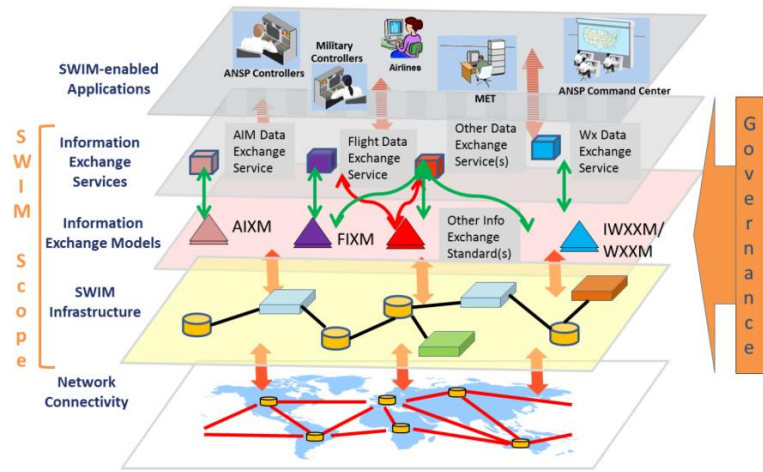

Figure 2. SWIM Global Interoperability Framework

# SESAR SWIM

Increased need to exchange information at lower cost

Airspace fragmentation cost €4 billion a year

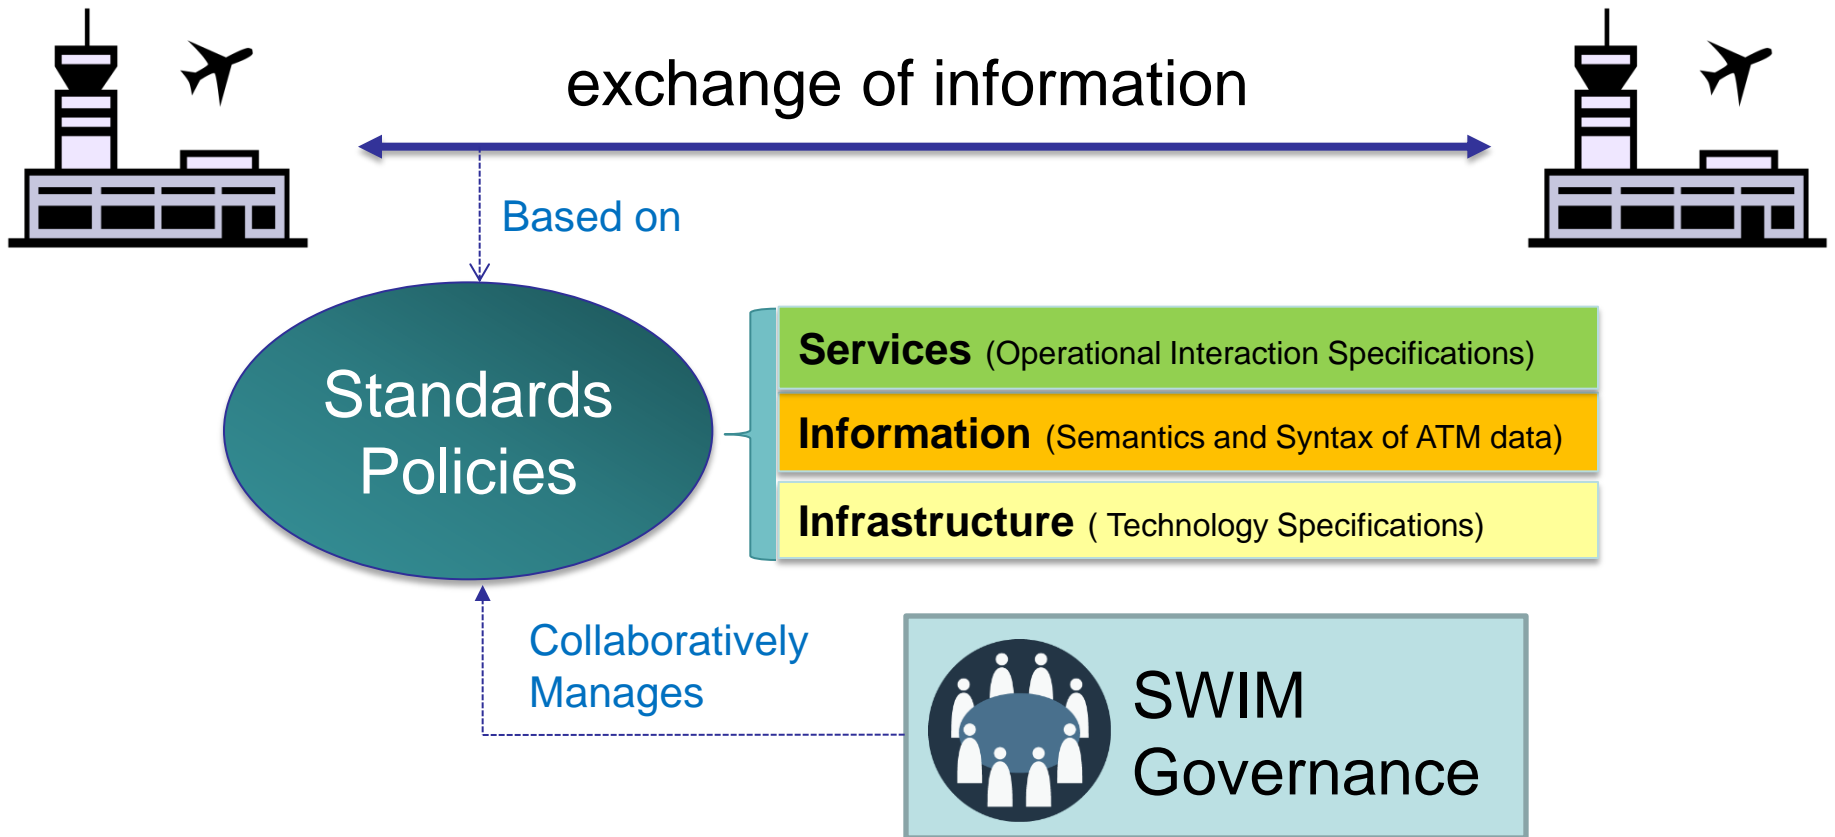

33k flights per day => 50k (2030)

