

## RELACIÓN DE FPL PARA EJERCICIO DEL DÍA 23

Nota:

Para el ejercicio se recolectaron un total de 127 FPL los cuales una vez enviados al sistema los enviara como CPL hacia el simulador de KINGSTON con un intervalo de 5 minutos o 40 millas separación acordada en las LOA.

Estos CPL se enviarán por todos los puntos de coordinación, es muy importante coordinar la hora de comienzo del ejercicio por que la Habana debe comenzar unos 30 minutos antes para los ajustes del sistema.

Todos los FPL son transmitidos en el mes de octubre y se les modifico el EOBT, el EET/MUFH y la identificación por la establecida para las pruebas en el documento NAM-ICD para cumplir con los objetivos del ejercicio el cual si planificamos bien la arrancada debe durar entre 50 minutos y una hora.

El día de las pruebas de interconexión para comprobar la efectividad de las mismas utilizaremos el transito real de ese momento solo queda precisar la hora de comienzo de las mismas y el tiempo de duración planificada.

También quiero aclarar que durante las pruebas se recibirán en el simulador de KINGSTON los CPL de vuelos reales que están operando en este momento y que pueden enriquecer la calidad de los ejercicios.

Si desean alguna aclaración o adicionar alguna otra situación me lo hacen saber por correo lo más rápido posible.

Victor Manuel Machado Sánchez  
Especialista de Transito Aéreo  
CCTA Habana.

## RELACIÓN DE FPL PARA EJERCICIO DEL DÍA 23

### A. Planes de vuelo que se coordinaran por la posición FUNKO y ATUVI Procedentes del sector occidental.
