MADRID

CUERPO NACIONAL DE POLICÍA

Stop being issued by the Civil Governors, on behalf of the Police Chiefs

Until 1942 the Spanish passport was issued by the Government Authority, usually the Civil Governor, political authority in the provinces of Spain since 1833.

Since 1942, the Passport is authorized by the Police Chiefs of the different geographical areas.

**This way of organization in the past has defined the decentralized system of issuing passports today.**

UNIDADES DE DOCUMENTACIÓN

1988. Passport is computerized

Nowadays, there are 352 offices all over the country personalizing passports in situ.

# Decentralized system

1. Blank passports are printed in the National Currency and Stamp Factory. Spanish Public Entity attached to the Ministry of Finance and Public Administration with headquarters in Madrid.

**Real Casa de la Moneda**  
Fabrica Nacional  
de Moneda y Timbre

2. These blank passports are sent to each issuing office in transport guarded by members of the National Police Force

3. Each batch of blank documents is assigned to a specific public servant, responsible for its custody and personalization, and can not be used by another official.

#### 4. Accesses to the system is granted:

- ✓ From a secure Intranet
- ✓ With professional card, (Chip Card which includes electronic certification of authentication and signature)
- ✓ Controlled access according to the level previously assigned.

5. Each action performed on the system may be audited by the Identity Documents Division as Central Unit.
6. To apply for a passport, the citizen must have an Identity Card first, and both documents will be linked together.

Each passport is **issued and delivered only to its holder**, after the biometric scanner compares his/her fingerprints with those present in the database of the National Identity Document.

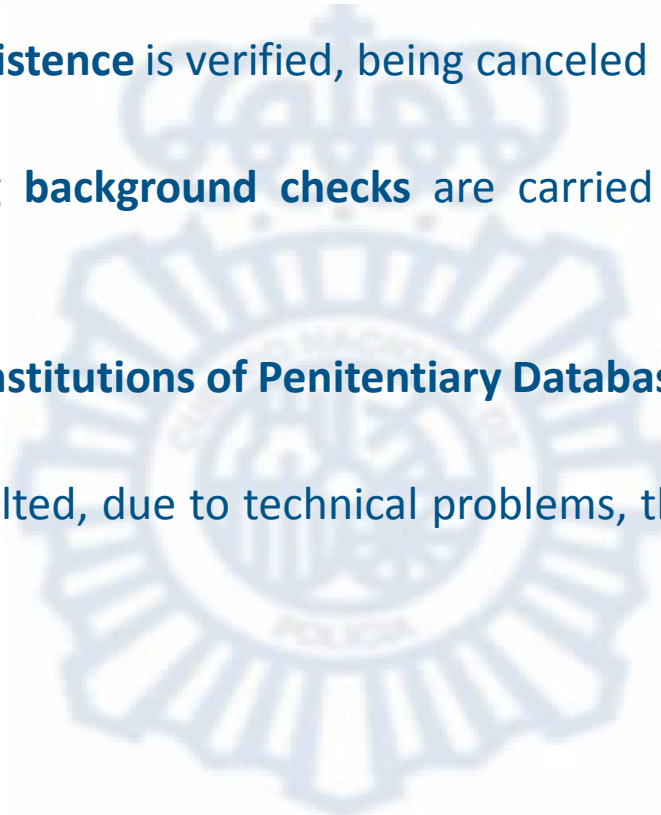

**Previous passport existence** is verified, being canceled in case of a positive.

Prior to the printing **background checks** are carried out, verifying any serving prison sentences.

**Judicial, Police and Institutions of Penitentiary Databases are consulted.**

If it can not be consulted, due to technical problems, the issuance of the passport will be interrupted.

## Advantages of the decentralized system

- ✓ **Passport issuance in a single administrative act. The citizen only has to attend once to the issuing office.**
- ✓ **Issuing for urgency reasons can be performed**
- ✓ **In situ detection of printing errors.**
- ✓ **No possibility of loss of personalized passports during transportation.**
- ✓ **Guarantee that the document is requested and delivered only to its holder.**

| ICAO

SECURITY & FACILITATION

NO COUNTRY LEFT BEHIND

## Disadvantages

The only disadvantage is the increase of the shipping cost due to the installation of printers in each issuing office.
