

Air Navigation Services Development in Oman

Air Navigation Services Development Objectives

ATM SG3

Standardized Nationwide Development

Wide-Ranging Development

Organizational Transformation Program

New Advanced ATC TWRs

New Advanced ATC TWRs

New Advanced ATM Centers

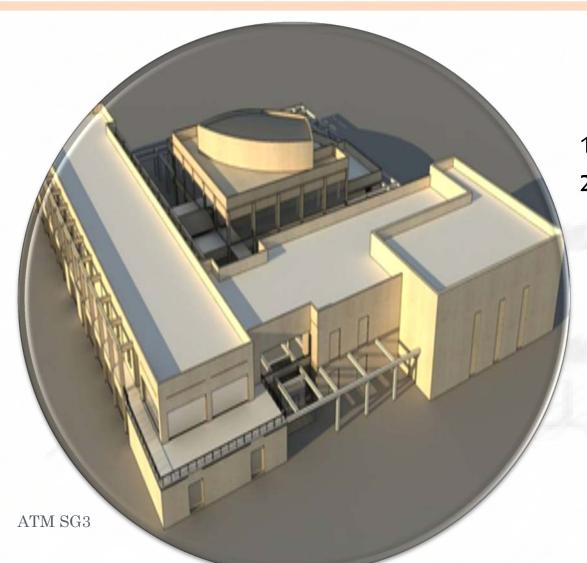

New Advanced ATM Centers

Contingency & Training Centers

- 1. 2015 ATM Training Facility, ATM Contingency unit South.
- 2. 2017 ANS Training Facility, ANS Contingency Center North.

Air Navigation Services Capabilities

1. SDP:

- Single & Multi Radar Processing, Multi sensor
 Data Fusion : MLAT, Radars, SMR, PSR weather data.
- > Safety Nets, RVSM, MTCD, STCA, Area Proximity Warnings, MSAW

3. DLS:

- → DVOLMET
- → DATIS

5. Direct Radar Access (Bypass):

- → SDP Bypass Mode,
- → Single Radar Processing,
- > Sensor Selection.

7. CWP:

- → Air Situation Display, Integrated (56')
- > SDP HMI,
- → Track Manual Update.

Air Navigation Services Capabilities

2. FDP:

- → Flight Data Processing,
- → FPL Associated Messages,
- → OLDI & AIDC Messages,
- → AFTN Interface.

4. Data Recording & Playback:

- → Air Situation Display Recording,
- > Playback,
- → Time Synchronization with Voice,
- → Archiving.

6. System Time Synchronization:

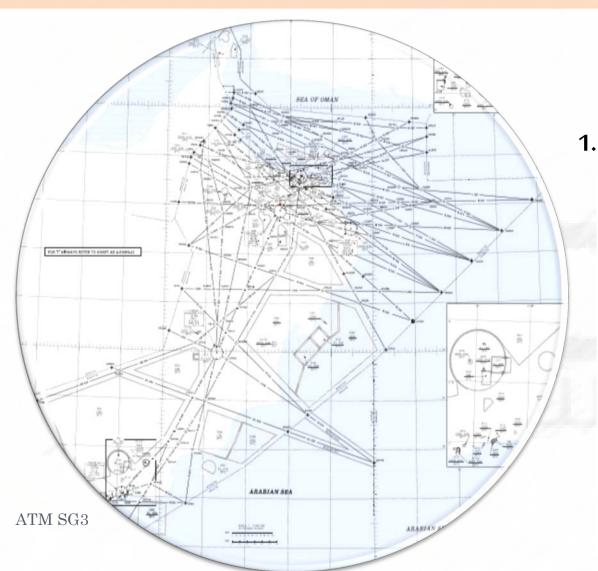

- → Dual GPS Receiver,
- → Network Time Protocol,
- → Node Time Update.