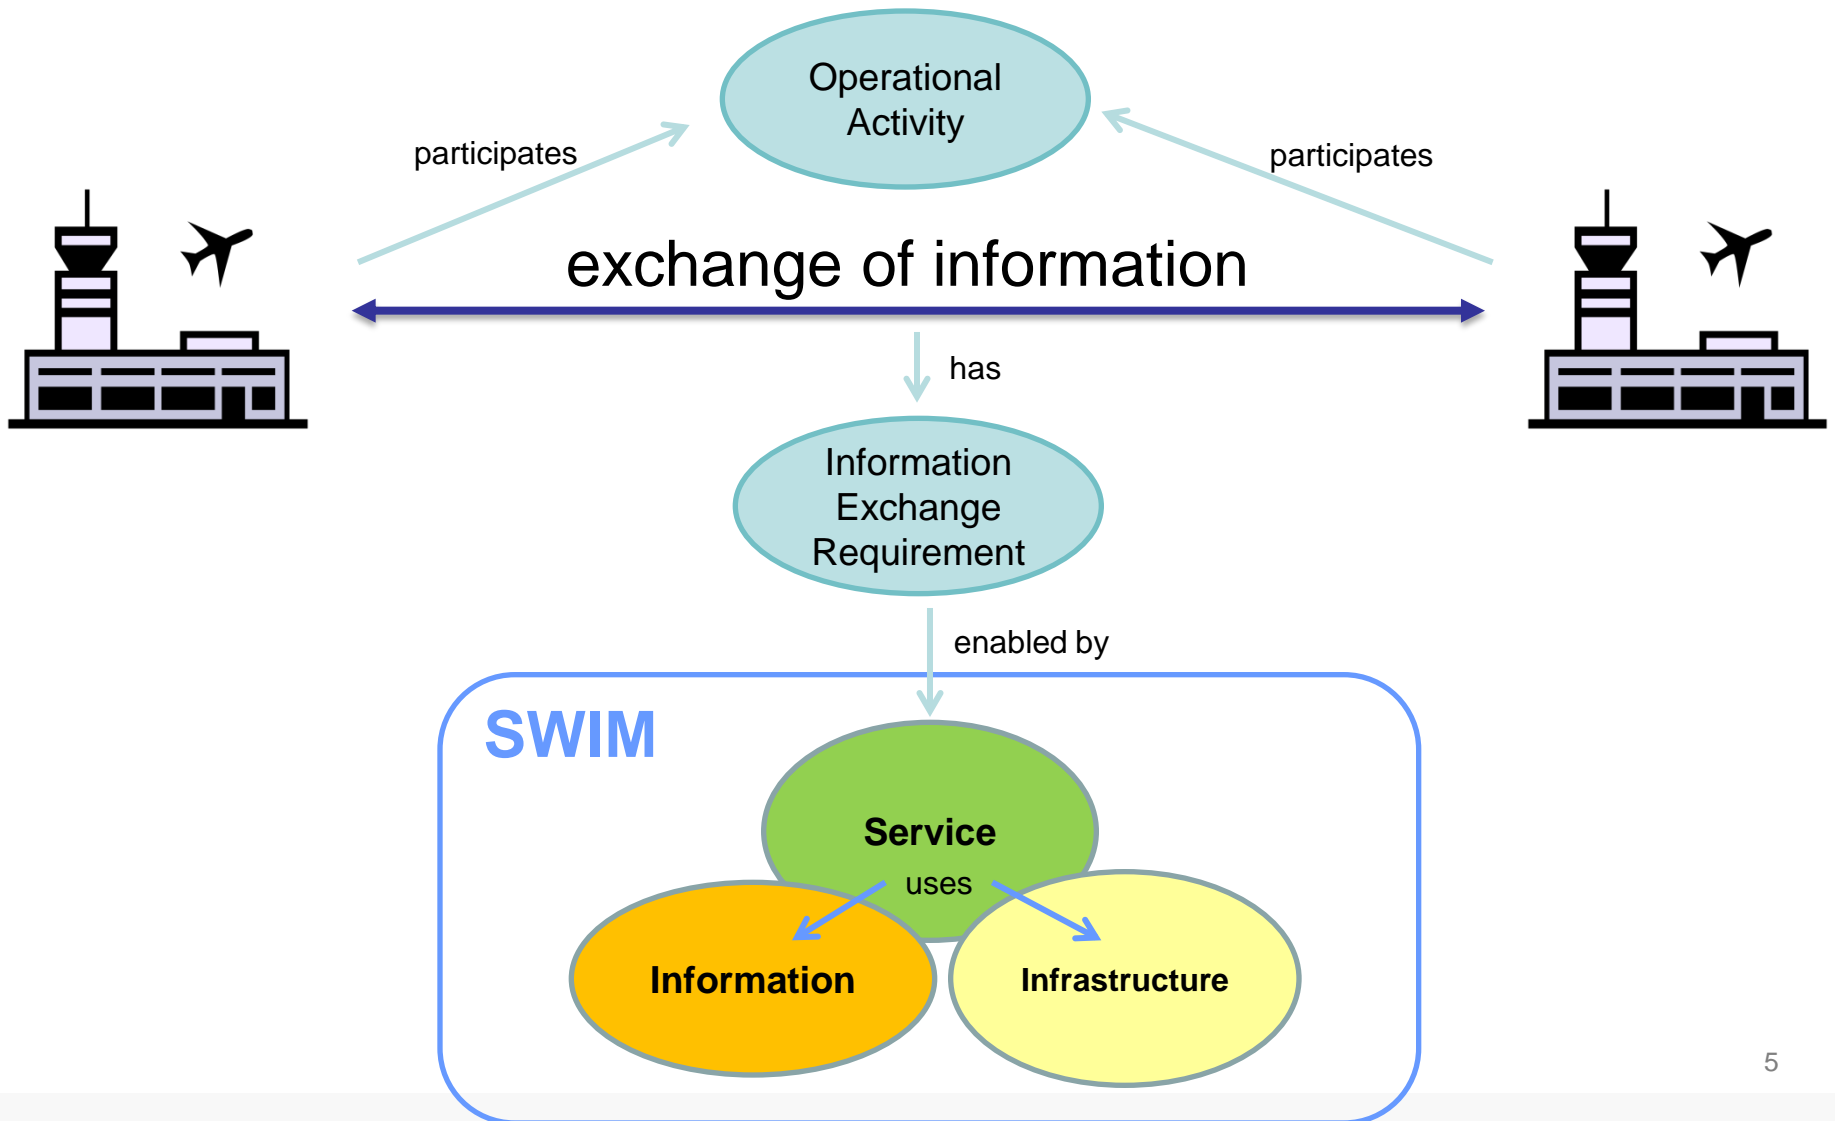

# What is SWIM?

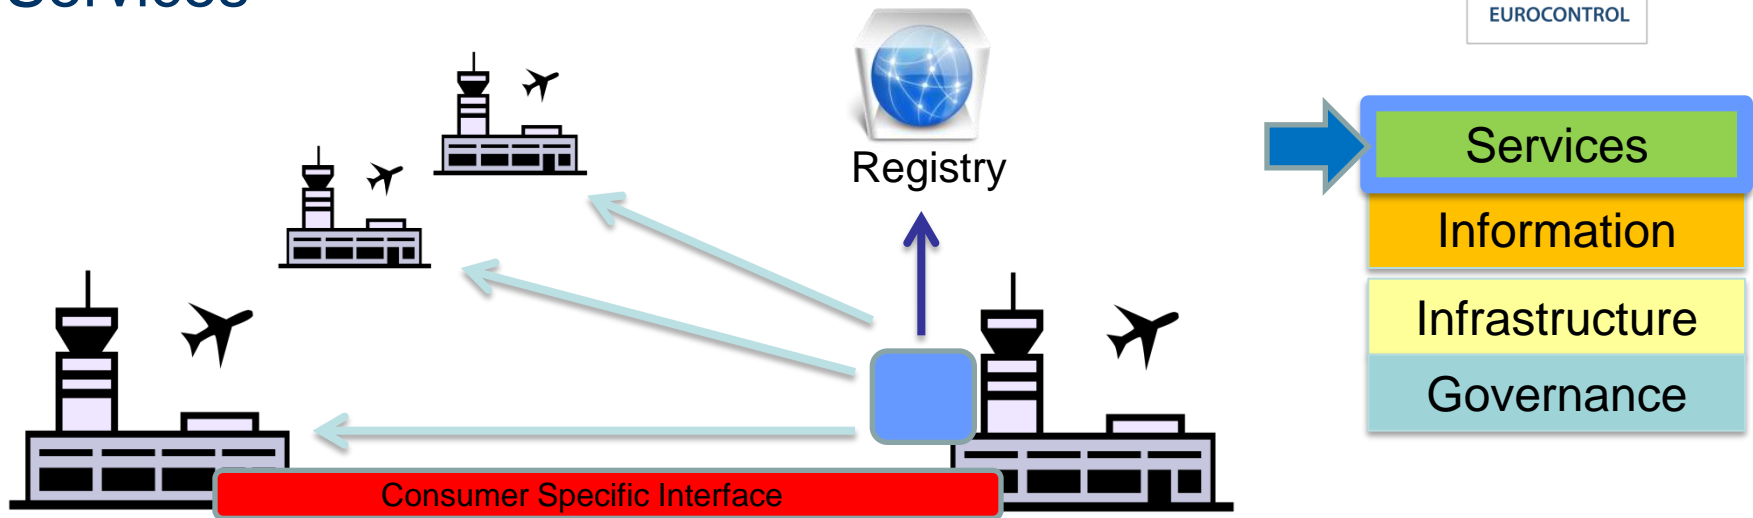

More Information Shared, Lower Cost, Higher Trust

# SWIM: Meets ATM Requirements

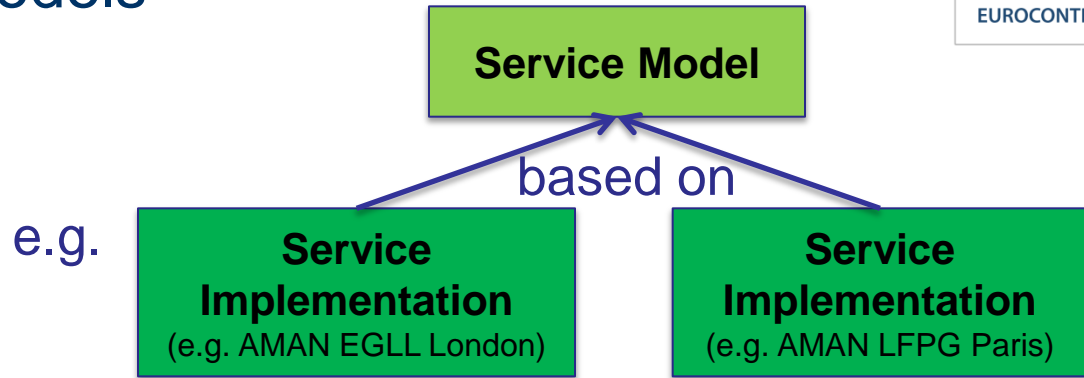

# Services

- Service Oriented Approach (Widespread Design Method)
  - Loose coupling, Reusable
  - Standardized contract
    - Interface: Operations, Messages
    - Access Mechanisms
    - SLA
  - Discoverable (Registry)
  - Business Relevant (Traced to operational activities)
    - Based on Information Exchange Requirements

