CAPACITY & EFFICIENCY

What is the GANP?

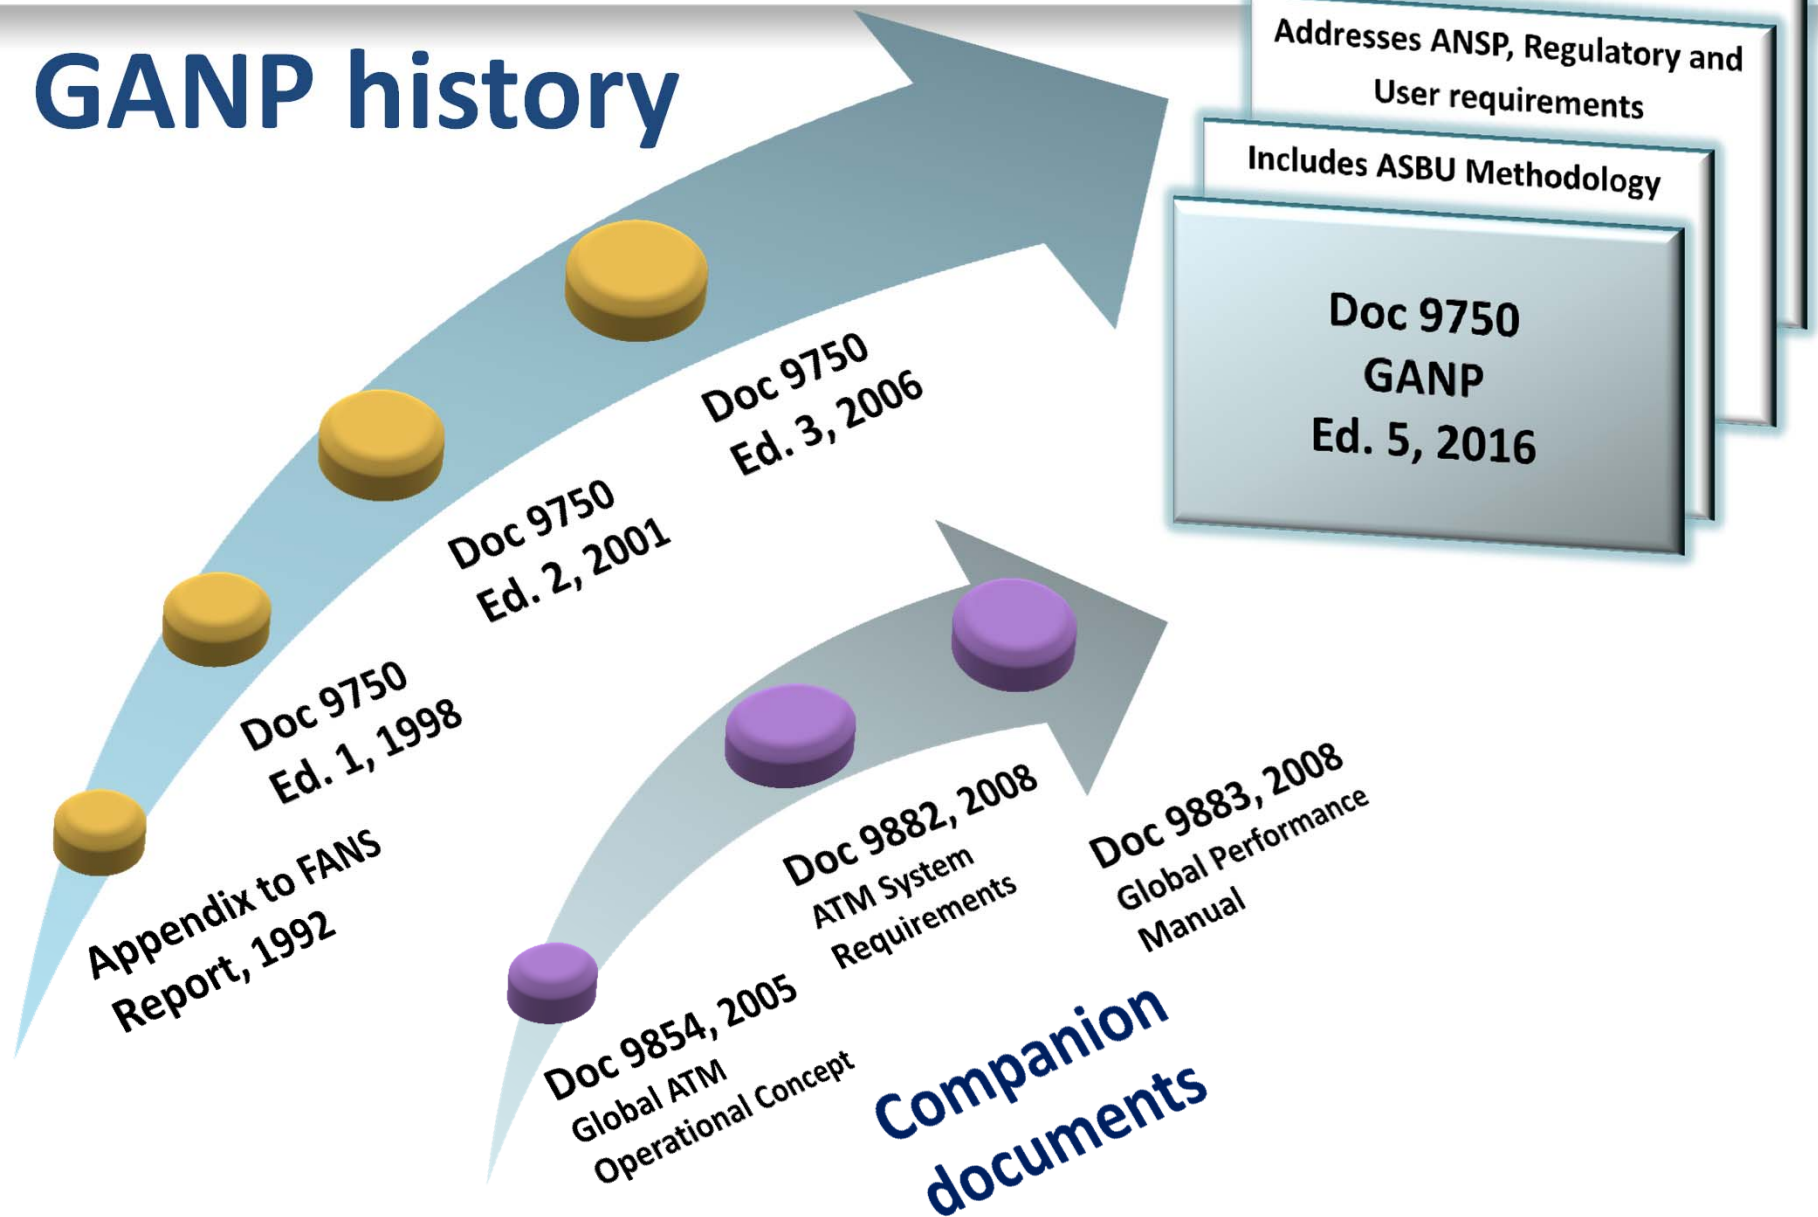

- Supports a harmonized global Air Navigation System
- It is an overarching framework
- Addresses key civil aviation policy principles
- Assists ICAO Regions and States to establish air navigation priorities for the next 15 years
- Assists ICAO Regions and States to prepare their navigation plans