8. Flight Data Operator:

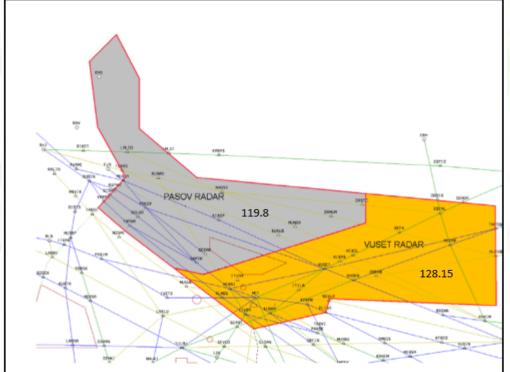

- → FPL List / Retrieve,
- → FDP HMI
- → FPL Manual Update,

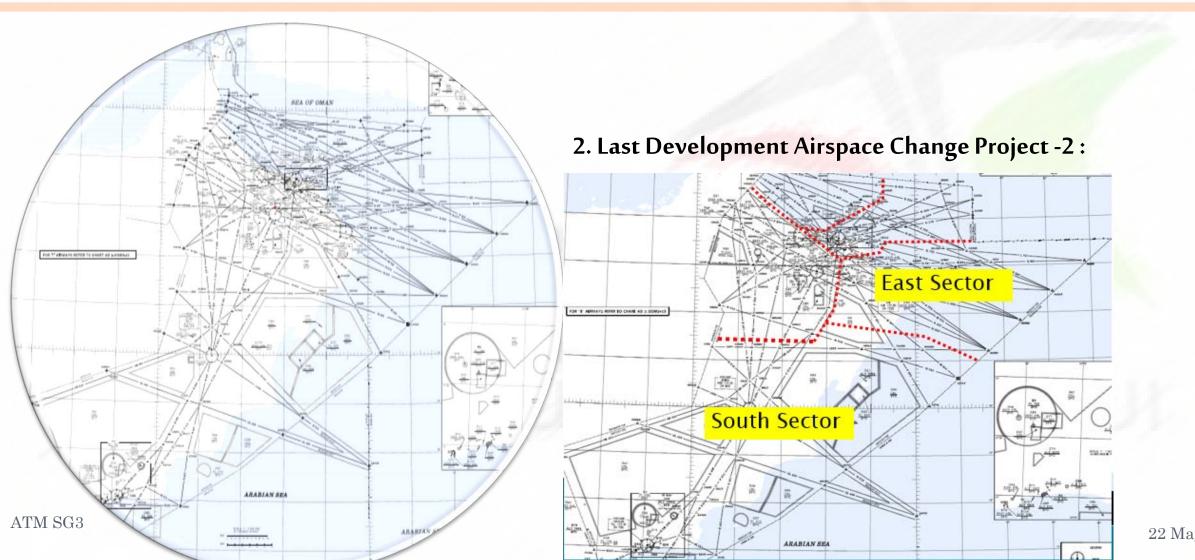

Strategic Airspace Restructuring & Development

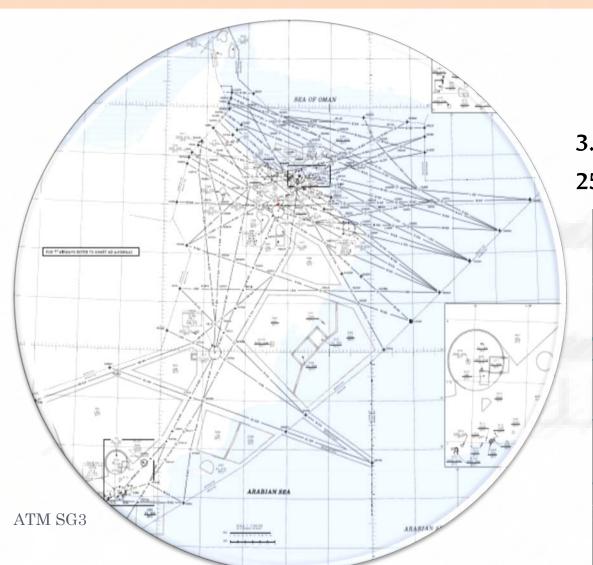

1. Previous Developments, RNAV1/RNAV5, ACP-1

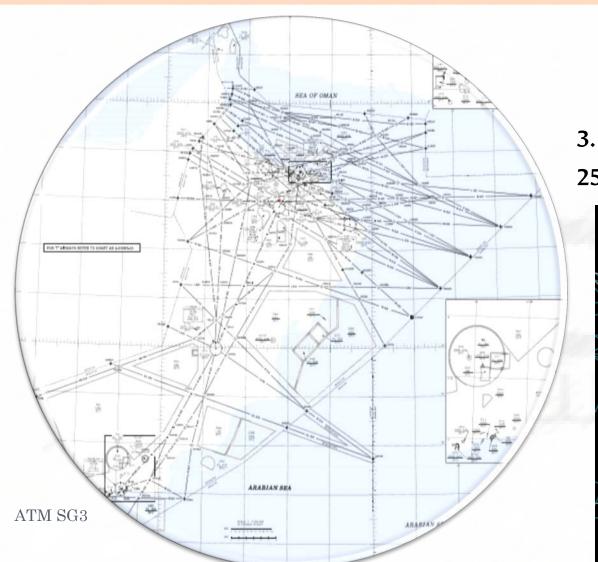

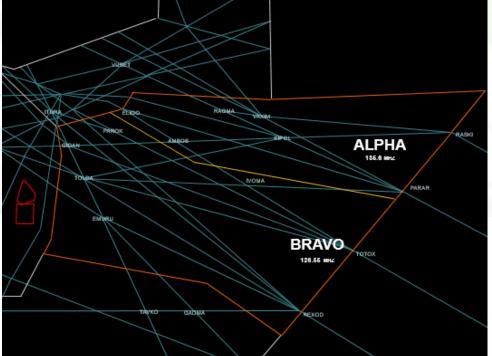

