

IATA's Priorities in the Region Related to the ICAO TRIP Strategy

Alejandro Restrepo

IATA Manager, Security & Facilitation, Americas

Antigua & Barbuda ICAO TRIP Regional Seminar

January 31 – Feb 2, 2017

IATA Priorities in the Region in relation to Border Controls

1. Aligned passenger data exchange programs
2. Effective & systematic screening of API data
3. Enhanced use of ePassports
4. Realization of Facilitation benefits for the traveler and the industry

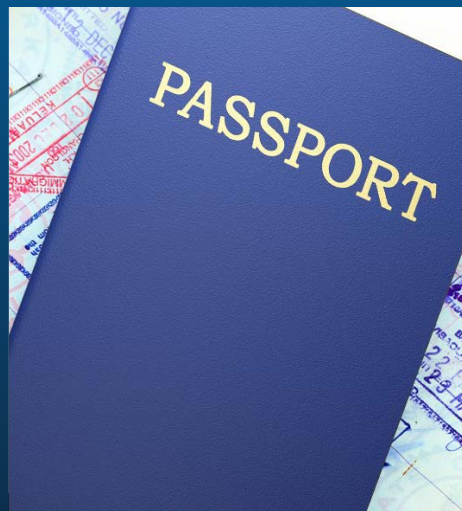

API – TRANSMISSION

Legacy (Batch) API

API-TRANSMISSION

Interactive API (iAPI)

PASSENGER NAME RECORD (PNR)

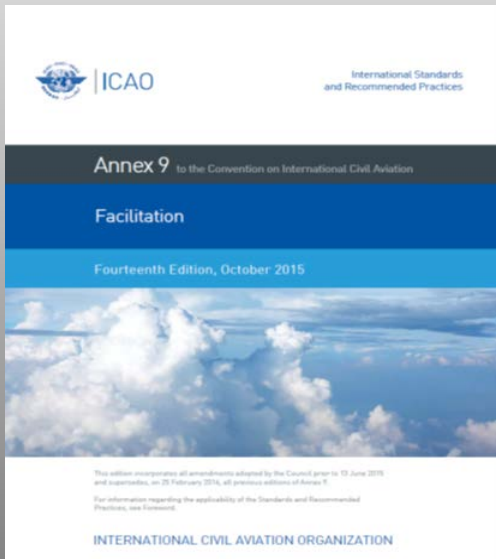

Information about a person's travel reservation.
It can be useful:

- For customs, law enforcement, security
- To help identify contraband, smuggling, etc
- To assist in risk assessment

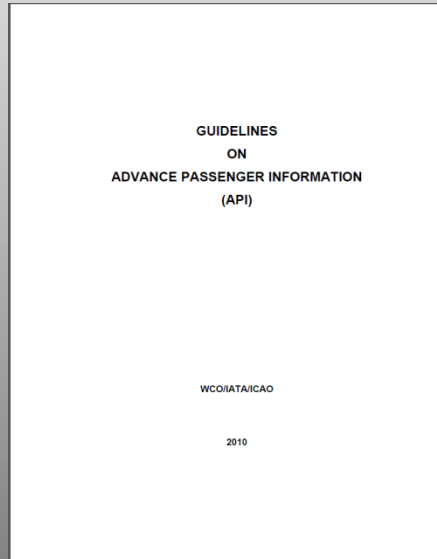

PRIVACY AND DATA PROTECTION

- PNR contains personal data
- Countries have different perspectives on how much is “private” or how much can be shared
- State to State agreement may be necessary
- Sensitive data should not be required

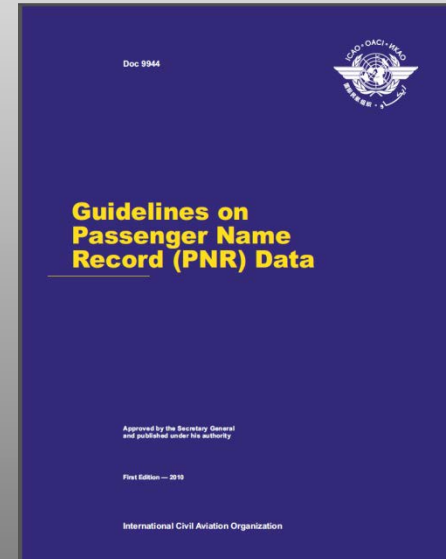

WHERE TO FIND THE LIST OF DATA ELEMENTS

Standards and Recommended Practices for API, iAPI and PNR

API and iAPI data elements are listed in the WCO-IATA-ICAO Guidelines on API

PNR data elements are listed in the ICAO Guidelines on PNR Data (Doc. 9944)

KEY PRINCIPLES

“ACE” stands for

- Alignment with standards
- Cooperation with industry and other States (data protection)
- Efficiency: necessary data only

SINGLE WINDOW

BENEFITS OF STANDARD TRANSMISSION

- ✓ Faster implementation
- ✓ Better compliance
- ✓ Cost control
- ✓ Reliable data
- ✓ Minimum impact on airport infrastructure

NATIONAL SECURITY BENEFITS

- ✓ Watch-list screening
- ✓ Integrated Border Management
- ✓ Single Window
- ✓ Automated Border Control
- ✓ International Cooperation
- ✓ Travel history and analysis

ICAO

SECURITY & FACILITATION

NO COUNTRY LEFT BEHIND

Thank you!
