

**Sean BORG**

**Chief, Technical Programs, Evaluation and Coordination  
Standards Branch, Civil Aviation Directorate,  
Transport Canada**

At Transport Canada, Mr. Sean Borg is responsible for supporting aviation safety regulatory program management. This includes facilitating program planning, design and development, and evaluation. As part of his mandate, Mr. Borg is responsible for establishing Transport Canada's aviation safety inspection policies and procedures, as well as cultivating a proactive safety culture within industry through promotion and education.

Mr. Borg and his team coordinate within aviation specialists in Standards Branch and regional offices, as well as various specialists across Transport Canada on the design and development of programs to facilitate national standardization. Internationally, they work in partnership with foreign civil aviation authorities and the International Civil Aviation Organization.

Mr. Borg is Canada's National Continuous Monitoring Coordinator under ICAO's Universal Safety Oversight Audit Programme, as well as the point person for ICAO Annex 19 – *Safety Management*, including the State safety programme. He previously served as senior advisor to the Director General, Civil Aviation for six years. His first full assignment with Transport Canada was as safety partnership officer, where he was responsible for motivating industry to voluntarily adopt safety management systems. He holds a Bachelor of Social Sciences from the University of Ottawa.
