2011 MRTD SYMPOSIUM PROGRAMME AND DIRECTORY

Registration

15:00 - 18:00	Sunday, 11 September
08:00 - 14:00	Monday, 12 September
09:00 - 12:00	Tuesday, 13 September

DAY 1 MONDAY 12 SEPTEMBER

07:30 - 09:00

Continental Breakfast
Sponsored by the **HID Global**

09:00 OPENING OF THE EXHIBITION

09:40 Solutions-Oriented Workshop

Conference Room 3. 1st Floor

Presentations *(Please note all times are approximate)*

09:40

Gemalto

Mr. Verna Heino, Marketing Manager, Travel documents, Gemalto Finland

Moving to the Third Generation of Electronic Passport

With the introduction of the ICAO Supplemental Access Control (SAC), this presentation will give an overview of how to manage the approaching SAC migration in travel documents and associated systems.

10:05

Entrust, Inc.

Mr. David Mahdi, Entrust Product Marketing Manager

Trends in ePassport Trust

Budget, time-to market and gaps in on the ground expertise are driving new models for ePassport Trust.

10:30

EDAPS Consortium

Mr. Yuriy Shostak, Deputy Chairman of the Board, Strategy and Business Development at EDAPS Consortium

Global Identity Verification and Migration Mobility: The Case of the CIS Region

The concept of GV-ID Cards (for migration applications) developed as per ICAO/MRTD requirements and migration trends in the CIS countries.

10:50-11:10

Morning Coffee/Refreshment Break

Sponsored by **HID Global**

11:10

Morpho

Mr. Joost van Roon, Designer

The Function of Design in Passports and Other ID Documents

As a country's most important document, every passport deserves special attention and the best design possible which is a major factor in the security concept.

Day 1 Monday (continued)

11:35	**IRIS Corporation Berhad** **Mr. Ronald Saade**, Chief Operating Officer **Beyond the Book...** **Compelling Issues in Search of Resolution** Where popular interest was previously on the production of an ICAO compliant electronic passport, this presentation moves on to explore other issues that have not been resolved.
12:00	**Crane Micro-Optic Solutions** **Mr. Scott Palm**, President **Micro-Optic Security Features:** **Applications to Identification Documents** Explore the unique visual effects, applications and security advantages of this emerging technology.
12:25	**Speed Identity AB** **Mr. Magnus Löfgren**, Sales and Marketing Director **Live Enrolment — Learning From the Mistakes of Others** Highlighting the pitfalls in sourcing and rolling out biometric data capturing equipment and how to avoid these pitfalls.
12:45-14:00	**Lunch** Sponsored by **3M Company**

14:00 OPENING OF THE SYMPOSIUM

Assembly Hall. 4th Floor

Ten Years Since 9/11: Lessons Learnt and Ongoing Challenges in Combating Terrorism

Moderator: Mr. Denis Chagnon, Acting Chief, Communications Office of the Secretary General, ICAO

Official Welcome: Mr. Raymond Benjamin, Secretary General, ICAO

KEYNOTE: Mr. Rand Beers, Under Secretary, Department of Homeland Security, USA

KEYNOTE: Ambassador Francisco Jose Madeira, Special Representative of the Chairperson of the Commission on Counter Terrorism Cooperation, African Union

KEYNOTE: Mrs. Folasade Odutola, Director of the Air Transport Bureau, ICAO

15:00–15:30

Afternoon Coffee/Refreshment Break

Sponsored by **DILETTA ID-Systems**

DILETTA ID-SYSTEMS

ICAO AVSEC Declaration 2010 and Beyond: the Emerging MRTD Strategy

Mr. Jim Marriott, Chief, Aviation Security Branch, ICAO

The presentation looks into the broader context of aviation security developments that have been taking place as a response to acts of unlawful interference during the recent years. It goes on to address the strategic directions and current developments of the MRTD programme, in order to consolidate its relevance to the needs and expectations of the travel document and border security community. Finally, the presentation provides a foundation for the MRTD Strategy panel that will take place on the last day of the Symposium, and frames its objectives and main items for the discussion.