GANP history

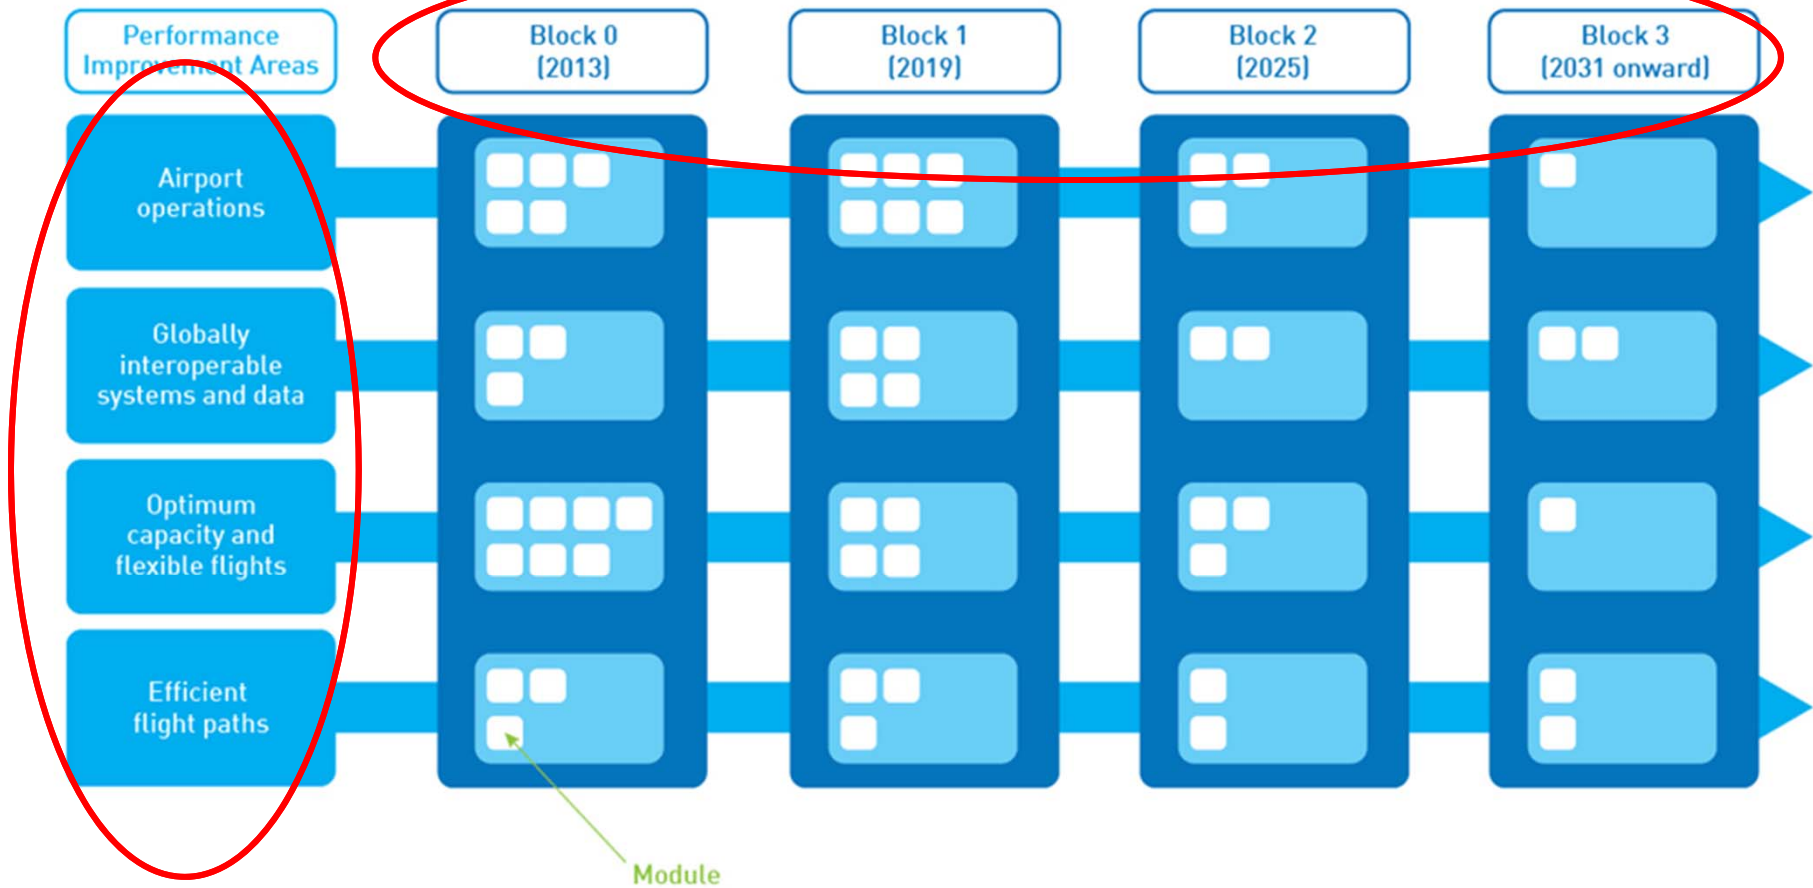

ASBU Framework

4 Performance Improvement Areas

6-year blocks (new 2016)

