6.129 Has investigation authority established and implemented a system for the maintenance of training records for its technical personnel, including records on the OJT received?

6.129 Has investigation authority established and implemented a **system** for the **maintenance** of **training records** for its technical personnel, including records on the OJT received?

Key elements:

1. System
2. Maintenance
3. Training records
4. OJT received

6.129 Has investigation authority established and implemented a **system** for the **maintenance** of **training records** for its technical personnel, including records on the OJT received?

System:

- **System:** a set of principles or procedures according to which something is done; an organized framework or method
- Includes written instruction, procedure and/or requirement for the establishment and maintenance of training records

6.129 Has investigation authority established and implemented a **system** for the **maintenance** of **training records** for its technical personnel, including records on the OJT received?

Maintenance:

- Training records being systematically retained
- Easily accessible
- Numbered pages + index

6.129 Has investigation authority established and implemented a system for the maintenance of training records for its technical personnel, including records on the OJT received?

Training records:

- Not only certificates of attendance but also information on the course content
- OJT:
 - details on the training activities performed and their outcome
 - Shall reflect observation, performance of tasks under supervision and final
 - assessments

4.3 INVESTIGATOR TRAINING

DOC 9962

4.3.4 The IDP contains the basic requirements of knowledge, skills and abilities that each person either must possess when hired, or must gain through a structured Training Plan. The IDP also provides a tool to manage and plan each person's training, including a means to project an annual training budget. Further, the IDP can be used to document the necessary steps to be taken for a person to be promoted to higher levels of responsibility, such as from the position of Operations Investigator to Investigator-in-charge. The completed IDP for each person becomes his or her training record, and it is filed along with supporting materials such as certificates and other records of training and experience.

Training Guidelines for Aircraft Accident Investigators

CIR 298

The circular discusses the experience and employment background required for training as an aircraft accident investigator. It also outlines the progressive training that is considered necessary to qualify a person for the various investigation roles, including appointment as the investigator-in-charge of an investigation into a major accident involving a large transport category aircraft. ICAO acknowledges that training guidelines are evolutionary in nature and may need to be updated periodically

3.4.2 Training of technical personnel

DOC 9734
(PART A, C3)

3.4.2.7 Technical personnel should satisfactorily complete OJT before being assigned to **investigation**-related tasks and responsibilities. OJT should be provided by experienced, senior technical staff in the subject area or task, and should follow a structured process, such as observing, working under supervision, competence assessment and authorization, etc. It is important to ensure that staff are only authorized to perform tasks after having been assessed as qualified.

The completion of the OJT, including the competency assessment, should be properly documented.

3.4.2 Training of technical personnel

DOC 9734
(PART A, C3)

3.4.2.10 The State authorities should establish and implement a system for the maintenance of training records for their technical personnel. This includes records of the OJT received, reflecting the various phases of the OJT completed (i.e. observation, performance of tasks under supervision and final assessments) as well as the assessment of competence of the personnel.
