

International Civil Aviation Organization

Runway and Ground Safety Working Group

Fourth Meeting (RGS WG/4) (Cairo, Egypt, 05-07 November 2017)

Agenda Item 5: AOP Air Navigation Deficiencies

REVIEW OF AOP AIR NAVIGATION DEFICIENCIES

(Presented by the Secretariat)

SUMMARY

This working paper presents the deficiencies related to Aerodrome Operational Planning for review, update and remedial actions.

Action by the meeting is at paragraph 3.

REFERENCES

- MIDANPIRG/16 Report

1. Introduction

- 1.1 The standard definition of deficiency adopted by the ICAO Council in November 2001 is as follows:
 - "A Deficiency is a situation where a facility, service or procedure does not comply with a regional air navigation plan approved by the Council, or with related ICAO Standards and Recommended Practices, and which situation has a negative impact on the safety, regularity and /or efficiency of international civil aviation."
- 1.2 The list of deficiencies in the AOP field is reflected in the MID Air Navigation Deficiency Database (MANDD) at: http://www.cairo.icao.int.

2. DISCUSSION

- 2.1 MIDANPIRG/16 meeting recalled that MIDANPIRG/15 meeting, through Conclusion 15/35, urged States to use the MID Air Navigation Deficiency Database (MANDD) for the submission of requests for addition, update, and elimination of Air Navigation Deficiencies, including the submission of a specific Corrective Action Plan (CAP) for each deficiency; and agreed that a deficiency would be eliminated only when a State submit a formal Letter to the ICAO MID Office containing the evidence(s) that mitigation measures have been implemented for the elimination of this deficiency.
- 2.2 MIDANPIRG/16 meeting agreed to retrieve the following Conclusion related to elimination of Air Navigation Deficiencies:

CONCLUSION 15/35: AIR NAVIGATION DEFICIENCIES

That, States be urged to:

- a) use the MID Air Navigation Deficiency Database (MANDD) for the submission of requests for addition, update, and elimination of Air Navigation Deficiencies, including the submission of a specific Corrective Action Plan (CAP) for each deficiency; and
- b) submit a Formal Letter to the ICAO MID Regional Office containing the evidence(s) that mitigation measures have been implemented for the elimination of deficiency(ies) when requesting the elimination of deficiency(ies) from the MANDD.
- 2.3 The MIDANPIRG/16 meeting noted with concern that the majority of deficiencies listed in the MANDD have no specific Corrective Action Plan (CAP). MIDANPIRG/16 urged States to implement the provisions of MIDANPIRG Conclusion 15/35 related to elimination of Air Navigation Deficiencies, in particular, the submission of a specific Corrective Action Plan (CAP) for each deficiency.
- 2.4 The MIDANPIRG/16 meeting highlighted that in the AOP field; the total number of AOP deficiencies was 13; 12 of priority "A" and 1 of priority "B" deficiencies. The lack of implementation of aerodromes' certification represents 70% of these deficiencies
- 2.5 The meeting may wish to note that some of the data included in the MANDD (in particular the "Reference") have been reviewed and updated in accordance with the requirements set forth in the new MID eANP (VOL I, II and III last amended in 2017 and the latest Amendment to Annex 14 Vol. I).
- 2.6 The updating of the list of deficiencies, which is considered as a living document, is an on-going activity to reflect the identified/reported air navigation deficiencies in the MID Region. The updated list of deficiencies in the AOP field is at **Appendix A**.
- 2.7 Concerned States are invited to review the reported deficiencies and advice ICAO MID Regional Office of their action plans for elimination, in order to update the MID List of Air Navigation Deficiencies.

3. ACTION BY THE MEETING

- 3.1 The meeting is invited to:
 - a) urge States to implement the provisions of the MIDANPIRG/15 Conclusion 15/35; and
 - b) review AOP deficiencies at **Appendix A** and provide updates on the status of the AOP deficiencies in particular corrective action plans using MANDD.

Note:* Priority for action to remedy a deficiency is based on the following safety assessments:

'U' priority = Urgent requirements having a direct impact on safety and requiring immediate corrective actions.

Urgent requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is urgently required for air navigation safety.

'A' priority = Top priority requirements necessary for air navigation safety.

Top priority requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is considered necessary for air navigation safety.

'B' priority = Intermediate requirements necessary for air navigation regularity and efficiency.

Intermediate priority requirement consisting of any physical, configuration, material, performance, personnel or procedures specification, the application of which is considered necessary for air navigation regularity and efficiency.

Definition:

A deficiency is a situation where a facility, service or procedure does not comply with a regional air navigation plan approved by the Council, or with related ICAO Standards and Recommended Practices, and which situation has a negative impact on the safety, regularity and/or efficiency of international civil aviation.
