

*International Civil Aviation Organization*

**Middle East Regional Monitoring Agency Board**

**Thirteenth Meeting (MIDRMA Board/13)**  
**(Bahrain, 9 –12 March 2014)**

---

**Agenda Item 4: RVSM Monitoring and Related Technical Issues**

**MID STATES MINIMUM MONITORING REQUIREMENTS**

*(Presented by MIDRMA)*

**SUMMARY**

The aim of this working paper is to address the RVSM Minimum Monitoring Requirements (MMR) applicable for each MIDRMA Member State.

Action by the meeting is at paragraph 3.

**REFERENCES**

- ATM/AIM/SAR SG/13 Report
- ICAO Doc 9547
- ICAO doc 9937
- ICAO Annex 6 Part I
- MIDANPIRG/14 Report
- MID RVSM SMR 2012-2013

**1. INTRODUCTION**

1.1 The height-keeping performance of aircraft is a key element in ensuring the safe operations of RVSM airspace. The RVSM height monitoring standards are considered the minimum requirement needed to maintain the safety of operations in the RVSM designated airspace.

1.2 Upon changes to ICAO Annex 6, Operation of Aircraft, Parts I & II, applicable on 18 November 2010, the following standard was adopted by the International Civil Aviation Organization (ICAO):

7.2.7 The State of the Operator that has issued an RVSM approval to an operator shall establish a requirement which ensures that a minimum of two aeroplanes of each aircraft type grouping of the operator have their height-keeping performance monitored, at least once every two years or within intervals of 1000 flight hours per aeroplane, whichever period is longer. If an operator aircraft type grouping consists of a single aeroplane, monitoring of that aeroplane shall be accomplished within the specified period.

## 2. DISCUSSION

2.1 The Height Monitoring Program for the MIDRMA is established and all the Middle East Civil Aviation Authorities must ensure that they cooperate with the MIDRMA to maintain their height monitoring targets for each operator's fleet according to the published MIDRMA Minimum Monitoring Requirement (MMR) Table. Operators found not in compliance with this table will face the risk of suspending their RVSM approval until they prove that they have met the minimum monitoring requirements again.

2.2 The MIDRMA took the initiative to facilitate the MMR for each Member State and established the MMR database for the whole Region to manage and supervise all monitoring activities for all the Middle East airline operators and shall keep all Member States aware of their MMR as needed.

2.3 The meeting may wish to note that the MIDRMA addressed the last MMR table issued for the SMR 2012-2013 to the ATM/AIM/SAR SG/13 and to MIDANPIRG/14 meetings and requested from all concerned Civil Aviation Authorities to take all necessary measures to ensure their enforcement of this table on all their RVSM approved aircraft to meet their minimum monitoring requirements according to ICAO Annex 6. The MIDRMA noticed that Lebanon and Yemen failed to comply with this table since the implementation of this requirement and despite several attempts from the MIDRMA to provide any kind of support to the concerned authorities to achieve their monitoring targets these two Member States remain as the only States in the MID Region that never met their minimum monitoring requirements.

2.4 Reference to the above and to the other MIDRMA Member States who partially met their MMR Tables, MIDANPIRG /14 meeting endorsed CONCLUSION 14/36 concerning RVSM Minimum Monitoring Requirements:

*CONCLUSION 14/36: RVSM MINIMUM MONITORING REQUIREMENTS*

*That, States that have not yet done so, be urged to:*

*a) take necessary measures to ensure that their aircraft operators fully comply with Annex 6 provisions related to long term height monitoring requirements, based on the MIDRMA MMR Tables; and*

*b) provide feedback to the ICAO MID Regional Office before 1 March 2014.*

2.5 Regrettably, the MIDRMA did not receive any response from Lebanon CAA to comply with the above draft conclusion, despite the List of Approved RVSM aircraft provided on 9 January 2014, indicating that three aircraft have not been granted RVSM approval. While Yemen MIDRMA Board Member reported on 27th February 2014 that instructions were issued from Yemen CAA to the concerned airline operators to conduct height monitoring but without specifying any deadline or the extended validity period for the RVSM approved aircraft without known height monitoring.

2.6 The MIDRMA urge all Member States to implement the height monitoring requirements according to ICAO Annex 6 to support the RVSM approval and to stop granting or reissuing the approvals without height monitoring results as operators will not obtain the full benefits offered by RVSM unless they are monitored, approved and registered in the database presented to all RMA's in the world.

2.7 The updated MMR as of Jan 2014 for each MIDRMA Member State already sent to all MIDRMA Board Members/Alternates. Member States are required to issue their instructions to all airline operators required to be monitored to conduct height monitoring as early as possible either by flying over any of the European HMUs or coordinate GMU checks with the MIDRMA.

2.6 The MMRs for each Member State as at **Appendix A** to this working paper, detail the status of each airline operator and the number of aircraft required to be monitored, in summary the operators required to be monitored in the MMR tables don't have valid HMU or GMU results.

### **3. ACTION BY THE MEETING**

3.1 The meeting is invited to:

- a) urge States to follow-up with their airline operators to conduct height keeping monitoring of their aircraft, in accordance with the latest MMR table, within the given time frame;
- b) urge States to coordinate with the MIDRMA all GMU monitoring activities for their airline operators requiring monitoring; and
- c) take necessary follow-up action on MIDANPIRG/14 Conclusion 14/36.

