- **strengthen States Safety Oversight capabilities**, and **risk-based approach** to managing safety
- focus on MID Region **strategic safety priorities**: Organizational challenges/issues, operational safety risks, and emerging risks
- provide **strategy for improving safety** within a **specified timeframe**, through **defined SEIs** in a coordinated, cooperative and **collaborative approach** among States, international organizations, and industry to **achieve Safety Targets**
- **outline to all stakeholders** where the different **regional entities** involved in the management of aviation safety should **target resources**
- **emphasize the commitment** of States, international organizations, and industry to aviation safety.

MID-RASP

MIDDLE EAST REGIONAL AVIATION SAFETY PLAN

Safety monitoring and implementation

- The **MID Region Safety Performance Measurement & Monitoring** provides a regional specific goals and **supports the region's strategic approach** to managing safety at the regional level.
- MID region safety indicators and targets were aligned with the 2023-2025 GASP goals and targets as relevant in the MID Region
- RASG-MID would continuously **monitor the implementation of the identified SEIs in the MID-RASP** and measure safety performance of the regional civil aviation system, to ensure the intended targets are achieved, using the **MID SPMM**
- For each **Goal** established in the MID Region Safety Performance Monitoring, **identified SEI(s) be mapped** to it including their respective actions.

Reinforce efficient and effective cooperation and collaboration with all stakeholders, avoiding duplication and optimizing the allocation of resources

To address:

- a. Regional operational risks including emerging risks: **9 SEIs & 22 actions**
- b. Organizational issues including emerging risks: **15 SEIs and 39 actions**