Post-9/11 AVSEC Incidents: Highlighting the Need for a Comprehensive Approach

Mr. Philip Baum, Managing Director, Green Light Ltd. & Editor, Aviation Security International, UK

How have we reached a stage where shoes are routinely removed, liquids restricted, whole body imaging is a routine in certain locations and we can't take our children to visit the pilot in-flight? Philip Baum looks at the various ways in which aviation has been targeted over the past decade and the industry responses to each attack or plot. He evaluates the effectiveness of the current screening procedures, supports the concept of the Checkpoint of the Future and sets out some ideas as to how we can provide better security and facilitation based on a common sense approach to aviation security, that respond to yesterday's threats and tomorrows.

Canada's Anti-Crime and Counter-Terrorism Capacity Building Programs

Ms. Alanna Parsons, Chief Counter-Terrorism Capacity Building Program (CTCBP), Department of Foreign Affairs and International Trade Canada (DFAIT)

The presentation will initially describe both Canada's Anti-Crime and Counter-Terrorism Capacity Building Programs (ACCBP and CTCBP). It will then present recent Canadian programming in the areas of border and transportation security, including Canada's support to ICAO projects.

Intelligence-Driven Risk Management and the Benefits of a Partnership Approach at National, International and Global Level to Secure End-to-End Supply Chains for all Modes of Transport

Ms. Susanne Aigner, Deputy Director Compliance and Facilitation, World Customs Organization

The presentation will cover risk management based controls of goods, the need for relevant and correct data, thus the need for cooperation with industry and trusted trader programs, as well as the need to cooperate at national, international and global level, among the Customs but also with other agencies. It will also cover security, efficiency and resiliency of global supply chains, global standards and the need to minimize trade disruption. Finally, the speaker will touch upon integrated border management, the role Customs plays and how we address the necessary linkages to robust identity management and API/PNR.

17:00–17:15 **Lunch Sponsor's Presentation** 3M

17:15–17:30 **Reception Sponsor's Presentation**

17:30–19:30 **Welcome Reception**
Sponsored by **Gemalto**

DAY 2 TUESDAY

13 SEPTEMBER

07:30 – 09:00

Continental Breakfast

Sponsored by **Toshiba Corporation**

TOSHIBA

09:00

Ten Years Since 9/11: Lessons Learnt and Ongoing Challenges in Combating Terrorism

KEYNOTE: Countering Terrorism Together

Mr. Mike Smith, Executive Director, United Nations Counter-Terrorism Executive Directorate (UN CTED)

Since September 2001, we have collectively taken important steps to strengthen our laws against terrorism, to improve the control of our borders, to hinder the transfer of funds to terrorist groups, to bring terrorists to justice and to develop mechanisms to promote cooperation across borders. But terrorists adjust their tactics to our successes and we will continue to face major challenges. These can be overcome but will need much higher levels of national coordination between government agencies; greater involvement of the community in strategies to divert vulnerable individuals from paths into terrorism; and significantly deeper cooperation across borders, particularly in the legal and financial fields.

KEYNOTE: ePassport and the Security Program at Passport Canada

Ms. Christine Desloges, CEO Passport Canada

Christine Desloges will make a presentation on Passport Canada's security program. This will include several key initiatives that have strengthened the passport adjudication process and will lead to the issuance of ePassports to all Canadians in 2012.

10:00–10:30

Morning Coffee/Refreshment Break

Sponsored by **Datacard Group**

DatacardGroup

10:30

Use of Travel Documents and Data: Their Role in Combating Terrorism and Trans-Border Crime

Moderator: Mr. Barry Kefauver, ICAO TAG/MRTD expert, International Organization for Standardization (ISO), USA

Non-Compliant Travel Documents: State of Play and Implications to Border Security

Mr. Dwight MacManus, Director, Travel Applications, Canadian Bank Note Company, Ltd.

Machine-readable travel documents are designed to facilitate border inspection and database verification. Non-compliant documents may be incorrectly recognized at the border, resulting in potential security risk and create unnecessary delay. ICAO's Implementation and Capacity Building Working Group (ICBWG) monitors non-compliance issues and will present several recent examples observed on passports.

ePassport Compliance Challenges: the Border Control Perspective

Mr. David Clark, Caicos Management Associates, President, Canada

e-Passports have been very widely accepted as a new generation of secure passports and are capable of providing excellent provable identity security to states. Yet their capabilities are not necessarily understood or properly utilized at many borders, which severely limits their benefits to international security. This talk focuses on the fundamental requirements for e-Passports at borders, examines various border practices outside of full authentication, and sets out proper program objectives for border officials to realize the full potential of e-Passports for their national security.