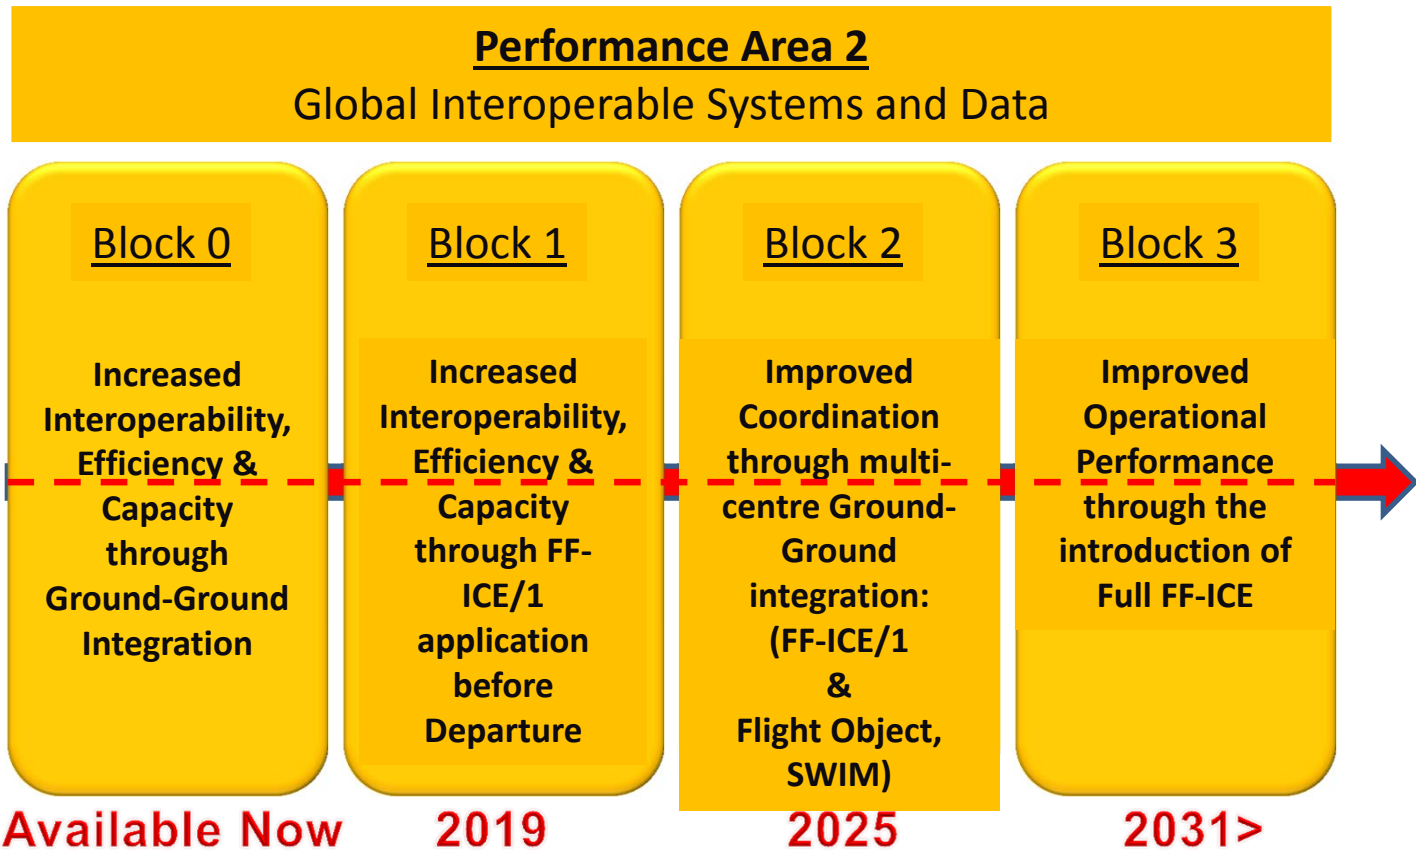

Blocks & Modules

Block—is made up of modules that, when combined, enable significant improvements and benefits (within a defined time frame).