# Service Design Models

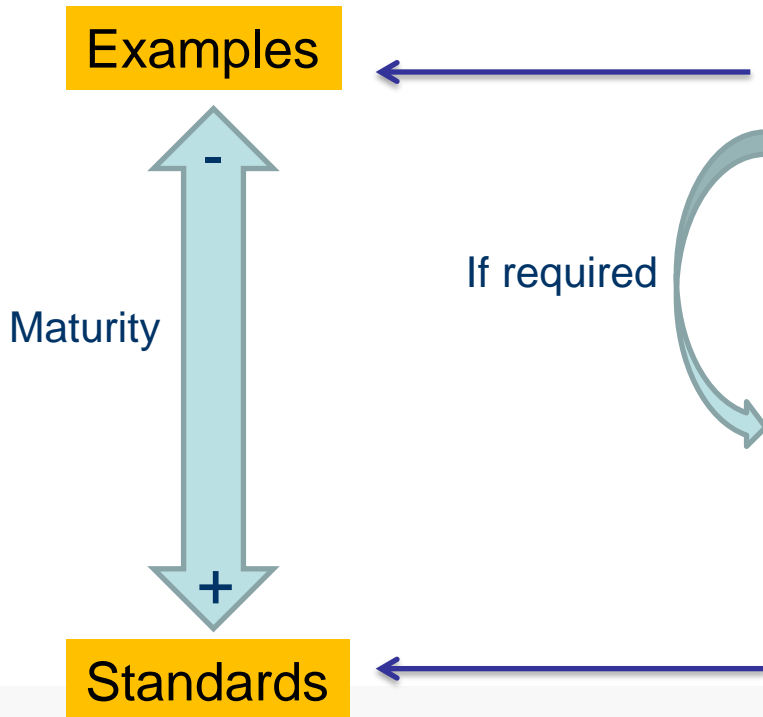

## SESAR Program:

- 40+ Service Models
  - ATC Flight Object
  - AMAN
  - Flight Plan Management
  - ...

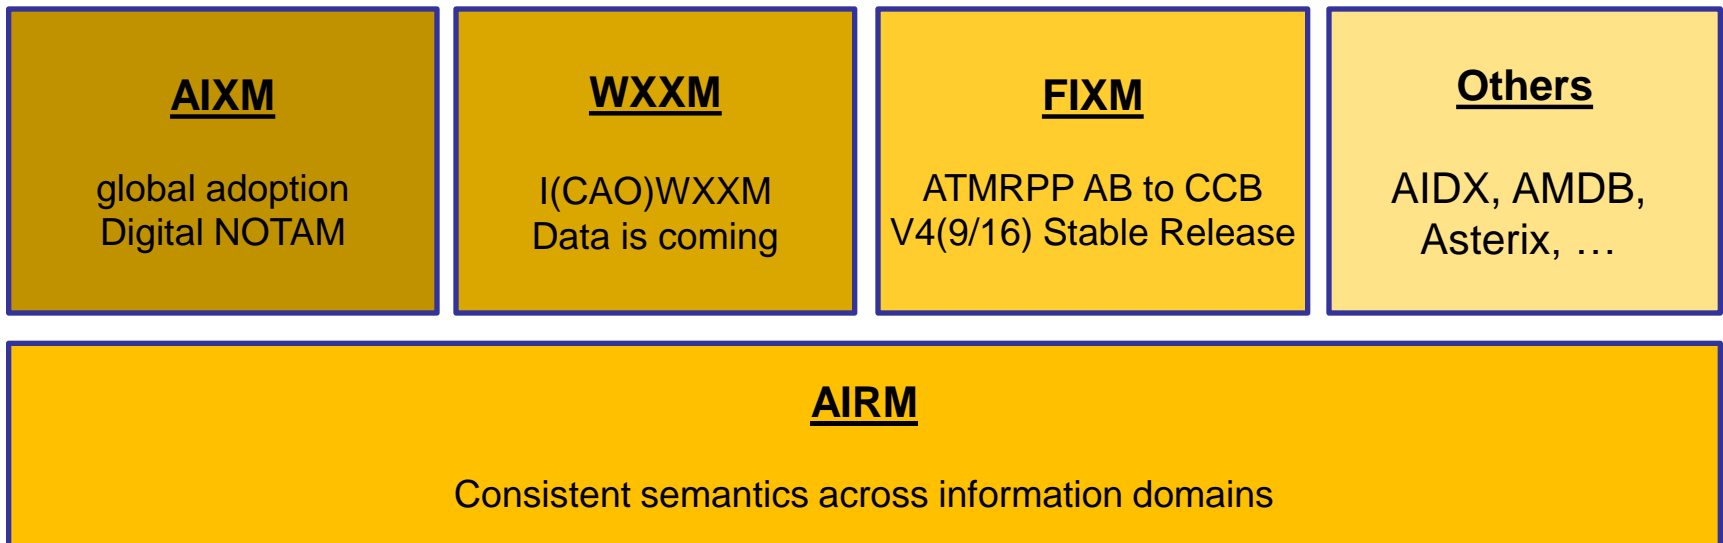

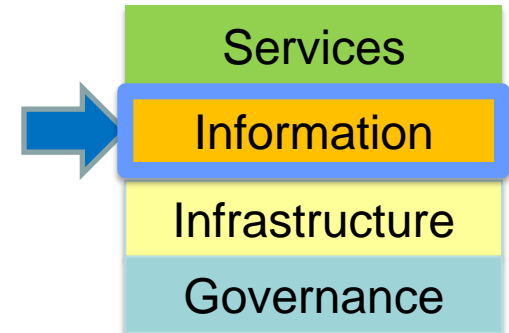

## Standardization:

- AMAN, Flight Object (ED133)

