

*International Civil Aviation Organization*

**Middle East Regional Monitoring Agency Board**

**Twelfth Meeting (MIDRMA Board/12)**  
**(Kuwait, 17 – 19 December 2012)**

---

**Agenda Item 4: RVSM Monitoring And Related Technical Issues**

**MID STATES MINIMUM MONITORING REQUIREMENTS**

*(Presented by MIDRMA)*

**SUMMARY**

The aim of this working paper is to address the RVSM minimum monitoring requirements (MMR) applicable for each MIDRMA member states.

Action by the meeting is at paragraph 3.

**REFERENCES**

- Annex 6
- Annex 11
- ICAO Doc 9547
- MIDRMA Board/11 final report.

**1. INTRODUCTION**

1.1 According to ICAO Annex 6, MID States issued RVSM approvals shall establish a requirement which ensures that a minimum of two aeroplanes of each aircraft type grouping of the operator have their height-keeping performance monitored, at least once every two years or within intervals of 1000 flight hours per aeroplane, whichever period is longer and as agreed by the published MIDRMA Minimum Monitoring Requirement table for the MID Region.

**2. DISCUSSION**

2.1 All airline operators that operate or intend to operate in airspace where RVSM is applied are required to participate in the regional RVSM monitoring program. This monitoring program addresses requirements for monitoring the height-keeping performance of aircraft in order to meet regional safety objectives and addresses the requirements for monitoring established in ICAO Annexes 6 and 11 as well as Doc 9574.

2.2 In order to accomplish the ICAO Annex 6 and 11 concerning height monitoring requirements, the MIDRMA coordinated with all Member States to publish the MMR table which reflects all height monitoring requirements for each state, this table is continuously reviewed at regular intervals or when requested by any Member State.

2.3 Based on the latest RVSM approval lists received from MID States, the attached Table in **Appendix A** to this working paper has been consolidated to show the minimum monitoring requirements for each of the MID States, as of November 2012, taking into consideration that no updated RVSM approval list received from Yemen and Iran for more than 15 months.

2.4 At present a total of 1353 aircraft granted RVSM approvals by the MIDRMA Member States, this number is applicable to the latest RVSM approval list received from all member States.

2.5 The MIDRMA managed to put a big effort to reduce the percentage of aircraft that required to be monitored in the MID Region from 46% to reach 15% since the last MMR Table published for the MIDRMA Board 11 meeting, taking in to consideration the total number of the RVSM approved aircraft increased 13% from the last meeting.

**MID. STATES - RVSM ACFT MINIMUM MONITORING REQUIREMENTES**

**AS OF NOVEMBER 2012**

### 3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) urge MIDRMA Member States to coordinate with their State RVSM Approval Authorities (or State of Approval, where different) to instruct all their airline operators required to conduct height monitoring according to their MMR table; and
- b) discuss the issue of lack of updated RVSM approval list by I.R. of Iran and Yemen.
