# Considerations for SARPs Implementation and Improvement of the State's Safety Oversight System

Mayda Ávila

*CNS Regional Officer  
ICAO NACC Office*

ICAO NACC Regional Office /13 – 15 November 2018

ICAO

SAFETY

# Agenda

- ✈ ICAO STRATEGIC OBJECTIVES
- ✈ STATE MASTER PLAN
- ✈ STATE MECHANISM TO COMPLY WITH ICAO SARPs
- ✈ Implementation & Monitoring
- ✈ State ICAO SARPs Implementation Processes
- ✈ STATE SYSTEM AND FUNCTIONS
- ✈ MONITORING PRINCIPLES
- ✈ PERIODIC REVIEW OF ICAO SARPS COMPLIANCE
- ✈ DATA ANALYSIS

ICAO

SAFETY

# ICAO STRATEGIC OBJECTIVES

- A. Safety: Enhance global civil aviation safety.
- B. Air Navigation Capacity and Efficiency: Increase the capacity and improve the efficiency of the global civil aviation system.
- C. Security & Facilitation: Enhance global civil aviation security and facilitation.
- D. Economic Development of Air Transport: Foster the development of a sound and economically-viable civil aviation system.
- E. Environmental Protection: Minimize the adverse environmental effects of civil aviation activities.

# STATE MASTER PLAN

- ✈ List of existing aviation activities carried out in the State;
- ✈ List of planned activities in short-term;
- ✈ List of planned activities in mid-/long-term (up to 10 years, if possible);
- ✈ Existing aviation infrastructure;
- ✈ Existing aviation service providers;
- ✈ Planned changes in aviation infrastructure;
- ✈ Planned changes in the aviation market;
- ✈ Institutional system of the State;
- ✈ Expected changes affecting the institutional system of the State;
- ✈ State's aviation strategies;
- ✈ State's aviation development plans; and
- ✈ State's performance targets (safety, security, environment, state's objectives, etc.)