Challenges to the Immigration Control in 21st Century

Mr. Charles Stevens, Former Head of the UK National Document Fraud Unit

In this presentation Charlie Stevens will review the challenges faced in operating the modern immigration control and, in particular, the challenges to the development and use of secure travel and identity documents for ensuring that document fraud is effectively identified and countered. The presentation will first look at the threats facing the immigration control and will then go on to focus on three key areas which confront these threats, namely the use of technology, the need for professionally skilled control officers and the role of international outreach projects.

12:00–12:15 **Sponsor's Presentation**

12:15–14:00 **Lunch**

Sponsored by **Bundesdruckerei GmbH**

BUNDESDRUCKEREI

Overview of the Five Country Conference (FCC) Data Sharing Working Group

Mr. Jean-Marc Gionet, Deputy Director, Citizenship and Immigration Canada

The presentation will provide an overview of the Five Country Conference Data Sharing Working Group activities, current projects and the future strategic direction of FCC cross-border immigration information sharing.

KEYNOTE: CICTE's Counter-terrorism Capacity Building Strategy

Mr. Gordon Duguid, OAS/CICTE Secretary

The speaker will look into the strategic framework of the counter-terrorism capacity building that the Organization of American States CICTE has been carrying on in the Americas. The presentation will go on to address specific programmes and projects that OAS/CICTE has been implementing in the region, including exploring the relevance of their objectives to travel document and border security within the broader counter-terrorism capacity building agenda.

15:00–15:30

Afternoon Coffee/Refreshment Break

Sponsored by **Canadian Bank Note Company, Limited**

Advance Passenger Information and Passenger Name Record (API/PNR): Regulatory Framework and Practical Applications

Mr. Jitendra Thaker, Facilitation Officer, ICAO

The presentation will begin with an overview of ICAO's involvement in API and its work, jointly with WCO and IATA, in developing and maintaining the WCO/IATA/ICAO Guidelines on API. This will be followed by a review of the development of the API-related Standards and Recommended Practices in Annex 9. ICAO's work on PNR, including its PNR Guidelines, will then be taken up. An overview of possible future regulatory developments in PNR will follow. The presentation will conclude with a description of the information (that includes elements found in MRTDs) that may be included in API and PNR programmes, and the practical applications of such programmes.

Biometrics and Human Factors in Passport Controls

Dr. Richard Kemp, University of New South Wales, Australia

Since the ability to establish the identity of a traveller is a critical link in the fight against terrorism and crime, it is vital that passport applications are carefully screened for identity fraud. Despite advances in biometric technology and the introduction of sophisticated Face Recognition software, the comparison of pairs of portrait images by human observers remains at the heart of most identity verification systems. This is problematic given that psychological research has shown most people find it difficult to determine whether two images are of the same unfamiliar person. The speaker will present initial results emerging from a new research collaboration between the Australian Passport Office and psychologists at the University of New South Wales.

Perspective of Development of Technical Means of Border Control and Educational Process of Border Control Specialists

Mr. P.I. Martinov, Russian Federation

The speaker looks into the state of play of providing vocational training to border control staff in the Russian Federation. The presentation provides the overview of the border control framework in Russia, including the skill and competencies that are required by the border control personnel to perform their functions. It goes on to look into the details of the vocational training with particular focus on the technology that is used both in the training and carrying our border control duties.

Authenticating Travel Documents: Challenges and Good Practices

Mr. Bill Russell, Vice President, Mount Airey Group, USA

Now that so many States are issuing machine-readable travel documents, it is imperative to begin authenticating the PKI elements of these documents conforming to Doc 9303. Without this extra layer of authentication, fraudulent data will go unnoticed. However, with such a differing array of PKI data available from issuing States, authentication is a challenge. Nonetheless, with the right policies and infrastructure in place these document security features can be maximized.
This presentation suggests the infrastructure features and policies each State needs to consider in order to maximize the PKI-related security features of travel documents.

