ICAO PUBLIC KEY DIRECTORY (PKD)

Christiane DerMarkar
ICAO PKD Officer

ICAO PKD: one of the 3 interrelated pillars of Facilitation

Chapter 3: main SARPs related to the TRIP

Doc 9303 Part 12: PKI specs

Mean to enhance security in cross-border movement. Inspection Tool for ePassports verification, validation and authentication of the digital signatures and content of the chip

ANNEX 9: Recommended Practice 3.9.1, 3.9.2 and 3.35.5

The Standards and Recommended Practice of Annex 9 recommend the following:

3.9.1: “Contracting States issuing, or intending to issue eMRTDs should join the ICAO Public Key Directory (PKD) and upload their information to the PKD.”

3.9.2: “Contracting States implementing checks on eMRTDs at border controls should join the ICAO Public Key Directory (PKD) and use the information available from the PKD to validate eMRTDs at border controls.”

 *3.35.5: “Contracting States utilizing ABC systems should, pursuant to 3.9.2 and 3.10.1, use the information available from the PKD to validate eMRTDs....”*

WHAT is an eMRTD

Electronic Machine Readable Travel Document (**eMRTD**):
is a passport, card, Laissez Passer or other Travel Document that has a contactless integrated circuit embedded in it and the capability of being used for biometric identification of the MRTD holder in accordance with the standards specified in the relevant Part of Doc 9303 — Machine Readable Travel Documents.

Operational View

ePassport Issuance Issuing State

ePassport Inspection (Manual or Automated) Receiving State

Importance of being **compliant** with **Doc 9303 - Machine Readable Travel Document**

Inspector / Inspection System

- Verify digital signature of State
- Validate data integrity and authenticity (Photo, etc...)
- Physical inspection

ePassport Validation And PKD

- ❖ It allows Border Control authorities to confirm that the ePassport:
 - ❖ Was issued by the right authority
 - ❖ Has not been altered

The authentication of the ePassport increases the trust and confidence on the information in the physical document

ICAO

SECURITY & FACILITATION

What is the PKD and what is its role

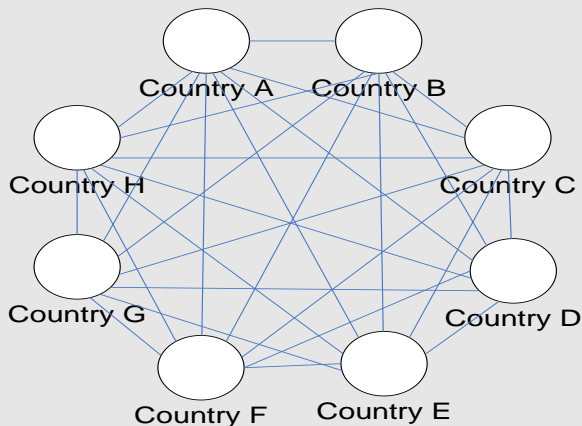

- ❖ A central Repository that simplify and facilitates the sharing of PKI certificates required to authenticate ePassport.
- ❖ Minimizing the volume of certificate exchange:
 - Document Signer Certificates (DSCs)
 - Certificate Revocation Lists (CRLs)
 - Country Signing Certificate Authority (CSCA) Master List
 - Deviation List
- ❖ Ensuring timely uploads

Central Broker

Distribution of Certificates and CRLs

via bilateral Exchange

via ICAO PKD

This example shows **8** States/non-States requiring **56** bilateral exchanges (left) or 2 exchanges with the PKD (right) to be up to date with DSCs and CRLs. In case of **191** ICAO States **36,290** bilateral exchanges would be necessary while there are still 2 exchanges with the PKD.

Why Join the PKD

Issuer Perspective:

Border authorities around the world can validate the ePassports that you issue.

ePassports that cannot be validated must essentially be considered and treated as a non-electronic travel document.

And you are not capitalizing and the investment made to implement ePassports

The ICAO PKD provides a means of distributing your information to other States that is efficient, reliable, and always accessible.

Border Authority Perspective:

performing ePassport validation (according to Doc 9303 7th Edition, Part 12) and accessing the information necessary to perform it, provides confidence that the travel document under inspection has been issued by the proper authorities and that the information recorded on the document has not been tampered with.

The ICAO PKD provides a means of accessing the necessary information published by other States in a cost efficient way that is always available.