# STATE MECHANISM TO COMPLY WITH ICAO SARPs

## Assessment & Planning

## Implementation & Monitoring

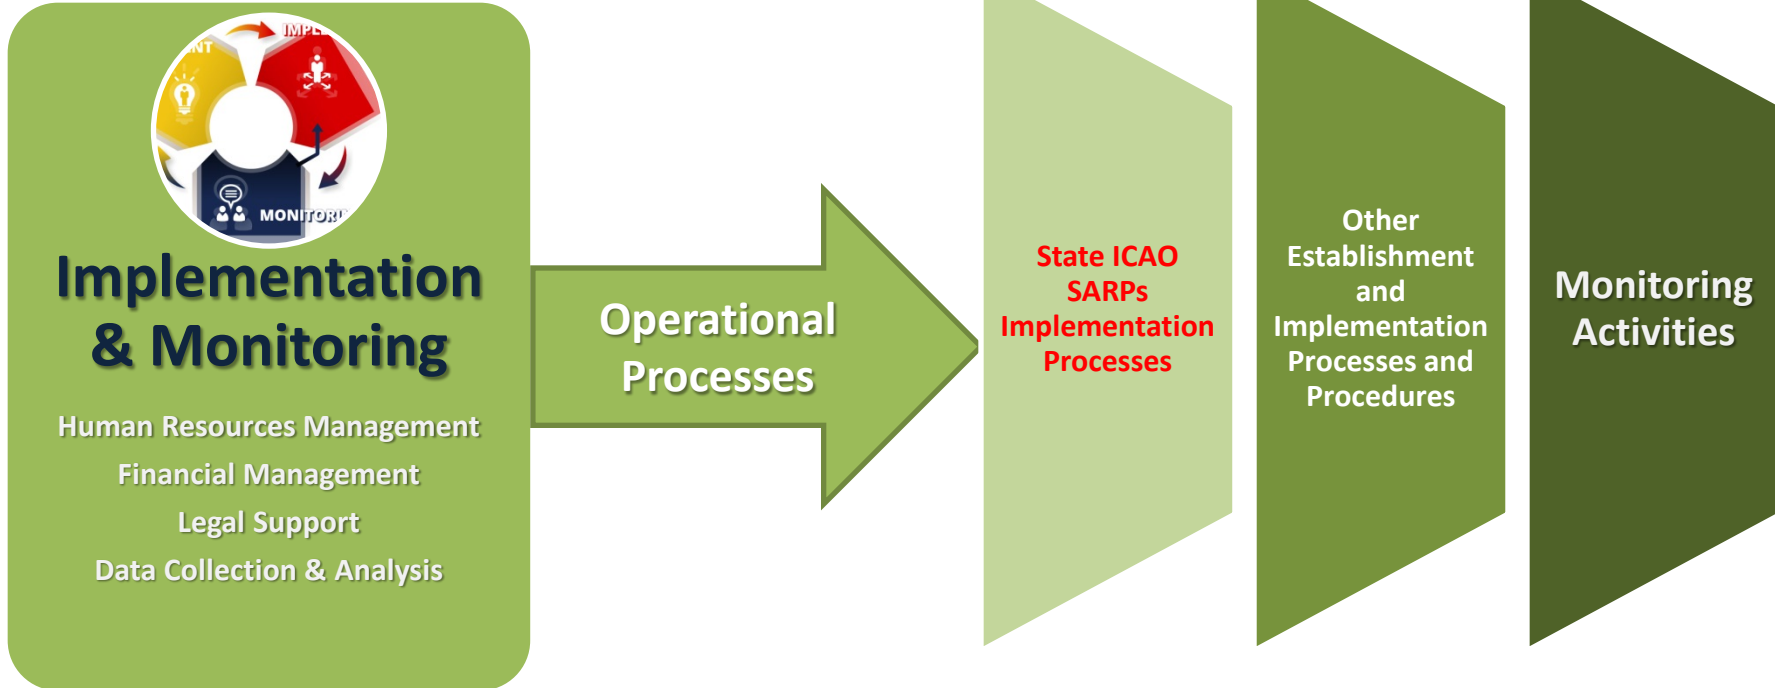

Human Resources Management  
Financial Management  
Legal Support  
Data Collection & Analysis

## Evaluation & Adjustment

# Implementation & Monitoring

ICAO

SAFETY

# State ICAO SARPs Implementation Processes

- ✈ Rule-making process
- ✈ Process for determining the needs to amend specific operating regulations and primary legislation (if necessary)
- ✈ Procedures for identifying and notifying differences to ICAO (**AIP GEN 1-7 publication**)
- ✈ Enforcement policy and associated procedures
- ✈ Procedures to ensure that all areas related to safety oversight or aircraft accident and incident investigation are covered and that there is no overlap of different authority's responsibilities
- ✈ Mechanism to ensure sufficient personnel to meet national and international obligations
- ✈ Mechanism to avoid perceived or potential conflict of interest of inspectorate staff
- ✈ Human resources development and training process
- ✈ Mechanism to ensure sufficient financial resources to meet national and international obligations

# STATE SYSTEM AND FUNCTIONS

- ✈ Establishing a State civil aviation system
- ✈ Staffing requirements
- ✈ Delegation of safety-security oversight functions and activities
- ✈ Establishment of service providers

## CE3 State System & Functions

“El establecimiento de autoridades o agencias gubernamentales relevantes, según sea el caso, apoyadas por personal suficiente y calificado y con adecuados recursos financieros para la gestión de la seguridad operacional y la seguridad de la aviación. Las autoridades del Estado o las agencias deberían haber iniciado funciones y objetivos para satisfacer sus responsabilidades de gestión.”

# Number of Personnel

- ✈ States shall be provided with a sufficient number of qualified and experienced technical and administrative staff. The necessary and adequate number of personnel depends on elements, such as:
  - ✈ number of assigned tasks;
  - ✈ average turnover rate; the level of aviation activities
  - ✈ completion rate of assigned tasks;
  - ✈ current vacancies;
  - ✈ monthly overtime.
- ✈ Each safety oversight entity/investigation authority shall have an active role in the selection and recruitment process of inspectorate staff and other technical personnel.

# Technical Personnel

An effective training system comprises:

Technical personnel are required to have appropriate knowledge, experience and skills to perform safety oversight functions.

## BUILDING A TRAINING PROGRAM

### A training policy

for each safety oversight/investigation entity, indicating a commitment from the management to provide initial, recurrent and specialized training to all technical personnel.

CBT – Implementation Process

### Comprehensive training programmes

defining the details for initial, on-the-job training (OJT), recurrent and specialized training. Training programmes are not specifically linked to one individual but to a job position.

Transform your "set-up" training plan into an ongoing coaching & training plan

-  Define periodic enhanced trainings for the team (e.g. monthly, quarterly, etc.)
-  Encourage your team to come up with new training topics
-  Define periodic coaching sessions to review "real life" experiences (e.g. word of call off the week/ Turnback demo)

### Periodic training plans

established on the basis of the training programmes and implemented for each technical personnel.

