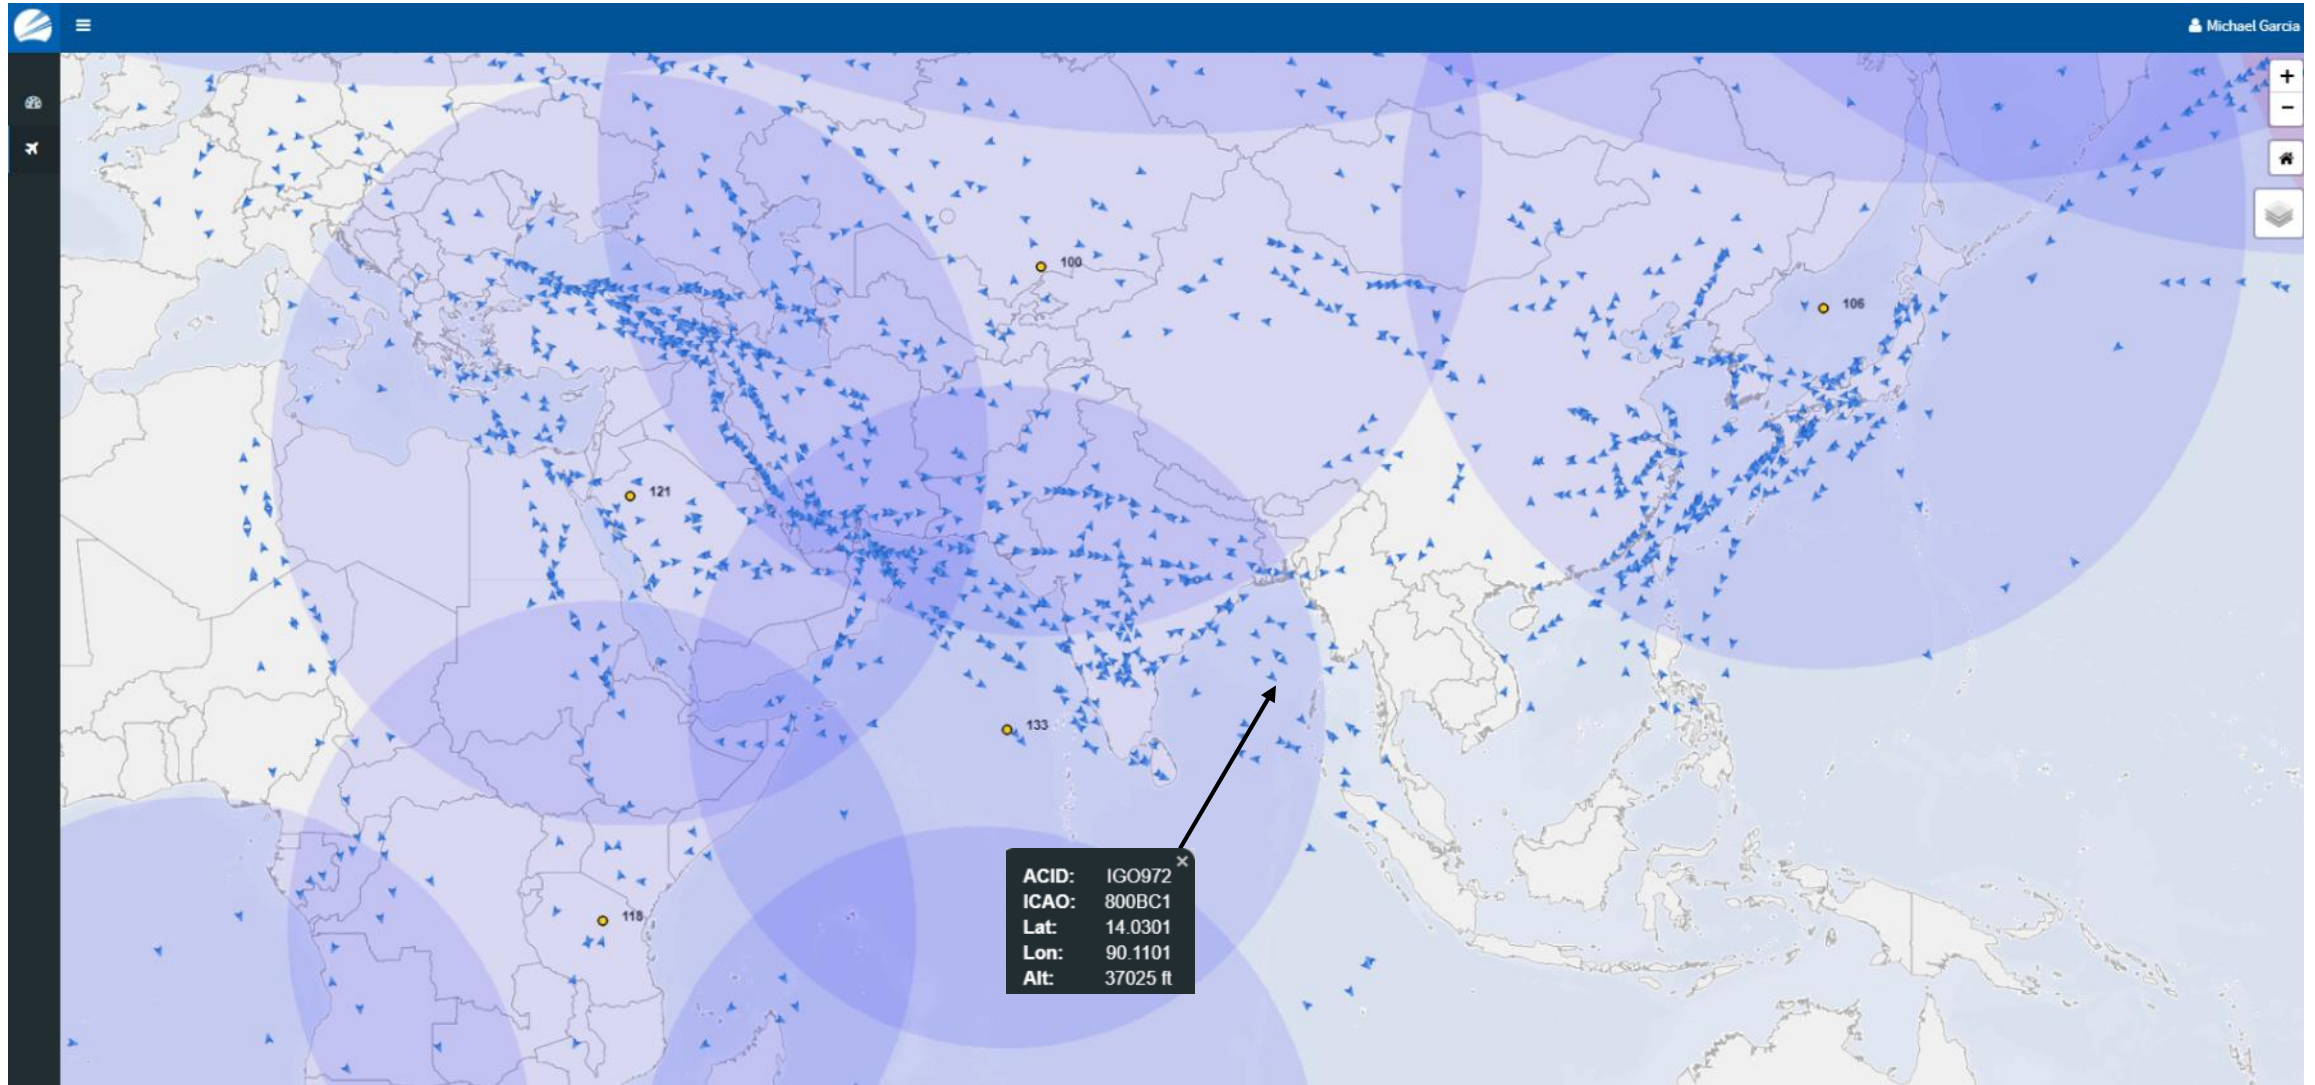

Coverage of Caribbean before Hurricane Irma  
2017-09-04 14Z-19Z

Our satellites are in the same approximate position about every 3 days.  
So this is the coverage from September 4<sup>th</sup>, 2017

