World's First 2 in 1 Desktop Laser Marker

Solution Key Characteristics

- Secure & Efficient
- Cost Effective
- Highly Scalable
- Minimum/No Consumables
- High Availability

Intelligent Desktop Laser Marker

DLP400

World's first cards and passports laser engraver

LASER ENGRAVING SOLUTION FOR HIGH SECURE CREDENTIALS

- *Hybrid Readers to support contact & contactless cards personalization*
- *Class 1 laser products*
- *Vision System for auto calibration*
- *No consumables needed*

Key Features

Ensures world class card security.

Complies with industry-standard interfaces world-wide.

Modular components to minimize routine maintenance.

Small footprint for convenience and easy portability.

Simple touch screen commands enables consistent and ease of operation.

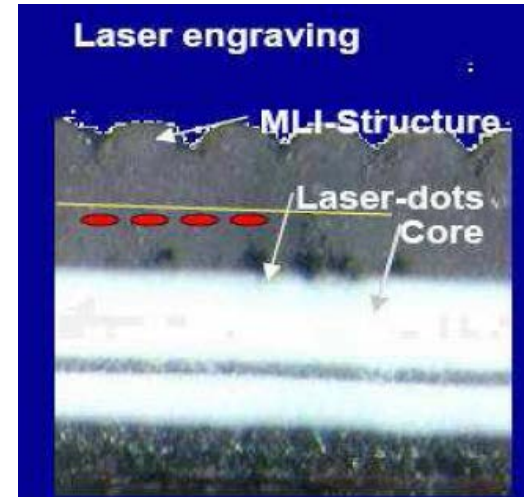

Compact design brings production engraving to office convenience.

Laser Marker: What is it?

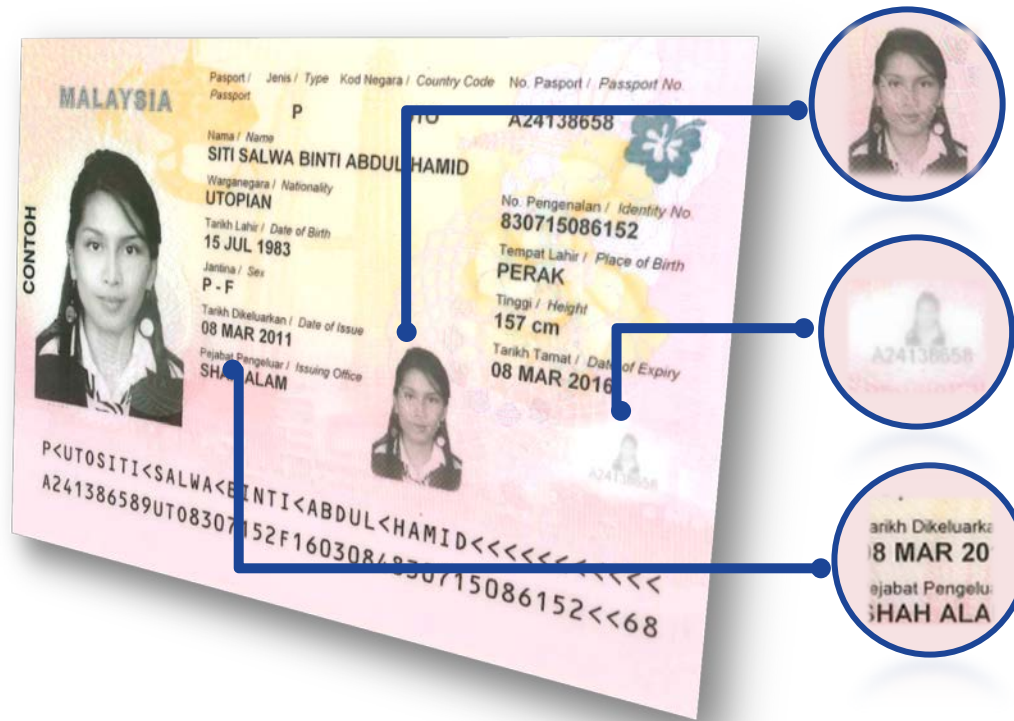

Laser marking is a **highly secure technology** used to flexibly create a durable, direct product marking that is forgery-proof and resistant to wear and corrosion.

In laser marking, laser permeates from the inner core of card's surface causes the card material to **carbonize**, creating characters and images.

It offers additional **highly secure personalization features** such as CLI (vertical tilted), MLI (horizontal tilted), tactile elements, and engraving through transparent holograms – for identification and financial cards.

Security Features

Sub-surface Image

Engraving ghost image below the top surface, delivers maximum durability.

Sub-surface Image

Engraving ghost image below the top surface, delivers maximum durability.

Tactile Surface Relief

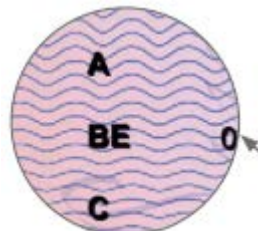

Embossed lettering provides evidence of authenticity with a touch of finger.

Personal data - laser engraved

Micro text

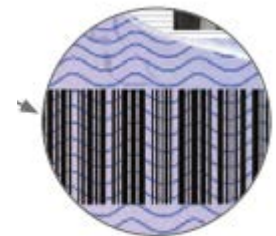

Tactile laser effect

MLI with laser engraved image

CLI

Laser engraved Barcode

Laser Marking: Why?

- Generate own Level 1 security with MLI/CLI, tactility
- Alteration is nearly impossible without destroying the cards

Enabling Security

Eco Friendly

- Extremely low energy consumption

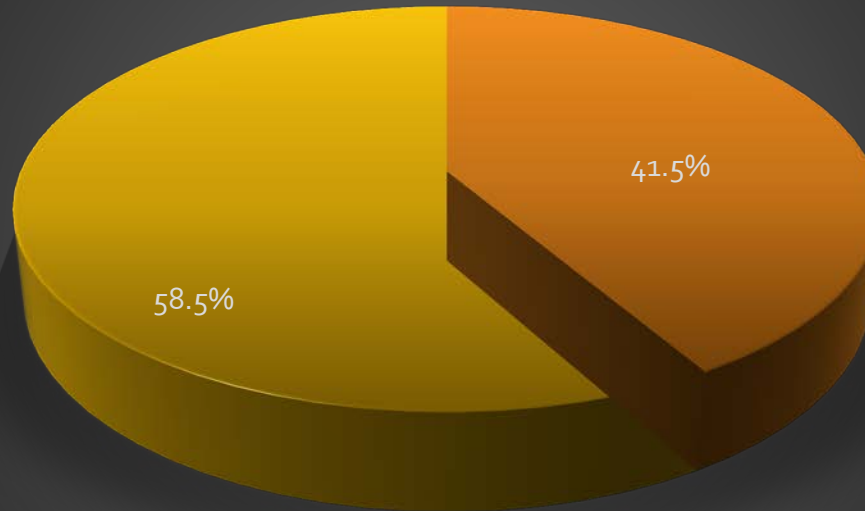

- No consumables
- Short cycle times, quick job setup
- Minimum maintenance

Optimized Cost

High Quality

- High resolution images
- Durable & resistance to chemicals
- Withstand physical contact

Global Datapage Market Share (2013)

■ Datapage Volume
 ■ Non-Polycarb Volume

| <i>PolyCarb Datapage Volume 41.5%</i> | <i>Non-Polycarb Volume 58.5%</i> | <i>Worldwide Passport Issued</i> |
|--|---|---|
| 203,146,000 | 286,376,300 | 489,522,300 |