17:00–17:15 **Sponsor's Presentation**

17:15–19:30 **Reception**

DAY 3 WEDNESDAY

14 SEPTEMBER

07:30 – 09:00

Continental Breakfast

Sponsored by **Global Enterprise Technologies Corporation**

09:00

Procurement Workshop: Ensuring Quality and ICAO Compliance of Travel Documents

Moderator: Mr. David Philp, ICBWG Chair, General Manager, Passports, Department of Internal Affairs, New Zealand

MRTD procurement is an area that often poses challenges to government agencies introducing new travel documents. The procurement process presents considerable technical complexity, project budgets are large, and any mistakes tend to be costly, both in monetary terms and ICAO-compliance of the documents. The Procurement Workshop explores the foundations of a successful procurement project, looks into MRTD-specific issues and challenges, and outlines a number of best practices and points to watch. In addition, the Workshop provides an overview of procurement services and technical advice offered by ICAO and offers a forum for discussing specific "real world" challenges and needs that the Symposium participants may have.

Getting Procurement Right: Points to Watch in Implementing a New Travel Document

Mr. David Philp, ICBWG Chair, General Manager, Passports, Department of Internal Affairs, New Zealand

The speaker looks into MRTD-specific issues of procurement tenders, including common challenges, mistakes and international best practices that had been identified through the work of the ICAO MRTD Implementation and Capacity-building Working Group. The presentation stresses the importance of ICAO-compliance of the new travel document, which is a key aspect of quality management in a MRTD procurement project.

MRTD Procurement: the Foundations of a Tender Process

Ms. Marie-Ange Baraer, Procurement Officer,
Technical Co-operation Bureau, ICAO

The presentation provides an overview of the full cycle of the procurement process, including developing a tender dossier, running the tender, contracting the winning provider and completing the implementation of a tender including project closer steps. It also addresses common mistakes and some preventive best practices to avoid them in the first place.

ICAO Procurement Services: Ensuring the Quality of MRTD Tenders

Mr. Patrick F. Molinari, Chief, Procurement Section,
Technical Co-operation Bureau, ICAO

The speaker will provide a briefing about procurement services and technical assistance provided by ICAO, with particular reference to MRTD procurement and ICAO-compliance. Participants are welcome to highlight any procurement needs they may have or challenges they have been facing, in order to address it in detail with the ICAO technical cooperation staff.

ICAO MRTD Request for Information (RFI): Relevance to MRTD Procurement

Mr. David Philp, ICBWG Chair, General Manager,
Passports, Department of Internal Affairs, New Zealand

The presentation will brief the audience about the ICAO MRTD Request for Information (RFI), an exercise that takes place every three years in order to provide the TAG/MRTD and its working groups with the latest technology developments relevant to the evolving MRTD specifications.
David Philp will give a brief overview of the RFI 2011 results and explore the broader relevance of the RFI to MRTD procurement.

10:40–11:10

Morning Coffee/Refreshment Break

Discussions and Q&A:

Dealing with Difficulties: Troubleshooting in MRTD Tenders and Preventing Mistakes Through Good Planning Practices

Moderator, all members of the Workshop panel.

12:00–12:15 **Sponsor's Presentation**

12:15–14:00 **Lunch**

Sponsored by **Speed Identity AB**

14:00 **ICAO MRTD Specifications and Secure Issuance of Travel Documents**

Moderator: Mr. David Philp, ICBWG Chair, General Manager, Passports, Department of Internal Affairs, New Zealand

Current Document 9303 Developments and Latest Technical Reports

Mr. Tom Kinneging, Senior expert standardization, Morpho.
Acting convenor of ISO/IEC JTC1 SC17 Working Group 3

In 2009 ICAO stopped the hard copy publication of Doc 9303 and replaced it with an electronic publication available free of charge on the ICAO MRTD website. During the coming year ICAO and ISO will work together on a project to re-format Doc 9303 and to incorporate issues from the Supplement to Doc 9303 as well as the latest Technical Reports into the standard.
The objective is to benefit from the variety of opportunities the electronic publication has to offer with respect to maintenance and more efficient, effective, and user friendly publication.

