

International Civil Aviation Organization

MIDANPIRG Air Traffic Management Sub-Group

Fourth Meeting (ATM SG/4)
(Amman, Jordan, 29 April – 3 May 2018)

Agenda Item 4: MID Region ATS Route Network

MID ATS ROUTE NETWORK

(Presented by the Secretariat)

SUMMARY

This paper provides an overview of the developments related to MID Region ATS route network and propose a comprehensive amendment of the MID ANP Table II MID-1 for the meeting review.

Action by the meeting is at paragraph 3.

REFERENCES

- ATM SG/3 Report

1. INTRODUCTION

1.1 The meeting may wish to recall that, in accordance with its term of reference, the ATM SG is tasked to:

- a) review the MID ATS Routes Network in order to assess its capacity and constraints;
- b) identify requirements and improvements for achieving and maintaining an efficient ATS Route Network in the MID Region; and
- c) propose a strategy and prioritized plan for development of improvements to the route network, highlighting the areas that require immediate attention and the inter-regional issues/improvements with the adjacent ICAO Regions.

2. DISCUSSIONS

2.1 The meeting may wish to recall that the ATM SG/3 meeting revised the list of Top ATS Routes be implemented as a priority. The meeting agreed to remove the proposal (L315 South bond) from the list based on the result of the safety assessment carried out by Egypt. Moreover, considering that an alternative route to CRM-JAJ was implemented by Iran and Turkey to accommodate the traffic through the Oriented Track System within Tehran FIR, the meeting agreed to remove the TPR 4 from the list.

2.2 Based on the above, the ATM SG/3 meeting agreed on Top 4 Routes as at **Appendix A** and urged Egypt, Iran, Saudi Arabia and Sudan to implement the routes relevant to their FIRs. The meeting invited ICAO to facilitate the coordination with Cyprus and Pakistan regarding TPR 4 and TPR 3, respectively.

2.3 It is to be highlighted that in respect to TPR/2, Egypt agreed on the establishment of the segment PASAM-HGD and Saudi Arabia is studying the establishment of the segment HIL-PASAM. The envisaged implementation date is 19 July 2018.

2.4 The meeting may wish to note that Egypt and Sudan are still working together for the improvements of the ATS route structure at the interface between Cairo and Khartoum FIRs. The first meeting was held at the ICAO MID Office, Cairo, Egypt, 29-30 March 2017. Egypt informed the MID Office that the proposed improvements will be considered during the planning process of the Airspace Structure Project for Cairo FIR. Meanwhile, both States agreed to the implementation of 30NM radar longitudinal separation to be further reduced to 20NM.

2.5 Jordan is coordinating with Saudi Arabia the improvements of the ATS Route Network at the South-East part of Amman FIR to split the traffic flows through Guriat (GRY) on two parallel unidirectional routes.

2.6 Oman and Yemen agreed to the realignment of UB403 to ensure smooth traffic flows between Muscat-Mogadishu through Sana'a FIR. The implementation date was planned for 12 October 2017.

2.7 The realignment of ATS routes UM860 and UM688 within Bagdad FIR with the introduction of new Entry/Exit Point (RATVO) between Ankara and Bagdad FIRs, implemented on 27 April 2017, has met its objective and currently the aligned routes are heavily used, mainly for the traffic to/from the Gulf States.

2.8 UAE implemented successfully on 7 December 2017 the new airspace restructuring project within Emirates FIR. More details about the project will be presented by UAE through a power point presentation.

2.9 Sudan new airspace design projects was implemented on 26 April 2018 within Khartoum FIR. More details about the project will be presented by Sudan through a power point presentation.

2.10 The new ATS route structure over the Empty Quarter had been successfully implemented on 26 April 2018 by Oman and Saudi Arabia in close coordination with UAE and in consultation with the airspace users.

2.11 It is to be highlighted that several efforts are taking place to improve the ATS route network at national and cross-border levels. In this respect, the ICAO MID Office reiterates its willingness and commitment to facilitate the coordination process if needed and invites States to use the MID RDWG for this purpose.