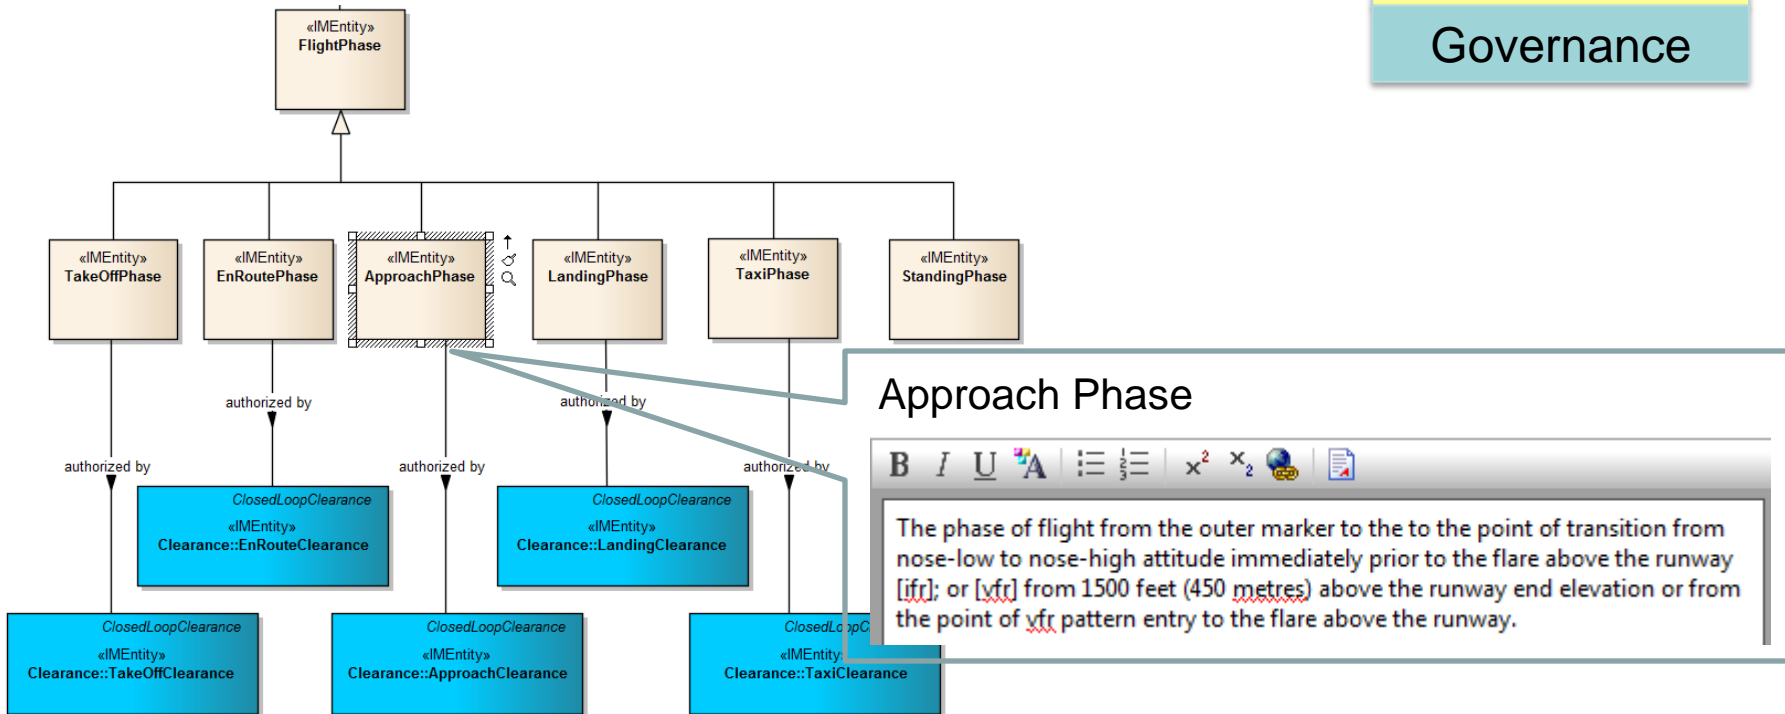

# Information

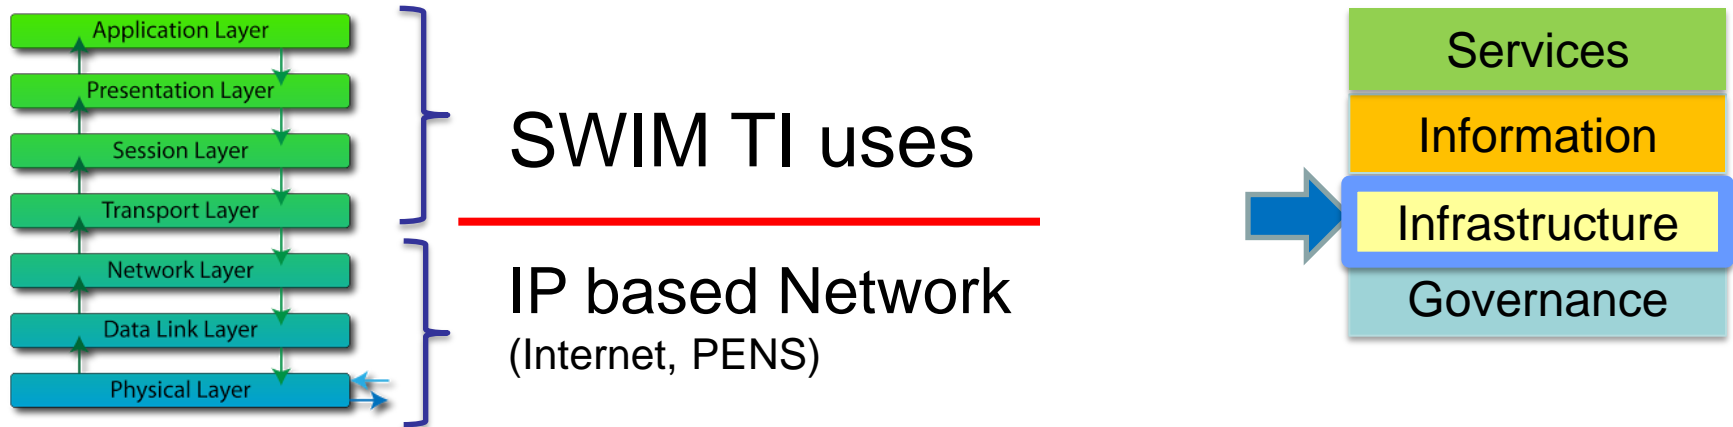

# Information

- AIRM Model (Semantic Interoperability)  
e.g. Flight Phase in AIRM

