

ICAO AVIATION AND SUSTAINABLE ALTERNATIVE FUELS WORKSHOP

ICAO Headquarters, Montréal, Canada

18 to 20 October 2011

Saltwater tolerant biomass as source of
aviation fuel – a way forward for Abu Dhabi?

Linden Coppell, Head of Environmental Affairs Etihad Airways

Founding Member Sustainable Bioenergy Research Consortium

Member Sustainable Aviation Fuel Users Group

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Criteria for Source Material

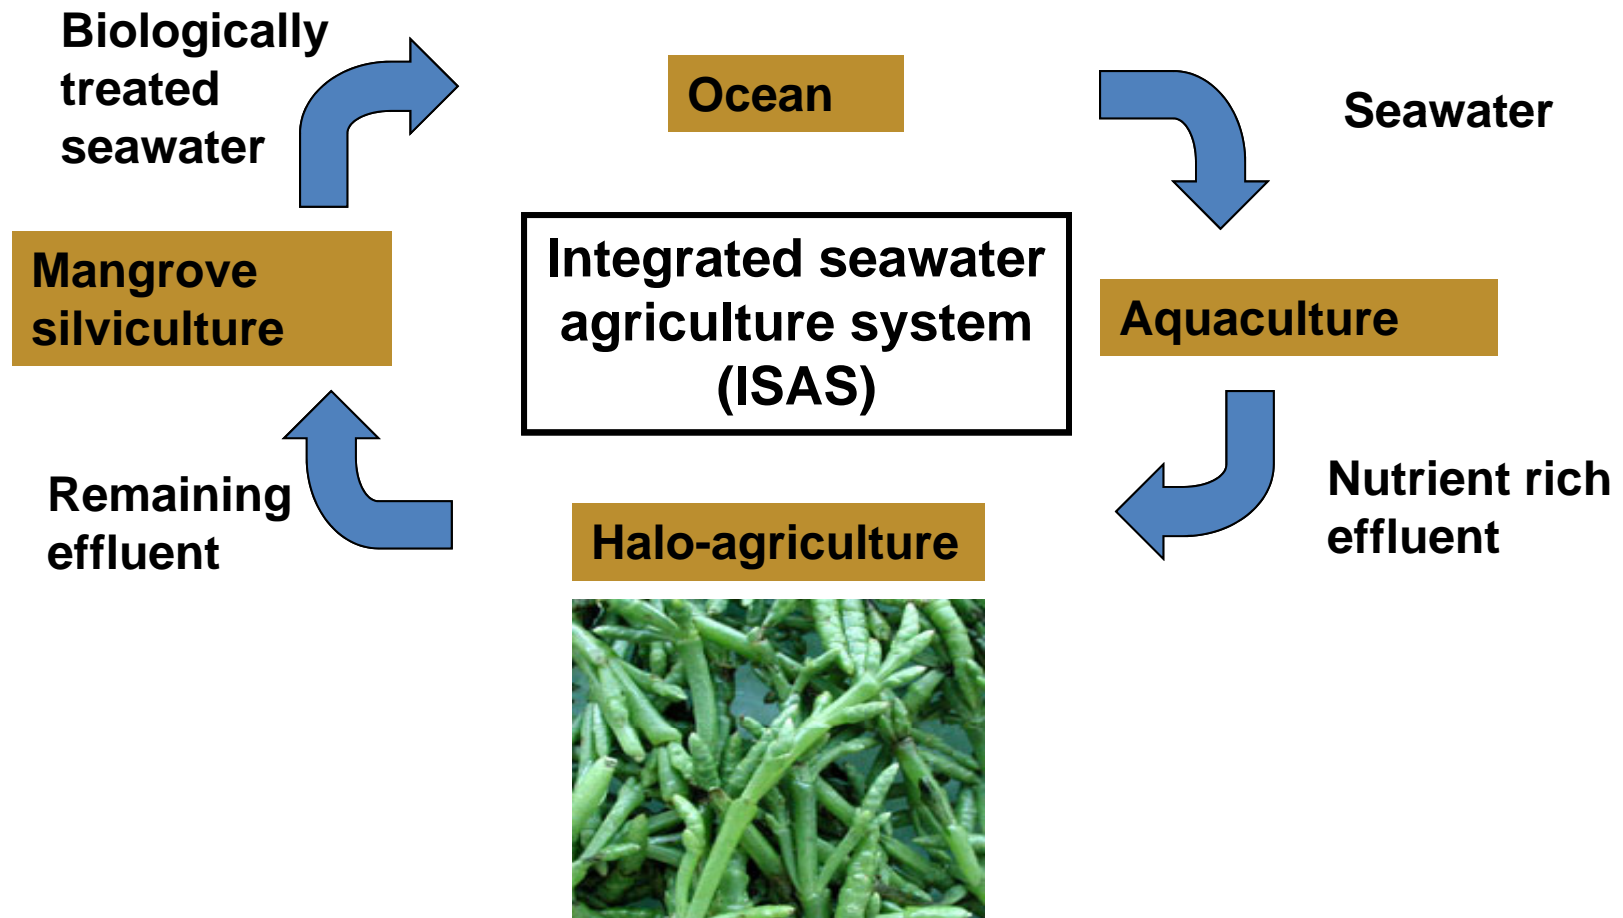

- Geographically suitable
 - No freshwater requirements
 - Tolerant of very high temperatures
 - Substantial land availability
- Sustainable
 - SAFUG principles / RSB criteria
 - Community benefits

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Integrated Seawater Agriculture System (ISAS)

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Global potential

There are approximately 50×10^6 hectares of potentially arable coastal desert around the globe.

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Sustainable Bioenergy Research Consortium

**Host
Institution**

Masdar Institute

**Industry
Launch
Partners**

**Physical
Infrastructure**

- Research Labs: Masdar Institute
- Pilot Plant Farm: **200 hectares** in Abu Dhabi, UAE

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Progress to date

- Early LCA study (Boeing funded)
 - Quantify inputs and outputs
 - Site management alternatives

Results indicated high potential for carbon storage and emissions reductions compared to fossil fuel

- Identification of challenges
 - Yields
 - Land requirements & ability to scale up
 - Hypersalinisation & eutrophication

ICAO AVIATION AND
SUSTAINABLE
ALTERNATIVE FUELS

WORKSHOP

Summary

- Significant potential for biofuels as part of integrated aquaculture system
- If this works in Abu Dhabi then can be used in many more coastal desert environments
- Net benefits through carbon soil sequestration