Frontex Study on Security of Electronic Passports (ePassports) in Europe

Mr. Gustav Söderlind, Research Officer, Frontex

In 2010 Frontex — formally known as European Agency for the Management of Operational Cooperation at the External Borders of the Member States of the European Union — commissioned a study on the Security of Electronic Passports (e-Passports) in Europe. The study, which was completed in the spring of 2011, investigated security relevant issues in the context of the application for, production, and use of electronic passports (BAC and EAC) in Europe. The study also addressed best practices in the passport issuance process and recommendations for redressing security gaps.

ICAO's Sub-Programme on Evidence of Identity: Issues, Objectives and Expectations

Mr. Mauricio Siciliano, MRTD Officer, ICAO

Since MRTD specifications have become so comprehensive, the trans-border crime and terrorism focus has been shifting to the pre-issuing phase which contain far more weaknesses: evidence of identity ("breeder documents"), civil registries and gaps in the integrity of the issuance process. These areas need to be addressed with considerable political will, efforts and resources in order to consolidate the core MRTD programme security-wise. The NTWG's recent Technical Report "Towards Better Practices in National Identity Management" presents in a systematic way best practices in these matters, which MRTD-issuing authorities can use to enhance their capacity abilities to assess such documents, and minimize security risks they present.

15:15–15:45

Afternoon Coffee/Refreshment Break

Sponsored by **IRIS Corporation Berhad**

Use of Forensic Document Examination for Evidence of Identity

Ms. Samiah Ibrahim, Manager, Forensic Document Examination Section, Canada Border Services Agency

In its broadest sense, forensic document examination is used to show links between documents of any sort and persons, places or events for judicial purposes. This presentation will provide the audience with the Canadian perspective on how forensic document examination is used by the federal government in border, immigration and other fraud investigations to prove, or disprove, identity. By examining forensically the documentary evidence such as travel and secure identity documents, course of business documentation, other official or banking documents, and other personal documents, identities may be confirmed. This confirmation can then be used in judicial setting to combat fraud and other criminal activities.

Identity Management From the Start: Basic Conditions for Establishing a Unique, Legal Identity From Birth

Ms. Mia Harbitz, Senior Specialist, InterAmerican Development Bank

A discussion of the legal, institutional and technological challenges that countries face in order to ascertain a legal, unique, safe and secure identity for their citizens, and guarantee the veracity of breeder documents necessary to issue travel documents. This will require interoperability between agencies and national data bases, but if this is to be achieved, a citizen centred and holistic approach is essential.

Identity Management in Times of Crisis or Mass Evacuation: Humanitarian Focus

Mr. Raul Esparza Valencia, Universal Civil Identity Program in the Americas, Organization of American States

The presentation looks into specific challenges to efficient and effective identity management presented by major crises, natural calamities and post-conflict situations. The speaker will explore the OAS' programme activities in challenging environments in the Americas, with particular reference to the reconstruction work in Haiti after the earthquake, to dwell upon specific difficulties, responses and humanitarian considerations.

KINEGRAM

09:00

PKI and ICAO PKD Workshop

Moderator: Dr. Eckart Brauer, Senior Officer, Federal Ministry of Interior, Germany; Chairman of the PKD Board

In the recent years the PKD grew to become the pivotal infrastructure on a global scale for the secure and efficient use of ePassports especially in border control scenarios. The PKD Workshop sheds light on the steps to take in order to effectively participate in the PKD. The workshop gives clear practical advice on how to find and fill in relevant documents that accompany the start of PKD participation. Experts are ready to clarify all possibly existing doubts or questions about technical, administrative, financial, procedural or other PKD relevant arrangements.

PKD and ePassport - Inseparable Twins

Dr. Duncan Westland, UK

The presentation will explain in a non-technical way how the ePassport and ICAO PKD work together to provide unprecedented integrity to travel documents. The presentation includes an overview of the foundations of ePassport and PKD, their complementary relationship, the working principles of the PKD Board in terms of administration, finance and other relevant areas.