2.12 The meeting may wish to recall that the ATM SG/3 meeting recognized that the suffix U (Routes in Upper Airspace) has been misused, which is leading to confusion. In most cases, the limits of Upper ATS Routes are beyond the limits of the upper Airspaces, which are not clearly defined by some States. In the same vein, the meeting discussed the necessity/advantage of defining RNAV routes from FL160 and above. Accordingly, the meeting agreed to defer the decision to the ATM SG/4 meeting, based on analysis/justification to be presented by the Secretariat.

2.13 As a follow-up action to the above, the MID Office in coordination with Bangkok, Dakar, Nairobi and Paris Offices addressed the issue at the global level through the Secretariat of the Instrument Flight Procedure (IFP) Panel and ATM OPS Panel, which are working on amending the provisions of Annex 11 and 15 related to ATS routes including ATS route requirements, classification, PBN specification, and route designators. The subject was discussed by the IFPP and is expected to be addressed by the ATM OPS and Information Management (IM) Panel in September and November 2018, respectively.

2.14 Moreover, ICAO would like to thank ICAO EUR/NAT Office and EUROCONTROL for accepting the invitation to share the European experience with the meeting on different topics and one of them is the ATS Route Designators application in EUR (lower limit of RNAV routes, RNAV route designators, removal of suffix U, etc.).

2.15 The meeting may wish to note that the MID eANP Table II-MID-1 *MID Region ATS Route Network* was selected as prototype for the development of the electronic table on the ICAO ANP website platform. The Secretariat carried out a comprehensive review of the Table as reflected in **Appendix B** and the information were transposed to excel format as at **Appendix C** (lower Airspace) and **Appendix D** (Upper Airspace).

2.16 Taking into consideration the significant changes to the MID Region ATS Route Network, a comprehensive review of the Table II-MID-1 is required. Accordingly, the States' inputs are essential to reflect all the changes in the proposal for amendment of the MID eANP.

3. ACTION BY THE MEETING

3.1 The meeting is invited to:

- a) urge States concerned to implement the Top Routes relevant to their FIRs;
- b) encourage States to use the MID RDWG as a platform to address ATS Route improvements; and
- c) review and update the Table II-MID-1 at **Appendix B**, and agree that the ICAO MID Office process a proposal for amendment of the MID eANP (Doc 9708).

