# Updates on the CASE-II Project Activities for ECAC

## CASE II Project

18 May 2022

AFI-SECFAL Steering Committee

# CASE II Project: overview

- ECAC implemented and EU funded project

- Geographical scope:
  Africa, the Middle East and Asia

- Objective:

  "*To enhance the capacity of civil aviation security regimes in Partner States*"

- Methods:
  - Provision of expertise from ECAC Member States and across the Projects target regions.
  - In-country activities – Workshops - E-learning
  - Activity provision is cost-free to Partner State

# CASE II Project in Africa: introduction

- Desire to continue valuable CASE I contribution to the region

- Relationship with regional organisations such as AFCAC has been invaluable.

- Challenges:
  - COVID-19/travel restrictions
  - Delivery language

# Bilateral Activities

Bilateral activities: in-country and remote training and seminars, including:

- Counter MANPADS

- Best Practices for National Auditors

- Best Practices in Insider Risk Training of Landside Security Assessors

- Covert and Overt Testing

- Security Equipment Inspection

# Multilateral activities

Multilateral workshops on

- Cyber Security

- Insider Risk

- Security Culture

All virtual so far (difficult because of COVID)

Hope for in-person events soon, in the context of broader ECAC-AFCAC cooperation

# Languages and Instructors

- English, French, Portuguese available

- Greater use of instructors from within Africa

- Future opportunity for African expert to be seconded to the project

# CASE II Project: Priorities for the remainder 2022

- Acceleration of activity delivery as a result of:
  - Project momentum
  - Expansion of Project Team experts
  - Take advantage of Reduced travel restrictions
- Expansion of available activities
- Continued engagement with AFCAC and Partner States within the AFCAC region vital to continued success

- Information Paper to ICAO 41$^{st}$ Assembly: lessons learned from delivery of project in COVID circumstances.
- What does it tell us about project delivery in "normal times"?
