

INTERNATIONAL CIVIL AVIATION ORGANIZATION

A United Nations Specialized Agency

Workshop on Air Navigation Deficiencies Management

Exercise instructions

Instructions- Revised methodology for identification, assessment and reporting of Air Navigation Deficiencies

- The group will be divided into teams based on the total number.
- Each member of each team will be provided with a list of their State's valid deficiencies or each member may access the GANDD for this information
- Teams, on the forms provided for Revised methodology for identification, assessment and reporting of Air Navigation Deficiencies shall :
 - complete the format for two deficiencies;
 - discuss the potential hazards and solutions based on the situation in each State;
 - Determine the safety risk assessment for the deficiencies; and
 - Identify and justify any differences with the original deficiency reported on the GANDD.

Instructions- Revised methodology for identification, assessment and reporting of Air Navigation Deficiencies

- The deficiencies to analyse may be any of the ANS areas: AGA, AIM, ATN, CNS or MET.
- Generic names and State identification may be omitted
- Teams must select one or more members to present their forms to the remainder of the group on the screen.
- This presentation may be in MS Word or MS Power Point