# Technical Infrastructure

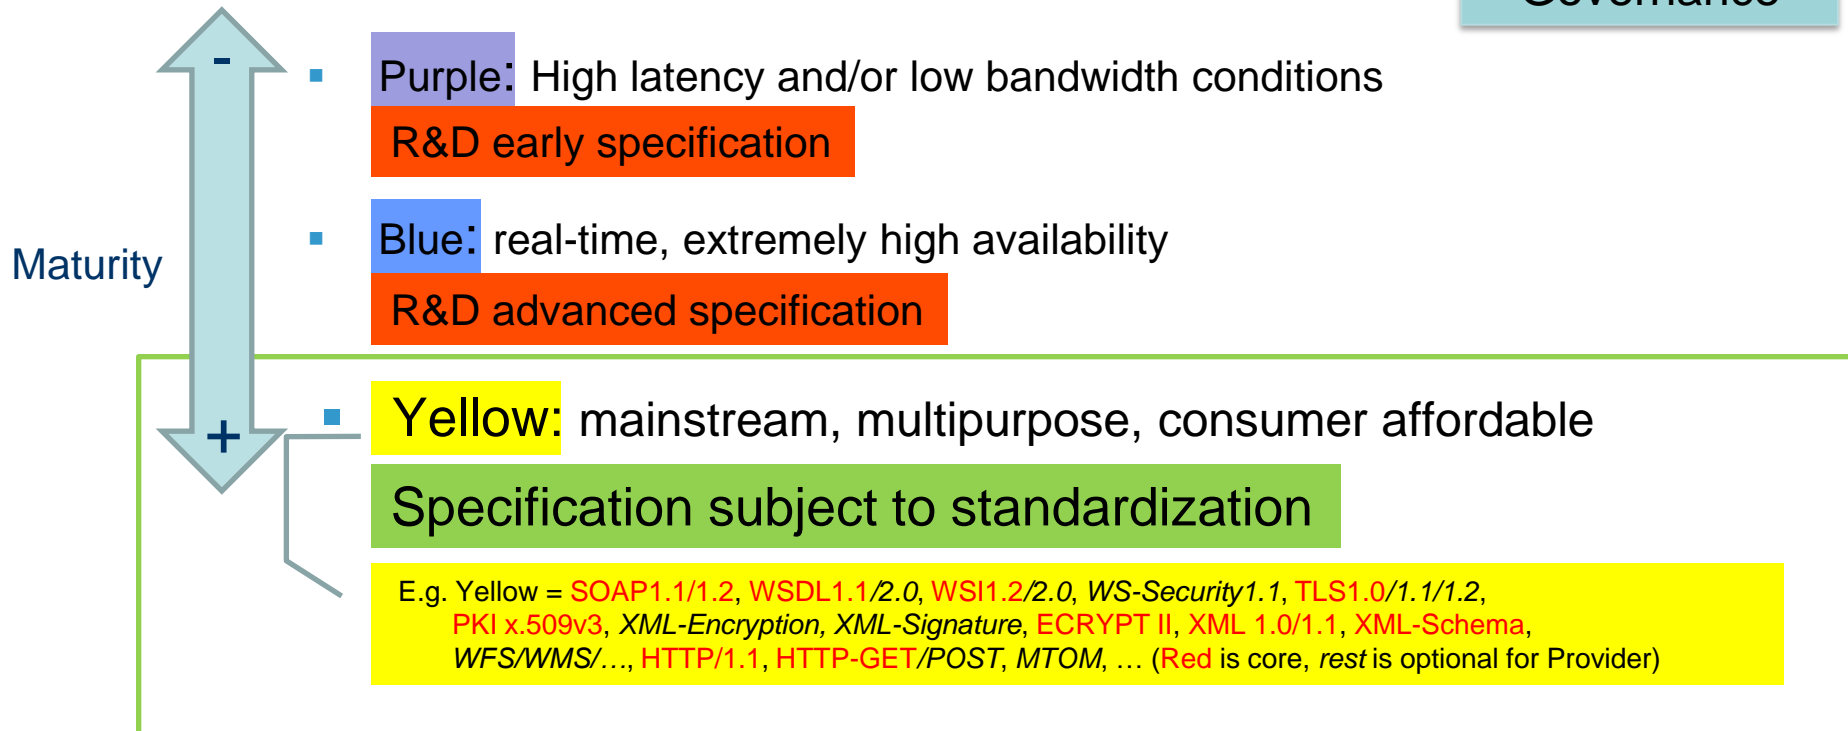

## Functionality:

- **Messaging** (e.g. Distribution, Routing, Transformation,...)
- Security
- Recording,
- Supervision
- ...

