Population Register, strategic role for the state

2013

WHAT IS IPRS?

- IPRS means the Integrated Population Registration System
- it comprises of a Centralized Electronic Population Database (The National Population Register – NPR) containing information of registered citizens and registered foreign nationals residing in country
- it also comprises of a Unique Personal Identifier (PIN) as a key link

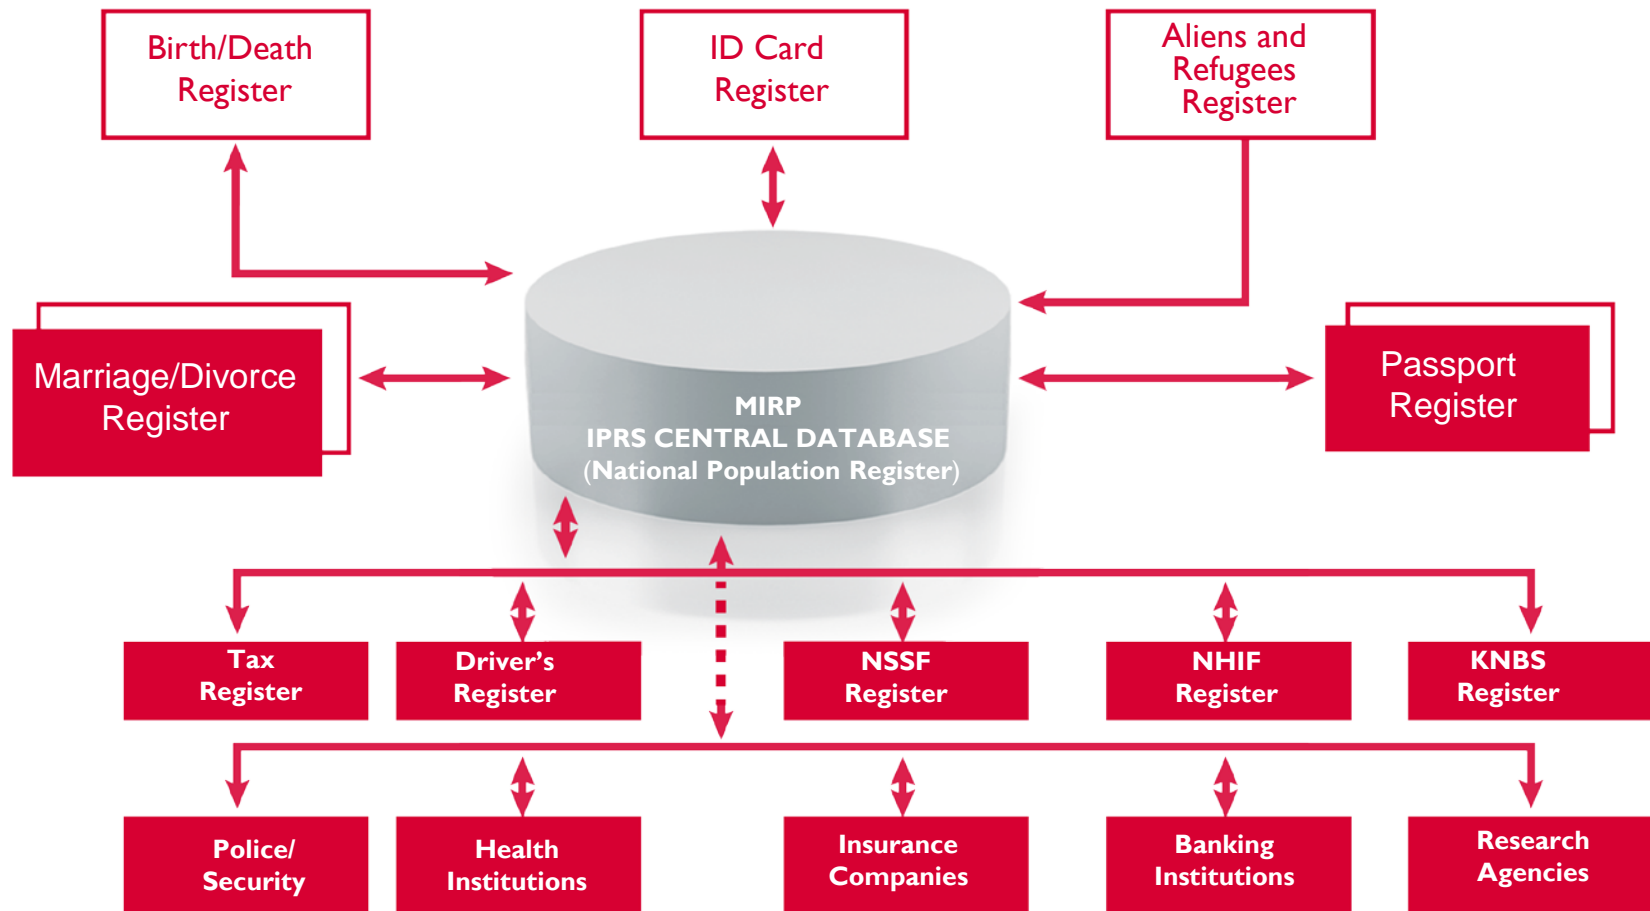

ITS MAIN OBJECTIVE?

- to establish and maintain a National Population Register (NPR) with information of all citizens and registered foreigners resident in the country

ITS MAIN PURPOSE?

