

**Tenth Meeting of the APIRG Air Traffic Services, Aeronautical
Information Services and Search and Rescue Sub-Group**
[Dakar, Senegal 12 – 15 May 2009]

**Agenda Item 8: Review of the ATS route network, including updating of the AFI ANP Table ATS1
(ICAO Doc 7474)**

Users Air Route Requirements Catalogue
(Presented by the International Air Transport Association)

SUMMARY

This paper presents to the ATS/AIS/SAR Sub-Group a catalogue of new users requirements for air routes in the AFI Region, and appeals to States and Air Navigation Service Providers for a swift implementation of those routes or portions thereof that they consider feasible, by taking advantage of a regional implementation coordination group such as the Tactical Action Group established by ICAO SP AFI RAN 08.

1. Introduction

- 1.1. **Appendix A** to this paper provides a catalogue of new user requirements for air routes as compiled by IATA in coordination with its member airlines operating in the AFI Region. These requirements are part of the Air Traffic Management (ATM) “*Quick Hits*” in battling the crisis facing the aviation industry.

2. Discussion

- 2.1. A swift implementation of these new identified air routes is expected to generate significant savings to AFI airspace users. To this effect, it is proposed a fast-track procedure whereby States and Air Navigation Service Providers proceed towards the implementation activities for the agreed routes, whilst ICAO processes the necessary amendments to the Air Navigation Plan, Table ATS1.
- 2.2. Considering successful implementation of RNAV routes UM114 (2005), UM731 and UM998 (2006), UM214 and UM215 (2007), and of RVSM operations (2008), the meeting may wish to agree that the Tactical Action Group (TAG) established by the ICAO Special AFI RAN 08 is the most suitable forum to efficiently coordinate air route implementation, and accordingly ensure that this task is properly reflected in TAG’s terms of reference.
- 2.3. The requirements developed by the ATS route network users, represented by IATA, could serve as a basis in order to facilitate the Working Group to deliver on its terms of reference with regard to a comprehensive ATS route network development.

3. Action by the meeting

- 3.1. The meeting is invited to:
- a) Review and update as necessary the information provided in the route catalogue shown in **Appendix A**;
 - b) Recommend that States and Air Navigation Service Providers proceed towards implementation of air route requirements in **Appendix A**, which they consider feasible, through the Tactical Action Group established by ICAO SP AFI RAN 08;
 - c) Accordingly request ICAO to initiate the corresponding ANP Table ATS1 amendment process; and
 - d) Agree that the requirements developed by the network users, represented by IATA, should serve as a basis in order to facilitate the Working Group to deliver on its terms of reference with regard to a comprehensive ATS route network development.
