

International Civil Aviation Organization

Middle East Regional Monitoring Agency Board

Eleventh Meeting (MIDRMA Board/11)
(Cairo, 27–29 September 2011)

Agenda Item 4: RVSM Monitoring and related Technical Issues

MID STATES MINIMUM MONITORING REQUIREMENTS

(Presented by MIDRMA)

SUMMARY

The aim of this working paper is to address the Minimum Monitoring Requirements (MMR) applicable for each MIDRMA member State.

Action by the meeting is at paragraph 3.

REFERENCES

- Annex 6

- ICAO Doc 9574
- SMR 2010

1 INTRODUCTION

1.1 It was highlighted during the last MIDRMA Board/10 meeting which was held in Tehran, I.R. of Iran 3-5 May 2010 that the ICAO Separation and Airspace Safety Panel (SASP) has identified that height-keeping performance monitoring results for RVSM approved aircraft had, in some cases, demonstrated long-term adverse trends in Altimetry System Error (ASE) stability. The likely results of this trend, if not reversed, would be aircraft becoming non-compliant with RVSM requirements. Accordingly, to ensure that adverse trends in ASE stability were detected, it was recognized by SASP that globally applicable RVSM long-term height monitoring requirements would be necessary.

2 DISCUSSION

2.1 As a result of proposals made by the SASP, during 2007 the ICAO Air Navigation Commission (ANC) agreed to amendments to Annex 6 – Operation of Aircraft that detail global RVSM long-term monitoring requirements that became effective on 18 November 2010. These requirements as stated in Annex 6 are:

7.2.7 the State of the Operator that has issued an RVSM approval to an operator shall establish a requirement which ensures that two aeroplanes of each aircraft type grouping of the operator have their height keeping performance monitored, at least once every two years or within intervals of 1,000 flight hours per aeroplane, whichever period is longer. If an operator aircraft type grouping consists of a single aeroplane, monitoring of that aeroplane shall be accomplished within the specified period.

2.2 The MIDRMA has considered the new requirements for long-term height monitoring in some detail, and has agreed that the RVSM Minimum Monitoring Requirements (MMRs) that have been adopted for global application by all ICAO Regional Monitoring Agencies (RMAs) should be the basis for implementation of the Annex 6 requirements.

2.3 A table detailing the minimum monitoring requirements (MMR) is published by the MIDRMA in conjunction with ICAO & RMACG and is available on the MIDRMA website, the MMR table already published in the MID RVSM SMR 2010 and the MMR for each MIDRMA Member State was addressed.

2.4 The MIDRMA took the initiative to facilitate the minimum monitoring requirements for each Member State and established a MMR database for the whole Region to manage and supervise all monitoring activities for all the Middle East airline operators and shall keep all Member States aware of their minimum monitoring requirements as needed.

2.5 The updated MMR for each member State already addressed to all MIDRMA focal points and their alternates and also published in the new draft SMR 2012. Member States are required to take all necessary measures to conduct height monitoring either by flying over any of the European HMUs or coordinate a GMU checks with the MIDRMA. The time frame to accomplish this activity was defined for each member State according to the number of aircraft required to be monitored by each State.

2.6 At present a total of 126 RVSM approved aircraft registered in the Middle East required to be monitored, this number is applicable to the latest RVSM approval list received from all member States and valid until 31st August 2011.

**MID. STATES - RVSM ACFT MINIMUM MONITORING REQUIREMENTES
AS OF AUGUST 2011**

Seq. #	MID STATES	RVSM ACFTs	HAVE HMU OR GMU	NOT Covered	NOT Covered in %	ACFT MMR	Required MON in %	REMARKS
1	BAHRAIN	58	31	27	47%	9	16%	
2	EGYPT	128	89	39	30%	9	7%	
3	IRAN	123	42	81	66%	24	20%	11 added
4	IRAQ	14	0	14	100%	7	16%	
5	KSA	260	109	151	58%	42	7%	
6	KUWAIT	36	22	14	39%	3	20%	
7	LEBANON	33	29	4	12%	3	9%

9	QATAR	107	80	27	25%	4	8%	
10	SYRIAN	9	8	1	11%	1	9%	
11	UAE	328	257	71	22%	14	20%	
12	YEMEN	12	5	7	58%	4	4%	
	TOTAL	1138	682	456	40%	126	11%	

2.7 **Appendix A** to this working paper includes the MMRs for each member State detailing the status of each Middle East airline Operator and the number of aircraft required to be monitored in accordance with the HMU results received from Eurocontrol as of 31st August 2011. In summary, the Operators which required to be monitored in the MMR tables attached for each State don't have valid HMU or GMU results.

3 ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) note the information contained in this working paper;
- b) urge States to instruct all their airline operators to conduct height monitoring according to their MMR Table;
- c) invite States to coordinate with the MIDRMA all GMU monitoring activities for their airline operators; and
- d) urge States to ensure height monitoring is conducted within the time frame given.