Standard Conformity: - the PKD Role

Mr. R. Rajeshkumar, Netrust Pty. Ltd., Singapore, PKD Operator

The presentation will detail the increasing role of the ICAO PKD as a tool to ensure compliance to Doc 9303 for Certificate and CRL profiles, with particular reference to the provisions of Document 9303. It provides a comprehensive overview of the PKD business case, technical and operational framework, PKD checks and typical mistakes, as well as other areas relevant to PKD operations.

ePassport Based Identity Check – Example

Mr. Benjamin Marzahn, BSI, Germany

The speaker will focus on the case study of the semi-automated border control (EasyPASS) and manual border control with PKD and SPOC (Single Point of Contact) in Germany, including the exchange of certificates from ICAO-PKD and CSCA/CVCA Germany to the Federal Police/border control, and other lessons learnt from the EasyPASS project.

10:30–11:00

Morning Coffee/Refreshment Break

14:00

Strategic Directions of the ICAO MRTD Programme: Maintaining Relevance to Future Needs and Challenges

The purpose of the Panel is to facilitate a dialogue between the ICAO senior management and the stakeholders of the MRTD community, with reference to ongoing MRTD Strategy exercise. Symposium participants are welcome to communicate issues, needs, suggestions, ideas or ask questions about matters of interest or concern related to the ICAO MRTD programme. While the feedback and questions from the MRTD community will serve as basis for panel discussions, the issues raised will also provide useful input for researching and developing the newly-emerging MRTD Programme Strategy.

Symposium participants are invited to reflect on matters of importance and submit written suggestions or questions to the panel. A box for suggestions and questions will be available at the entrance into the Assembly Hall during the whole event (until Thursday 12:00). As courtesy to moderators, please remember to indicate your name and agency. In addition to written submissions, Symposium participants are, of course, also welcome to contribute with ideas or ask questions orally during the Strategy panel discussions.

Moderator: **Mr. David Philp**, ICBWG Chair, General Manager, Passports, Department of Internal Affairs, New Zealand

Panel members:

Ms. Folasade Odutola, Director, Air Transport Bureau, ICAO

Mr. Jim Marriott, Chief, Aviation Security Branch, ICAO

Ms. Annette Offenberger, TAG/MRTD Chair, London Manager, Department of Internal Affairs, New Zealand

Mr. David Philp, ICBWG Chair, General Manager, Passports, Department of Internal Affairs, New Zealand

Mr. Barry Kefauver, ICAO TAG/MRTD expert, International Organization for Standardization (ISO), US

Mr. Mauricio Siciliano, MRTD Officer, ICAO

AmaTech Ltd.

AmaTech produces RFID enabled inlays for integration into secure electronic documents, using proprietary processes. The company is headquartered in Ireland with machine engineering capability in Germany. The AmaTech team has designed, developed and implemented robotic technology for the successful automation of electronic inlays.

Our core competencies are: engineering and design of automated inlay machinery; volume production of electronic inlays using laser ablation technology; process design and enhancement of inlays for use in high quality ID documents and smartcards; continuous R&D activity

The team members have almost 20 years experience in the RFID industry, in developing machines and processes and as well in running mass volume production; this enables AmaTech to meet the quality and economical requirements of our customers.

General Information

Registration of Participants

All participants are required to register. Upon registration, participants will be issued an ICAO security pass which will be needed to access the Conference Centre.

Identification of Participants and Security

The ICAO security pass must be visible at all times while on the premises. Security guards have strict instructions not to allow access to the ICAO premises or to the conference rooms to persons not wearing a pass.

Although special care should be taken not to lose these passes, registration personnel will provide replacements upon proper identification.

Meeting Arrangements

Presentations

Presentations will be posted on the ICAO website:
http://www.icao.int/mrtdsymposium2011/.

Languages

Facilities for simultaneous interpretation from and into English, French, Russian and Spanish will be available.

Presentations will be given in the language submitted by the speaker.

Communication Facilities

The ICAO Assembly Hall is equipped to offer Internet connectivity from each seat through a wireless network for attendees who bring their own portable computers equipped with **802.11b/g/n** network cards. Electrical power is available at every seat. Several radio frequency access points have been installed in the Assembly Hall, enabling participants to access Internet facilities (including the ICAO-NET website and web-based e-mail) from their seat by means of a special wireless communications card. Wireless public internet access is also available throughout the exhibition area.