- the purpose is to have a comprehensive population database as a single point of truth of information regarding all individuals resident

IPRS scheme – operates in Kenya

Biometric verification service – development of IPRS

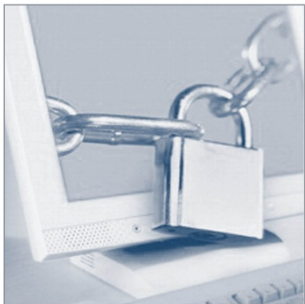

In view of the practical usage of IPRS, the facility enabling the verification of physical person was developed.

Security of:

- various financial transactions
- conclusion of contracts with banks+security of crediting and payments
- conclusion of contracts with mobile operators + security of payments

This tool considerably enhances the security of physical person in said operations and increases the significance of IPRS for the whole population.

Biometric verification service – development of IPRS

**Money invested in the IPRS by the State
are used for the NEEDS OF THE WHOLE
POPULATION**

Fingerprint verification is one of the most reliable personal identification methods.

The biometric verification solution will make the verification process faster and more secure giving the additional value to the IPRS's clients.

Each participant of the process wins

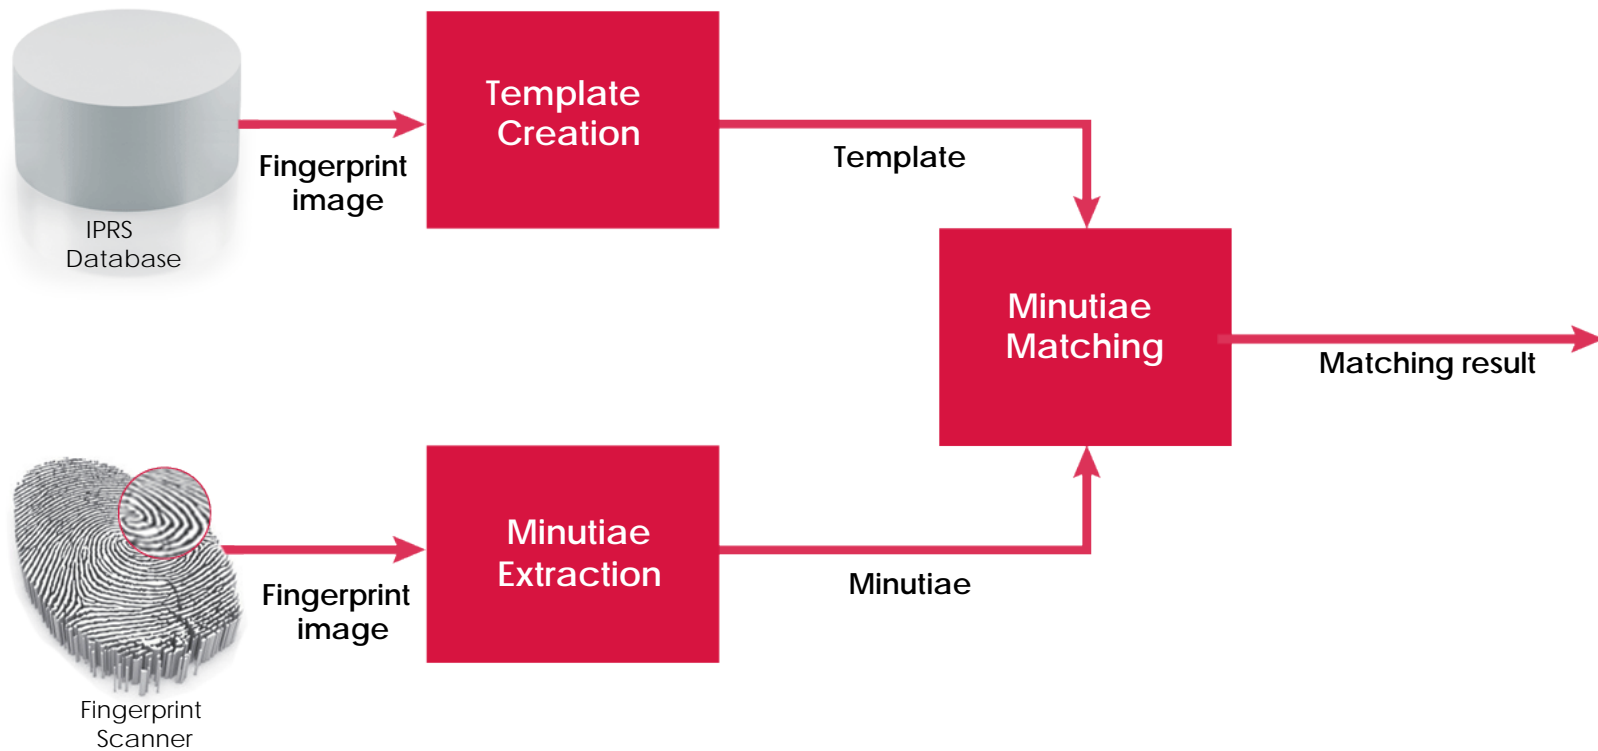

- Every citizen – convenience, reliability, security
- State – consolidation of the role of legal ensuring guarantor of operations provision correctness, enhancement of governing function
- Clients – security and reliability of operations performance, especially in credits provision, medical insurance aiding, determination of documents' ownership to a certain physical person