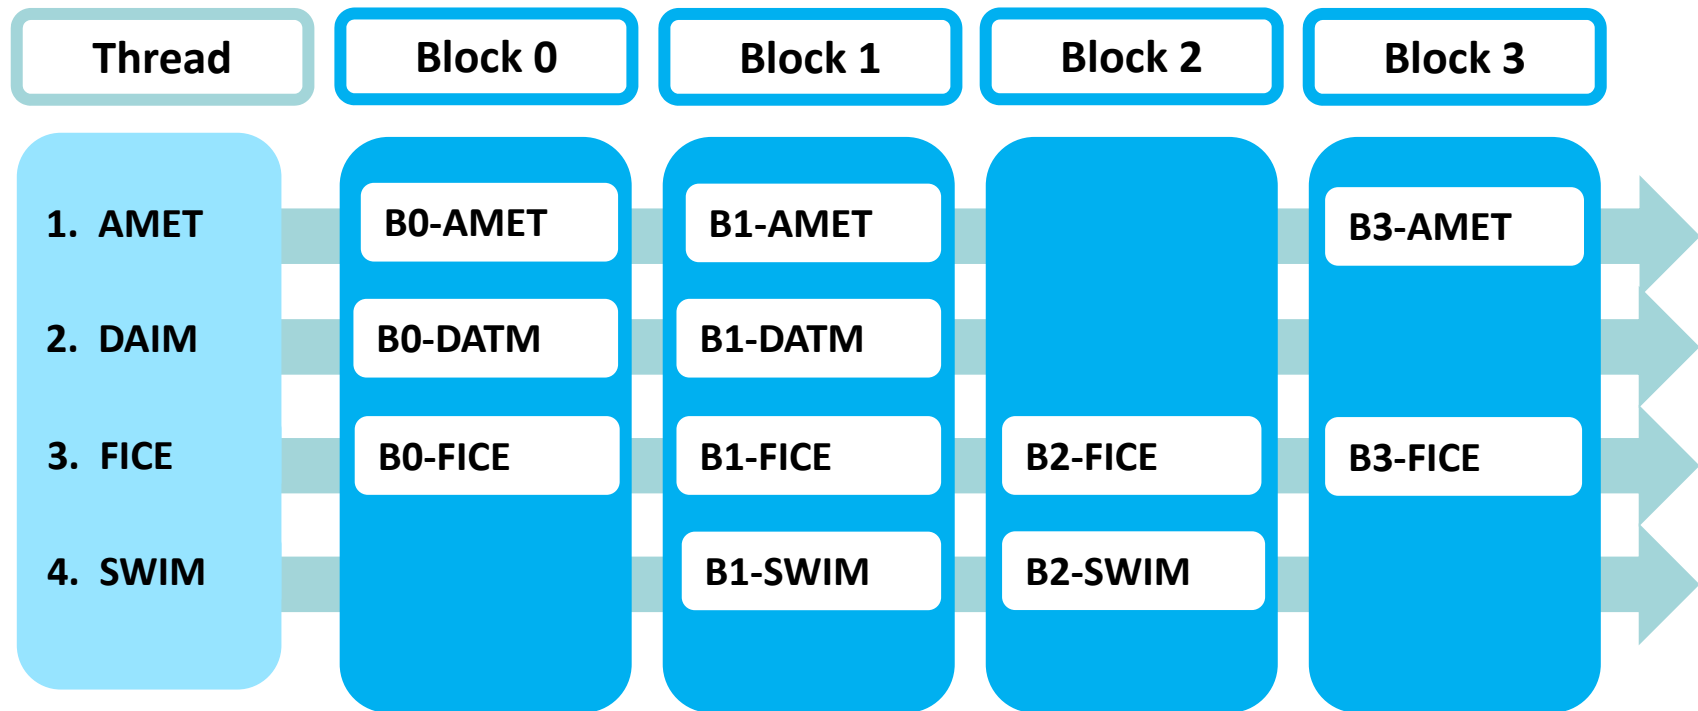

Module — a deployable package based on performance or capability. It offers a clear operational benefit, supported by procedures, technology, regulation/standards as necessary, and a business case. A module will be also characterized by the operating environment within which it may be applied.

PIA 2: Globally Interoperable Systems and Data

AIM Definition

- The dynamic, integrated management of aeronautical information through the provision and exchange of quality-assured digital aeronautical data in collaboration with all parties. (ICAO Annex 15)
- AIM: the right digital Aeronautical Information, at the right place, at the right time.

How to get there?

