

*AIDC Update -
Philippines*

Manila ATM Systems upgrade is estimated to be completed by December 2014. One of its capabilities is the AIDC. The AIDC is through AFTN and can be configured to exchange flight data messages in APAC ICD V2.0.

AIDC Test will be conducted with Taipei ACC and Singapore ACC to test the AIDC capability of the upgraded system. This is estimated on the second week of December after the Site Acceptance Test. Coordination with Taipei and Singapore ACCs is on-going

Planned AIDC trial will be on June 2015.