General Information (continued)

Computer workstations configured with most of the **Microsoft Office** tools, and printers will be available on the first and fifth floors of the **Conference Centre** for participants who wish to access the Internet to use web-based e-mail services.

Technical support

Technical support for the configuration of participants' portable computers will be provided by ICAO's Information Technology staff.

Smoking

Smoking is **not** permitted in ICAO Headquarters.

Wireless Internet Access (WiFi)

Access to a public wireless network is available throughout ICAO's facilities. Using the public wireless network, users with computer equipment compatible with **WiFi 802.11b/g/n** will get access to the Internet.

Below are the specifications for ICAO's public wireless network:

Wireless network	Public@Intl. Civil Aviation
UserID	Guest
Passphrase	MRTD

Under normal circumstances, users of **Windows 2000** and **XP** will not have to set any special configuration parameters. For technical assistance call **extension 8248**.

General Information (continued)

Ancillary Services Provided by ICAO

Lost and Found

Lost articles should be reported to the office of the Chief, Conference and Office Services Section, telephone extension **8227**. Any articles found should be handed to the Security Desk.

Medical Services

The **Medical Consultant's office** is located on the fourth floor, **Room 4.25**, telephone extension **8212**. A nurse will be on duty at that location from 08:30-16:30 for the duration of the event. If an emergency occurs and if the nurse cannot be reached, the **Social Security** and **Welfare Unit**, also located on the fourth floor, **Room 4.35.28**, telephone extension **8236** or **8237**, will take appropriate action to obtain medical assistance.

Participants seeking medical attention can obtain from their hotel management the location and telephone number of a doctor in their hotel or nearby.

The closest hospital to the ICAO premises is the **McGill University Health Centre**, telephone **514-934-1934**.

Most hospitals have an emergency service open 24 hours a day.

Ambulance service may be obtained through a doctor or **Urgences-Santé**, telephone **911**.

Telephone Services

The **ICAO** general telephone number is **514-954-8219**.

Telephones for use within the Organization and for local calls in the Montreal area may be found on each level of the Conference Centre. When calling an extension within the Organization the four-digit extension may be dialled directly. When making a local call outside the building, "9" must be dialled before the outside number.

The internal telephones located in the Conference Centre cannot be used for direct long-distance calls. Long-distance calling cards may be purchased from the telephone operator on the fourth floor.

The use of cellular phones is prohibited in all conference rooms.

General Information (continued)

Other Services

Banking Facilities

The following banks are conveniently located relatively close to the ICAO premises:

National Bank of Canada
600 de la Gauchetière West
514-394-4385

Canadian Imperial Bank of Commerce
1155 René-Lévesque West
514-876-2323

Royal Bank of Canada
1 Place Ville-Marie
514-874-7222

TD Canada Trust
500 Saint-Jacques West (corner of McGill)
514-289-0799

City Bus and Metro Services

Public transportation by bus and metro is operated as an integrated system within the city limits and transfers may be made at designated points. Individual tickets as well as one-day and three-day passes can be purchased in advance at metro stations (not on the bus). All buses are the "pay-as-you-enter" type with the exact fare demanded (no change is given) or a ticket/pass. Route and fare information may be obtained by calling **514-288-6287**.

Newspapers and Magazines

Indigo Bookstore, located at 1500 McGill College Avenue, off Sainte-Catherine Street, carries a wide range of international newspapers, magazines and other publications, including street maps.

Tourist Information

All major hotels provide tourist information on points of interest in Montreal and vicinity, excursions, cultural and sporting events and other activities.

Tourisme Québec, located at the Centre Infotouriste at 1001 Square Dorchester (between Peel and Metcalfe Streets, one street south of Sainte-Catherine Street) offers tourist information for Montreal as well as for the entire province.

General Information (continued)

It can be reached at **514-873-2015** every day from 09:00 -17:00 or via its website: **http://www.tourisme.gouv.qc.ca.**

Transportation to Pierre Elliot Trudeau Airport (Dorval)

Special bus service from major downtown hotels is available from 05:00 - 23:00. Arrangements can be made and prices obtained through the hotel management.