# Infrastructure

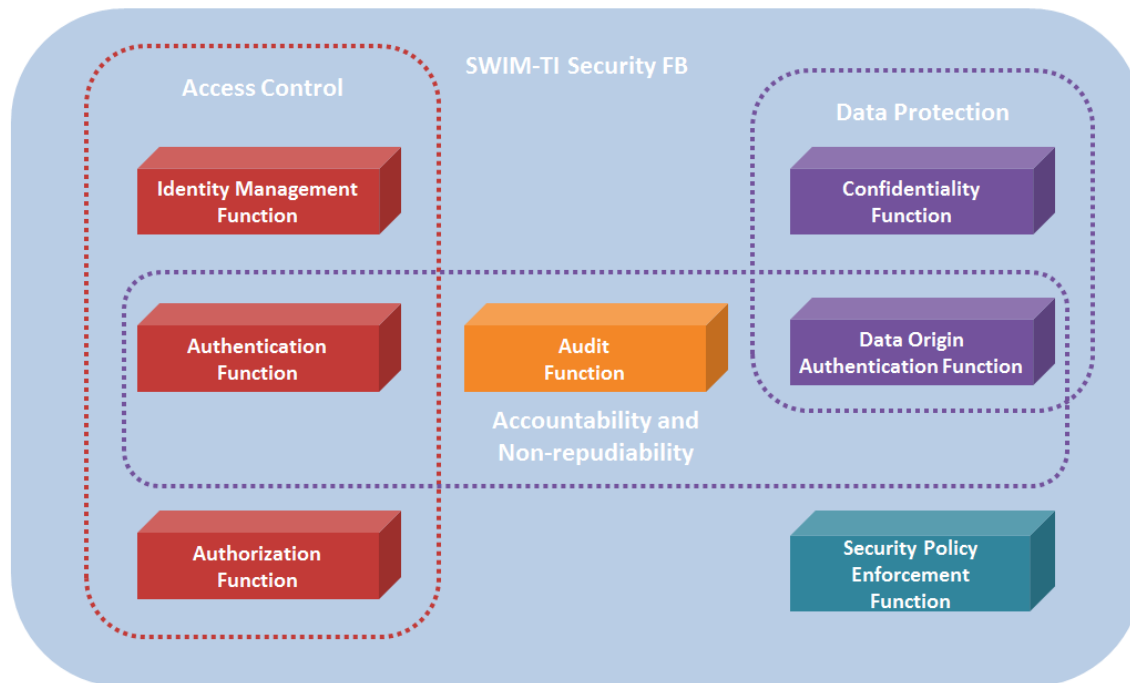

## "One size does not fit all": TI Profiles

TI Profile: Infrastructure requirements including transport protocols

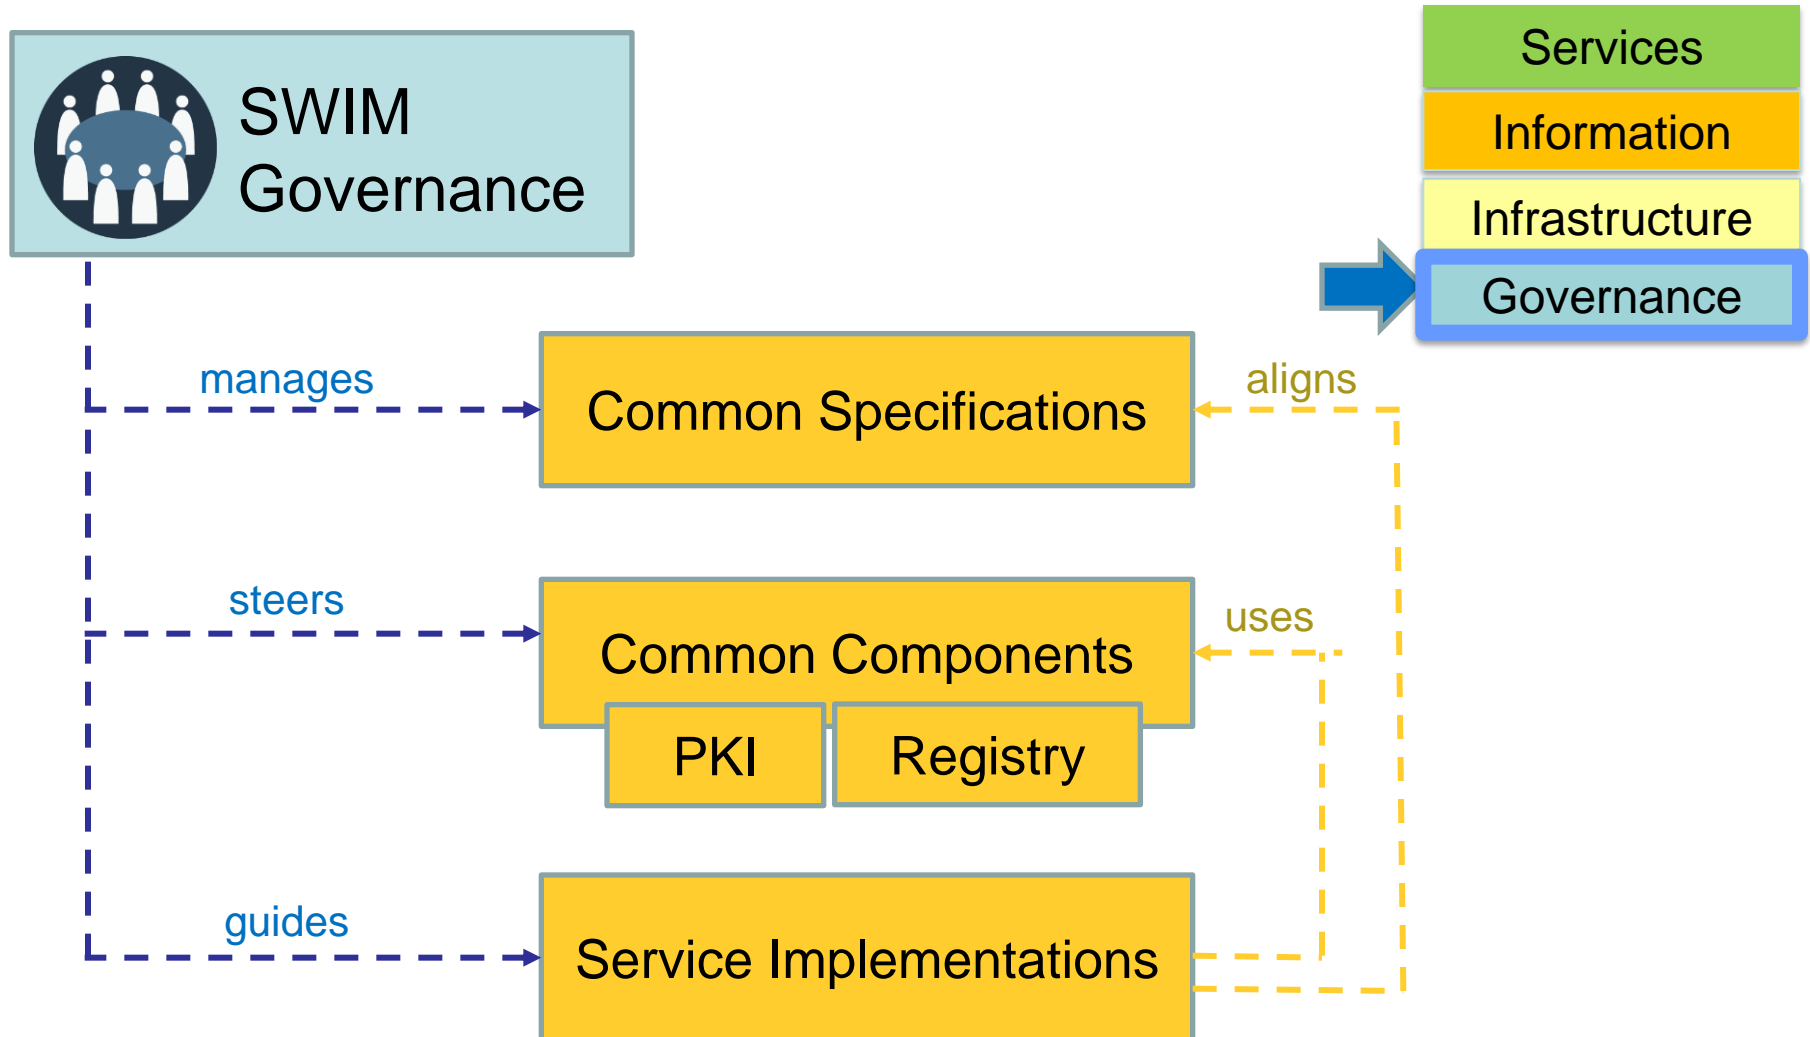

# Infrastructure Security

- The infrastructure will implement functions that secure information exchanges :*

# Governance

# SESAR Steps

**Regulated**

COMMISSION  
IMPLEMENTING  
REGULATION (EU)  
No 716/2014

EUROCONTROL  
SWIM STANDARDS

**Standardized**

European  
Air Traffic Management  
Master Plan  
Edition 1 - 30 March 2009

## Definition phase

- Create European ATM Master Plan

2005-08

## Development Phase

- Develop operational procedures and technologies

2009-16

## Deployment Phase

- Implement results of development to meet performance targets

2013-25

## SWIM Pioneers

B2B Services ( Airspace Mgt., Aeronautical Info, Flight Plan Mgt.)

**1.5 million messages/day**

## What can you do next?

- Data in digital format (e.g. AIXM)
- Available using web service technologies (XML, SOAP, WSDL)
- Over IP network (Internet/Private)
- Publish guidance to service consumers (if you build it, they will come)
- Formalize relationship with service consumers (SLAs)