**MMR for Yemen as of January 2014= 3**

## MINIMUM MONITORING REQUIREMENTS – June 2011

1. **UPDATE OF MONITORING REQUIREMENTS TABLE AND WEBSITE.** As significant data is obtained, monitoring requirements for specific aircraft types may change. When Table 1 below, is updated, The MIDRMA will advise all State members. The updated table will be posted on the MIDRMA website.
2. **MONITORING PROGRAM.** All operators that operate or intend to operate in the Middle East Region airspace where RVSM is applied are required to participate in the regional RVSM monitoring programme. Table 1 addresses requirements for monitoring the height-keeping performance of aircraft in order to meet regional safety objectives. In their application to the appropriate State authority for RVSM approval, operators must show a plan for meeting the applicable monitoring requirements. Initial monitoring should be completed as soon as possible but not later than 6 months after the issue of RVSM approval, the State of Registry that had issued an RVSM approval to an operator would be required to establish a requirement which ensures that a minimum of two aeroplanes of each aircraft type grouping of the operator have their height-keeping performance monitored, at least once every two years or within intervals of 1000 flight hours per aeroplane, whichever period is longer.
3. **AIRCRAFT STATUS FOR MONITORING.** Aircraft engineering work that is required for the aircraft to receive RVSM airworthiness approval must be completed prior to the aircraft being monitored. Any exception to this rule will be coordinated with the State authority.
4. **APPLICABILITY OF MONITORING FROM OTHER REGIONS.** Monitoring data obtained in conjunction with RVSM monitoring programmes from other Regions can be used to meet regional monitoring requirements. The RMAs, which are responsible for administering the monitoring programme, have access to monitoring data from other Regions and will coordinate with States and operators to inform them on the status of individual operator monitoring requirements.
5. **MONITORING PRIOR TO THE ISSUE OF RVSM OPERATIONAL APPROVAL IS NOT A REQUIREMENT.** Operators should submit monitoring plans to the responsible civil aviation authority and to the MIDRMA that show how they intend to meet the requirements specified in Table1. Monitoring will be carried out in accordance with this table.
6. **AIRCRAFT GROUPS NOT LISTED IN TABLE 1.** Contact the MIDRMA for clarification if an aircraft group is not listed in Table 1 or for clarification of other monitoring related issues. An aircraft group not listed in Table 1 will probably be subject to Category 2 or Category 3 monitoring requirements.
7. **TABLE OF MONITORING GROUPS.** Table 2 shows the aircraft types and series that are grouped together for operator monitoring purposes.
8. **TRAILING CONE DATA.** Altimetry System Error estimations developed using Trailing Cone data collected during RVSM certification flights can be used to fulfill monitoring requirements. It must be documented, however, that aircraft RVSM systems were in the approved RVSM configuration for the flight.
9. **MONITORING OF AIRFRAMES THAT ARE RVSM COMPLIANT ON DELIVERY.** If an operator adds new RVSM compliant airframes of a type for which it already has RVSM operational approval and has completed monitoring requirements for the type in accordance with the attached table, the new airframes are not required to be monitored. If an operator adds new RVSM compliant airframes of an aircraft type for which it has NOT previously received RVSM operational approval, then the operator should complete monitoring in accordance with the attached table.

Table 1: MONITORING REQUIREMENTS TABLE

MONITORING IS REQUIRED IN ACCORDANCE WITH THIS TABLE			
NOTE: MONITORING PRIOR TO THE ISSUE OF RVSM APPROVAL IS <b>NOT</b> A REQUIREMENT			
CATEGORY		AIRCRAFT GROUP	MINIMUM OPERATOR MONITORING FOR EACH AIRCRAFT GROUP
1	GROUP APPROVED: DATA INDICATES COMPLIANCE WITH THE RVSM MASPS	A124, A300, A306, A310-GE, A310-PW, A318, A320, A330, A340, A345, A346, A3ST, AVRO, B712, B727, B737CL, B737C, B737NX, B747CL, B74S, B744-5, B744-10, B752, B753, B767, B764, B772, B773, BD100, CL600, CL604, CL605, C17, C525, C560, C56X, C650, C680, C750, CARJ, CRJ7, CRJ9, DC10, E135-145, E170-190, F100, F900, FA10, GALX, GLEX, GLF4, GLF5, H25B-800, J328, KC135, LJ40, LJ45, LJ60, MD10, MD11, MD80, MD90, PRM1, T154	Two airframes from each fleet of an operator to be monitored
2	GROUP APPROVED: INSUFFICIENT DATA ON APPROVED AIRCRAFT	Other group aircraft other than those listed above including: A148, <b>A158</b> , A380, <b>A400, AC90, AC95</b> , AN72, ASTR, ASTR-SPX, B701, B703, B703-E3, B731, B732, <b>B787</b> , BD700, BE20, BE30, BE40, B744-LCF, B748, C130, C500, C25A, C25B, C25C, C441, C5, C510, C550-552, C550-B, C550-II, C550-SII, <b>CRJ10</b> , D328, DC85, DC86-87, DC93, DC95, E120, E50P, <b>E55P</b> , EA50, F2TH, F70, FA20, FA50, FA7X, G150, GLF2, GLF2B, GLF3, <b>GLF6</b> , H25B-700, H25B-750, H25C, HA4T, IL62, IL76, IL86, IL96, L101, <b>LJ23, LJ24, LJ25, LJ28</b> , L29B-2, L29B-731, LJ31, LJ35-36, LJ55, MU30, P180, PC12, SB20, SBR1, SBR2, T134, T204, T334, TBM, WW24, YK42	60% of airframes (round up if fractional) from each fleet of an operator <b>or</b> individual monitoring
3	Non-Group	<b>Aircraft types for which no generic compliance method exists;</b> <b>BA11, R722, SJ30, STAR, B720, A225, GLEX-ASTOR, GLF5-AEW, VC-10 GPSN, B74S-SOFIA</b>	100% of aircraft shall be monitored

**Note:** The above table represents the minimum monitoring requirements; but RMAs may increase these requirements at their discretion.
