**THIRTEENTH MEETING OF THE ASIA/PACIFIC REGIONAL OPMET
BULLETIN EXCHANGE WORKING GROUP (ROBEX WG/13)**

Seoul, Republic of Korea, 16 – 18 March 2015

Agenda Item 3: OPMET information

IATA NON-SCHEDULED OPMET MONITORING

(Presented by IATA)

SUMMARY

This paper summarizes the results of a monitoring of NON-SCHEDULED OPMET (SIGMET, VAA and TCA) data for the AISAPAC region with the focus on SADIS and WIFS distribution.

1. INTRODUCTION

1.1 SADIS and WIFS are the two main data systems for weather data. Primarily SADIS is a satellite broadcasting system but it is also possible to get access to the SADIS Secure FTP Service. WIFS is only using the ftp for data provision.

1.2 Both systems are reliable source of weather data. Beside the distribution of WAFS products it is used for broadcasting OPMET data.

2. DISCUSSION

2.1 NON-Scheduled OPMET data are messages which are not issued on a regular basis. This category comprises AIRMET, GAMET, SIGMET, Volcanic Ash Advisories and Tropical Cyclone Advisories.

2.2 The monitoring is a snapshot over a period of 4 days and is considering the availability of issued NON-Scheduled OPMET data on SADIS and WIFS. Additionally the data feed from DWD (German Met Authority) is monitored as an independent source.

2.3 The monitoring does not provide any hint about the completeness of issued NON-Scheduled OPMET data because the end users does not know when such a message should be issued.

2.4 The attached appendix contains the details of the received NON-Scheduled OPMET data in Frankfurt during the monitoring period of 4 days commencing on 21st of February 2015.

2.5 The IATA monitoring of NON-Schedule OPMET data shows that, with some exceptions, all received messages could be found on all three data sources.

2.6 Although the current monitoring covers only a four day non-representative period it is recommended to investigate following findings:

FK-message from NFFN

Such TCA are only found on the SADIS broadcast

SIGMET from VIDF

Such SIGMETs are only found on the WIFS distribution

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note of the information provided: and
- b) start investigation on the reported deficiencies

NON-Scheduled OPMET data monitored by IATA, 21 to 24 February 2015*Explanation of the table*

Column

1 Received date (UTC) recorded in OPMET distribution system

2 Received time (UTC) recorded in OPMET distribution system

3 International location indicator of the centre originating the message

4 Data type designators T₁T₂ in WMO abbreviated heading:

WA AIRMET

FK Tropical cyclone advisories

FV Volcanic ash advisories

WS SIGMET

WV Volcanic ash clouds (SIGMET)

5 International date/time group in WMO abbreviated heading

6 Distribution system on which OPMET was monitored:

A Received directly via AFTN

D DWD (German Met Authority)

S Secure SADIS FTP

W WIFS

7 End date of the validity period

8 Output comment of the IATA data monitoring process:

SKIPPED message ignored for the indicated reason

REJECT message not processed automatically due to format error