3. Ongoing Development Airspace Change Project -3 a (ACP-3a 25 May 2017 – ACP3b October 2017)

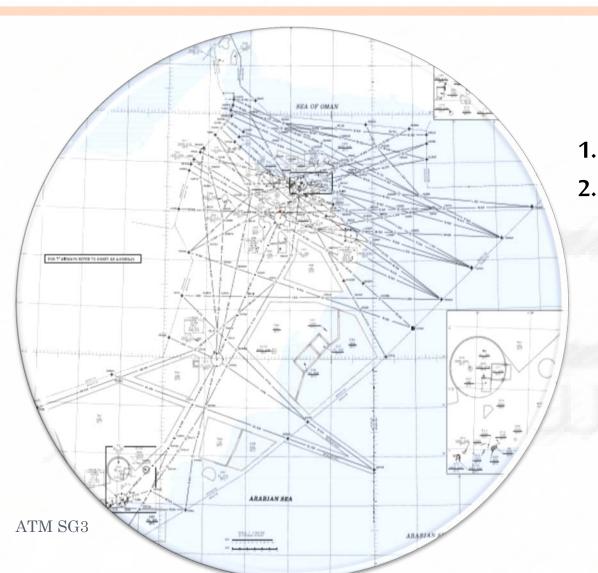

3. Ongoing Development Airspace Change Project -3 a (ACP-3a 25 May 2017 – ACP3b October 2017)

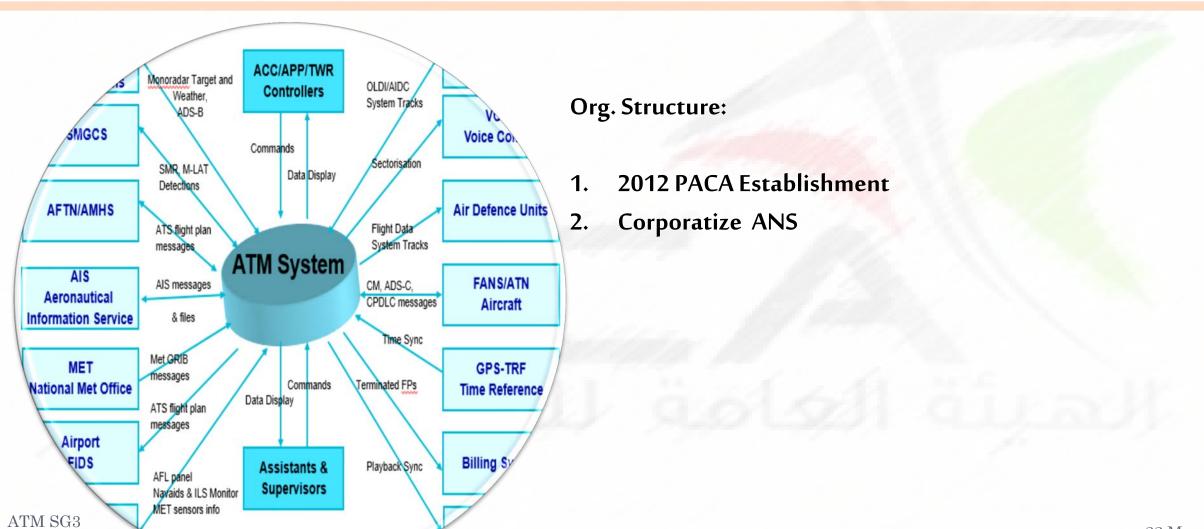

- 1. Airspace Change Project -3 a (ACP-3a 25 May 2017)
- 2. Air space Change Project-3 b (ACP-3b Q4-2017, Q1-2018)

ANS Infrastructure (Facilities & CNS)

Thank you