APPENDIX A

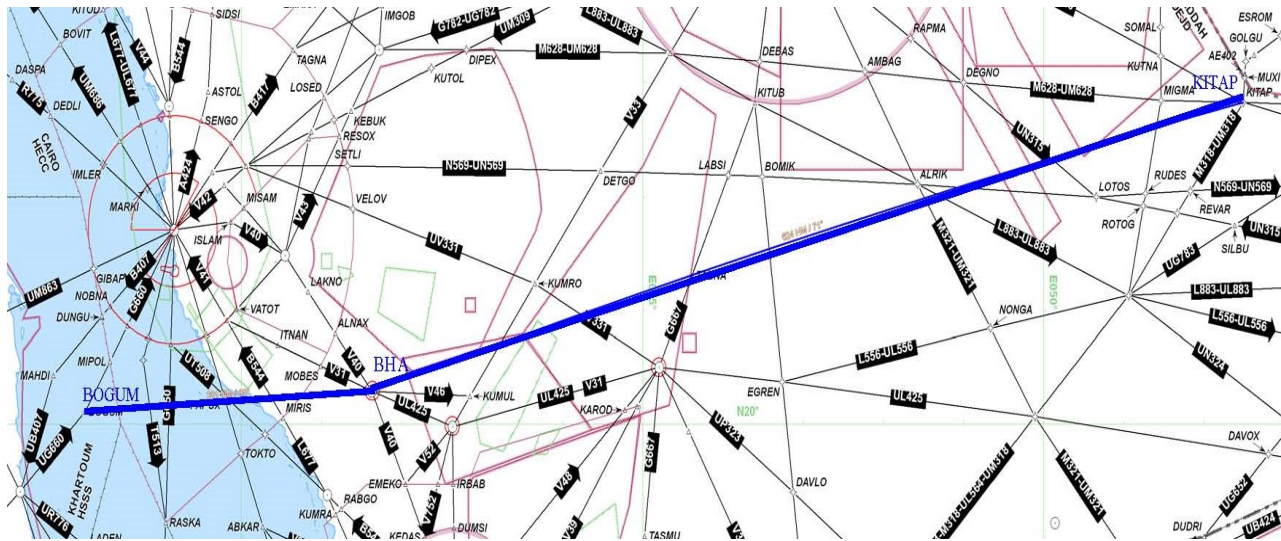

MID TOP SIX PROPOSED ATS ROUTES

TPR	ATS Route Catalogue Reference	ATS Route Affected	States Concerned	Status			Remarks
				Reviewed by	Date	Changed	
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)
1	RC-045	New	Saudi Arabia-Sudan	ATM SG/2	Dec. 2015	No	Moved to ANP
2	RC-083	New	Egypt-Saudi Arabia	ATM SG/2	Dec. 2015	No	Route amended and moved to ANP
3	Not from catalogue	New	Iran-Pakistan	ATM SG/2	Dec. 2015	Yes	
4	Not from catalogue	New	Egypt-Cyprus	ATM SG/2	Dec. 2015	Yes	

Table Explanation

- a) TPR used as reference for the proposed Top Six routes to be considered for implementation, numbers do not reflect the level of priority.
- b) Source of the proposed routes.
- c) Affected ATS Routes by the implementation of the new proposed routes.
- d) States Concerned with the implementation.
- e) The Group, Sub-Group or Task Force that had reviewed and updated the status of implementation of these top 10 routes.
- f) Date of last status update.
- g) Indicates if the status is changed or Not.
- h) Remarks.

TPR 1 (MID/RC -045)	ATS Route Name: New Route	Entry-Exit: PSD- KITAP		Inter-Regional Cross Reference	Users Priority	Originator of Proposal	IATA
		Date of Proposal	ARN TF/2				
Route Description		States Concern ed	Expected Impl. date	Implementation Status	ANP Status	Action Taken / Required	Deadline for each Action
Port Sudan (PSD) BOGUM Al BAHA (BHA) KITAP		Saudi Arabia Sudan		Not implemented	Moved to ANP August 2014	Sudan has no objection from Port Sudan to SALWA (CDR) KSA suggest Port Sudan BHA-KITAP (Normal route) will avoid CDR KSA needs more time for studying. <u>2017</u> <u>amended</u>	
Flight Level Band:							
Potential City Pairs: DGAA, DNMM, HSSS, OEJN, SBGR to OBBI, OMAA, OMDB, OTBD (Central and Eastern Arabian Peninsula to Sudan, West Africa, South America)

APPENDIX B

TABLE ATM II-MID-1 MID REGION ATS ROUTE NETWORK

EXPLANATION OF THE TABLE

Column

- 1 *Designator of ATS route and Type (Conventional, RNAV5 or RNAV1 etc.)*
- 2 *MIGNMfificant points defining the ATS routes. Only prominent locations have been listed. Additional points where facilities are provided to complete navigational guidance along a route, but not otherwise marking significant characteristics of the route (change of heading of centre line, intersection with other routes, etc.) have normally not been included. Locations shown in parentheses indicate significant points outside the Region.*
- Note 1. *Not representing the operator's requirements. Operator's required route and/or nav aids are shown in square brackets ([]).*
- Note 2. *Subject to further study. Including the associated navigation aid coverage.*
- Note 3 *Subject to military agreement.*
- Note 4. *Not acceptable at present.*
- Note 5. *At present, implementation possible only during specific periods (e.g. weekends, nights, etc., as published).*
- Note 6. *At present, implementation of the RNAV route only possible above FL 300, or as published.*
- Note 7. *Unidirectional use.*
- Note 8. *For ATS route or part thereof is RNAV 1*