Flight operations in the Caribbean changed significantly as a result of  
Hurricane Irma from September 7<sup>th</sup>, 2017

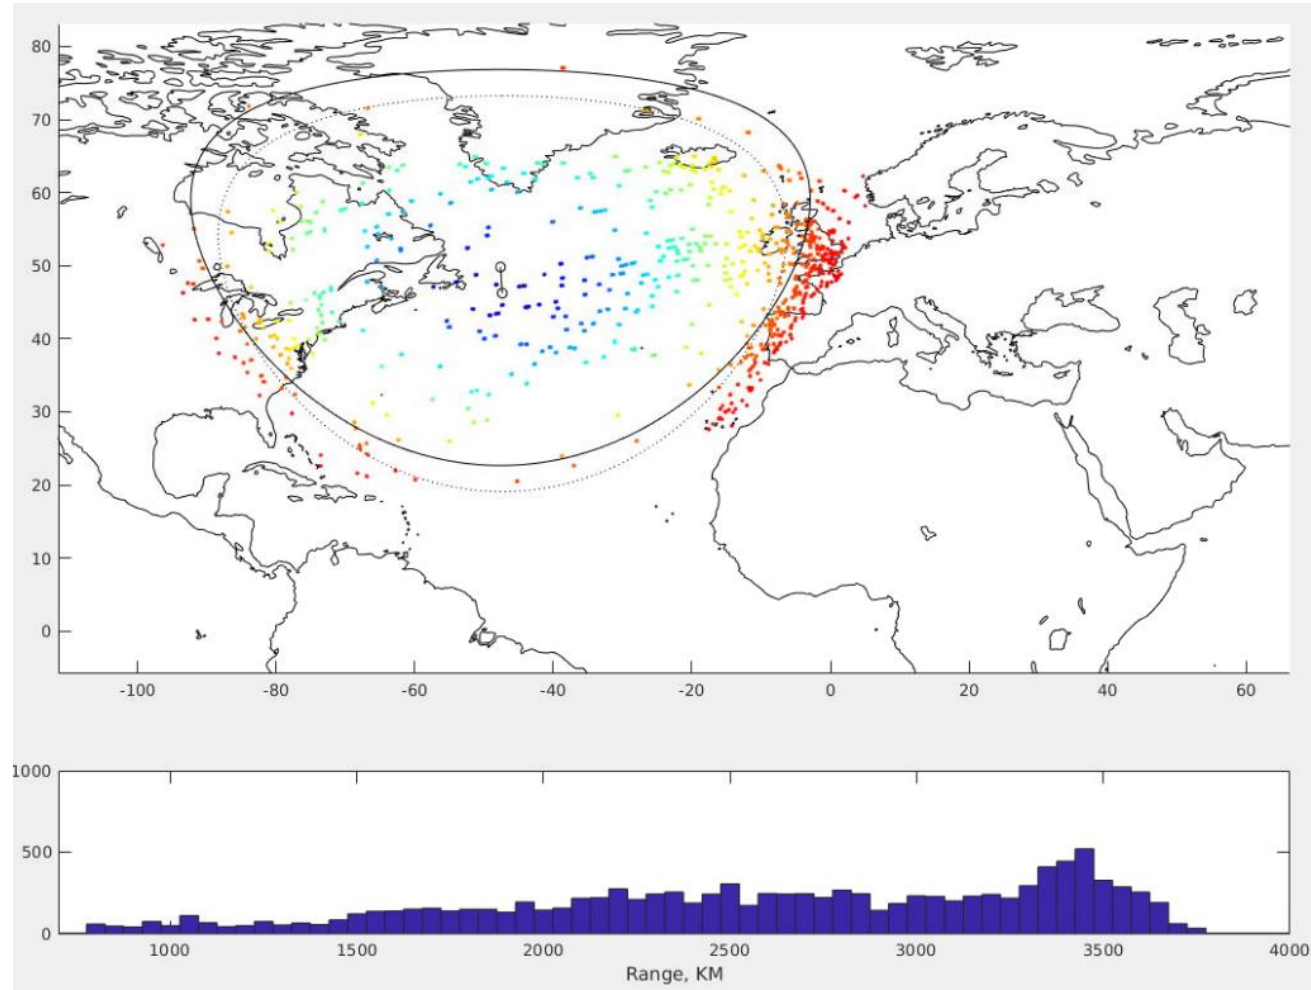

# Aireon Dashboard Web Application

01:55Z 1/29/2018

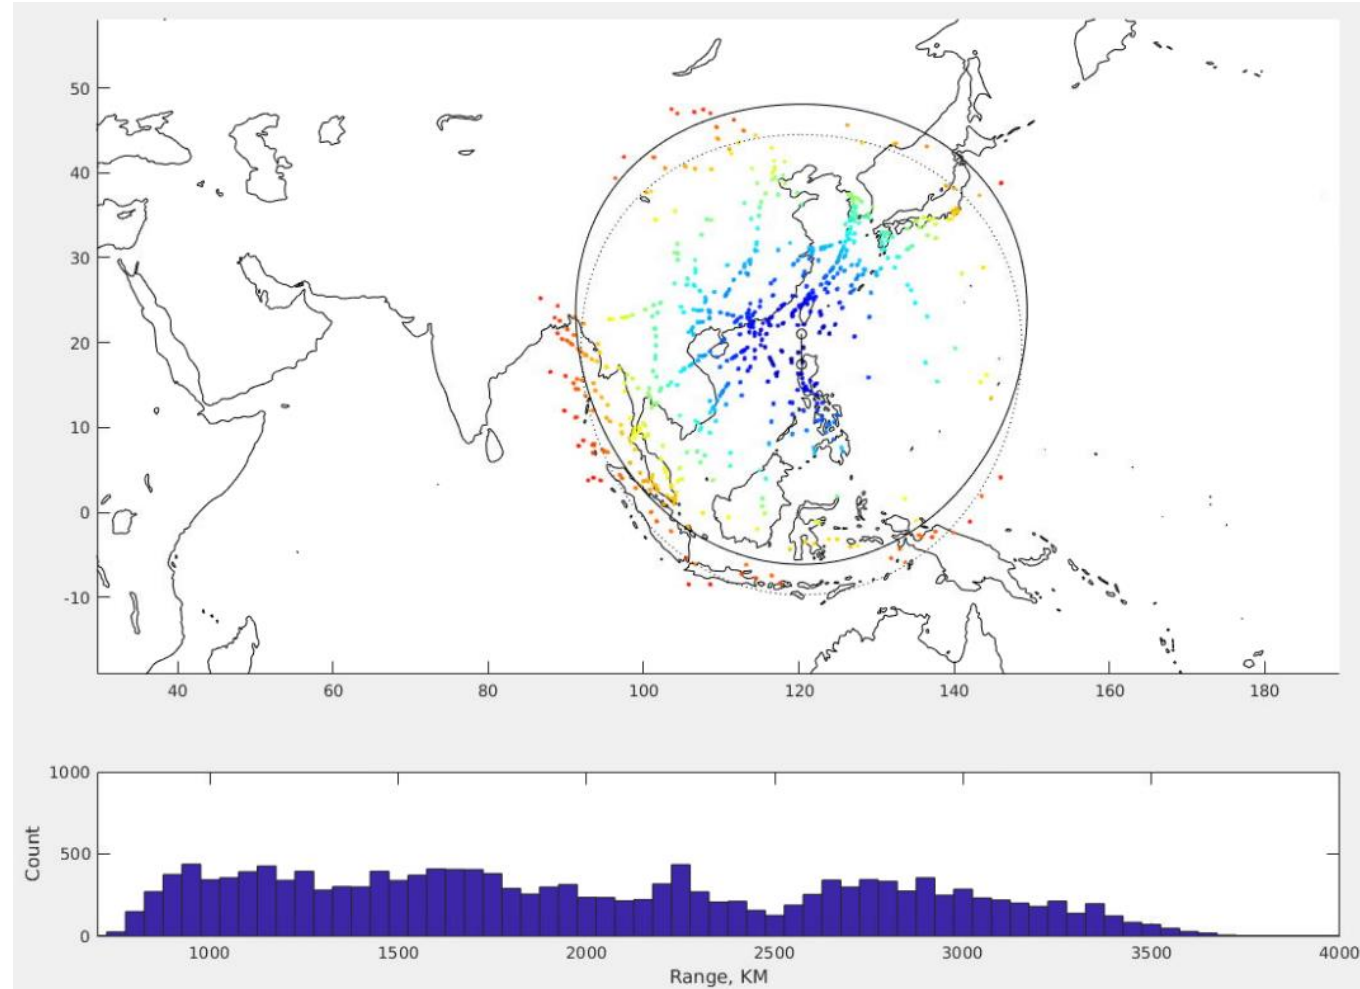

# Satellite Coverage Analysis (1)

SV103  
2017-11-19 08:08Z  
Max Range = 3783 km  
Min Elev =  $-4.6^{\circ}$   
