

Attachment C

Draft ATFM Operational Trial Scenario

1) Demand-Capacity Balance Impact Situation

Typhoon is passing at 150 NM south of Hong Kong from East to West, strong crosswind affecting Hong Kong International Airport (VHHH)

2) Impacting Time

- a. Impacting Time: 1100-1500UTC
- b. Applicable Event Forecast: 0300UTC

3) Impact Estimation and ATFM Measure Required

- a. AAR reduced from 29 movements/hour to 24 movements/hour during the event
- b. Ground Delay Program using CTOT required for arriving flights due to excessive demand anticipated from Flight Plan received