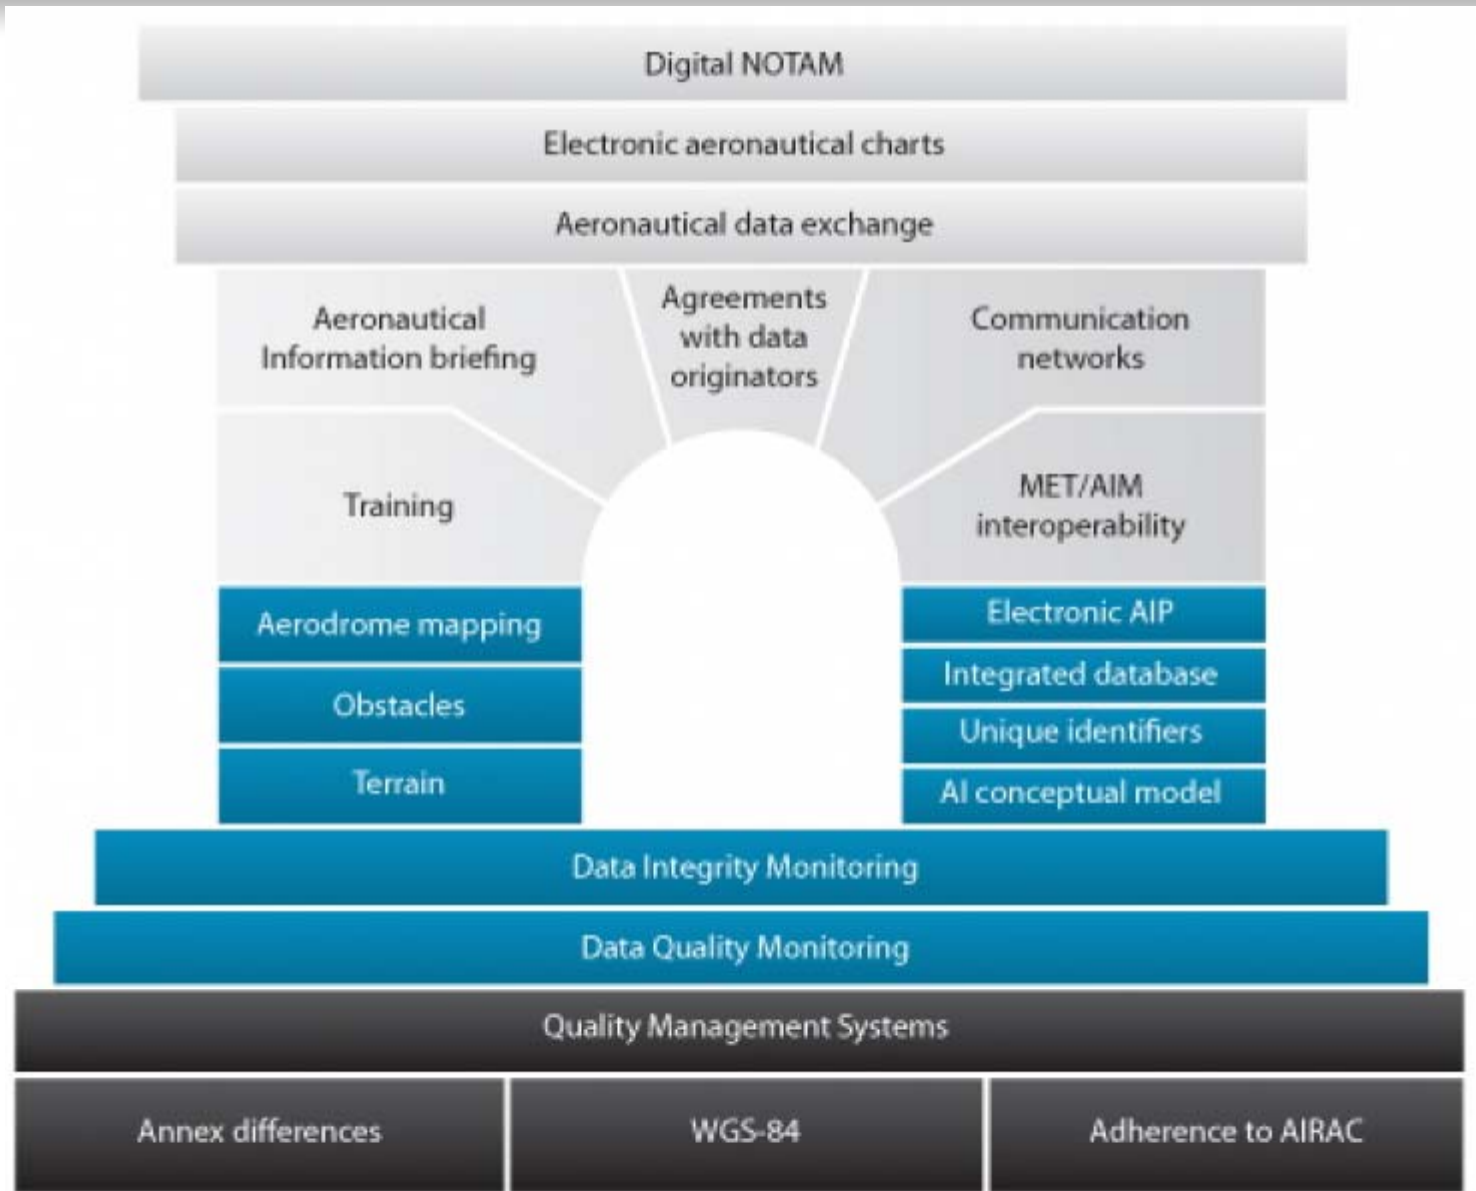

- *ICAO Roadmap for the Transition from AIS to AIM*
 - ICAO has developed in 2009 a roadmap to reflect the importance of the evolution and to address the required changes from AIS to AIM.
 - The roadmap identifies major milestones for a uniform evolution, the specific steps that need to be achieved and timelines for implementation.