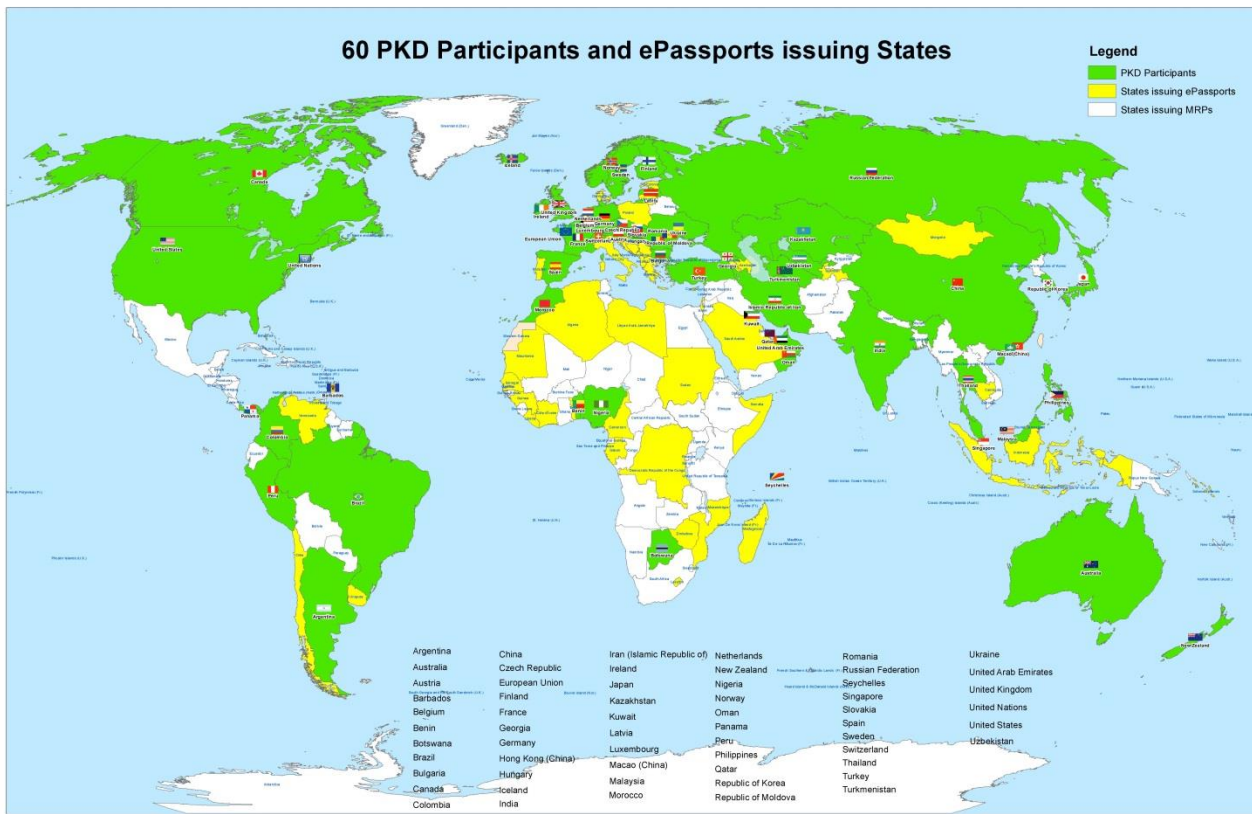

Traveler Perspective:

Validation through the ICAO PKD, confirms the authenticity and integrity of the data on the chip, and in turn facilitates the fast and secure cross-border movement of citizens by the “frontline” entities.

The ICAO PKD is the most efficient and reliable means of both providing and accessing the information required for ePassport validation.

It's not complicated : All you have to do is....

- Review national legislation:
 - Essential before introducing ePassport and joining the PKD
- Find out who is responsible:
 - Define roles and responsibilities of all those involved with the PKD (PKI, NPKD, etc...)
- Establish a budget line:
 - streamline the annual payment
- Address Technical Specifications:
 - ensure that the National PKD is technically compatible with the ICAO PKD
- Integrate the National PKD with the ICAO PKD:
 - This includes National PKDs uploading and downloading certificates (DSCs and MLs) and revocation lists to and from the ICAO PKD

ICAO

SECURITY & FACILITATION

Conclusion

- ICAO urges all ICAO Member States to **join and actively use the certificates** distributed by the ICAO PKD as a means to validate and authenticate ePassports at Border Controls.