# Follow up information

## ■ SESAR Joint Undertaking

The screenshot displays the SESAR SWIM Registry website interface. At the top, there is a navigation bar with links for 'My Organisation', 'My Registry', 'My Account', and 'Logout'. Below this is a secondary navigation bar with categories: 'ABOUT', 'COMMUNITY', 'IMPLEMENTATIONS', 'REFERENCE', 'ACTIVITIES', and 'SESAR'. A search bar is located on the right side of the top navigation.

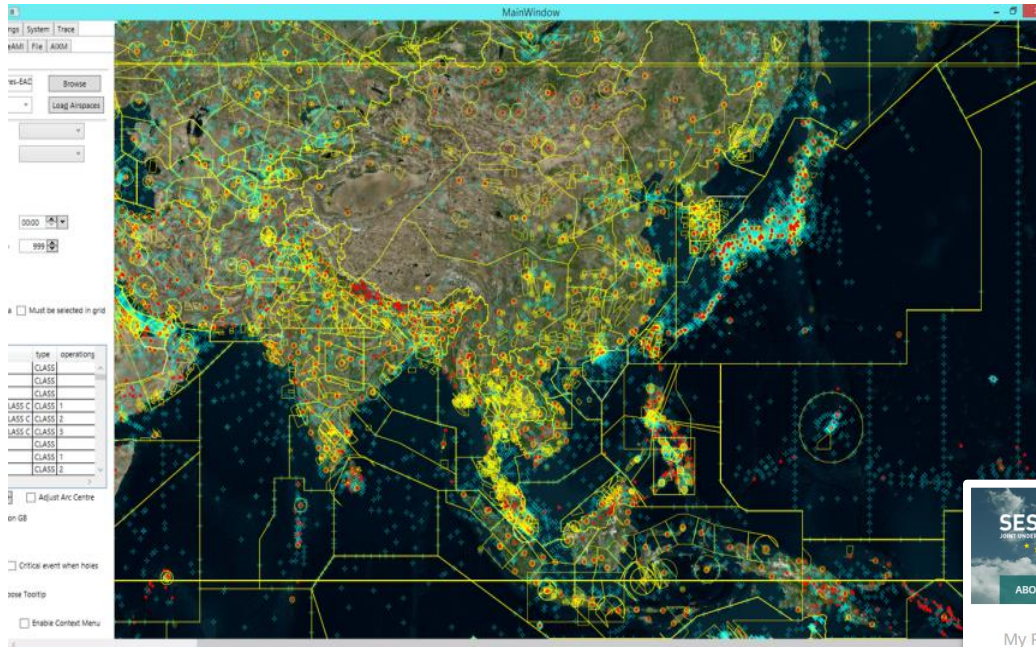

The main content area is titled 'My Registry' and features a 'Service Implementations' section with a pie chart. The chart is divided into segments for Surveillance, Aeronautics, Capacity, Environment, Flight, Meteorology, and Other.

Overlaid on the website are several 'sesar factsheet' documents. The visible ones include:

- ATM Information** (Summary: ATM - ...)
- SWIM Registry** (Overview - SWIM Registry: ...)
- System Wide Information Management (SWIM)** (Summary - SWIM: Connecting the ATM world)

The factsheets contain detailed information about the SWIM concept, its objectives, and the current situation and need for change. They also mention the expected increase in aviation capacity demands and the need for a more cost and time efficient exchange of information between providers and users.

See you soon
