SPECIAL ACCESS SYSTEMS

According to one definition “symposium” was the name for an ancient Greek drinking party – welcome to the “party.”

Is that why we have Special Access programs, i.e. are we in a hurry to get to the party?

Individual perspective – we see the world based on our perspective, i.e. security versus facilitation!

ПАСПОРТ
PASSPORT

E-PASSPORTS

IS IT FOR:

- Better control of people movement?
- Better security?
- Control costs?
- Accommodate special interests?
- Manpower costs?
- Simple Facilitation?

© Billie H. Vincent

Stop

What are the possible consequences of Special Access programs?

- Terrorist, Criminals, Refugees processed faster?
- Better control, i.e. security/safety?

© Billie H. Vincent

ENROLLMENT PROCESSES

- Background clearances?
- Simple data from the applicant?
- Are they standard/consistently applied internationally?
- Are they verifiable?
- Is this Garbage-in and Garbage-out?

© Billie H. Vincent

ENHANCED

IATA

EXAMPLE - IATA THREE-TUNNEL CONCEPT

- What's the tunnel selection based on?
- What's the integrity of that tunnel selection?
- Who makes those decisions?
- What are the reactions from neighboring countries?

© Billie H. Vincent

END RESULT?

- Removes human fallibilities?
- Dependent on enrollment data?
- Loss of direct human reaction?
- Value of biometrics?
- Indiscriminate?
- Everyone gets equal treatment?

© Billie H. Vincent

CONCLUSIONS

- Throughput is improved
- International Commerce is facilitated
- People impacted are pleased
- People versus system
- New vulnerability introduced