### Record keeping

# Financial Management

## ✈ Financial plan:

The purpose of the financing plan is to provide, inter alia, the following basic information:

- ✈ estimate of the cost elements (labour, materials, equipment, etc.)
- ✈ the currencies in which payments are to be made
- ✈ the funds required to make disbursements at various deadlines, including investment costs (premises, equipment, etc.) and payments on debt obligations
- ✈ the sources of funds selected, including information on the applicable conditions (interest rates, repayment period, etc.).

# Identification of Stakeholders

✈ **Stakeholders:** anyone whose actions can affect an organization or is affected by the organization's actions

# MONITORING PRINCIPLES

## Why to monitor?

- ✈ It is important to observe a process or activity to check that it is carried out fairly or correctly, especially in an official capacity.
- ✈ The advantage of monitoring and evaluating is to ensure that the organization is following the direction established during strategic planning.

ICAO

SAFETY

# Responsibilities of Monitoring Activities

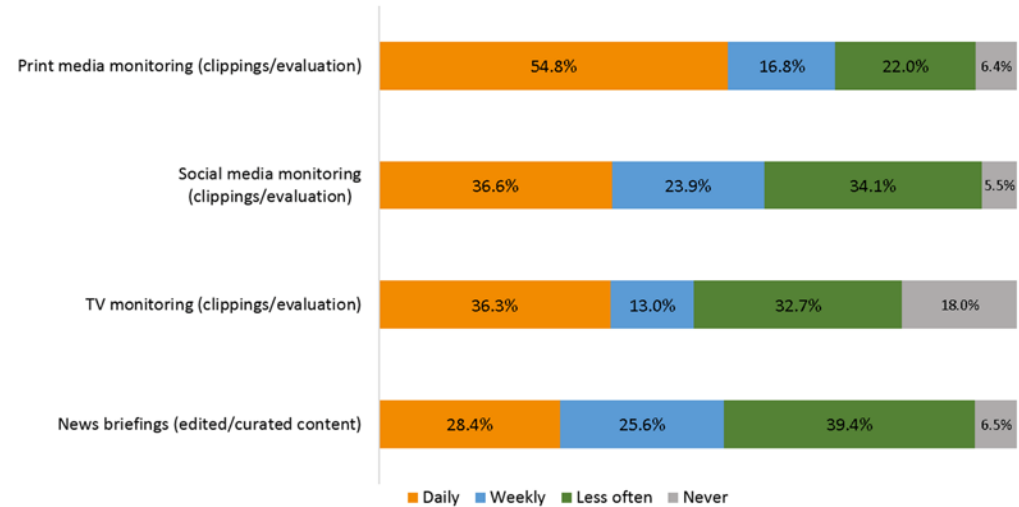

- ✈ Specify **who** is responsible for the overall implementation of the plan.
- ✈ **Who** is responsible for achieving each goal and objective?

# Frequency of Monitoring

The frequency of reviews depends on the nature of the organization and the environment in which it's operating.

*Frequency of monitoring reports and news briefings*

ICAO

SAFETY

# PERIODIC REVIEW OF ICAO SARPS COMPLIANCE

# Risk Assessment in Safety

| Frequency of Occurrence (or Likelihood) | Consequences (Severity of Accident) |           |             |           |                  |
|---|-------------------------------------|-----------|-------------|-----------|------------------|
|   | Incidental (1)                      | Minor (2) | Serious (3) | Major (4) | Catastrophic (5) |
| Frequent (5)                            | M                                   | H         | VH          | VH        | VH               |
| Occasional (4)                          | M                                   | M         | H           | VH        | VH               |
| Seldom (3)                              | L                                   | M         | H           | H         | VH               |
| Remote (2)                              | L                                   | L         | M           | H         | H                |
| Unlikely (1)                            | L                                   | L         | M           | M         | H                |

# Benefits of Risk Management

- ✈ Provides a systematic approach to examine the key components of risk and produce a risk assessment;
- ✈ Informs the effective allocation of limited resources;
- ✈ Provides basis for prioritizing mitigation strategy alternatives;  
Assesses your safety-security environment focusing on keeping vulnerabilities at an acceptable level; Establishes a common frame of reference for analysing aviation security, communicating issues, and determining priorities;
- ✈ Provides the basis for compliance with Annexes.

# General Approach

## REASERCH & ANALYSIS