Aircraft Count = 697

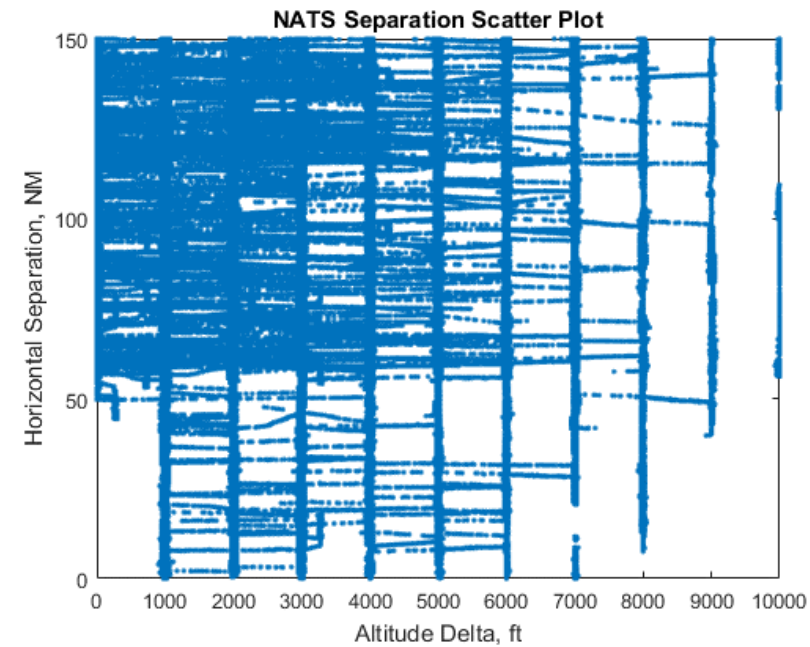

# Satellite Coverage Analysis (2)

SV104  
2017-11-16 21:21Z  
Max Range = 3750 km  
Min Elev =  $-4.4^{\circ}$   
Aircraft Count = 797

# Atlantic Traffic Separation

Data captured over the Atlantic shows how targets are being separated in oceanic airspace  
This two hour sample shows peaks at 60 and 120NM of horizontal separation and 0-2000ft vertical separation

# OOAT Summary

- The On Orbit Test campaign has successfully evaluated the Aireon system with
  - Flight Tests
  - Reference Transmitters
  - Commercial Aircraft
  - Data Analytics
- Each Additional Launch further improves our confidence in the capabilities of the system with continuous improvement of our knowledge, tools, and techniques
